ATORN Combination wrench (DIN 3113)

Jaw angle 15°, box-end side angled 15°

Ident. No. 013

Execution:
- With completely new special surface
- Maximum resistance against contact corrosion
- 15x greater corrosion protection against exposure to temperature, road salt and environmental influences compared to conventionally coated keys
- Up to 720 hours in the salt spray test in accordance with DIN EN ISO 9227
- Environmentally friendly chromium-VI-free coating process
- Made from chromium-vanadium steel, die-forged and hardened.
- DIN 3113 A

Advantage:
- Extremely durable and robust industrial design

Technical data:
- Tip profile type: ENERGY profile
- Jaw position: 15 Degree
- Surface: Special coating according to specifications
- Material: Chrome-vanadium steel

straight version

Execution:
- Finely toothed ratchet on socket end with 72 teeth
- 5° return angle

Advantage:
- 5° switching angle enables working in the most confined spaces

Technical data:
- Surface: Chrome plated
- Material: Chrome-vanadium steel

ATORN Ratchet combination wrench
ratchet function on both sides

Head detail

Application:
For screw connections in inaccessible places with optimum flexibility.

Execution:
- Finely toothed ratchet on socket end with 72 teeth
- Ratchet function on jaw side via spring-loaded insert and special jaw geometry

Advantage:
- Small ratcheting angle thanks to the fine toothing
- Maximum flexibility thanks to the two-sided ratchet function

Technical data:
- Surface: Chrome plated
- Material: Chrome-vanadium steel

Wera Combination ratchet wrench set JOKER

Execution:
- Made from chrome-molybdenum steel
- Nickel/chrome coating
- Ratchet mechanism on the ring side
- Finely serrated ring ratchet with 80 teeth
- Jaw side with clamping function and bi-hexagonal shape
- Jaw return angle of 30°

Advantage:
- Excellent rigidity and torque transfer thanks to cutting geometry
- Bi-hexagonal shape for positive force transfer
- clamping function for secure clamping of nuts and bolts
- end stop reduces risk of slipping
- Nickel/chrome coating protects against corrosion

Delivery:
In robust tool roll

ATORN socket set
1/4" square drive 6.3, DIN 3120

Application:
For tightening and loosening all types of screw connections

Execution:
- Chrome-vanadium steel inserts
- Hexagon with special profile

Advantage:
- Optimum power transmission thanks to special profile
- Bolt and nut are not damaged
- Higher torques possible

- Two-tone polyethylene foam inlay ensures any missing tools are instantly detected
- Oil and chemical-resistant foam inlay

Delivery:
In powder-coated sheet steel case with polyethylene foam insert

ATORN Socket set

with hexagon sockets, 1/4 inch square drive 6.3 DIN 3120

Ident. No. 045

Execution:
- **Ident. No. 045:**
  - 36 pieces – 8 actuating tools and 28 inserts
  - Ratchet and Stubby handle with ergonomically shaped 3-component handle
- **Ident. No. 045, 048:**
  - Highly impact-resistant plastic box with anti-slip properties
  - All tools secured in place in 2-colour foam insert
- **Ident. No. 047:**
  - 29 pieces - 5 actuating tools, 24 screw inserts
  - Smart combi grip with fold-out function for high torques
  - Highly impact-resistant plastic box with non-slip properties
  - Ratchet and screwdriver with ergonomically shaped 3-component handle
- **Ident. No. 048:**
  - 20 pieces – 2 actuating tools and 18 inserts
  - Highly flexible ratcheting handle with 180° bend mechanism
  - 1/4 in quick-change chuck for bit or adapter direct mounting
  - Ratchet with ergonomically shaped 3-component handle

Advantage:
- **Ident. No. 048:**
  - Extremely high transmittable torques of up to 50 Nm via the bend handle
  - Super strong reversing mechanism with fine toothing, 48 teeth/7.5° return angle
  - Handle is non-detachably connected to the forged part

Technical data:
- Drive: 1/4 inch

- **Ident. No. 065, 075:**
  - Innovative concept of a compact, folding tool set
  - Easy-to-wipe material and pleasant touch-and-feel
  - Combines the benefits of a slim and lightweight textile case with the ruggedness of hard shell tool boxes
  - Long-lasting, robust clamps - no loose, rattling tools
  - Magnetic lock - quick to open and wear-free
  - Easy removal of the tool - can be folded out flat - similar to a tablet case - can be set up
  - Maximum number of tools in the smallest space for the best overview
- **Ident. No. 075:**
  - Equipped with 15 bits 25 mm long, 12 bits 50 mm long and 12 bits 89 mm long in TX, TX-IP, slotted, Phillips, hex socket
  - HIPER high-performance bit ratchet with fine toothing, adapter insert
  - Hex key, hex socket
- **Ident. No. 080:**
  - Miniature full steel fine-tooth bit ratchet with 60 teeth and 6° operating angle
  - SmartHolder tool holder, extremely handy and compact with a great many tools clearly arranged in the smallest of space
  - Robust, easily accessible tool storage
  - Equipped with 18 bits 25 mm long, 11 bits 50 mm long in TX, slotted, Phillips, hex socket
  - With hand-held bit holder, quick-change chuck, adapter
  - Socket mount with locking system

Advantage:
- **Ident. No. 005:** Impact-resistant "smart case" with non-slip coating for secure storage of tools
- **Ident. No. 065, 075–080:** "Made in Germany": developed and produced
- **Ident. No. 075–080:** Double-hexagon traction profile on the outside

Delivery:
Ident. No. 065: With bit ratchet, hand-held bit holder, quick-change chuck and angled screwdrivers
Ident. No. 075: With bit ratchet and sockets

STAHLWILLE® Socket sets

With hexagon or bi-hexagon sockets

Execution:
- HPQ steel, die-forged
- chrome-plated, polished
- Socket wrench inserts with AS-Drive profile
- **Ident. No. 301–311:** 13 socket wrench inserts, 6 operating tools
- **Ident. No. 311:** Ratchet, extensions and plug-in handle with quick-release safety lock
- **Ident. No. 341:** 17 socket wrench inserts, 5 operating tools

Advantage:
- Excellent load capacity thanks to tough, hard HPQ steel alloy
- Cadmium-free, therefore also suitable for working on titanium-alloy parts and titanium connecting elements
- High force transmission to the edges of the bolts and nuts for optimum load distribution
- Longer bolt and nut service lives

Delivery:
in robust, stackable ABS plastic storage box

ATORN Reversible ratchets: Fine-tooth ratchet, telescopic ratchet, miniature bit ratchet

1/4 inch square drive 6.3

Application:
Ident. No. 010: Ratchet for manual socket wrench inserts and connection parts.
Ident. No. 050: ratchet for manual socket wrench bits and connectors.
Ident. No. 100: Ratchet for direct mounting of bits with 1/4 inch hexagon head.

Execution:
- **Ident. No. 010:**
  - Anti-clockwise and clockwise rotation possible using reversing lever with locking button
  - With suspension eyelet
- **Ident. No. 010, 100:** Finely toothed
- **Ident. No. 050:**
  - telescopic function: can be extended from 150 to 200 mm
  - ratcheting/clamping function
  - anti-clockwise and clockwise rotation possible using reversing lever with locking button
- **Ident. No. 100:**
  - Anti-clockwise/clockwise rotation can be switched using reversing lever
  - With thumb wheel

Advantage:
- **Ident. No. 100:** Thumb wheel for easier placement, screwing and unscrewing of bolts

Wera Ratchets

1/4 inch square drive 6.3

Execution:
- **Ident. No. 100:**
  - Freely swivellable ratchet head with 5 defined positions at 0°,15° and 90°, left and right
  - Pushbutton release
  - Anti-clockwise/clockwise rotation can be switched using knurling wheel
  - Multi-component power grip
- **Ident. No. 110:** Forged solid metal reversible ratchet with nut locking function
- **Ident. No. 120:** Forged all-metal push-through ratchet with nut locking function
- **Ident. No. 200:**
  - All-steel ratchet with bit direct mounting (ref. no. 200) or 1/4 inch square drive (ref. no. 210)
  - Anti-clockwise/clockwise rotation can be switched using reversing lever
  - Small and extremely handy with switching angle of only 6° - for narrow installation spaces

Advantage:
- **Ident. No. 100:**
  - In the 0° position, the ratchet becomes a standard screwdriver
  - Ergonomic power grip for fatigue-free work
  - Flywheel design and quick-action rotary sleeve for quicker screwdriving process
- **Ident. No. 110–120:** Extremely robust without limiting the torque

Execution:
- **No. 58120 030–58120 080, 58126 030–58126 060:** Burnished tips
- **No. 58126 030–58126 060:** long version total length 55 mm, blade length 30 mm
- **No. 58126 130–58126 180:** bronzed tips

Advantage:
- **No. 58120:** Improved corrosion resistance thanks to the black oxide finish
- **No. 58122:** CVD-TiN coating enables longer service lives, facilitates greater torque application and ensures resistance to corrosion
- **No. 58126 030–58126 060:** Improved resistance to corrosion thanks to burnishing process

Adapters with ball detent mechanism (DIN 3123)

1/4" square drive 6.3, DIN 3120

Application:
For adapting a 1/4" internal square drive to a 3/8" external square drive.

Execution:
- **No. 58149:** Ball stop
- **No. 58150–58158:** Ball lock

Advantage:
- **No. 58158:**
  - Excellent load capacity thanks to tough, hard HPQ steel alloy
  - Cadmium-free, therefore also suitable for working on titanium-alloy parts and titanium connecting elements

Wera Zyklop Speed socket set

3/8” square drive 10, DIN 3120

Execution:
- Zyklop Speed ratchet with 3/8” square drive and freely swivelling head with 5 specific positions
- pushbutton release
- changes between anti-clockwise/clockwise
- finely toothed
- multi-component handle
- extensions with quick-action rotary sleeves and Flexible-Lock system
- all bits 50 mm in length
- with quick-change chuck

Advantage:
- wobble extension enables swivelling up to 15°
- quick change of bits using the quick-change chuck

Delivery:
in fabric case with Velcro closure

Technical data:
- Drive: 3/8 inch
- Number of pieces in assortment/set: 29 PCS
- Sockets with hexagon-head tip provided: 8 mm | 10 mm | 12 mm | 13 mm | 15 mm | 16 mm | 17 mm | 18 mm | 19 mm

ORION GRIPPER universal screwdriving tool (DIN 3120)

3/8" square drive 10, DIN 3120

Application:
Universal tool for nuts and bolts with external profile.

Execution:
- Alloyed steel housing
- 54 hardened steel pins
- Pins with spring and solid stop

- Torque transfer of up to 80 Nm
- Head height up to 8 mm

Advantage:
- Replaces nuts in the region of 7 to 19 mm
- Independent of imperial or metric sizes
- All geometries such as triangular, square, hexagonal or octagonal, slightly damaged screws, and hook and lug wrenches can be screwed in place

Prod. Gr. 530

STAHLWILLE Bit holder (ISO 1174)

3/8" square drive 10, DIN 3120

Application:
Holder for 1/4" hexagonal bits with 3/8" square drive

Execution:
- Hexagon socket with annular pressure spring

Advantage:
- Also suitable for hexagons as per DIN 3126-E 6.3 (ISO 1173) with wide groove

Drive		3/8 inch
Bit holder		1/4 inch hexagon
Surface		Chrome plated
Material		Chrome-vanadium steel

HAZET Extensions

3/8" square drive 10, DIN 3120

Application:
Extension for hand-operated socket wrench inserts with 3/8" square drive

Execution:
- Polished
- **Ident. No. 005–070:** Rigid version
- **Ident. No. 100:**
  - Flexible version
  - Only suitable for clockwise tightening
  - Non-standard

Advantage:
- **Ident. No. 100:** Difficult-to-reach areas easier to reach with flexible version

ATORN Socket sets

with hexagon, hexagon socket and TX inserts, 1/2 inch square drive, 12.5, DIN 3120

Execution:
- Chrome-vanadium steel
- Hexagon with special profile
- 1/2" square drive

Advantage:
- Optimum power transmission thanks to special profile
- Bolt and nut are not damaged
- Higher torques possible
- Two-tone polyethylene foam inlay ensures any missing tools are instantly detected
- Oil and chemical-resistant foam inlay

Delivery:
In powder-coated sheet steel case with polyethylene foam insert

ATORN Reversible ratchets: Fine-tooth ratchet and telescopic ratchet

reversible 1/2 inch square drive, 12.5, DIN 3120

Application:
Ident. No. 010, 070: Ratchet for hand-operated socket wrench inserts and connection parts with 1/2" square drive.
Ident. No. 060: ratchet for hand-operated socket wrench inserts and connection parts with 1/2" square drive.

Execution:
- Finely toothed
- **Ident. No. 010:** With suspension eyelet
- **Ident. No. 010, 070:** Anti-clockwise and clockwise rotation possible using reversing lever with locking button
- **Ident. No. 060:**
  - telescopic function: can be extended from 305 to 445 mm
  - ratcheting/clamping function
  - anti-clockwise and clockwise rotation possible using reversing lever with locking button
- **Ident. No. 070:**
  - Telescopic function: Can be extended from 457 to 600 mm
  - Ratcheting/clamping function

Zyklop Speed, Zyklop Hybrid and Zyklop Metal ratchets

1/2" square drive 12.5, DIN 3120

Execution:

- **Ident. No. 100:**
  - Freely swivellable ratchet head with 5 defined positions at 0°,15° and 90°, left and right
  - Flywheel design with quick-action rotary sleeve
  - Pushbutton release
  - Anti-clockwise/clockwise rotation can be switched using knurling wheel
- **Ident. No. 110–120:** Forged all-metal ratchet with safe nut locking function

Advantage:

- **Ident. No. 100:** Ergonomic power grip for fatigue-free work
- **Ident. No. 110:** Ratchet with reversing lever for easy change in direction
- **Ident. No. 110–120:** Extremely robust without limiting the torque
- **Ident. No. 120:** Ratchet with sliding square tang prevents accidental switching when screwdriving

Technical data:

- Tip size: 1/2 inch
- Surface: Chrome plated
- Material: Chrome-vanadium steel

STAHLWILLE® Slip-on ratchet socket

1/2" square drive 12.5, DIN 3120

Application:
As ratchet or torque wrench attachment for hand-operated socket wrench inserts and connection parts with 1/2" square drive.

Execution:
- Chrome-alloy steel
- Can be reversed for anti-clockwise and clockwise rotation

Advantage:
- For flexible use with T-handles, jointed handles etc.
- Used in combination with torque wrenches for controlled tightening of bolts

Tip size		1/2 inch
Length (mm)		53
Number of teeth (PCS)		20
Returning angle (Degree)		18
Surface		Chrome plated
Material		Steel, specially hardened

ASW Socket insert long, hexagon head

1/4" square drive and spring element

Execution:
- Square drive according to DIN 3121 type G
- Hexagon head output according to DIN 3129
- With spring-loaded permanent magnets

Advantage:
- When tightening a screw nut, there is sufficient space for the threaded bolt to extend into the tool. The spring-mounted magnet is pressed further into the tool by the bolt without pushing the nut out of the tool.
- Screw/nut is in a secure position and is easy to remove

Prod. Gr. 540

Hexagon socket sets with 1/2" square drive

Hexagon head, hexagon socket and TX

Application:
Ident. No. 100: Wheel nut inserts for gentle rim assembly

Execution:
- **Ident. No. 100:** Plastic-coated
- **Ident. No. 120:** 10 inserts, 2 operating tools

Advantage:
- **Ident. No. 100:** Gentle bolting thanks to plastic coating for optimum rim protection

Delivery:
Ident. No. 120–165: In stable plastic box with soft foam inlay

Ident. No. 100

Ident. No. 120

Ident. No. 155

Ident. No. 165

Prod. Gr. 540

Hook wrenches

With lug

Execution:
- Special steel
- Rounded edges
- With suspension hole
- Surface annealed in burnished finish

Advantage:
- Excellent material strength with low-tension microstructure
- Better resistance to corrosion
- Comfortable to use

Technical data:
- Suitable for nut type: Slotted nut DIN 1804 | Bearing nut DIN 981

Suitable for min./ max. nut male thread size	Length (mm)	Thickness (mm)	52100... Ident. No.

Prod. Gr. 532

Articulated hook wrench, industrial version

For DIN 1804 slotted nuts and DIN 981 roller bearing nuts

Execution:
- Special steel
- Rounded edges
- With suspension hole
- Extended hook and shank
- Reinforced rivet
- With spring washer
- Surface annealed in burnished finish

Advantage:
- Longer shank for greater transferable torque
- Reinforced rivet for longer service life with greater force transmission
- Even movement with additional spring washer
- One-hand operation possible
- Excellent material strength with low-tension microstructure

Technical data:
- Suitable for nut type: Slotted nut DIN 1804 | Bearing nut DIN 981

Suitable for min./max. nut male thread size		20-35 mm	35-60 mm	60-90 mm	90-155 mm	155-230 mm

ATORN Lifter for ESD components

Application:
For removing tightly seated components.

Execution:
- Chromium-vanadium steel blade
- Fully hardened
- Matt chrome-plated
- Impact-resistant plastic precision handle

Technical data:
- Fork width (outer): 3.6 mm
- Blade length: 55 mm
- Length: 150 mm

52689...	Ident. No.	300 ●

Prod. Gr. 5HG

ESD slotted screwdriver

Precision handle

Application:
For working on potentially electrostatic components (IEC 61340-5-1).

Execution:
- High-alloy, chrome-vanadium/molybdenum steel blade
- Fully hardened
- Brushed chromium-plated
- Wiha-Chromtop® tip
- Precision handle with impact-resistant plastic rotary cap

Technical data:
- Material of handle: 1-component plastic

Width of cutting edge (mm)		1.5	2.0	2.5	3.0
Thickness of cutting edge (mm)		0.25	0.4	0.4	0.5

Prod. Gr. 533

ESD hex key

Precision handle

Application:
For working on potentially electrostatic components (IEC 61340-5-1).

Execution:
- High-alloy, chrome-vanadium/molybdenum steel blade
- Hexagon socket drive
- Matt chrome-plated and continuously hardened
- Wiha-Chromtop® tip
- Precision handle with impact-resistant plastic rotary cap

Technical data:
- Design: Straight
- Surface: Chrome plated

Width across flats		0.7 mm	0.9 mm	1.3 mm	1.5 mm	2 mm	2.5 mm	3 mm

Wera Kraftform electrician's micro screwdriver sets

In rack or fabric bag

Application:
For fine screw fittings in the electronics industry

Execution:
- Rotating cap
- Rotary zone with integrated soft zones
- Black Point tip
- **Ident. No. 005–020:**
  - Ref.: 005 – IPR TX Plus 1 PPR x 40, Microstix m x 40 mm
  - Ref.: 020 – 1 IPR TX x 40 mm, Microstix m x 40 mm, lifters 3.5x50
- **Ident. No. 030:**

Wera Slotted screwdrivers (DIN 5264)

Hexagonal shank and striking cap

Execution:
- end-to-end, tempered hexagon shank
- Hexagonal shoulder from size 3.5 mm
- Multi-component Kraftform handle with roll-away protection for sizes 3.5 mm to 10 mm
- Black Point tip
- Size 12 and 14 mm/ref. no. 070 and 080 with 1-C Weralit handle

Advantage:
- Impact-resistant blade
- Black Point tip for longer service life and enhanced protection against corrosion
- Size 3.5 mm to 14 mm with steel cap for use as a chisel
- Hexagonal shoulder for use with a wrench

Wera XXL screwdriver sets
with circular shank

Execution:
- Screwdriver with power grip
- **Ident. No. 010:**
  - Lasertip tip
  - round blades, slotted, cross-head and TX
- **Ident. No. 020:**
  - Workshop, VDE, screw chisel screwdrivers
  - round and hexagon blades, slotted, cross-head and TX
  - Voltage tester screwdriver

Advantage:
- Multi-component handle for greater comfort
- **Ident. No. 010:**
  - Micro-roughened, sharp-edged surface texture created by laser tip securely holds the screwdriver in the screw head
  - Cam-Out effect is reduced
  - Lower contact force required

Delivery:
In plastic rack to hang up

Wera VDE Lasertip® Phillips screwdriver

Ident. No. 100–103

Application:
For working on live components.

Execution:
- Protective insulation according to DIN EN 60900
- Ergonomic power grip
- Lasertip blade
- Individually tested

Advantage:
- Multi-component handle for optimum handling
- High degree of torque transmission

Technical data:
- Material of handle: 2-component plastic

Wera VDE Lasertip® screwdriver set

Application:
For working on live components.

Execution:
- Protective insulation according to DIN EN 60900
- Ergonomic power grip
- Lasertip blade from a blade width of 3.5 mm
- Individually tested

Advantage:
- Multi-component handle for greater comfort
- High degree of torque transmission
- Micro-roughened, sharp-edged surface texture created by laser tip securely holds the screwdriver in the screw head
- Cam-Out effect is reduced
- Lower contact force required

felo Esmart VDE screwdriver

Application:
For working on live components.

Execution:
- Protective insulation according to DIN EN 60900
- Safe up to 1000-V alternating voltage
- Two-component handle
- Clip-on rotary cap
- Soft shell area
- Certified 'GS' safety
- Individually tested

Advantage:
- Blades held securely in grip thanks to automatic lock in the handle
- Rotary cap and soft shell for use as precision tool

Delivery:
In plastic case

ORION® Hexagon tubular socket screwdriver

seamless, made of hardened, chrome-plated C35

Application:
Ideally suited for far-projecting threaded pins.

Execution:
- Impact-resistant plastic handle

Technical data:
- Surface: Chrome plated
- Material: Hardened steel

ATORN Torque limiter sets

19 or 30 pieces, in plastic box with foam insert

Application:

Ident. No. 100: For controlled screw tightening between 0.6 to 5.5 Nm

Ident. No. 110: For controlled screw tightening between 0.6 to 3.0 Nm

Execution:

- Precise deviation tolerance of +/- 10%
- Tactile indication and clicking noise when torque is reached
- Integrated safety clutch prevents the screw joint from being overtightened
- Carbon steel body with 43–48 HRC, electrically nickel-plated
- Industrial bit inserts made from hardened bit steel 58-60 HRC, with colour-coded rings
- Precision quick-change chuck with bit lock
- **Ident. No. 100:**
  - Pre-set torque limiters with the values 0.6/0.9/1 .2/1.4/2.0/3.0/5.0/5.5 Nm
  - Coloured outer sleeve with printed torque value - The matching bit insert, which is also colour-coded, can therefore be selected without any problems.
  - Ergonomically shaped two-component screw-driver handle and two-component t-handle with optimum power transmission properties
- **Ident. No. 110:**
  - Pre-set torque limiters with the values 0.6/0.9/1.2/1.4/2.0/3.0 Nm
  - Coloured outer sleeve with torque value printed on - this makes it easy to select the right bit insert, which features the same colour coding.
  - Ergonomically shaped two-component handle with optimum power transmission properties

Advantage:

- Optimum protection against overtightening sensitive screw connections
- Easy to handle thanks to the colour coding

Delivery:

Ident. No. 100: 50 mm bit inserts. Sizes: TX 6, 7, 8, 9, 10, 15, 20, 25, TX plus 6, 7, 8, 9, 10, 15, 20, 25, HEX (hexagon socket) 2.0/2.5/3.0/4.0 mm

Ident. No. 110: 50 mm bit inserts. Sizes: TX 6, 7, 8, 9, 10, 15, TX plus 6, 7, 8, 9, 10, 15

GEDORE Torque screwdriver (ISO 6789)

With calibration certificate according to DIN EN ISO 6790

Application:
For actuating 1/4 inch bits according to DIN 3126-C 6.3.

Execution:
- With length and circular scale for simple and precise adjustment
- When the set value is reached, the mechanism slides down so that the values are not overrun
- Precision round ball coupling for controlled clockwise tightening

Advantage:
- A secure stop function prevents accidental value adjustment

Notes:
Supplied with a factory test certificate

Technical data:
- Blade diameter: 1/4 in
- Material of handle: 1-component plastic
- Error limit (%): 6 %
- Calibration certificate: Yes

Torque wrench with reversible ratchet (ISO 6789)

With calibration certificate according to DIN EN ISO 6789

Application:
For controlled tightening in a clockwise direction with a high degree of accuracy

Execution:
- The torque is set by turning the handle
- With lever reversible ratchet, suitable only for controlled clockwise tightening.
- Haptic and acoustic adjustment aid
- Audible and perceptible release when the set value is reached
- Dual scale with Nm and lbf.ft. display
- Ergonomic handle with comfortable, textured surface
- Rapid securing and opening via the locking ring

Advantage:
- Robust tubular design
- Reversible ratchet with locking push button
- Viewing window protects scale from damage

Delivery:
Secure and safe transport/storage in handy cylindrical package

Notes:
Supplied with calibration certificate.

Technical data:
- With scale: Yes

ATORN Torque wrench with square plug-in socket (ISO 6789)

With calibration certificate according to DIN EN ISO 6789

Execution:
- Adjustable torque wrench
- For accommodating square plug-in tools
- Haptic and acoustic adjustment aid
- Triggering can be heard and felt when the set value is reached
- Dual scale with Nm and lbf.ft. display
- Ergonomic handle with comfortable, textured surface
- Rapid securing and opening via the locking ring

Advantage:
- Robust tubular design
- Plug-in square with locking push button
- Viewing window protects scale from damage

Notes:
Supplied with calibration certificate.

Technical data:

GEDORE TORCOFIX TF-K torque wrench with reversible square drive (ISO 6789)

With calibration certificate according to DIN EN ISO 6789

Application:
For controlled right- and left-hand tightening (reset square to change direction)

Execution:
- Adjustable, triggering and robust pipe torque wrench with integrated square drive ratchet for industry and trade
- Classified according to DIN EN ISO 6789-2:2017 type II Class A, calibrated to a maximum permissible deviation of +/- 3% and thus more precise than the +/- 4% required by the standard
- Incl. traceable test certificate (DIN EN ISO 6789-2:2017)
- Robust, matt powder-coated steel tube construction with high-quality plastic parts
- New ergonomic handle, shaped to the natural grip position of the hand
- Clearly recognisable and perceptible hand centring aid and calibration aid in the centre of the handle
- Double scale Nm/lbf-ft with vernier scale (Nm), enlarged viewing window protects against abrasion and contamination
- Vertical alignment of the scale, torque adjustment thus suitable for left- and right-handed users
- Scale mark positioned directly above the scale, prevents reading errors (parallax errors)
- Precise bounce mechanism generates a clearly perceptible and audible trigger signal on reaching the set torque value

Notes:
Supplied with calibration certificate.

Technical data:
- With scale: Yes
- Error limit (%): 3 %

GEDORE DREMOMETER torque wrench (ISO 6789)

With calibration certificate according to DIN EN ISO 6789

Application:
The tightening value is set and read from the scale by means of rotary motion with angle key integrated in the handle end.

Execution:
- Audible and perceptible release when the tightening torque is reached
- Single key, one arm, with automatic release

Advantage:
- Special design ensures faultless operation
- The measured value or set torque is not changed
- Independent of handle position

Notes:
Supplied with calibration certificate.

Technical data:
- Error limit (%): 3 %

Wera Click-Torque wrench with reversible ratchet

With calibration certificate, for clockwise tightening

Execution:
- setting: audible and perceptible click when scale values are reached
- release mechanism: audible and perceptible click signal when the set torque is reached
- dual Nm and lbf-ft scale
- fine adjustment scale in Nm – ensures precise and safe operation
- ergonomically shaped 2-component handle
- locking button on the end of the handle with silicone padding – protection against unintentional adjustment
- **Ident. No. 200, 220–290:** very robust design, with ratchet (45 teeth)
- **Ident. No. 210:** very robust design, with ratchet (45 teeth) – with direct mounting of bits

Delivery:
in a robust plastic rot. box

Notes:
Supplied with calibration certificate.

STAHLWILLE® Torque wrench
MANOSKOP® 730 and 730 Quick from 6-50 Nm, all models with calibration certificate

Execution:
- with chuck for replaceable plug-in tools
- double stop signal
- dual scale with Nm and ft-lb
- integrated magnifying glass in adjustment window for optimal legibility
- can be adjusted without dismantling
- ergonomically shaped, non-slip adjustment element
- QuickRelease safety catch on insert head
- Low-wear triggering system with bending rod.

Advantage:
- With long-term accuracy

Delivery:
in sturdy plastic container

Notes:
Supplied with calibration certificate.

Technical data:
- With scale: Yes

STAHLWILLE® Torque wrench

MANOSKOP® 755 series

Application:
For holding plug-in tools no. 52286, suitable for working on production lines or for series production work.

Execution:
- Double stop signal
- No adjustment scale, adjustment via testers
- Automatic audible and perceptible release when the set value is reached
- Made from square steep pipe
- IMPORTANT: Supplied WITHOUT calibration certificate. This is only created when the wrench settings are fixed at the factory.

Advantage:
- Long-term accuracy

Technical data:
- Error limit (%): 4 %
- With scale: No

Min./max. torque	Insert shank square	Length (mm)	52284... Ident. No.

STAHLWILLE® Electronic torque wrench SENSOTOK 701

With built-in 1/4" reversible fine-tooth ratchet

Execution:
- very slim and compact design for torques from 1 Nm
- measurement units: Nm, cNm, ft-lb and in-lb
- measurements can be taken regardless of force application point
- With 3.6 V lithium battery (spare battery art no. 56815330)
- with certificate
- evaluation of screwing process by means of colour LEDs, buzzer and vibration

Advantage:
- versatile – 3 measuring modes: Track, Peak Hold, screwing application with evaluation
- intuitive keying-in control ensures simple adjustment
- ergonomic handle construction for effortless operation

Min./max. torque	Tip size	Length (mm)	Error limit (%) (%)	52284... Ident. No.

Prod. Gr. 531

STAHLWILLE® Electronic torque/angle-controlled wrenches

Sensotork® 713 R with digital display and calibration certificate

Execution:
- Electronic torque wrenches for rotation angle with plug-in tool reversible ratchet
- With quick-release safety locking device
- Torque and rotating angle are visible simultaneously, comfortable rotating angle measurement without reference arm in extremely large area of rotation.
- Measurement units: Nm, ft.lb, in.lb
- Adjustable pre-warning time of visual, perceptible and acoustic signals
- Adjustable individual plug-in tool lengths
- Fulfils DKD-R3-7, Class 2 and DIN EN ISO 6789, with certificate
- operating duration approx. 60 hours (with 2 batteries type Mignon, 1.5 V, AA)
- Measurements can be taken regardless of force application point
- backlighting of the display (traffic light principle) screwdriving processes are saved with a time stamp

Advantage:
- Service friendly thanks to simple adjustment and self-actuated note regarding next calibration deadline
- Individual identification designation possible, protection against unintentional adjustment and external access by password
- Repeated screw tasks can be combined into a menu-controlled process

Delivery:
In a rugged plastic case incl. batteries (2x Mignon 1.5 V, type AA)

Notes:
Supplied with calibration certificate.

Technical data:
- Error limit (%): 1 %

STAHLWILLE® Electro-mechanical torque/angle-controlled wrench

MANOSKOP 714 - indicating and clicking

Execution:
- 4 measurement modes (torque, rotation angle, torque with control variable of rotation angle, rotation angle with control variable of torque)
- High-resolution colour graphic display with additional lateral signal lights, freely configurable menu structure
- 3 function modes: triggering, peak (displaying operation with peak value display) and track (displaying operation with current value display)
- Micro-USB 2.0 interface
- Data storage (2500 screwdriving processes), up to 200 screw joints in max. 25 processes can be programmed
- Measurement units: Nm, ft.lb, in.lb/automatically correct tightening torque on input of deviating actual dimension
- Feelable, optical and acoustic release signal, torque and angle of rotation visible simultaneously
- Automatic indication of the next calibration deadline depending on the time and/or the loading count
- Display resolution, rotation angle 0.1°
- Torque display resolution <= 60 Nm: 0.01 Nm > 60 Nm: 0.1 Nm

Advantage:
- Quick and precise setting via keyboard, automatic key lock to protect against accidental changes to settings
- Overload protection by means of acoustic and optical warning signals and forced release (right)
- Reliable handling with ergonomically shaped handle (resistant to oils, greases, fuels, brake fluids and Skydrol)

Delivery:
In robust plastic case (size 40 in sheet steel case), with software Sensomaster, USB cable, 4 micro batteries AAA/LR03, 1.5 V micro NiMh batteries AAA, 1.2 V can be used.

Technical data:
- Error limit (%): 2 %

STAHLWILLE® Electro-mechanical torque wrench

Service/series MANOSKOP® 730 D with calibration certificate

Execution:
- Display and release when the set torque is reached just like a mechanical wrench
- Holder for plug-in tools
- Display of the value reached on the display
- In 'display' mode, continuous display of torque experienced on display
- Saved values of screw-tightening actions can be transferred to a PC (USB interface, storage of up to 7500 screw-tightening actions in wrench)
- Automatic indication of the next calibration deadline (convenient adherence to DIN EN ISO 6789)
- Operating duration approx. 60 hours (with 2 batteries type Mignon, 1.5 V, AA)

Advantage:
- Quick setting via handy keyboard and large display
- Automatic key lock to protect against accidental changes to settings, protection against setting changes by third parties via PIN code.
- Overloading protection by means of acoustic and optical warning signals

Delivery:
In robust plastic case

Notes:
Supplied with calibration certificate.

Technical data:
- Error limit (%): 2 %

GEDORE DremoTest E electronic torque tester

calibration certificate

Application:
For checking and adjusting all clockwise torque wrenches used in workshops, in industry and for quality assurance processes.

Execution:
- With auto-reset function
- 1st peak value recognition (first peak/crunch point recognition)
- Fixed hexagonal box nut mount
- Convertible between Nm and lbf.ft, integrated measuring transducer
- Serial RS232 interface

Advantage:
- Simple to use and with a robust design

Notes:
Supplied with calibration certificate.

ATORN Snipe nose pliers and spark-plug connector pliers, long version

Application:

Ident. No. 500–520: For gripping and holding in difficult-to-reach areas.

Ident. No. 540: For holding and loosening round, conical and angular objects.

Execution:

- Special tool steel, oil-hardened
- Pulling round materials and handling particularly delicate workpieces
- **Ident. No. 500:** Long, straight, flat, round jaws
- **Ident. No. 500–520:** Finely serrated with special profile
- **Ident. No. 520:** Long, bent by 35°, flat, round jaws
- **Ident. No. 540:**
  - Long, bent by 90°, flat, round jaws
  - Finely serrated, with burner hole and special tip shape for diameters of 15-30 mm

Advantage:

- The optimum position of the pivot point ensures secure and controlled gripping
- **Ident. No. 540:** The long design prevents the risk of burns from the hot cylinder block

ATORN Pliers wrench

Application:
For gentle screwing of delicate surfaces

Execution:
- Smooth jaws with stepless parallel movement for gentle gripping or powerful pressing
- Push-button fine adjustment of all widths across flats for comfortable arm positioning
- Strong clamping force thanks to >10:1 lever ratio
- Slightly open the mouth for fast, ratchet-style tightening or loosening of nuts
- Protected scale for presetting the desired width across flats

Advantage:
- Powerful, precisely adjustable screw tool for parallel, full-surface, play-free and secure gripping of multiple edges without damage

Technical data:
- Surface: Chrome plated

Pliers wrench (ISO 5743)

Application:
For clearance-free, safe gripping of parallel surfaces.

Execution:
- Chrome-vanadium electric steel, forged, oil-hardened
- Flat, parallel gripping jaws
- Replaces a complete set of wrenches thanks to infinitely variable gripping of all wrench sizes

Advantage:
- Quick direct adjustment to workpiece via pushbutton
- The stroke between the gripping jaws enables rapid tightening and loosening of bolted connections using the ratchet principle
- Also suitable for bending sheet metal or breaking tiles
- High degree of clamping force due to 10x more manual force
- **Ident. No. 090–110:** Safe, ergonomic and fatigue-free working thanks to two-component handles

Technical data:
- Surface: Chrome plated

Prod. Gr. 535

Protective jaws for pliers wrench

Suitable for size 250 mm

Application:
For working on particularly sensitive surfaces

Execution:
- Easy to slip on, made of plastic
- suitable for size 250 mm, 2018 model

Delivery:
Set of 3 pairs

Technical data:
- Width across flats: 52 mm
- Surface: Polyvinyl chloride

53076...	Ident. No.	210 ●

Prod. Gr. 535

Quick-adjustment locking pliers

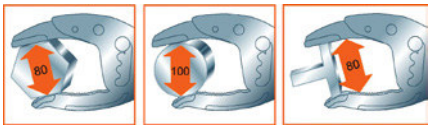
Application:
For flexible clamping of round and flat material.

Execution:
- Chrome-vanadium alloy
- Jaw width 18 mm

Advantage:
- Optimum flexibility thanks to 4-way opening quick-adjustment mechanism
- One-handed adjustment wheel integrated in the handle
- Ergonomic soft opening system

Length (mm)		250
Min./max. clamping width		0-100 mm
Surface		Chrome plated
53419...	Ident. No.	010 ●

Prod. Gr. 5HZ



Adjustable locking pliers

Top straight jaw, bottom prism jaw or half-round jaws, with wire cutter

Application:
For clamping round and flat material.

Execution:
- One-hand, quick release lever with return spring and pinch guard.
- Carbon-nitrided knurled thumb screw with fine thread for precise adjustment of the clamping width and clamping pressure.
- **Ident. No. 110–130:**
  - Wire groove in upper jaw - wires can be gripped and routed from the front
  - Forged and hardened jaws at the top, straight at the bottom with prism, made of chrome-vanadium.
- **Ident. No. 140–160:**
  - Fine toothing in the front jaw area.
  - Forged and hardened jaws half-round form, made of chrome-vanadium.
  - Ground wire cutter for cutting welding wires, but also for cutting nails

Technical data:
- Surface: Nickel plated

ATORN Welder's, clamping, parallel clamping, wide jaw locking pliers

with steel jaws

Application:

Ident. No. 200: For clamping profile or flat material edge-to-edge for welding.

Ident. No. 210–220: For clamping profile and flat material.

Ident. No. 230: For clamping edges and surfaces.

Execution:

- One-hand, quick release lever with return spring and pinch guard.
- **Ident. No. 200:**
  - Large clamping range, easy and flexible clamping - very good vibration absorption
  - Simple and efficient clamping force adjustment, ideal for delicate surfaces
- Carbonated knurled thumb screw with fine thread for precise adjustment of the clamping width and clamping pressure.
- **Ident. No. 200–210:** Forged chrome-vanadium jaws.
- **Ident. No. 210:** Jaw size when closed: 55 x 85 mm, jaw width: 12 mm
- **Ident. No. 210–220:** Ideal for bulky workpieces or for clamping behind bars.
- **Ident. No. 210–230:** Carbon-nitrided knurled thumb screw with fine thread for precise adjustment of the clamping width and clamping pressure.
- **Ident. No. 220:**
- Movable, forged jaws made of chrome-vanadium.
- Due to the alignment jaws with the large support plates, an excellent clamping effect is achieved even with unbalanced bodies.
- Jaw size when closed: 55 x 85 mm, plate: 30 mm
- **Ident. No. 230:**
  - Chrome-vanadium jaws.
  - Ideal for clamping, bending and crimping thin and soft sheet metal.
  - Jaw width: 80 mm; jaw thickness: 3 mm

Technical data:

- Surface: Nickel plated

Circlip pliers sets

for internal and external circlips

Application:
for mounting and removing inner and outer circlips.

Execution:
- chrome vanadium steel, forged, oil-hardened
- polished head
- non-slip, robust tips

Delivery:
Ident. No. 250: in roll-up pouch with 1x: J 1, J 2, A 1, A 2
Ident. No. 260: in roll-up pouch with 1x: J 1, J 2, J 11, J 21, A 1, A 2, A 11, A 21

Precision circlip pliers with inlaid spring steel wire tips

for internal circlips

Application:
For mounting and removing inner retaining rings in drill holes.

Execution:
- Chrome-vanadium electric steel, forged, oil-hardened
- Inlaid tips, spring steel wire, drawn

Advantage:
- Safe working processes with inlaid tips
- For heavy-duty use, even in continuous operation, up to 10x longer service life compared to turned tips

Technical data:
- Surface: Grey atramentised
- Material of handle: Polyvinyl chloride

VBW TopCut concreters' nippers (ISO 9242)

Mechanic's nippers

Application:
For twisting and pinching wire or for pulling out nails.

Execution:
- Special tool steel, drop-forged, oil-hardened
- Black atramentised pliers
- Polished head
- Inductively hardened blades for excellent wear resistance

Advantage:
- Opening angle is limited for one-handed closure
- Less cutting force required thanks to optimum blade geometry

Length (mm)		224	250	280
53300...	Ident. No.	510 ●	520 ●	530 ●

Prod. Gr. 544

KNIPEX Heavy-duty concreters' nippers, nickel-plated (ISO 9242)

Application:
For twisting and pinching wire or for pulling out nails.

Execution:
- Special-grade tool steel, forged, oil-hardened
- Fully nickel-plated pliers
- Blades additionally hardened

Advantage:
- 25% less force required compared to standard long-handled pincers of the same size thanks to the high-ratio joint, which relieves strain
- Also suitable for tying deep-set iron bars thanks to the particularly narrow design
- Strong damping of the cutting impact after cutting binding wire relieves strain on tendons and muscles

Length (mm)		250	300
53300...	Ident. No.	025 ●	030 ●

Prod. Gr. 535

ATORN Heavy-duty end cutting nippers (ISO 5748)

Application:
For cutting and pinching soft wire, hard wire and piano wire.

Execution:
- Flat heavy-duty joint for good accessibility
- Precision cutting requires less energy
- Optimised joint geometry for even easier cutting
- Tool steel with induction-hardened cutting edges
- Ground and polished head
- Three-component handles with thumb recess and anti-slip protection
- Cutting performance for piano wire: 2.2 mm (with length 160 mm) and 2.5 mm (with length 200 mm)

Technical data:
- Material of handle: 3-component plastic

Length (mm)		160	200

Prod. Gr. 535

VBW Bolt end cutters

Application:
For cutting bolts, tie rods and steel wire.

Execution:
- Forged cutting blade
- Steel pipe arms
- Inductively hardened blades
- Handle ends encased in rubber

Technical data:
- Surface: Plain
- Material of handle: Plastic

Length (mm)		460	610	760	910
Max. piano wire Ø cutting capacity (mm)		6	8	9	10
Max. soft wire Ø cutting capacity (mm)		8	9	11	13
53324...	Ident. No.	200 ●	210 ●	220 ●	230 ●

Prod. Gr. 544

ATORN Cable cutters

Application:
For cutting single and multi-conductor copper and aluminium cables.

Execution:
- Hardened, precision-ground blades
- Polished head
- Slim, riveted joint
- Not suitable for steel wire or hard-drawn copper wire

Advantage:
- Safe, ergonomic and effortless work thanks to 2-component handles

Technical data:
- Material of handle: 2-component plastic

Length (mm)		160	210
Max. medium wire Ø cutting capacity (mm)		10	12
53093...	Ident. No.	310 ●	320 ●

Prod. Gr. 5HZ

ATORN Ratchet cable cutters
One-handed operation

Application:
For cutting multi-strand copper and aluminium cables.

Execution:
- Excellent lever transmission and step-by-step cutting for optimal power transmission
- Simple one-hand operation
- Copper up to 600 MCM/300 mm², aluminium up to 750 MCM/380 mm²
- Unlocking option in each cutting position
- All parts are made of high-strength steel, black oxide surface

Advantage:
- Excellent handling of cables with diameters from 6 mm to 34 mm, as the total tool length is only 260 mm
- The ergonomically shaped, soft multi-component handle ensures optimal power transmission

Technical data:
- Length: 260 mm
- Max. medium wire diameter cutting capacity: 34 mm
- Surface: Burnished
- Material of handle: 2-component plastic

53093...	Ident. No.	700 ●

Prod. Gr. 5HZ

ATORN VDE cable cutters

Application:
For cutting single and multi-conductor copper and aluminium cables.

Execution:
- Chrome-plated pliers
- Fine blade for smooth and easy cuts
- Adjustable, ground, screwed precision joint
- Not suitable for steel wire or hard-drawn copper wire
- VDE type according to DIN EN 60900

Advantage:
- Safe, ergonomic and effortless work thanks to 2-component handles
- One-handed operation with integrated spring and lock
- Angled head relieves strain on the wrist and provides a clear view

Technical data:
- VDE certified: Yes
- Material of handle: 2-component plastic

Length (mm)		180	220
Max. medium wire Ø cutting capacity (mm)		18	25
53093...	Ident. No.	410 ●	420 ●

Prod. Gr. 5HZ

ATORN Cable and electrician's scissors

Application:
For cutting finely stranded copper conductors

Execution:
- INOX stainless steel cutting blades
- With notch for stripping insulation
- Toothed cutting edge prevents the cable from slipping out when cutting
- Cutting edge hardness of 56 HRC.
- Ergonomic 2-component handles

Technical data:
- Length: 140 mm
- Max. medium wire diameter cutting capacity: 16 mm
- Material of handle: 2-component plastic

53093...	Ident. No.	500 ●

Prod. Gr. 5HZ

ATORN Cable cutters

Application:
For cutting single or multi-wire copper or aluminium conductors

Execution:
- INOX stainless steel blades
- Self-opening through internal spring
- Sharp cut – no crushing or deformation of conductors
- Ergonomically shaped plastic handles
- Hardened and precision-ground

Technical data:
- Material of handle: Plastic

Ident. No. 600

Ident. No. 610

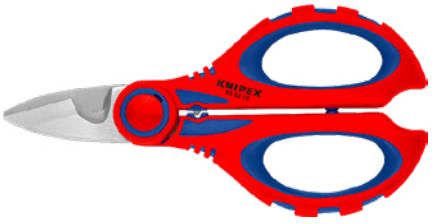
Length (mm)		134	168
Max. medium wire Ø cutting capacity (mm)		6	10
53093...	Ident. No.	600 ●	610 ●

Prod. Gr. 5HZ

KNIPEX Electrician's scissors

Execution:
- Precision grinding with fine toothing and cable cutters
- Multi-component handle, fibre glass-reinforced
- With crimp function for wire end ferrules in the handle

Delivery:
With plastic belt pouch



Length (mm)		161
53099...	Ident. No.	002 ●

Prod. Gr. 535

Cable cutters with adjustable screw joint, self-locking

Application:
For cutting, stripping and removing insulation on copper and aluminium cables.

Execution:
- Special-grade tool steel, forged, oil-hardened
- Hardened, precision-ground blades
- Not suitable for steel wire and hard-drawn copper wire
- Adjustable screw joint, self-locking
- **Ident. No. 020:** VDE type according to DIN EN 60900

Advantage:
- Cuts smoothly and cleanly without crushing
- Easy one-handed cutting
- Pinch guard prevents crushing injuries
- **Ident. No. 015–020:** Safe, ergonomic and fatigue-free working thanks to two-component handles

Technical data:
- Length: 165 mm
- Max. medium wire diameter cutting capacity: 15 mm

Ident. No. 010

Ident. No. 015

Ident. No. 020

VDE certified		-	-	Yes

Prod. Gr. 535

Cable cutters
Twin cutting edges

Application:
For cutting single and multi-conductor copper and aluminium cables.

Execution:
- Special-grade tool steel, forged, oil-hardened
- Hardened, precision-ground blades
- Not suitable for steel wire and hard-drawn copper wire
- Adjustable screw joint, self-locking
- **Ident. No. 110:** VDE type according to DIN EN 60900

Advantage:
- Cuts smoothly and cleanly without crushing
- Pinch guard prevents crushing injuries
- Low force required thanks to favourable transmission ratios and optimised blade geometry
- By splitting the cutting process into pre-cut (insulating sheath with front blade area) and post-cut (conductor in rear blade area), cables up to 20 mm in diameter can be cut with one hand
- **Ident. No. 105–110:** Safe, ergonomic and fatigue-free working thanks to two-component handles

Technical data:
- Length: 200 mm
- Max. medium wire diameter cutting capacity: 20 mm

Ident. No. 100

Prod. Gr. 535

VDE cable cutters, 1,000 V

Application:
For cutting single- and multi-core copper and aluminium cables

Execution:
- Cutting without deformation of conductor
- Protective insulation individually tested in accordance with EN/IEC 60900
- Optimal grip geometry, minimal hand forces required
- **Ident. No. 010:** Single-wire conductors up to 8 mm, multi-wire conductors up to 16 mm²
- **Ident. No. 020:** Single-wire conductors up to 12 mm, multi-wire conductors up to 35 mm²
- **Ident. No. 030:** Single-wire conductors up to 22 mm, multi-wire conductors up to 95 mm²

Technical data:
- VDE certified: Yes
- Material of handle: 2-component plastic

Ident. No. 020

Model		KT 8	KT 12	KT 22

Prod. Gr. 543

Cable cutters
Short model

Application:
For cutting single and multi-conductor copper and aluminium cables.

Execution:
- Not suitable for steel wire and piano wire
- Pivot arms: Aluminium pipe
- Hardened, precision-ground blades
- Blade top: Special grade chrome-vanadium electric steel, forged, oil-hardened

Length (mm)		500
Max. medium wire Ø cutting capacity (mm)		27
Material of handle		2-component plastic
53101...	Ident. No.	005 ●

Prod. Gr. 535

Cable cutters

Application:
For cutting copper and aluminium cables.

Execution:
- Special-grade tool steel, oil-hardened
- Hardened, precision-ground blades
- Not suitable for steel wire and piano wire
- **Ident. No. 110–120, 140:** VDE type according to DIN EN 60900

Advantage:
- Cut smoothly and cleanly without crushing
- Simple to use thanks to low weight and compact design; even possible to use in confined spaces
- With pinching guard to prevent crushing injuries
- **Ident. No. 010–120:**
  - One-handed operation using ratchet principle, low force required thanks to optimum transmission ratios
  - 2-speed gear ring drive for simple cutting
- **Ident. No. 130–140:**
  - One-handed and two-handed operation using ratchet principle, low force required thanks to optimum transmission ratios
  - 3-speed gear ring drive for simple cutting

Technical data:
- Material of handle: 2-component plastic

Prod. Gr. 535

ATORN Wire rope cutters

Application:
For cutting finely stranded cords, hard wires and cables.

Execution:
- Extra-strong shearing blade
- Adjustable, ground, screwed precision joint

Advantage:
- Angled head for improved view of the working area
- One-handed operation with integrated spring and lock
- Safe, ergonomic and effortless work thanks to 2-component handles

Technical data:
- Length: 190 mm
- Max. medium wire diameter cutting capacity: 7 mm
- Surface: Plain
- Material of handle: 2-component plastic

53300...	Ident. No.	019 ●

Prod. Gr. 5HZ

Wire rope and cable cutters

Application:
For cutting wire cables, steel cables, wires of all types and wire gauze.

Execution:
- Knife and pin made from hardened high-quality steel, pressed sheet steel handles
- Case-hardened blades

Advantage:
- Even cutting without pinching or prior tying of cables thanks to triangular cutting
- One-hand operation
- Easy cutting thanks to optimum lever action

Model C 7

Length (mm)		190
Max. medium wire Ø cutting capacity (mm)		5
Surface		Plain
Material of handle		Polyvinyl chloride
53340...	Ident. No.	010 ●

Prod. Gr. 546

Mitre snips

For synthetic and rubber profiles

Application:
For cutting plastic, rubber, soft wood profiles and flat-band cables with no pinching.

Execution:
- Special tool steel, rolled, oil-hardened
- Blade: Standard trapezoid blade, interchangeable
- With opening spring and catch

Advantage:
- Interchangeable cutting support with angle stop for 45° cuts and markings for 60°, 75° and 90° cuts

Length (mm)		215
Surface		Chrome plated
Material of handle		Polyvinyl chloride
53138...	Ident. No.	010 ●

Prod. Gr. 535

Precision electronics ESD side cutters

Execution:
- glossy polished steel surface: proven and reliable finish.
- no risk to circuitry or components due to chrome flaking off
- ESD-compatible 2-component handles with wide and non-slip contact surface
- inductively hardened blades facilitate easy and sharp cutting with maximum service life
- inserted double leaf springs and wear-resistance guarantee uniform action
- box joint design for optimal maintenance-free guidance of jaws -
- silky-smooth action, long service life, blade overlap prevented.

Technical data:
- Surface: Plain
- Material of handle: 2-component plastic

Prod. Gr. 5HZ

ATORN ESD precision electronics angled and pointed cutters

Execution:
- angle cutting pliers ideal for horizontal and vertical application
- Glossy polished steel surface: proven and reliable finish.
- no risk to circuitry or components due to flaking off of chrome
- ESD-compatible 2-component handles with wide and non-slip contact surface
- inductively hardened blades facilitate easy and sharp cutting with maximum service life
- double leaf springs inserted and wear-resistant guarantee uniform action
- Box joint design for optimal maintenance-free guidance of jaws – silky-smooth action and long service life, overlapping of blades avoided.

Technical data:
- Length: 120 mm
- Max. soft wire diameter cutting capacity: 1.2
- Head design: Straight | With small grind
- Surface: Plain

ATORN Electronics gripping pliers

Application:
Ident. No. 010, 030–040: For highly precise assembly tasks in electronics and precision mechanics fields.
Ident. No. 020: For bending grommets with different radii for wire-shaped materials.

Execution:
- C-45 steel, 44-48 HRC arm hardness

Advantage:
- Glare-free, phosphated surface for safe work
- With low-friction double-opening spring and 2-component handles for effortless, ergonomic work

Technical data:
- Length: 125 mm
- Surface: Phosphated
- Material of handle: 2-component plastic

ATORN Electronics pliers and cutter set
in textile bag

Application:
For cutting, holding and gripping.

Execution:
- C45/C60 steel
- Consisting of: Flat-nose pliers, round-nose pliers, needlenose pliers (straight and bent), side cutters with and without bevel

Advantage:
- Glare-free, phosphated surface for safe work
- With low-friction double-opening spring and 2-component handles for effortless, ergonomic work

Delivery:
Set in zipped case

Number of pieces in assortment/set		6
Surface		Phosphated
Material		Tool steel
Included in delivery		1x flat-nose pliers 125 mm, 1x round-nose pliers 125 mm, 1x pointed pliers 125 mm, bent by 30°, 1x straight pointed pliers 125 mm, 1x diagonal cutters 112 mm with bevel, 1x diagonal cutters 112 mm without bevel

KNIPEX Electronics pliers set
For working on electronic components

Execution:
- Pliers length: 115 mm
- **Ident. No. 010:**
  - Elasticated rubber strap pliers holder, with zip
  - Comes with: 1 pair of electronics side cutters with and without chamfer, 1 pair of electronics gripping pliers with flat, flat/round and round jaws, 1 pair of electronics end-cutting nippers and precision tweezers
- **Ident. No. 020:** Comes with: 1 pair of electronics gripping pliers, 1 pair of electronics side-cutters, WERA electronics screwdriver PH 0/PH

1/0.40 x 2.5/0.50 x 3.0/0.60 x 3.5/0.80 x 4.0

Advantage:
- **Ident. No. 020:** ESD design, discharges electricity

Delivery:
Ident. No. 010: In durable plastic case
Ident. No. 020: In practical storage box made from impact-resistant plastic with foam inlay

Prod. Gr. 535

Electronics pliers

Application:
Ident. No. 040: For highly precise assembly tasks in electronics and precision mechanics fields.

Execution:
- Chrome-vanadium ball-bearing steel, forged
- Burnished pliers (anti-glare), polished head
- Smooth double spring for gentle, even opening action
- Bolted joint and precision-made joint surfaces
- **Ident. No. 040:** Smooth-ground gripping surfaces, edges finely rounded
- **Ident. No. 110–130:** Extremely precisely ground, sharp blades

Advantage:
- Weighs 20% less than conventional electronics pliers and enables safe, ergonomic and fatigue-free working thanks to 2-C handles
- **Ident. No. 040:** Dissipative handles

Technical data:
- Surface: Plain
- Material of handle: 2-component plastic

Electronics Super-Knips

Application:
Ident. No. 010–100: For precision cutting tasks in electronics and precision mechanics fields.
Ident. No. 150: for precision cutting tasks in electronics and precision engineering fields.

Execution:
- Joint with stainless steel rivet
- **Ident. No. 010–030, 090–100:** Polished head
- **Ident. No. 010–030, 150:** INOX stainless steel
- **Ident. No. 010–060:** Blades also inductively hardened
- **Ident. No. 010–100:**
  - Ground, very sharp blades without chamfer for flush cutting
  - With opening spring and opening limiter
- **Ident. No. 040–080:** Special tool steel, burnished
- **Ident. No. 090–100:** INOX surgical stainless steel, air-hardened
- **Ident. No. 150:**
  - polished head
  - ground, very sharp blades without chamfer for flush cutting
  - blades also inductively hardened
  - with opening spring and opening limiter
  - VDE-design , tested according to DIN EN 60900

Advantage:
- **Ident. No. 010–100:**
  - Safe, ergonomic and fatigue-free working thanks to two-component handles
  - Precisely shaped tips also cut close-fitting wires from a diameter of 0.2 mm
  - Extremely smooth action for fatigue-free working
- **Ident. No. 020, 060, 080:** With wire clamp – no uncontrolled displacement of wire sections
- **Ident. No. 050:** Also suitable for cutting fibre glass cables
- **Ident. No. 070–100:** ESD design, discharges electricity
- **Ident. No. 150:**
  - safe, ergonomic and effortless work thanks to 2-component handles

Electronics side cutters

With opening spring, without blade bevel

Application:
Ident. No. 125–135: For cutting soft copper wires.
Ident. No. 145–165: for cutting soft copper wires.

Execution:
- **Ident. No. 125–135:**
  - Special tool steel, anti-glare
  - Hardened blades
  - Smooth-running joint
  - blade angle 21°, blade length 10 mm, head width 13.5 mm
- **Ident. No. 145:** blade angle 50°
- **Ident. No. 145–165:**
  - special tool steel, anti-glare
  - hardened blades
  - smooth-running joint
- **Ident. No. 155–165:**
  - particularly sharp cutting edges for difficult tasks
  - head angle 21°, blade length 8 mm, head width 10 mm

Technical data:
- Surface: Burnished
- Material of handle: 2-component plastic

Automatic wire stripping pliers

Application:
For automatic stripping of all standard cable cross-sections and insulation materials.

Execution:
- Blade: Special tool steel, oil-hardened, interchangeable
- Housing: Plastic, glass fibre reinforced
- With wire cutters for copper and aluminium conductors up to max. 2.5 mm²
- With adjustable length stop from 6.0-18.0 mm

Advantage:
- The conductors are not damaged – automatically adapts to different cross-sections
- Light, manageable design for ease of use
- Streamlined head shape for use in difficult-to-reach work areas

Length (mm)		180
Min./max. stripper size		0.2-6 mm²

ORION Automatic wire stripping pliers

Self-adjusting

Application:
For automatic stripping of fine-strand and solid conductors with PVC insulation.

Execution:
- Interchangeable high-quality, hardened steel inserts
- Fully insulated, robust design made from fibre glass-reinforced polyamide
- With ergonomic handles and additional locking option
- Length stop adjustable from 5-12 mm
- ref. no. 510 : For unsheathing and stripping
- Side-cutters up to maximum 3 mm in diameter

Advantage:
- Also suitable for use in hard-to-reach areas thanks to the narrow jaws
- The external insulation is not damaged thanks to a special gauging system

Length (mm)		170
Min./max. stripper size		0.2-6 mm²
Material of handle		1-component plastic

Application:
For stripping solid and fine-wire conductors

Execution:
- Intelligent self-adjustment for all cross-sectional areas
- Length positioner for adjustable stripping length from 3 to 21 mm
- Solid conductors up to 6 mm², fine wires up to 16 mm²
- Cutting function with integrated hand protection
- Stripping knife can be replaced quickly and without tools
- Extremely durable thanks to fibreglass-reinforced polyamide
- No damage or splaying of conductors

Advantage:
- Process a wide variety of cable materials using just one tool. Wire-stripping blades are available in straight, V and U shapes.

Technical data:
- Length: 202 mm
- Min./max. stripper size: 0.03-16 mm²
- Material of handle: 2-component plastic

KNIPEX Automatic wire stripping pliers
Patented

Application:
Ident. No. 005: For automatic stripping of single and multi-strand conductors and fine-wire conductors with plastic or rubber insulation.
Ident. No. 010: For automatic stripping of single and multi-strand conductors and fine-wire conductors with an array of insulation materials.

Execution:
- Blade: Special tool steel, oil-hardened
- Housing: Plastic, glass fibre reinforced
- **Ident. No. 005:**
  - With adjustable longitudinal stop
  - Cutting depth can be adjusted for different insulation materials
  - With wire cutter for copper and aluminium multi-strand conductors up to 10 mm² and solid-wire conductors up to 6 mm²
- **Ident. No. 010:**
  - With deep-set wire cutter for copper and aluminium multi-strand conductors up to 10 mm² and solid-wire conductors up to 6 mm²
  - With adjustable length stop

ATORN Precision crimping tool with positioner and hexagonal pressing 0.08 to 16 mm²

with automatic cross-section adjustment

Application:
For processing wire end ferrules with and without an insulating collar and twin wire end ferrules in accordance with DIN 46228 | EN 50027

Execution:
- Very large application range from 0.08 to 16 mm² without adjustment
- Low manual force – 30% reduction compared to older tools
- Positions even small wire end ferrules in the right place quickly and easily using the swivel positioner (locator).
- Even six-edge precision crimping over the full length of the sleeve
- Save time by simple insertion even in confined spaces.
- Unlocking latching mechanism for securing the entire crimping process
- Ergonomic soft-grip handles, narrow gripping width
- Made entirely of high-strength steel, particularly stressed parts are specially tempered

Technical data:
- Length: 213 mm
- Suitable for min./max. diameter: 0.08-16 mm
- Material of handle: 2-component plastic

ATORN Crimping pliers with rotating crimping insert

For wire end ferrules

Application:
Ident. No. 210: For processing wire end ferrules with and without insulating collars
Ident. No. 211: For processing wire end ferrules with and without insulating collars, square crimping
Ident. No. 212: For processing wire end ferrules with and without insulating collars, trapezoidal crimping

Execution:
- **Ident. No. 210:**
  - 360° rotation for interchangeable crimping inserts
  - Insert the wire end ferrule from the front or from the side
  - Crimping area can be adjusted in intervals with 45° locking mechanism
  - Integrated, releasable latching mechanism ensures complete crimping
  - Highly heat-treated steel with a black oxide surface
  - Square or trapezoidal crimping possible thanks to interchangeable inserts
  - Automatically adjusts to the conductor cross-section
- **Ident. No. 211:** Square crimping of 0.08-16 mm²
- **Ident. No. 211–212:**
  - Tool-free interchangeable crimping insert, 360° rotation
  - High-strength, specially heat-treated steel
- **Ident. No. 212:** Trapezoidal crimping of 0.08-16 mm²

Advantage:
- **Ident. No. 210:**
  - Wide range of applications from 0.08 to 16 mm²/ twin sleeves from 2 x 0.25 to 2 x 10 mm²
  - Small and handy - can be used with minimal manual force, even in hard-to-reach places
- **Ident. No. 211–212:** Precision crimping over the full length of the ferrule

Delivery:
Ident. No. 210: Crimping insert not included - please order separately

KNIPEX Crimping tool for wire end ferrules, square or hexagonal crimping

Self-adjusting

Application:

For crimping wire end ferrules with self-adjustment function.

Execution:

- Special grade chrome-vanadium electric steel, oil-hardened
- **Ident. No. 010:** Self-adjusting square crimping
- **Ident. No. 020:**
  - Also for twin wire end ferrules up to 2x10 mm²
  - Self-adjusting hexagon crimping for cramped connection sizes
  - Reversing lever for 16 mm²

Advantage:

- 20% less force applied when crimping
- Reduced handle width and improved ergonomics, with 2-component handles
- Consistently high crimping quality thanks to force stop function (can be unlocked)
- Crimping pressure is factory-set for precision
- Knee lever creates additional force for fatigue-free working

Crimping pliers with MultiCrimp interchangeable magazine

Application:
For crimping a range of connectors and sheaths.

Execution:
- Pliers: Special grade chrome-vanadium electric steel, oil-hardened
- Round magazine: Plastic, glass fibre reinforced
- Application 1: Uninsulated, open plug-in connectors from 0.5 to 6 mm²
- Application 2: Insulated cable lugs and plug connectors from 0.5 to 6 mm²
- Application 3: Wire end ferrules from 0.25 to 6 mm²
- **Ident. No. 110:**
  - Application 4: Uninsulated cable lugs and plug connectors from 0.5 to 10 mm²
  - Application 5: Uninsulated, butt connectors from 1.5 to 10 mm²

Advantage:
- Only one tool required for the most common crimping applications
- Fast and simple to replace the crimping inserts without the need for additional tools
- Secure and protected storage of replaceable inserts in a round magazine

Execution:
- Ergonomic hickory handle DIN 5111, extremely rigid
- Extended hammer head eye with additional plastic protective handle sleeve
- DIN 1041 hammer head, C45 steel, forged, hardened, annealed
- Polished working surface

Advantage:
- Head and handle are connected via a safety ring wedge

Technical data:
- Recoil-free
- Material of long handle: Hickory
- Handle fastening: Splined
- Protective handle sleeve available: Yes

Prod. Gr. 520

GEDORE ROTBAND-PLUS machinist's hammers (DIN 1041)

WERKZEUGE FÜRS LEBEN

DBGM patent no. 0703045

Execution:
- With long, hardened protective handle sheath
- Hammer head DIN 1041, forged, hardened and tempered
- Ergonomic Hickory wooden handle DIN 5111, extremely rigid

Advantage:
- With the safest possible connection; the protective handle sheath, ring-shaped wedge, fastening plate and wood screw turn the hammer head and handle into a single unit

Technical data:
- Recoil-free
- Material of long handle: Hickory
- Handle fastening: Bolted with locking plate
- Protective handle sleeve available: Yes

PEDDINGHAUS ULTRATEC machinist's hammers

3-component handle

Execution:
- handle inseparably connected with the hammer head
- non-slip elastomer grip layer
- hammer head made from quality steel in line with DIN 1041
- handle with unbreakable fibre glass core and ergonomically shaped PP base layer

Advantage:
- reduced vibration for fatigue-free work

Technical data:
- Material of long handle: Three-component plastic
- Handle fastening: Glued

HAZET Hatchet, axe and pickaroon

With hickory wood handle

Application:
Ident. No. 500–520: For universal use in forestry and gardening work
Ident. No. 550: For moving and lifting wooden beams and tree trunks

Execution:
- Ergonomically shaped hickory wood handle, does not splinter
- Non-slip coating on the end of the handle
- **Ident. No. 500:** Tool head and wooden handle with double safety wedging
- **Ident. No. 500–520:** Head made of high-quality C60 tool steel
- **Ident. No. 520:**
  - Tool head and wooden handle with triple safety wedging
  - Impact protection sleeve to increase the service life in the event of missed strikes
- High splitting performance thanks to optimised head shape
- **Ident. No. 550:**
  - Professional double wedging between tool head and handle
  - Steel part forged and hardened

Advantage:
- **Ident. No. 500–520:** Easily penetrates wood thanks to the specially polished cutting edge (flap disc sanding technique)

ATORN Soft-face hammers

recoil-free

Application:
Powerful impact action on metal while being gentle on muscles and joints thanks to lack of recoil.

Execution:
- Impact heads made from shatterproof polyurethane, replaceable
- Powder-coated precision steel tube handle

Advantage:
- Ergonomic rubber handle
- Hammer body filled with cast iron shot for recoil-free working

Technical data:
- Recoil-free: Yes
- Material of long handle: Steel
- Impact insert, interchangeable: Yes
- Colour of hammer head insert: Blue
- Handle fastening: Welded
- Protective handle sleeve available

wiha Soft-face hammers

recoil-free

Application:
Ideally suited for straightening workpieces on machine tables.

Execution:
- Polyurethane heads, yellow, shatterproof, medium-hard
- **Ident. No. 125–160:** With steel tube handle and rubber grip

Advantage:
- Gentle on arms and muscles as the recoil is reduced
- The metal shot in the hammer head doubles the impact effect compared to standard hammers

Technical data:
- Recoil-free: Yes
- Impact insert, interchangeable: Yes

HALDER SIMPLEX soft-face hammers

With 1 composite rubber tip and 1 super plastic tip each

Application:
For medium-hard impacts when assembling sharp-edged workpieces

Execution:
- Soft-face hammer combined with rubber composition and superplastic
- Black rubber composition, medium-hard, very low wear, vibration damping, odourless
- Superplastic made of extruded, extremely homogeneous material, white, medium-hard, highly resistant and wear-proof.
- Housing made of malleable iron with integrated protective shaft sheath and high breakage resistance
- High-quality, vibration-damping, ergonomically shaped wooden handle; double-painted grip area

Advantage:
- All individual parts can be replaced and retrofitted, thus very economical

Technical data:
- Material of long handle: Robinia
- Handle fastening: Bolted

Hammer handle wedges

Tapered, for machinist's hammers and mallets

Application:
For safely connecting the hammer handle and hammer head

Execution:
- Tapered steel sleeve with all-round groove
- Fit by pressing or pushing into the wooden handle when the handle is inserted in the hammer eye.
- **Ident. No. 010–200:**
  - Use with machinist's hammers
  - Ref. 080 suitable for 800 to 1000 g heads
- **Ident. No. 210–240:**
  - Use with mallets and sledgehammers
  - Ref. 210 suitable for 800 to 1000 g heads

Advantage:
- Safety and accident prevention

Delivery:
Ident. No. 010–200: Pack of 5/price = pack price

GEDORE ROTBAND-PLUS sledgehammers

DBGM European patent no. 0703045

Execution:
- Forged hammer head to DIN 1042
- Ground head, painted black, polished work surfaces
- Ergonomic Hickory wooden handle DIN 5112, extremely rigid
- With long, hardened protective handle sheath

Advantage:
- With the safest possible connection; the protective handle sheath, ring-shaped wedge, fastening plate and wood screw turn the hammer head and handle into a single unit

Technical data:
- Recoil-free
- Handle fastening: Bolted with locking plate
- Material of long handle: Hickory
- Protective handle sleeve available: Yes
- Impact insert, interchangeable

RENNSTEIG Universal chisel hand guard

Application:
For mounting on chisel for improved grip and protection against injuries.

Execution:
- Made of PVC, black
- Suitable for all chisels with min. length 250 mm
- Suitable for flat-oval chisel cross-sections from 20x12 mm to 26x13 mm
- For octagonal chisel cross-section 16–18 mm

Technical data:
- Length: 110 mm

51269...	Ident. No.	100 ●

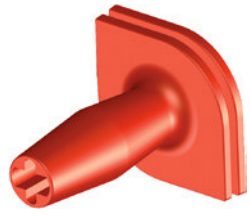
Prod. Gr. 522

GEDORE Chisel hand guard

Application:
For mounting on chisel for improved grip and protection against injuries.

Execution:
- Red PVC
- Suitable for all chisels with min. length 250 mm
- Ergonomic design
- Suitable for flat-oval chisel cross-section from 20 x 12 mm to 26 x 13 mm
- Suitable for octagonal chisel cross-section of 14-20 mm

Advantage:
- Optimum safety for your hands in the event of missed strikes thanks to larger, double protective plate
- Will not roll away thanks to the oval shape
- Your hands do not become fatigued – safe and secure grip maintained



Length (mm)		150
51269...	Ident. No.	010 ●

RENNSTEIG Pin punch set

Application:
For driving split pins and studs out of clearance holes.

Execution:
- High-alloy tool steel, fully chrome-plated
- High hardness level above 59 HRC for longer service life
- Safety impact head
- Colour powder coating
- Tip diameter: 3/4/5/6/8/10 mm

Advantage:
- Rounded strike edge; no damage to workpiece

Delivery:
In metal case

Composition of set			Supplied shaft cross-sections: 10-12 mm
Length (mm)			150
51280...	In metal case	Ident. No.	500 ●

Prod. Gr. 522

RENNSTEIG Pin punch set
With guide sleeve, knurled, impact piece made of silver steel, zinc-chromated

Application:
For driving split pins and studs out of clearance holes.

Execution:
- Chrome-vanadium steel, hardened drive point
- Tip diameter: 0.9/1.4/1.8/2.4/2.8/3.4/3.9/5.9 mm
- Pin punch lengths: 80-102 mm

Delivery:
In steel metal case

Composition of set			Supplied shaft cross-sections: 6-8 mm
Number of pieces in assortment/set			8

ATORN HSS bimetal hand saw blades

precise and sharp toothing, flexible, high-performance saw blade

Application:
Ident. No. 590–610: For universal sawing tasks including on rustproof sheet steel.
Ident. No. 620, 640: Universal use in industry and workshops
Ident. No. 630: For cutting hard and toughened steels that are difficult to machine

Execution:
- **Ident. No. 590–610:**
  - Elastic blade body made of tool steel
  - Long service life and excellent heat resistance
- **Ident. No. 620:**
  - Flexible, tooth-hardened blade, sharp milled teeth
  - Quality - Flex - SS - Tooth type
- **Ident. No. 630:**
  - Flexible, side-set blade, sharp milled teeth
  - Quality: Fully hardened HSS
- **Ident. No. 640:**
  - Toothed on both sides
  - Quality: SS high-speed steel, fully hardened

Advantage:
- **Ident. No. 590–610:**
  - Completely shatterproof
  - Particularly high cutting capacity thanks to optimally hardened HSS toothed section

Technical data:
- Saw blade length: 300 mm

ATORN Aluminium hand saw bow

Execution:
- Die-cast aluminium
- Weighs only 650 g
- Captive pins hold the blade

Advantage:
- Ergonomic, soft rubber handles for effortless work
- Quick-action clamping in grip

Suitable for sawblade length (mm)		300
Overhang (mm)		400
51849...	Ident. No.	020 ●

Prod. Gr. 528

ATORN Metal hand saw bow

Execution:
- Bracket made from strong square tubing
- Aluminium grip, blue, powder-coated

Advantage:
- Blade can be adjusted eight ways
- Quick-action clamping in grip

Suitable for sawblade length (mm)		300
51848...	Ident. No.	020 ●

Prod. Gr. 528

BAHCO ERGO metal saw bow

Execution:
- Alternative blade clamping at 55° for flush cuts
- Includes bimetal blade
- **Ident. No. 500:**
  - Clamping mechanism integrated in the handle
  - Lightweight yet sturdy thanks to 2-component frame with steel core
  - Comfortable, non-slip handle for secure grip and safe handling
- **Ident. No. 510:**
  - Ergonomic version with extremely high blade clamping for straight, clean cuts and precise saw kerfs
  - Centred blade for correct balance
  - Spring-tensioned blade fastening enables quick changeover of blades

Prod. Gr. 529

Miniature saw with saw blade

For bow saw spare blades up to 300 mm long

Application:
For sawing in hard-to-reach places.

Execution:
- Includes bi-metal blade

Delivery:
With SANDFLEX bimetal saw blade

Saw blade length (mm)		250
51847...	Ident. No.	020 ●

Prod. Gr. 519

Multi-purpose hand saw, 3 pieces

Flexible handle

Application:
Ideal for hard-to-reach areas

Execution:
- Handle can be adjusted and locked at 2 angles
- Multi-functional mount for saw blades as well as for 1/4 inch bits or bit holders
- The scope of delivery includes: 1x (sabre) saw blade for wood, 6 inch x 10 teeth, and 1x (sabre) saw blade for metal, 6 inch x 24 teeth
- 2-component handle with slide lock

Advantage:
- Suitable for all sabre saw blades with 1/2 inch mounts
- Secure hold and easy, tool-free replacement of the saw blade

Technical data:
- Length: 280 mm

Prod. Gr. 580

Saws for wood and plastic

Carpenters' saws, Japanese saws, fine saws

Application:
Ident. No. 200: For fine and medium-coarse wood
Ident. No. 210: For medium-coarse wood
Ident. No. 220: ProfiCut version allows optimum flexibility
Ident. No. 230: For universal use, e.g. including fine cross-cuts and angular cuts
Ident. No. 240–250: For wood and plastic

Execution:
- **Ident. No. 200–210:**
  - With unique XT toothing
  - Ergo-Superior 2-C handle, bolted
- **Ident. No. 220:**
  - Japan pit saw with teeth on both sides
  - Extra-fine toothing on one side of the blade
  - Progressive, coarse toothing on the other side
  - 2-C handle
- **Ident. No. 230:**
  - With hardened teeth tips
  - ProfiCut version with three-sided ground teeth
  - Extremely narrow saw kerf of just 0.9 mm
- **Ident. No. 240–250:**
  - Fine universal toothing with hardened tooth tips for long-lasting sharpness
  - With light steel back for excellent stability
  - Wooden handle
- **Ident. No. 250:**
  - Handle with depressed centre for flush sawing
  - The folding handle allows sawing on both the left-hand and right-hand sides

Advantage:
- **Ident. No. 200–210:** Hardened teeth tips for long-lasting sharpness
- **Ident. No. 220–230:** Flexible blade even allows flush sawing
- **Ident. No. 240–250:** High-performance fine-toothed saws for precise cuts

Erdi Ideal straight shears
Leverage transmission

Application:
For straight continuous and shaped cuts.

Execution:
- Forged cutting head, sheet metal handles
- Maximum sheet metal thickness that can be cut: 12 mm (600 N/mm²)

Advantage:
- **Ident. No. 500–550:** Micro-serrated blade for non-slip cutting
- **Ident. No. 500–550, 800–850:**
  - Noticeably reduced force application thanks to double lever ratio
  - With ergonomic two-component handles for a secure hold, even when high force is used
- **Ident. No. 710–760:**
  - Compact cutting head for excellent manoeuvrability
  - Optimised lever ratio for 25% less force application
  - Optimised blade geometry prevents slippage, even without micro serration
  - ERGO handles for fatigue-free work
- **Ident. No. 800–850:** HSS blades guarantee considerably longer service life, particularly for stainless steel sheets

Ident. No. 600: For cutting, sawing, filing and screwdriving.

Execution:
- **Ident. No. 500–550:** Stainless steel cutters
- **Ident. No. 600:**
  - Multi-tool with 7 options
  - Scissors, knives, saws, files, cross-head, large and small slotted screwdrivers

Advantage:
- **Ident. No. 500–550:**
  - Ergonomically shaped plastic handles with soft inlay and anti-slip protection
  - With practical one-handed lock
- **Ident. No. 600:**
  - Stainless steel tools for a long service life
  - Non-slip stainless steel handles with soft foam inlays for safe working processes

Delivery:
Ident. No. 600: With practical robust nylon belt pouch

ORION® Multi-purpose shears

Application:
For cutting sheet metal, soft wire, iron bands, fabric, cardboard, plastic, paper, leather, flowers, branches, carpets, twine etc.

Execution:
- Especially robust
- Rustproof stainless steel head
- Screw joint prevented from coming loose

Advantage:
- Serrated cutting edges, making them particularly non-slip
- With safety lock
- With ergonomic handles for safe and fatigue-free work

Length (mm)		180
Design		Straight
53723...	Ident. No.	010 ●

Prod. Gr. 598

ORION® All purpose and electrician's shears

Application:
For cutting cables, insulating material, cable ducts, leather, cardboard etc.

Execution:
- Stainless steel head
- Screw joint prevented from coming loose

Advantage:
- One blade has fine teeth, one is smooth, thereby ensuring precise working on cables
- Durable, robust two-component handle, non-slip and ergonomic

Length (mm)		140
53724...	Ident. No.	010 ●

Prod. Gr. 598

ATORN Safety tin snips
Leverage transmission

Application:
For safe cutting of steel and plastic strapping.

Execution:
- Special tool steel cutting head, forged, inductively hardened
- With plastic handles

Advantage:
- Sturdy hold-down clamp prevents the strap from whiplashing and causing damage

Length (mm)		600
Knife insert length (mm)		50
Max. material thickness for steel (mm)		1.2
53751...	Ident. No.	510 ●

Prod. Gr. 5HZ

Erdi Safety tin snips
With lever action

Application:
For safe cutting of steel and plastic strapping.

Execution:
- Drop-forged shear head
- One-handed operation, self-opening spring action

Advantage:
- GS-tested
- 2-component handle with anti-slip protection for fatigue-free work
- Lower section is flat to enable the shears to be easily slid beneath the strap
- Clamping device prevents the packaging strap from springing up and causing a hazard

Length (mm)		260
Material of handle		2-component plastic
Knife insert length (mm)		32
Max. material thickness for steel (mm)		1.0
53751...	Ident. No.	020 ●

Prod. Gr. 552

ATORN Crate pliers

Application:
For easy opening of crates without risk of injury.

Execution:
- Pushing the handles together raises the spring out of the stop cam groove
- When used on a bolt locking mechanism, the jaws will pull the bolt out of the groove of the retaining cam when the handles are pressed together

- Optimised lever transmission
- Ergonomically designed 2-component handle

Advantage:
- Using these pliers saves time, increases safety and presents no risk of injury

Length (mm)		221
Surface		Chrome plated
Material of handle		2-component plastic
53754...	Ident. No.	100 ●

Prod. Gr. 5HZ

SHAVIV Mango II/B10 universal deburring tool

Application:
For deburring straight edges, bore holes and slots.

Execution:
- Mango II handle with safety lock (direct mounting)

- High-quality, ergonomic handle with integrated blade magazine
- Includes 10x type B 10 blades
- For steel, aluminium, copper and plastics

Suitable for blade type		B
Material of handle		2-component plastic
53811...	Ident. No.	005 ●

Prod. Gr. 554

SHAVIV Mango II set B universal deburring tool

Application:
For deburring hard-to-reach areas such as in hollow pieces or housing parts.

Execution:
- Mango II handle with tool holder B

- High-quality, ergonomic handle with integrated blade magazine
- Includes one of each blade: type B 10 and B 20
- For steel, aluminium, copper, brass, cast iron and plastics

Suitable for blade type		B
Material of handle		2-component plastic
53811...	Ident. No.	016 ●

Prod. Gr. 554

SHAVIV Replacement blades, type B

Application:
Ident. No. 020, 040, 081: For deburring steel, aluminium, copper and plastics
Ident. No. 025, 042: For deburring steel, aluminium, copper, stainless steel and plastics
Ident. No. 030: For deburring steel, aluminium, copper, hardened steel and plastics
Ident. No. 035: For deburring cemented carbide, carbide and glass
Ident. No. 045: For deburring brass, cast iron and plastics
Ident. No. 050–055: For deburring brass, cast iron, stainless steel and plastics
Ident. No. 060: For simultaneous deburring on the inside and outside of bore holes in steel, aluminium, copper and plastics up to a thickness of 4 mm
Ident. No. 065: For simultaneous deburring on the inside and outside of bore holes in brass, cast iron and plastics up to a thickness of 4 mm
Ident. No. 075: For backwards deburring in hard-to-reach areas and in bore holes up to 20 mm in depth

Execution:
- **Ident. No. 045–055, 065:** For right-hand and left-hand use

Advantage:
- **Ident. No. 025, 042, 050:** Increased service life thanks to TiN coating
- **Ident. No. 081:** Increased service life thanks to cobalt alloy

ATORN HSS bimetal hole saws

made of HSS bimetal

Application:
For sawing circular holes in unalloyed steel (up to 700 N/mm²), non-ferrous metals, light metals, plastics, plaster, fibre and plywood boards, light-weight building boards and general wood processing.

Execution:
- High concentricity
- Solid base plate with improved stability
- Cutting depth maximum 38 mm
- Drill bit can be replaced with other commercially available mounts
- Excludes drive arbour and drill bit - please order separately!
- In individual packages, with information regarding cutting values

Advantage:
- Lateral slots in the body make the removal of cut-out parts easier
- More even cut, reduced vibration and heat generation and less force required thanks to variable tooth pitch with 4/6 teeth per inch

ATORN Accessories
for HSS bimetal hole saws

Application:
Ident. No. 230: As mounting shank for keyhole saws from 14-30 mm in diameter
Ident. No. 250: As mounting shank for keyhole saws from 32-210 mm in diameter
Ident. No. 270: As spare centring drill for keyhole saw mounting shanks
Ident. No. 280: For extending the hexagon mounting shanks of keyhole saws
Ident. No. 330: To eject the centre after cutting

Execution:
- **Ident. No. 210–250:** Including centre drill bit
- **Ident. No. 230, 250:** Please note that the striking mechanism must be switched off when SDS is used!
- **Ident. No. 270:** HSS centring drill, 6.35 mm

Ident. No. 210, 240

ATORN Hole saw sets

Application:
For sawing circular holes in unalloyed steel (up to 700 N/mm²), non-ferrous metals, light metals, plastics, plaster, fibre and plywood boards, light-weight building boards and general wood processing.

Execution:
- HSS bi-metal
- Two drive arbours with hexagon drive
- Including replacement centre drill bit
- Stored in robust tool case

Advantage:
- Lateral slots in the body make the removal of cut-out parts easier
- More even cut, reduced vibration and heat generation and less force required thanks to variable tooth pitch with 4/6 teeth per inch

GESIPA® Blind riveting pliers and riveters

Application:
For blind rivets made from aluminium alloy, copper, steel and stainless steel.

Execution:
- **Ident. No. 015:**
  - Pliers casing made from high-quality die-cast aluminium
  - Sturdy steel plier arms
  - Mandrel is ejected automatically using opening spring
- **Ident. No. 015–020:**
  - Comfortable working thanks to ergonomically shaped handles
  - Pliers feature slim head, particularly handy for difficult-to-reach areas
- **Ident. No. 020:**
  - High-quality chrome-vanadium steel pliers
  - The long tool stroke means that inconvenient adjustments are not necessary
  - Patented intermediate lever system reduces the force required and dampens the tear-off effect
- **Ident. No. 025:**
  - Robust placement device with riveting mandrel container
  - One-handed operation with 30% less force required
- **Ident. No. 030:** Optimum lever action and pinching guard for your hands

Delivery:
Ident. No. 015: With 4 nosepieces
Ident. No. 020–025: With 3 nosepieces

GESIPA® pneumatic-hydraulic blind rivet tools

Application:
Ident. No. 055: For rapid placement of blind rivets made of all materials up to 5 mm in diameter and aluminium/steel up to 6 mm in diameter.
Ident. No. 057: For rapid placement of blind rivets made of all materials up to 6.4 mm in diameter.
Ident. No. 058: For rapid placement of blind rivets made of all materials up to 6.4 mm in diameter and aluminium up to 8 mm in diameter.

Execution:
- **Ident. No. 040:**
  - Die-cast aluminium pneumatic cylinder
  - Aluminium rotating hydraulic head
  - Hardened and hard chrome-plated piston
- **Ident. No. 054–058:**
  - Powerful, patented gripping mechanism and chuck jaw system
  - The complete device stroke is used to place the rivet
  - Compressed air-saving technology; air required to place the rivet is also used to eject the riveting mandrel
  - Extremely low noise emissions.
  - High placement forces with lightweight device

GESIPA® AccuBird and PowerBird electromechanical blind riveters

Execution:

- **Ident. No. 061:**
  - Electro-mechanical placement device
  - with 14.4 V Li-ion rechargeable battery, 2.0 Ah
  - With integrated container for torn-off mandrels
  - Includes charger, interchangeable nosepiece and assembly key
- **Ident. No. 062:**
  - Extra-light electro-mechanical setting tool - only 900 g in weight
  - With 18 V CAS Li-ion battery 2.0 Ah (can also be operated with accessory 4.0 Ah battery)
  - With transparent collection container for torn-off mandrels
  - Includes charger, four colour-coded interchangeable nozzles
  - Ergonomically designed housing with soft grip
- **Ident. No. 062–087:** BLDC brushless motor
- **Ident. No. 083–087:**
  - electro-mechanical setting tool
  - with 18 V CAS Li-ion rechargeable battery, 2.0 Ah
  - integrated container for torn-off mandrels
  - includes charger, interchangeable nosepieces and installation key
  - hand-friendly housing with soft grip
- **Ident. No. 087:**
  - Various lighting options in the adjusting ring
  - Aluminium blind rivets including up to 8 mm in diameter

Advantage:

- **Ident. No. 061:** Quick working speed while also maintaining excellent performance
- **Ident. No. 062:**
  - Lightest device in the 18 V class
  - Nozzle and chuck jaw can be replaced without the need for tools

Delivery:

Ident. No. 061: In plastic case with 4 nosepieces and installation key

Ident. No. 062: In L-Boxx with riveter, 2.0 AH CAS battery, charger, 4 nozzles

GESIPA® Blind rivet nut hand tools

Execution:
- **Ident. No. 280:** Also available as accessories: M3, 4, 5, 6 mandrels and nozzles
- **Ident. No. 280–300:** Supplied with M5 thread mandrel and nozzle
- **Ident. No. 300:** Also available as accessories: M4, 5, 6 mandrels and nozzles
- **Ident. No. 301:**
  - Very good power transmission through ratchet function
  - Compact design
- **Ident. No. 301–303:**
  - Sets blind rivet nuts up to M12
  - Threaded mandrels and mouthpieces can be changed quickly and without tools
- **Ident. No. 303:**
  - Quick drill setup – fast and easy to drill into and drill out blind rivet nuts
  - Ergonomic design, low effort, optimised leverage

Advantage:
- **Ident. No. 280:** Minimum manual force required thanks to special lever arm arrangement and ratchet mechanism
- **Ident. No. 280–300:**
  - Simple to adjust the stroke using the knurled nut with stroke scale for secure and complete placement of the blind rivet nut
  - Rapid replacement of threaded mandrels without the need for tools

Delivery:
Ident. No. 280–300: replacement thread mandrels and nozzles available deliverable from stock - please request

GESIPA® FireBird, FireBird Pro and FireBird Pro Gold Edition cordless blind rivet nut setting tool

In case

Execution:
- **Ident. No. 401:**
  - Electro-mechanical placement device with automatic two-way drilling function
  - No cables, with 14.4-V Li-ion rechargeable battery, 2.0 Ah
  - Includes charger, nosepiece and M4, M5 and M6 threaded mandrels
  - in plastic case
  - For processing M3-M10 rivet nuts
- **Ident. No. 406:**
  - includes charger, nosepiece and M4, M5 and M6 threaded mandrels
  - for processing M3-M10 rivet nuts
- **Ident. No. 406–411:**
  - electro-mechanical setting tool with automatic two-way drilling function
  - cordless, with CAS sliding battery 18 V Li-Ion 2.0 Ah
  - in L-Boxx
- **Ident. No. 411:**
  - includes charger, nosepiece and M6, M8 and M10 threaded mandrels
  - for processing M3-M12 rivet nuts

Advantage:
- **Ident. No. 401:**
  - Quick working speed while also maintaining excellent performance
  - High degree of functional reliability thanks to simple drilling of blind rivet nuts and electronic control of the placement stroke
  - Extremely comfortable to use with fatigue-free working thanks to balanced centre of gravity and handle that adapts to your hand
- **Ident. No. 406–411:**
  - quick working speed while maintaining excellent performance
  - high functional reliability thanks to simple drilling of blind rivet nuts and electronic control of the setting stroke
  - balanced centre of gravity and ergonomic handle for extremely comfortable, fatigue-free work

GESIPA® Pneumatic-hydraulic blind rivet nut tool FireFox

Execution:
- Control: Adjustable setting force or path (stroke) optional
- Ergonomic design ensures fatigue-free work

Advantage:
- Placement force and stroke can be adjusted for optimum and reliable anchoring of rivet nuts
- As soon as the blind rivet nut is positioned by applying light pressure, the twisting process starts automatically
- Extremely quick placement procedure with subsequent automatic untwisting process
- Extremely comfortable to use with fatigue-free working thanks to balanced centre of gravity and handle that adapts to your hand

Delivery:
Includes thread mandrel and nosepiece M 4, M 5, M 6, M 8, further thread mandrels and nosepieces available from stock – please request

Application:
For practical cleaning of floors in different work areas

Execution:
- Pick-up capacity up to 9 kg
- Easy removal of collected metal parts using simple release mechanism on the shaft
- Telescopic handle can be adjusted from 750 to 1050 mm in length
- Sweeping width 400 mm, smooth-running plastic wheels

Technical data:
- Length: 1050 mm

PEDDINGHAUS Welding and holding magnets

Switchable

Application:
For precise straightening of workpieces, quickly and easily using the switchable magnetic force.

Execution:
- With a range of brackets for the most common applications

Technical data:
- Width of side: 25 mm
- Angle: 90 Degree

Limb length (mm)		110	140
51129...	Ident. No.	001 ●	002 ●

Prod. Gr. 592

Permanent magnet, switchable

Individually or as a pair connected by a hinge

Application:
For securing sheet metal, round and flat materials at any desired angle.

Execution:
- **Ident. No. 510:** Individual magnetic V-block, switchable
- **Ident. No. 610:**
  - Comprises 2 magnetic V-blocks connected by joint
  - Magnetic blocks can be activated/deactivated individually

ORION® Flat magnetic grips
With threaded bush

Application:
Auxiliary materials with universal application during clamping, assembling, lifting and welding operations, and for installing in devices etc.

Execution:
- With hard ferrite core
- Surface galvanised
- Magnetic shielding
- With threaded bush
- Operating temperature up to 100°C

Grease gun accessory set

In a metal case

Application:
For all common lubricating nipples, for accessing difficult-to-reach lubrication areas.

Connection thread		M10 x 1
Composition of set		2 hydraulic nosepieces for H, 1 hollow nosepiece for K, 1 pointed nosepiece for D, 1 16-mm slide coupling for M1, 1 300-mm reinforced hose, 3 150-mm curved nozzle pipes, 1 150-mm straight nozzle pipe, 1 90° bracket for hydraulic nosepiece, extension, quick-action coupling suitable for all hydraulic nosepieces, 3 H 1 lubricating nipples: M6 x 1, M8 x 1, M10 x 1, G 1/8, H 2: M6 x 1, M8 x 1, 1 thread adapter from G 1/8 to M10 x 1 female thread, in metal case

PRELIxx Pro high pressure grease gun and ZHFP two-handed grease gun

Execution:
- With 300-mm reinforced hose and hydraulic adapter
- **Ident. No. 010:**
  - Grease supply can be adjusted from 0.1-1.6 cm^3 per stroke
  - With filling nipple and vent valve
  - Ergonomic pump handle, non-slip. T-handle, grip and pressure-optimised
  - Zinc die-cast head, rolled thread on the grease gun pipe, damage-proof.
- **Ident. No. 100:**
  - Ergonomic, non-slip handles
  - Quicker and cleaner to change cartridges; environmentally friendly, as the cartridges are completely drained
  - Simple, wear-proof design with vacuum principle

Technical data:
- Connection thread: M10 x 1

Crank pump with suction pipe

Application:
For pumping diesel, heating oil, hydraulic and engine oils

Execution:
- Suitable for 60 and 200-l metal barrels
- 3-part metal suction tube with foot valve
- Adjustable G2-inch tap adapter
- 1 m transparent NW 25 plastic hose with elbow outlet

Advantage:
- Robust. Powerful, self-priming and perfectly sealed

PRESSOL Lever-operated cylinder-type drum pump

Application:
Media: Oils up to SAE 50, diesel, petroleum, kerosene, glycerin and undiluted radiator antifreeze

Execution:
- Can be used for 60, 200 and 220 l drums
- Pump housing with piston, hand lever and plastic outlet manifold
- Telescopic suction tube can be adjusted in length from 355 to 955 mm
- Drum adapter G 2'' and drum adapter M 64x4
- Delivery hose 1500 mm with steel outlet manifold
- Powder-coated steel housing, FKM seals

Advantage:
- Maintains a constant flow rate over years
- Can be completely disassembled – easy to clean
- Simple drum assembly by means of a drum adapter, freely positionable in a 30° grid

HORN TECALEMIT Drum pump K 10 C kit

With hose set

Application:
For diesel, heating oil, fuels (flammable liquids, low-viscosity mineral oils, radiator anti-freeze (undiluted)).

Execution:
- Hand-operated piston pump for pumping liquid from drums and small containers
- With telescopic suction pipe 470-925 mm immersion depth
- Hose set 1.5 m, DN19 x 4, HORN 365X, electrically conductive, with discharge manifold AK 20
- Medium temperature -20 to + 40°C
- Barrel thread M 64x4/G 2 inch

Delivery:
Fully ready for use with suction pipe and delivery hose in set

Technical data:
- Model: K 10 C Kit
- Min./max. immersion depth: 470-925 mm
- Feed volume per stroke: 0.25 l
- Suitable for container: 50-200 litres

HORN TECALEMIT Drum pump

Voltage 230 V, 50/60 Hz, shockproof, noise-suppressed

Application:
For pumping heating and diesel oils of hazard class A III from all standard containers. Fast and simple filling of heating oil into transport containers and refuelling of all kinds of diesel vehicles.

Execution:
- 230-V voltage, 50/60 Hz, shockproof, noise-suppressed
- Suction hose with filter
- Pump housing and nozzle valve made from high-quality, impact-resistant plastic
- **Ident. No. 120:**
  - Motor pump
  - Pressure hose with anti-kink spring
  - With nozzle valve, dispensing pump for supply of small volumes
- **Ident. No. 140:**
  - Self-priming hybrid pump
  - Delivery hose with automatic nozzle valve and hose swivel joint
  - 4-m connection cable with plug

Advantage:
- **Ident. No. 120:** Emergency manual mode in the event of power failures

ATORN Handles, extensions, wire rods and thread adapter for pipe brushes

With M6 or 1/2 inch thread connection

Application:

Ident. No. 001, 100: For screwing in the pipe brushes and extensions

Ident. No. 002–004, 101–102: For extending pipe brushes

Ident. No. 005, 103: For using the pipe brushes in a machine

Execution:

- **Ident. No. 001, 100:**
  - Ergonomically shaped two-component handle with optimal power transmission properties
  - Suspension hole
- **Ident. No. 002–003, 101:** Chuck, rust-free zinc plated

ATORN – Professional cordless work floodlight

Application:

Extremely robust lamp for heavy-duty use – light metal body with rubberised protective rim

Execution:

- Effective lighting duration when plugged into the mains: 24 h, when battery operated: 6–8 h
- Li-ion battery pack, 11.1 V
- Switching stages: Low 20%/Middle 45%/High 100%
- Fold-out foot to hang up or place in upright position
- Charging status and residual capacity display
- Charging option via barrel connector socket/USB output: 5 V

Advantage:

- Continuous light during day and night – possible to have the lights on and charge at the same time

Delivery:

Power supply including cables

Technical data:

- IP protection class: IP 54

SCANGRIP® LED work lamps

INNOVATION FROM DENMARK

NEW

Application:
Ident. No. 016–027: For individual lighting of dark areas when working on the move.

Execution:
- **Ident. No. 012:**
  - Light source COB LED light/spotlight: 1 x high-performance LED
  - Luminous flux 90–900 lux/spotlight 2000 lux
  - Luminous flux can be adjusted from 60–600 lumen (main lamp)
  - Spotlight 150 lumen
  - Power supply 3.7 V/2600 mAh Li-on
  - IP 54 degree of protection
- **Ident. No. 016:**
  - powerful and uniform illumination thanks to OPTILight function
  - Mounting via rotating hook or magnet
  - Adjustable luminous efficacy, state-of-charge indicator
  - Main lamp: 20-200 lm, spotlight: 120 lm
  - Minimum of 1,000 charging cycles possible
- **Ident. No. 016–027:** Dual temperature monitoring to protect the lamp and rechargeable battery
- **Ident. No. 027:**
  - Highly efficient multi-LED design with 32 LEDs
  - Convenient charging station, OPTILight function
  - Easy to mount and adjust using a rotating hook or powerful magnet
  - Rechargeable battery state-of-charge indicator, minimum of 1,000 charging cycles
  - Rotating and swivelling lamp head, spotlight
  - Adjustable luminous efficacy up to 500 lm

Advantage:
- **Ident. No. 012:** Operating time 15 hours, charging time 4 hours

Delivery:
Ident. No. 012: USB cable 1 m, operating instructions
Ident. No. 016: With USB charging cable

ATORN LED machine and workstation lamp

Voltage 230 V/AC/50 Hz

Execution:
- High-performance brand LED, colour temperature approx. 5500 K (cold white)
- Luminous flux approx. 1000 lumen
- Resistant to liquids such as water, oils, coolants and cleaning agents
- Lamp head and housing made of durable, anodised aluminium
- Flexible metal stem with rubber coating
- Switch integrated in the lamp base
- Energy efficiency class A+

Advantage:
- Completely watertight
- Can be used universally thanks to flexible goose-neck stem
- Made in Germany

Delivery:
Complete with screw terminal and screws for direct mounting, plus strong adhesive magnet, 80 mm

LED workstation lamps, “Highlight” and “Floodlight” models

With flexible lamp arm, 230 V 50 Hz

Execution:
- High-performance chip with lamp life of min. 50,000 operating hours
- **Ident. No. 150:**
  - LED module with very low power consumption
  - Streamlined shape, for universal use
  - Protected against splash water and dust, with power supply unit
  - anti-glare and flicker-free light, low-reflection, 175° uniform illumination
  - Luminous flux: 300 lm, light temperature: daylight white, approx. 5,500 K
  - Rubber-coated 66-mm magnetic base with adhesive force of 180 N
  - Lamp head 90 x 30 x 13 mm, total length 620 mm
  - Ref. no. 150: No dimmer
  - Ref. no. 152: With dimmer (continuously variable)
- **Ident. No. 160:**
  - LED light, with flexible light arm, rubber-coated
  - Low power consumption and low heat generation
  - Solid and robust design for heavy-duty use
  - Anti-glare and flicker-free light, low reflection, with 24 V power supply
  - Luminous flux: 950 lm, light temperature: daylight white approx. 5,500 K, 105° uniform illumination
  - 88-mm magnetic base with 420 N adhesive force
  - Total length 850 mm, lamp head 220 x 40 x 20 mm
  - Ref. no. 160: No dimmer
  - Ref. no. 162: With dimmer (continuously variable)

Advantage:
- Waterproof and extremely robust
- Magnetic rubber base - prevents scratches to coated surfaces
- Made in Germany - high-quality product for demanding industrial use

ATORN LED light strips for machines and workstations IP 67

With 230 V or with 24 V connection

Application:
For lighting workbenches, cabinets, shelves, inside and outside machines or simply on the wall

Execution:
- High-performance brand LED, light colour temperature 5500 K (cold white), 140° beam angle
- Lamp housing made of anodised aluminium
- Resistant to liquids such as water, oils, coolants and cleaning agents
- Energy efficiency class A++
- Can be mounted using magnets or with two mounting brackets for precise alignment of the light beam.

Advantage:
- For universal use
- The slim design means it fits easily into tight spaces and guarantees optimum illumination of the work surface.
- Made in Germany

Delivery:
With rubber-coated strong adhesive magnets (2 pcs. /45 mm) and an additional two mounting brackets with screws for mounting

Technical data:
- IP protection class: IP 67

Batteries or rechargeable batteries

Application:
Ident. No. 010: Focusing function for optimum short- and long-range illumination

Execution:
- **Ident. No. 002:**
  - Anodised aluminium housing
  - Light and strong
  - Durable and powerful CREE LED
- **Ident. No. 005:** Rubberised push-button switch at the lamp end
- **Ident. No. 005–007:**
  - Light beam can be focused with infinite adjustment by moving the lamp head
  - Sturdy aluminium lamp, steel retaining clip
- **Ident. No. 007:**
  - Push button at the lamp end, with simultaneous strong magnetic function
  - 3 switchable light modes
  - The micro-USB charging input is protected by a sliding cover
  - Small LED at the side to indicate the charging status
- **Ident. No. 010:**
  - high-performance Cree LED 5 W
  - Light beam can be focused using one hand
  - Waterproof and dustproof, IP 66 degree of protection
  - 4 light levels

Delivery:
Ident. No. 002: Includes AAA batteries
Ident. No. 005: Including 2 x AAA batteries
Ident. No. 007: Includes battery and USB charging cable

ATORN LED inspection lamps
with flexible head

Application:
for illuminating and finding scratches, dirt or leaks

Execution:
- with two LEDs – can be switched with two separate switches.
- 2. switching: UV LED (black light 395 nm)
- bendable lamp head, strong magnet in the lamp base
- Protection class IP 54
- **Ident. No. 110:** 1. switching: CRI 95 LED with true-colour, warm white light
- **Ident. No. 120:** 1. switching: CREE LED with three stages of true-colour, warm white light at 25, 50 and 100%

Delivery:
Battery included

Technical data:
- Material: Aluminium
- Colour: Dark grey
- Number of rechargeable batteries/batteries: 1 PCS

ATORN LED inspection lamps

Execution:
- **Ident. No. 205:**
  - Light chip with 120 lumen light output
  - Lateral holding magnet, rubberised push switch
  - Rotatable push-on clip
- **Ident. No. 215:**
  - Light chip with 150 lumens light output, additional LED at the head end
  - Retaining magnet on a rotatable retaining clip at the side
  - Rechargeable 3.7 V lithium-ion battery with USB contact
  - Charge level display
- **Ident. No. 220:**
  - Side main light with powerful LEDs, light level 30% and 100%
  - UV test light in the lamp head
  - Rechargeable lithium-ion battery, can be charged using a micro USB socket
  - Ball joint on the lamp base with strong holding magnet, can be tilted up to 45° and can be rotated 360°
  - Robust retaining clip on the rear side with integrated retaining magnet
  - Battery status indicator, IP 54 splash-proof housing

Delivery:
Ident. No. 205: Incl. 3 x AAA batteries
Ident. No. 215: incl. battery and USB charging cable
Ident. No. 220: Includes rechargeable battery and USB charging cable, does not include charging adapter

ATORN Headlamps

Batteries or rechargeable batteries

Execution:

- **Ident. No. 300:**
  - Rubberised push switch at the lamp head
  - Switch between three light modes (medium, high and red LED), battery compartment in the lamp head
  - The motion sensor can be activated via an additional pressure switch.
  - Housing made of impact-resistant ABS plastic
- **Ident. No. 305:**
  - Switch: Main light low, main light high, off – or via sensor: On/Off
  - Weighs only 110 g, but is a robust head lamp
  - 3.7 V battery can be charged via micro USB jack
  - Swivel-mounted luminous element
  - Protection class IP 65
- **Ident. No. 310:**
  - Robust aluminium housing, push switch on the lamp head
  - 4 light modes (high, medium, low, strobe)
  - Battery on the back of the head placed in a robust ABS housing with additional red signal lamp
  - Textile headband, adjustable for optimum comfort
  - With battery status display via LEDs and overload protection
  - 3.7 V rechargeable battery with 2,600 mAh

Advantage:

- **Ident. No. 305:** Switches on/off by sensor to keep both hands free
- **Ident. No. 310:** Extra-long 8-hour illumination duration

Delivery:

Ident. No. 300: Includes 3x AAA batteries and fabric head band

LEDLENSER LED high-performance lamps

Execution:
- Advanced Focus System for efficient, precisely adjusted light in a focused and defocused condition
- **Ident. No. 015:** Ultra-compact torch for keychains – weighs just 36 g and is only 103 mm long (defocused)
- **Ident. No. 015–020:**
  - Outstanding light quality – brightness, range and duration are ideally adapted to the energy source
  - Eco-friendly battery, rechargeable via micro-USB
- **Ident. No. 020:** Small, lightweight, powerful pen torch – weighs just 55 g and is only 150 mm long (defocused), brightness of up to 200 lm
- **Ident. No. 030:** Extremely high protection against dust and water (protection class IP68) thanks to Flex Sealing Technology
- **Ident. No. 030, 045:**
  - Smart Light Technology allows all lighting functions to be customised to suit preferences and requirements
  - Constant luminous flux over a long period of time
  - Battery can be conveniently charged via the magnetic charging system
- **Ident. No. 040:**
  - Outstanding LEDLENSER light quality – brightness, range and duration of light are ideally adapted to the energy source
  - Rapid Focus function provides quick adjustment of the light cone
  - End cap switch for easy operation
  - Operates with four AAA alkaline batteries
- **Ident. No. 045:** Extremely high protection against dust and water (protection class IP68)

Delivery:
Ident. No. 015–020: With battery, pocket clip and USB charging cable
Ident. No. 030, 045: Rechargeable battery pack, hand strap, magnetic charging cable

LEDLENSER LED high-performance headlamps

Execution:

- **Ident. No. 100–110:**
  - Advanced Focus System for precise focusing of light
  - The head of the torch can be swivelled up and down through a continuous 160° range
- **Ident. No. 100–113, 120:**
  - Easy to operate, with a wheel switch on the head of the torch that allows the light to be dimmed through a continuous range
  - Extremely high protection against dust and water (protection class IP67) thanks to Flex Sealing Technology
- **Ident. No. 110–113:** Robust magnetic charging system allows the torch to be charged without the need for small, multi-part connectors
- **Ident. No. 113:**
  - Compact, powerful and versatile head torch with Advanced Focus System
  - The head of the torch can be swivelled up and down through a continuous 130° range
- **Ident. No. 115:**
  - Multicolour LED in red, green and blue
  - Two energy modes (constant light and energy saving) for especially constant or energy-saving light as required
  - Two battery types (Li-ion and AA) that combine the benefits of rechargeable and replaceable batteries
  - Li-ion battery can easily be charged via the magnetic USB cable
  - Innovative mounting system allows the head of the torch to be removed and re-attached when needed for maximum flexibility
  - Advanced Focus System for simple and intuitive adjustment of the light cone
  - Mounting options on helmets: Rubberised headband, self-adhesive mounting material
- **Ident. No. 120:**
  - Extremely powerful head lamp with adjustable focus: high colour rendering, neutral white, constant and flicker-free light
  - Protective elements on the front glass and battery for high resistance to all kinds of impacts
  - Large scope of supply for versatile mounting and use

ATORN Tool case with tool assortment, 50 pcs

Application:
Tool case equipped with wide range of tools, with hard foam inlay – all tools are neatly laid out and held securely.

Execution:
- Robust and durable tools in industrial quality
- Screwdriver, pliers and reversible ratchet with two-component handles with perfect ergonomic functionality
- case external dimensions: H 440 x W 505 x D 130 mm

Advantage:
- Case features sandwich frame construction that affords the case a large carrying capacity
- Fasteners closed with your knees firmly press the case together and give it excellent stability
- Softtouch grip; provides support and comfort when being worn
- Easy to open the case on both sides; tools are held securely in foam and cannot fall out
- Partition panel in the centre of the case also provides optimum protection for tools

Delivery:
- 1 x combination spanner set DIN 3113 A, chrome-plated 8 pieces, size 8–19 mm
- 1 x hexagonal socket wrench inserts 1/2 inch, size 10 to 24 mm
- 1 x hexagonal spark plug insert 1/2 inch with rubber insert size 20.8
- 1 x reversible ratchet 1/2 inch with quick release button 255 mm
- 1 x handle with sliding piece 1/2 inch and cardan joint 70 mm
- 1 x extension 1/2 inch, 125 mm and 250 mm
- 1 x hexagonal ball head T-handle wrench set, 9 pcs, long, size 1.5–10 mm
- Workshop screwdrivers, slotted, 1 each of 0.8 x 4.5/1.0 x 5.5/1.2 x 6.5 mm
- Phillips screwdrivers, 1 each PH 1 x 80 mm, PH 2 x 100 mm
- 1 x machinist's hammer, DIN 1041 with nylon shaft protection sleeve, 300 g
- 1 x water pump pliers 250 mm
- 1 x combination pliers, 180 mm
- 1 x side cutters 160 mm
- 1 x VDE single-pole voltage tester, 150–250 volts
- 1 x pocket tape rule, end hook with magnet, 5 metres
- 1 x snipe nose pliers, bent, 200 mm
- 1 x universal knife, with 18-mm snap-off blade
- 1 x LED pen lamp incl. battery
- 1 x universal voltage tester, 6–24 volts

ATORN Safety glasses (EN standard 166 | 170)

Model: A-View 3

Application:
Grinding, turning and milling work, precision engineering, workshop, assembly and laboratory work

Execution:
- Robust safety glasses for heavy industrial use
- Additional, soft, multi-component sealing lip in the eyebrow area to protect against foreign objects entering from above
- Vents in the seal area ensure excellent air circulation
- Individually adjustable temple angle for maximum comfort and perfect fit
- Soft nose bridge and rubberised temple ends ensure pressure-free and non-slip wearing
- Tested in accordance with EN 166, EN 170
- Frame designation EN166 F CE

uvex Disposable ear plugs (EN standard 352-2)
Model: Hi-com

Execution:
- Reduces the sensation of ringing in the ears which can occur when wearing ear protection
- Built-in cavities provide a greater surface area in the direction of the eardrum
- Absorption of disruptive noises
- Excellent speech perception
- Good insulation values
- Closed surface prevents penetration by foreign bodies
- Meets the additional requirements: W (hearing a general warning signal)

Technical data:
- Category: III
- EN standard: 352-2
- Model: Hi-com
- Sound insulation value: 26 dB
- Material: Polyurethane foam
- Colour: Lime green

ATORN Particulate-filtering half face mask (EN standard 149)

A-Mask series

Execution:
- Flexibly adjustable nose clip
- Soft sealing lip ensures that the mask fits securely and comfortably
- Soft material edges for excellent comfort
- **Ident. No. 001, 003, 005:**
- Full-length head harness for a comfortable and secure fit
- Folding FFP mask: Design in three pieces allows facial movements during speech, making it particularly comfortable to wear

HIGHLIGHT

- **Ident. No. 002, 004, 006:** Full-length head harness for a comfortable and secure fit (A-Mask 2 and A-Mask 4)

Breathing protection half face mask (EN standard 140)

Secure-Click™ HF-800SD series

Execution:
- With voice membrane: For easier communication during work
- Unique and fast Secure-Click™ filter connection: Align the filter and push to hear a click
- Adjustable strap for a secure and comfortable fit
- Push-button seal check: Provides increased confidence that the respirator is being worn properly
- Face seal with flexible nose piece: Soft and comfortable to wear
- Reduced breathing resistance: Two dual-flow filters combine four airflow paths for easier breathing

NEW

- Exhalation valve helps direct heat from breath and moisture downwards
- Slim filter design for a good field of vision

Filters and accessories for Breathing protection half face masks (EN standard 143)

Application:
Suitable for all reusable 3M™ half and full face masks with bayonet connection system

Execution:
- Trapezoidal gas and vapour filters combine outstanding protection with excellent wearing comfort
- Low breathing resistance
- Even weight distribution when attached to the mask
- Ref. no. 365 and 375: Insert filter to be used in combination with the gas filters
- Ref. no. 405: The filter cover is required for combining the particle insert filters (55848365 and 55848375) with the gas and vapour filters.

NEW

- Ref. no. 411: For attaching the particulate filter insert (55848365 and 55848375) to a respirator system. Equips gas and vapour filters with additional particulate protection.

Automatic welding helmet (EN standard 166 | 175 | 379)

Model: p550 neo

Application:
Electrode welding (stick welding, SMAW), MIG/MAG (gas metal arc welding, GMAW), GMAW high-performance welding, flux-core welding, TIG welding (GTAW), plasma welding, microplasma welding, plasma cutting

Execution:
- Classic helmet featuring the latest in cartridge technology for shade control
- True-colour view: A specially developed UV/IR filter enables colour perception and brings colours into the world of the welder
- Perfect protection due to short response times when darkening
- New energy concept: “Super sleep mode” means the electronics are significantly more energy efficient and can be used for approx. 3000 hours without changing the battery
- Manual adjustment
- Power supply: Solar cells, 2 lithium button cells (approx. 3000 hours operating time)
- Switching time from light to dark: 0.1 ms
- Switch-off time: 0.05-1.0 s
- Y Series

Technical data:
- Category: II
- EN standard: 166 | 175 | 379
- Classification according to EN 379: 1 / 1 / 1 / 2
- Model: p550 neo
- Width of glass: 50 mm
- Glass height: 100 mm
- Min./max. protection level: 9-13
- Translucency when not activated: Protection level 4

55700...	Ident. No.	200 ●

Prod. Gr. 5SI

Automatic welding helmet (EN standard 166 | 175 | 379)

Model: crystal 2.0

Application:
Electrode welding (stick welding, SMAW), MIG/MAG (gas metal arc welding, GMAW), GMAW high-performance welding, flux-core welding, TIG welding (GTAW), plasma welding, microplasma welding, plasma cutting, gas welding, grinding mode

Execution:
- Crystal Lens Technology: Crystal-clear visibility before, during and after welding
- In the light state, colour perception is exceptionally realistic and in the darkened state, a detailed, high-contrast view of the welding bath is possible
- Heat-reflective paint keeps your head cool
- Grinding mode: The brightest view for grinding that a welding helmet has ever offered
- Autopilot or manual adjustment
- Power supply: Solar cells, 2 lithium button cells (approx. 3000 hours operating time)
- Switching time from light to dark: 0.1 ms
- Switch-off time: 0.05-1.0 s, with dimming function
- Sphere series

Technical data:
- Category: II
- EN standard: 166 | 175 | 379
- Classification according to EN 379: 1 / 1 / 1 / 2
- Model: crystal 2.0
- Width of glass: 100 mm
- Glass height: 50 mm
- Min./max. protection level: 4-12
- Translucency when not activated: Protection level 2

55700...	Ident. No.	201 ●

Prod. Gr. 5SI

Automatic welding helmet with powered air respirator (EN standard 166 | 175 | 379 | 12941)

Model: crystal 2.0

Application:
Electrode welding (stick welding, SMAW), MIG/MAG (gas metal arc welding, GMAW), GMAW high-performance welding, flux-core welding, TIG welding (GTAW), plasma welding, microplasma welding, plasma cutting, gas welding, grinding mode

Execution:
- Crystal Lens Technology: Crystal-clear visibility before, during and after welding
- In the light state, colour perception is exceptionally realistic and in the darkened state, a detailed, high-contrast view of the welding bath is possible
- Heat-reflective paint keeps your head cool
- Grinding mode: The brightest view for grinding that a welding helmet has ever offered
- Autopilot or manual adjustment
- Power supply: Solar cells, 2 lithium button cells (approx. 3000 hours operating time)
- Switching time from light to dark: 0.1 ms
- Switch-off time: 0.05-1.0 s, with dimming function
- Includes powered air respirator e3000x: Constant breathing protection throughout the welding process
- Sphere series

Technical data:
- Category: II
- EN standard: 166 | 175 | 379 | 12941
- Classification according to EN 379: 1 / 1 / 1 / 2
- Model: crystal 2.0
- Width of glass: 100 mm
- Glass height: 50 mm

55700...	Ident. No.	202 ●

Prod. Gr. 5SI

Automatic welding helmet (EN standard 166 | 175 | 379)

Model: vegaview 2.5

Application:
Electrode welding (stick welding, SMAW), MIG/MAG (gas metal arc welding, GMAW), GMAW high-performance welding, flux-core welding, TIG welding (GTAW), plasma welding, microplasma welding, plasma cutting, gas welding, grinding mode

Execution:
- Detailed and true-colour view of the welding process
- Extremely bright shade cartridge, which offers around 400 % better visibility than conventional automatic welding helmets in the light state at protection level 2.5
- Grinding mode: A simple push of a button on the outside of the welding helmet activates the grinding mode
- Manual adjustment (outside)
- Power supply: Solar cells, 2 lithium button cells (approx. 3000 hours operating time)
- Switching time from light to dark: 0.1 ms
- Switch-off time: 0.05-1.0 s, with dimming function
- Sphere series

Technical data:
- Category: II
- EN standard: 166 | 175 | 379
- Classification according to EN 379: 1 / 1 / 1 / 2
- Model: vegaview 2.5
- Width of glass: 100 mm
- Glass height: 50 mm
- Min./max. protection level: 8-12
- Translucency when not activated: Protection level 2,5

55700...	Ident. No.	203 ●

Prod. Gr. 5SI

Automatic welding helmet with fresh air connection (EN standard 166 | 175 | 379)

Model: vegaview 2.5

Application:
Electrode welding (stick welding, SMAW), MIG/MAG (gas metal arc welding, GMAW), GMAW high-performance welding, flux-core welding, TIG welding (GTAW), plasma welding, microplasma welding, plasma cutting, gas welding, grinding mode

Execution:
- Detailed and true-colour view of the welding process
- Extremely bright shade cartridge, which offers around 400 % better visibility than conventional automatic welding helmets in the light state at protection level 2.5
- With fresh air connection: May be upgraded with a powered air respirator e3000x
- Grinding mode: A simple push of a button on the outside of the welding helmet activates the grinding mode
- Manual adjustment (outside)
- Power supply: Solar cells, 2 lithium button cells (approx. 3000 hours operating time)
- Switching time from light to dark: 0.1 ms
- Switch-off time: 0.05-1.0 s, with dimming function
- Sphere series

Technical data:
- Category: II
- EN standard: 166 | 175 | 379
- Classification according to EN 379: 1 / 1 / 1 / 2

Grinding helmet with fresh air connection (EN standard 166 | 169 | 170 | 12941)

Model: clearmaxx

Application:
Ideal for grinding applications in metalworking, paint shops or the automotive industry

Execution:
- Unrestricted and clear view of the workplace
- Can be combined with powered air respirator e3000x
- Individually controlled air distribution: A stepless rotary switch allows up to 20 % of the air from the fresh air system to be fed into the forehead area for additional cooling. Avoids direct air flow over the eyes that could cause them to dry out.
- clearmaxx series

Technical data:
- Category: II
- EN standard: 166 | 169 | 170 | 12941
- Model: clearmaxx

55700...	Ident. No.	206 ●

Prod. Gr. 5SI

Swiss air respirator system (EN standard 12941)

Application:
Ideal for welding and grinding work in the automotive, heavy metals and chemical industries

Execution:
- Flexible to use and completely independent of the helmet system used
- Guaranteed TH3 protection: 99.8 % of all harmful particulates, aerosols, vapours, smoke and viruses are reliably filled out of the surrounding air
- Ventilated half face mask made of flame retardant material completely covers the mouth and nose
- Y-hose with adjustable neck strap and flexible hose elements guides the air directly into the half face mask
- Shoulder support unit allows the weight of the super-light filter system (550 g) to be perfectly ergonomically distributed and thus avoids pain in the neck and back
- Infinitely adjustable headband for all sizes from XS to XL
- Blower unit with automatic airflow calibration and 14-hour high-capacity battery for an uninterrupted working day
- Easy and safe use, as no fit test is necessary
- Improve performance with clean air
- Increased productivity by eliminating forced breaks

Delivery:
Consisting of comfort half face mask, blower unit, hose connections, head and neck strap, shoulder support unit, control panel, charger and backpack

Technical data:
- Category: III
- EN standard: 12941
- Model: swiss air

Speedglas™ Automatic welding helmets (EN standard 166 | 175 | 379)

Model: 100 V

Application:
For MIG/MAG and WIG welding, manual metal arc welding, tack welding and grinding

Execution:
- Comfortable headband with smooth ratchet mechanism for a perfect fit
- Power supply: Lithium button cell (approx. 1500 hours operating time)
- Switching time from light to dark: 0.1 ms

Technical data:
- Category: II
- EN standard: 166 | 175 | 379
- Classification according to EN 379: 1 / 2 / 2 / 2
- Model: 100V
- Width of glass: 93 mm
- Glass height: 44 mm
- Min./max. protection level: 8-12
- Translucency when not activated: Protection level 3

Speedglas™ Automatic welding helmets (EN standard 166 | 175 | 379)

Model: 9002NC

Application:
For MIG/MAG and WIG welding, manual metal arc welding, plasma arc welding, tack welding and grinding

Execution:
- 3M™ Speedglass™ Natural Colour Technology for natural colour reproduction, increased contrast and enhanced visibility
- Increased freedom of movement as the mask can be worn closer to the face thanks to the exhalation valve integrated into the helmet shell
- Comfortable headband with smooth adjustment wheel for a perfect fit
- Power supply: Lithium button cell (approx. 2000 hours operating time)
- Switching time from light to dark: 0.1 ms

Technical data:
- Category: II
- EN standard: 166 | 175 | 379

Speedglas™ Automatic welding helmets (EN standard 166 | 175 | 379)

Model: 9100

Application:
For MIG/MAG and WIG welding, manual metal arc welding, plasma arc welding, tack welding and grinding

Execution:
- Patented comfort headband for enhanced comfort also with the mask flipped up
- Optimum results for versatile welding thanks to a choice of seven protection levels (5, 8, 9-13)
- Enhanced ear and side protection provide additional safety
- Lateral valves allow exhaled air to escape more easily
- Power supply: Lithium button cell (approx. 2800 hours operating time for ref. no. 310, approx. 2500 hours operating time for ref. no. 320 and approx. 2000 hours operating time for ref. no. 330)

YOU TAKE ON DIFFICULT CHALLENGES.
WE HAVE WHAT IT TAKES.
Do you need more than just a hammer, pair of pliers or a screwdriver?
We have the full range for you. Machining tools, handling systems and
measuring technology. However, we also offer tailor-made system solutions,
large and small machinery and complete factory equipment.
In total, more than 120,000 products.

Drawer cabinets - selection overview

HK drawer cabinets facilitate and simplify the proper storage and provision of tools of all kinds, equipment and accessories. Store your tools in these cabinets to save space and time. Your tools are kept clearly organised at your fingertips and held gently and securely. The cabinets are deliverable in a wide range of variants for all operating conditions.

A high level of adaptability is required in the storage facilities due to the wide range of possible tools and equipment, as well as requirements within facilities. Therefore, flexibility must be guaranteed with regard to drawer design and equipment materials, especially when it comes to cabinet housings.

The **HAHN+KOLB drawer cabinet range** fulfils all these requirements.

Depending on the goods stored, and for optimum use of space, we offer:

3 different models in depths of 550 mm (550 series), 700 mm (700 series) and 800 mm (800 series). These are each available in widths of S (narrow), B (wide) and BX (extra wide) as well as in 4 different heights (800, 1036, 1336, 1568 mm).

The many potential combinations resulting from this modular design can even stretch to complete tool distribution systems and storage facilities. All components are largely interchangeable and can be removed and converted at any time, depending on operational and spatial requirements.

S (narrow = 722 mm) | **B (wide = 1022 mm)** | **BX (extra wide = 1422 mm)**

RAL 7035 light grey	RAL 7038 agate grey	RAL 7042 traffic grey	RAL 8019 grey brown	RAL 9005 jet black	RAL 9006 white aluminium	RAL 9010 pure white	

Colours may be subject to printing-related differences; the original colours according to RAL are definitive.

advantages and features of HK drawer cabinets

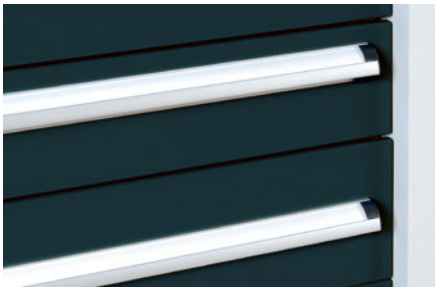
housing:
- robust welded sheet steel construction
- all cabinets are equipped with a plastic-coated, 8 mm cover panel as standard.
- tip-proof thanks to built-in drawer individual extension lock
- grid system – 30: 30 mm enables individual division of drawers within the useful height on all models. the layout can subsequently be changed as required.
- partially and fully extendible drawers can be combined in the cabinet housings as required.

drawers:
- with high-quality Delrin rollers.
- rails are laterally inserted, not screwed.
- slots 'all around' for inserting compartment rails and dividers.
- perforated steel sheet base (25 mm hole spacing) for attaching and fastening individual components.
- in addition to our complete sets, there is also a large selection of individual equipment features for customising your cabinet set-up.

full extension:
- 100% full extension with 70 kg and 100 kg load capacity, 100% full extension with 200 kg load capacity with uniformly distributed load.
- ideal sliding properties due to specially formed profile and two-sided positive guide with lateral guide rollers.

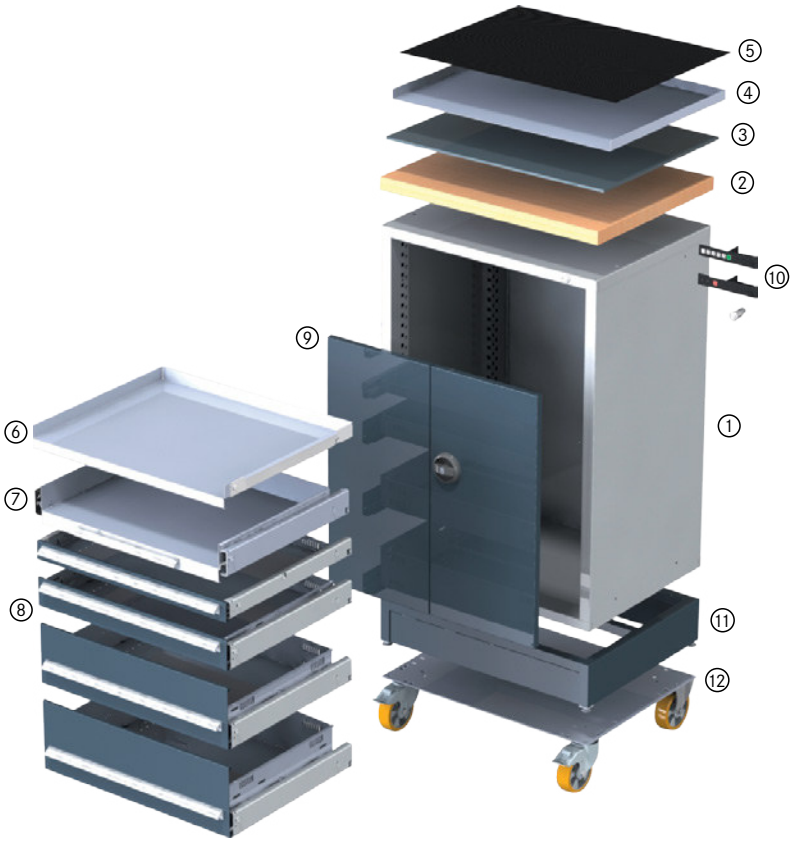
partial extension:
- approx. 80% partial extension with 70 kg and 100 kg load capacity with uniformly distributed load.
- forced guiding by formed profile, smooth operation due to Delrin rollers.

hard foam inserts:
- we offer suitable hard foam inserts completely fitted with tools for all HK drawer cabinets.
- safe and protected storage of expensive tools with customised recesses
- clearly arranged and organised drawers
- contrasting blue immediately shows missing tools
- we offer our light box or contour scanner for creating customised layouts for existing and special tools



handle strips:
- aluminium handle strips with paper and cellon strips and side cover caps.
- load capacity of the drawers is visible by the coloured marking on the cover caps.
- drawers flush with cabinet housing, no protruding handle strips.
- equipped with 2 handle strips from a drawer front height of 240 mm, for improved handling when opening the drawer

HK drawer cabinets
Best quality – made in Germany



① Cabinet housing consisting of a robust welded sheet steel construction
② Multiplex panel, painted, height 20 mm
③ Cover panel, plastic-coated
④ Cover panel with raised edge on 3 sides
⑤ Ribbed rubber lining
⑥ Shelf, height-adjustable
⑦ Shelf with full extension, height-adjustable
⑧ Drawers with full extension and a front height of 60–360 mm, with aluminium handle strips. Optionally with SOFT-CLOSE.
⑨ Front-mounted hinged doors with solid sheet metal doors
⑩ Locking systems (KEY LOCK, E-CODE, RFID)
⑪ Fork lift-compatible base with removable panel
⑫ Steel panel with 2 fixed castors and 2 steering rollers with wheel blocks

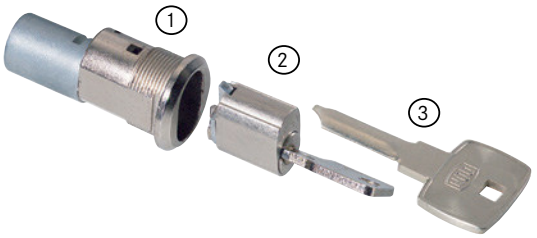
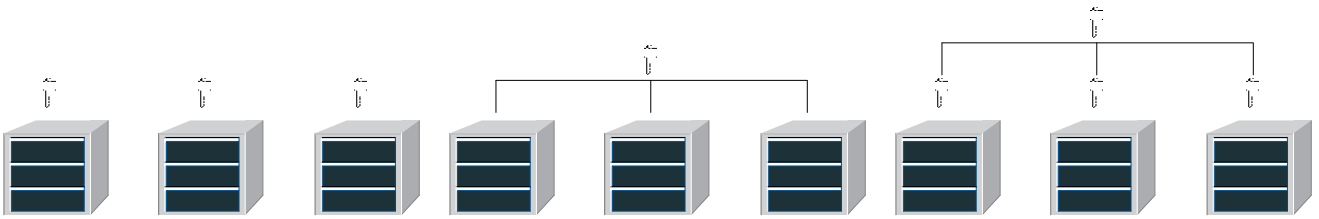
locking systems for drawer cabinets

DOM® locking system:
- Central lock in the form of a DOM safety rotary cylinder lock, located laterally on the right side
- The connector system allows an easy exchange of the cylinder without the need to remove the drawer

Easy modification thanks to the plug-in system
① Sleeve for cylinder locks
② Plug-in cylinder insert
③ Key





single locking, keyed differently
the locks have different closures. each key can open only one particular lock.

single locking, keyed alike
locks have the same closure. all locks can be opened with one key.

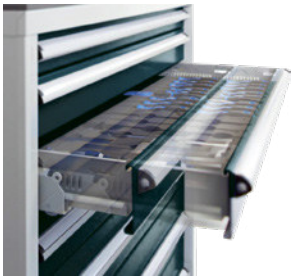
main locking system
the locks have a different closures. each key can open only one particular lock. however, the master key can open every lock.

Optionally available: ELECTRONIC CODE locking system

- open the tool cabinet using a 4-digit to 8-digit numerical code
- battery powered, no external power required, LED display for low battery warning
- no key required to open and close, therefore no loss of key possible
- up to 100 individual user PINs can be programmed to a single cabinet

Operating instructions: www.hk-code.com/u.php?c=c04Zy4

Optionally available: SOFT-CLOSE-AUTOMATIC for drawers



- particularly suitable for the safe storage of delicate, sensitive tools and parts in drawers
- when you close the drawer, the damper system decelerates and closes the drawer gently and silently with the self-closing mechanism
- suitable for our HK workbenches, undercounter cabinets, drawer blocks, group workbenches, assembly trolleys, roller containers, workbench trolleys and tool cabinets
- gently closing drawers reduce impact loads on the tools and parts to a minimum

Product video: YouTube-ID x5ry8OqhFKw

Optionally available: RFID locking system for drawer cabinets

- All marked products in the catalogue can be delivered with RFID locking system on request.
- The NFC locking system is set to active state by an approaching tag or by pressing a button. After checking the access rights of the user tag, the TM-NFC lock unlocks the turning knob for 4 s.
- It is possible to store more than 100 user tags for each lock.
- NFC system operating frequency: 13.56 MHz

RFID

Online tool cabinet configurator
For independent planning of drawer cabinets

Individuality for your tool cabinets - just click to start planning!

You can now plan our HK tool cabinet systems online and combine them according to your individual requirements. The easy-to-use configurator enables you to plan your cabinet in only a few minutes. Admire your cabinet from all sides in the 3D view and order directly.

www.werkzeugschrank-konfigurator.de

Advantages:

- Easy to configure your ideal cabinet
- Clearly organised, intuitive and easy to use
- Large choice of insert assortments and tool inserts for the drawers
- Can be ordered directly

Drawer cabinets, system 550 S - standard versions

Depth 550 mm, width 722 mm

Execution:
- Solidly welded steel sheet construction
- Tilt-proof due to built-in individual drawer pull-out locking
- The drawers have high-quality Delrin rollers which means that they run quietly
- Drawers with slots all around for inserting compartment rails and dividers
- Perforated steel sheet base (25 mm hole spacing) for fastening and fixing components
- Aluminium grip handles with paper and cellophane strips and lateral cover caps

- **Ident. No. 040–052, 070–072, 090–092:** For drawer front height 60 mm, the load capacity is 70 kg with evenly distributed load
- **Ident. No. 080–082:** With door height 740 mm
- **Ident. No. 090–092:** With door height 440 mm

Advantage:
- Optimum operating characteristics of drawers
- High quality - made in Germany

Notes:
To order customised hard foam inserts, please use the following clear internal dimensions: Width 585 mm, depth 435 mm.
Front height = FH, cabinet height = KH, see illustrations.

Technical data:
- Drawer width (inner dimension): 600 mm
- Drawer depth (inner dimension): 450 mm
- Pullout type: Full extension
- Load-carrying capacity per drawer: 100 kg
- With SOFT-CLOSE closing function: No
- Drawer surface: 0.27 m^2
- Lock type: DOM® locking system
- Material of cover panel: Wood, plastic-coated
- Material: Sheet steel
- Surface: Powder-coated

Drawer cabinets, system 550 S - standard versions with SOFT-CLOSE

Depth 550 mm, width 722 mm

Application:
Particularly suitable for careful storage of delicate, sensitive tools and parts in drawers.

Execution:
- Solidly welded steel sheet construction
- Tilt-proof due to built-in individual drawer pull-out locking
- The drawers have high-quality Delrin rollers which means that they run quietly
- Drawers with slots all around for inserting compartment rails and dividers
- Perforated steel sheet base (25 mm hole spacing) for fastening and fixing components
- Aluminium grip handles with paper and cellophane strips and lateral cover caps
- **Ident. No. 740–752, 770–772, 790–792:** For drawer front height 60 mm, the load capacity is 70 kg with evenly distributed load
- **Ident. No. 780–782:** With door height 740 mm
- **Ident. No. 790–792:** With door height 440 mm

Advantage:
- The damping system brakes the drawer while closing; it closes the drawer smoothly and soundlessly by means of the self-closing mechanism
- Impact load on tools and parts stored in the drawer is reduced to a minimum due to the smooth-closing drawers
- High quality - made in Germany

Notes:
To order customised hard foam inserts, please use the following clear internal dimensions: Width 585 mm, depth 435 mm. Front height = FH, cabinet height = KH, see illustrations.

Technical data:
- Drawer width (inner dimension): 600 mm

Cabinet housing, system 550 S

Depth 550 mm, width 722 mm

Application:
For the individual configuration of drawer cabinets, can be fitted with drawers and shelves.

Execution:
- Robustly welded sheet steel construction
- Tilt-proof due to built-in single drawer extension locking
- Central locking with central combination safely lock, optional installation of electronic combination lock, see no. 50392 010
- **Ident. No. 196–200:** With plastic-coated cover panel 8 mm

Advantage:
- The empty cabinet housing can be individually fitted with drawers and shelves in accordance with tool and part storage requirements
- The plug-in system means that the DOM cylinder lock can easily be replaced without removing the drawers

Notes:
Ident. No. 186–190: Suitable floor or wall mounting is required if the cabinet housing is fitted with extending shelves.

ELECTRONIC CODE combination lock - surcharge

Locking system for drawer cabinets from HK

Application:
Ideal for shift work, schools and training workshops where a variety of people require access to the cabinet.

Execution:
- Cabinet opened using a 4- to 8-digit numerical code
- Battery-operated, no main power required
- Battery empty warning via LED display
- For hinged door version see no. 50392 020

Advantage:
- Up to 100 individual user PIN numbers can be programmed for one cabinet
- No key is required for opening and closing – no keys to lose
- Programmed directly on the cabinet or a PC/laptop programming kit, see programming kit no. 50392 015

Delivery:
Incl. 3 x Lithium batteries 1.5 V type Micro/AAA

Notes:
The price shown is the extra price charged. Retrofitting of existing cabinets, trolleys or workbenches is not possible.

Technical data:
- Type: For HK drawer cabinets (extra charge)

Light case and light panel

for scanning contours and creating individual hard foam inserts

Application:
For simple and rapid arrangement of your individual hard foam insert, for your existing tool stock.

Execution:
- LED panel 600 x 600 mm incl. transformer and socket
- Step 1: Decide how you want your tools to be arranged and partitioned and place them within the reference frame on the white area of the light box/light panel.
- Step 2: Take a photograph with your digital camera, transfer it to your computer and then upload it to the HK Designer Software for hard foam inserts.
- Step 3: The shapes of the photographed tools, parts or items are digitised, processed individually by you using the HK Designer Software and provided with recessed handles.
- Step 4: After the order has been placed and confirmed, the customised hard foam insert will be manufactured and delivered.
- Please request log-in and access details for the HK Designer Software.
- **Ident. No. 980:**
  - Case lid equipped with hard foam insert for all accessories
  - Digital camera with memory card and accessories
  - Flight case with combination lock for the secure transport of reusable items without additional packaging
- **Ident. No. 985:** LED panel inserted in a hard foam insert, colour black/blue

Advantage:
- Existing tools can be captured directly on site and ordered and partitioned as you wish
- simple and straightforward recording using a digital camera (for version with light panel no. 50537 985, not included in scope of delivery)
- Little effort required
- Can be ordered as a hard foam insert from lot size 1

Delivery:
Ident. No. 980: Incl. flight case with combination lock, digital camera with memory card and accessories
Ident. No. 985: LED panel incl. transformer inserted in hard foam insert

Notes:
Our device is, of course, also available on a lease basis.

Ident. No. 980

Ident. No. 985

Use the digital camera to take pictures of your tools on the light panel, then load the pictures into the HK designer software to process and design the hard foam insert

Prod. Gr. 586

Contour scanner

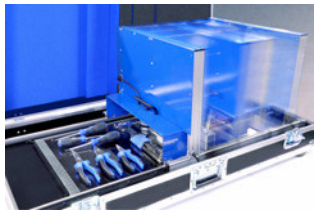
for scanning contours and creating individual hard foam inserts

Application:
For simple, straightforward and rapid scanning of all kinds of tools and components, and designing custom hard foam inserts.

Execution:
- scanning area: 750 x 400 mm, max. load capacity of scanning area: 10 kg (with uniform distribution)
- scanning height: max. 115 mm (component height)
- depending on range of parts, up to 10x more precise recording of contours than with conventional scanning systems with cameras

Advantage:
- immediately ready to use with plug & play function
- works with HK Designer planning software for custom hard foam solutions, no further software needs installing
- no need to transfer images, contours can be called up directly from the HK Designer planning software after scanning
- highly accurate and precise recording of small and narrow components, no shadowing, even with tall components
- no distortion of perspective and independent of ambient conditions (light, brightness etc.)

Delivery:
incl. USB connection cable, power connection cable and case with trolley function



Saves a great deal of time compared to conventional scanning systems with photographs

Can be used to store tools and parts up to an overall height of 115 mm

Includes case with trolley function

ELECTRONIC CODE combination lock

keyless locking system for hinged door cabinets from HK

Application:
Ideal for shift work, schools and training workshops where a variety of people require access to the cabinet.

Execution:
- Cabinet opened using a 4-digit to 8-digit numeric code
- Battery-operated, no mains power required
- Battery discharge warning via LED display
- **Ident. No. 020:** Additional charge only applies when ordered together with a cabinet with doors.
- **Ident. No. 025:** Retrofit kit for existing HK cabinets with turning handle lock with three-point locking and Euro holes

Advantage:
- No key is required to open and close - no keys to lose
- **Ident. No. 020:**
  - Up to 100 individual user PINs can be programmed on a single cabinet
  - Programming possible directly on the cabinet or via a PC/laptop programming kit, see programming kit no. 50392 015
- **Ident. No. 025:**
  - Simple conversion of existing doors with twist lock to electronic locking system with numeric code
  - Up to 100 individual user PINs can be programmed on a cabinet
  - Programmed directly on the cabinet or via a PC/laptop programming kit, see programming kit no. 50392 015

Delivery:
incl. batteries

for ELECTRONIC CODE combination lock

Application:
For connection to an ELECTRONIC CODE combination lock and for connection with a PC or laptop. Can also be used for emergency unlocking.

Execution:
- Interface converter for connection with a PC so that data can be transferred to the system
- USB cable 2.0 for connecting a converter to a PC or laptop
- Software on USB stick for convenient management of access rights (PIN codes) at the PC or laptop

Advantage:
- Easy and convenient programming and management of PIN numbers via a PC or laptop
- If the batteries have been completely discharged, emergency opening can be carried out together with a laptop or USB power supply

Drawer with full-extension slide for drawer cabinet system 550 S

Depth 450 mm, width 600 mm, load capacity 70 kg and 100 kg

Application:
For individual configuration of the HK cabinet housing/tool shelves. The drawers can be installed in the housing in any sequence, but the sum of the front heights must be equal to the useful height of the housing.

Execution:
- Made of sheet steel with a reinforced, perforated bottom (25 mm hole grid)
- Run on Delrin rollers in rails which are suspended in the housing with plug caps
- Inner sides slotted all around, for attaching and fixing insert material such as compartment rails and dividers
- Equipped with aluminium handle strip, paper and cellon strips and lateral cover caps
- SOFT-CLOSE-AUTOMATIC for smooth and silent drawer closing, see no. 50392 005.

Notes:
Clear internal dimensions for hard foam inserts: 15 mm less than specified internal dimensions

Technical data:
- Pullout type: Full extension
- Drawer with slots: Yes
- Perforated drawer base: Yes
- Material: Sheet steel
- Surface: Powder-coated

SOFT-CLOSE for drawers with full-extension slide

for smooth and quiet closing of drawers

Application:
Particularly suitable for the safe storage of sensitive tools and parts in drawers in HK drawer cabinets, workbenches, undercounter cabinets, drawer blocks, group workbenches, assembly trolleys, roll containers and workbench trolleys. For drawers with a carrying capacity of up to 100 kg.

Execution:
- The damping system brakes the drawer while closing, and the self-closing mechanism closes the drawer smoothly and without noise

Advantage:
- Due to the smooth closing of the drawers, the impact load on tools and parts stored in the drawer is reduced to a minimum

Notes:
When ordering, please indicate the required number of SOFT-CLOSE drawers. The price shown is the extra price per drawer. Cannot be retrofitted on existing drawers.

Technical data:
- Load-carrying capacity: 100 kg

Hard foam inserts, equipped with high-quality ATORN tools

Width 435 mm, depth 293 mm, for HK drawer cabinets, system 550 S

Application:
For flexible and modular drawer configuration in HK system 550 S and 550 B drawer cabinets, WGS and WG series workbenches, undercounter cabinets, drawer blocks, assembly trolleys, roller containers and workbench trolleys.

Execution:
- **Ident. No. 625–650:**
  - Two-tone foam inserts made of polyethylene (PE) equipped with tool assortments
  - Closed cells provide resistance against most oils and chemicals
  - The PE foam is lightweight, resistant, durable, odour-neutral and safe for foodstuffs
  - One tool insert fills half of the useful area of a drawer with internal dimensions 450 x 600 mm
  - Three tool inserts fill the entire useful area of a drawer with internal dimensions 450 x 900 mm
  - For flexible and modular drawer configuration in HK system 550 S and 550 B drawer cabinets, WGS and WG series workbenches, undercounter cabinets, drawer blocks, assembly trolleys, roller containers and workbench trolleys.
- **Ident. No. 910:**
  - two-tone foam inserts made of polyethylene (PE) equipped with tool assortments
  - resistant against most oils and chemicals due to closed cells
  - The PE foam is lightweight, resistant, durable, odour-neutral and even food safe
  - one tool insert fills half of the useful area of a drawer with internal dimensions 450 x 600 mm
  - Three tool inserts fill the entire usable area of drawers with internal dimensions 450 x 900 mm
  - For flexible and modular drawer configuration in HK drawer cabinets system 550 S (no. 50295) and 550 B (no. 50298), workbenches series WGS and WG (no. 50212), undercounter cabinets (no. 50212), drawer blocks (no. 50211), assembly trolleys (no. 50282), roller containers (no. 50284) and workbench trolleys (no. 50285).

Advantage:
- **Ident. No. 625–650:**
  - For clear order and protected storage of tools in the drawers
  - Precisely dimensioned cut-outs and a contrast colour (blue) means that missing tools can be spotted at a glance, avoiding any loss of tools
  - Expensive tools will be kept safe and protected in the insert
- **Ident. No. 910:**
  - Clearly arranged, organised and protected storage of tools in the drawers
  - Accurately fitting cut-outs in contrasting blue make it easy to spot when tools are missing and help to prevent loss of tools
  - Expensive tools can be stored securely and safely in the insert

Technical data:
- Depth: 293 mm
- Height: 30 mm
- Length: 293 mm
- Width: 435 mm
- Material: PE - Polyethylene
- Colour of top hard foam inlay: Black
- Colour of bottom hard foam inlay: Blue

Hard foam insert

A perfectly organised workplace increases productivity and safety in every process. For optimal performance, this perfect organisation must be maintained down to the last detail. Hard foam inserts can help: Already equipped with high-quality tools or individually planned, the inserts maintain order down to the tiniest screw. High-quality materials and the latest technology allow detailed outlines and a wide range of different cavities to be cut – always near to the surface for easy removal. Each part has its dedicated space. Hard foam inserts also secure the contents during storage and transport. The two-tone material lets you see at a glance if an item is missing.

A strong material:

PE-foam is lightweight yet resilient.

Furthermore it is oil-resistant and water-resistant.

It also has shock-absorbing properties.

The hard foam is durable, odour-free and even suitable for use with foodstuffs.

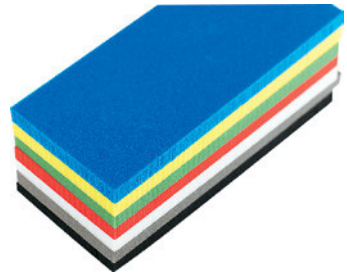
ESD foam is available for electronic parts.

Use the laser engraver to add your personal signature and give the hard foam insert an individual finish.

Versatile applications – many possibilities:

The largest available hard foam insert is 1500 mm long and 1000 mm wide. Almost all dimensions and shapes smaller than this are possible.

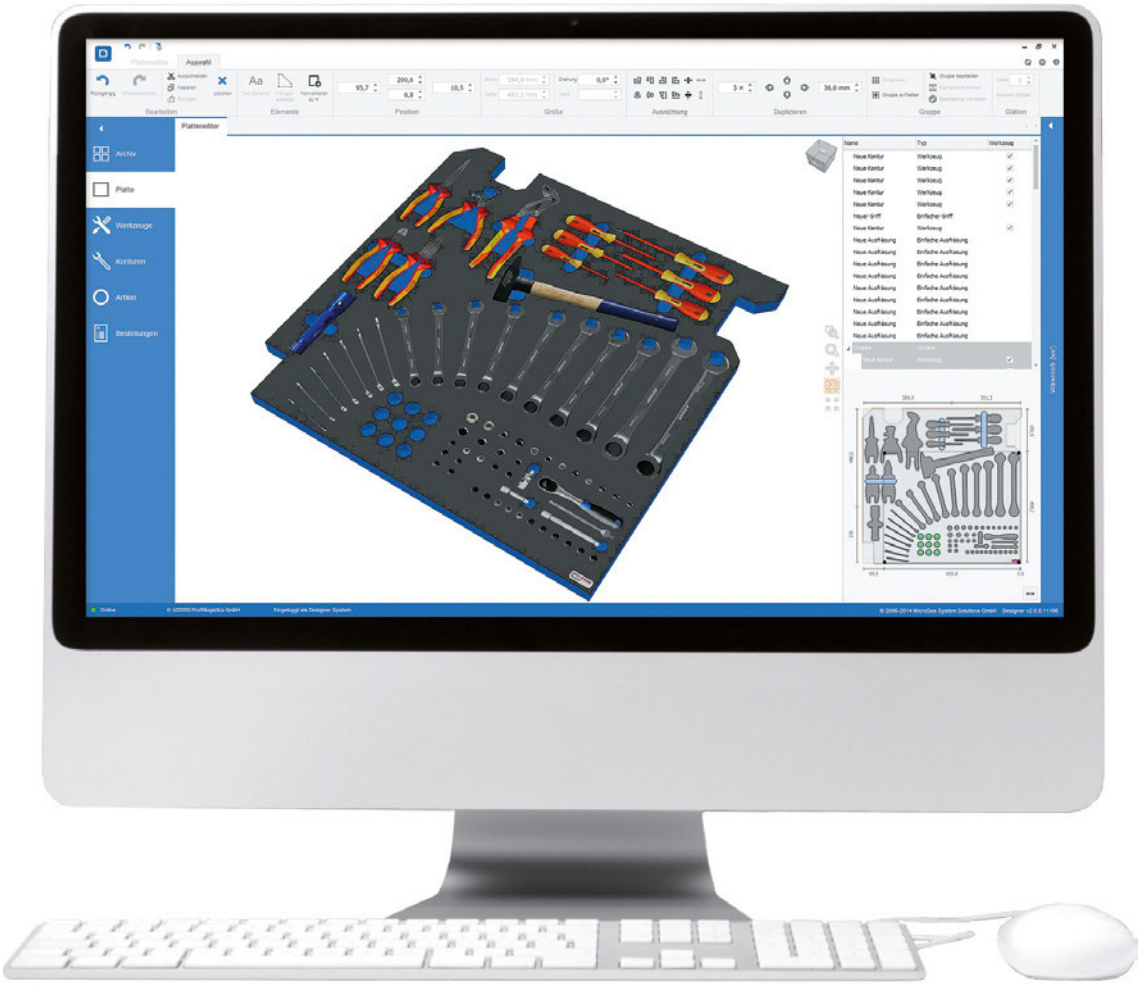
Standard versions of the material are 30 mm, 60 mm or 90 mm thick. Individual versions are possible with smaller and larger thicknesses up to a maximum of 210 mm.

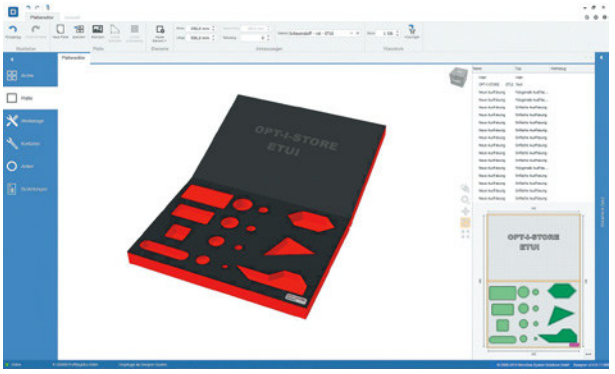


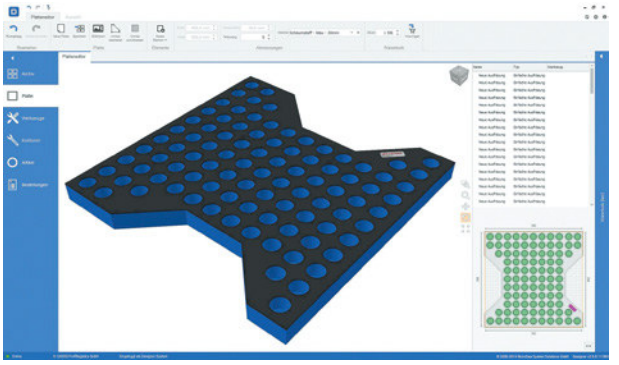
There are many colour options available. The black surface layer can be combined with the following contrasting colours: Standard blue, as well as the optional colours red, green, yellow, white or grey.

Designer software for hard foam inserts
The quick and easy configurator for your individual hard foam inserts

Hard foam inserts can be custom-made for tools from the current HAHN+KOLB-product range and tailored to your existing drawer dimensions. Plan and design fully customised tool-equipped hard foam inserts adapted to your requirements in just a few clicks – either using your existing tool collection by photographing with light box no. 50537 980 or light panel no. 50537 988 and loading the images into our designer software via an SD card, or using the contour scanner no. 50537 988 to transfer the scanned contours directly into our designer software via the USB cable supplied – quick and simple. You also of course have the option of designing the hard foam inserts using new tools from our database, using photo-realistic 3D graphics. Once this is done, order the complete package online. The free Designer Software is easy to use and clearly laid out. In this way, you can make your own personal and completely unique hard foam insert quickly and easily. Planning errors are eliminated by real-time calculation, integrated contour collision testing and technical feasibility checks. Simply position each tool roughly and move it to the required location. Use the laser labeller to add your personal signature and give the hard foam insert a certain individual finish.







The software can be used to create any geometric shape.

Our systems for recording contours
For simple and rapid designing of custom hard foam inserts

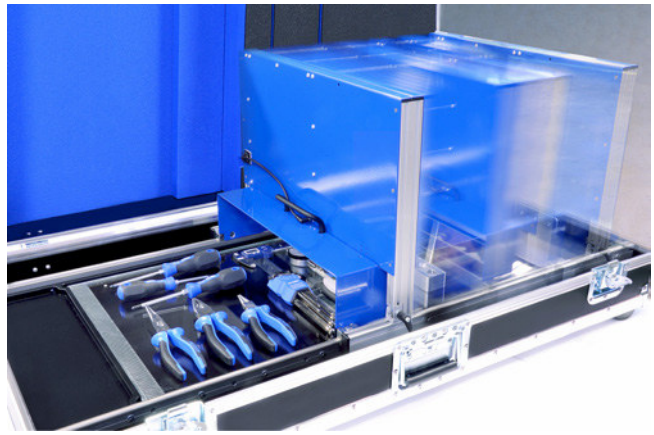
We offer various options for recording the contours of tools, components and other objects directly at your location in order to produce custom hard foam inserts.

HK light panel system no. 50537 985 and HK light case no. 50537 980:
Place the tools and components on the white surface within the reference frame (556 x 556 mm) and photograph these with a digital camera. Transfer the photos produced to your computer and then load these into our designer software for hard foam inserts. The contours of the photographed tools, components or objects can be individually edited in the software and given designated recessed handles.

Use the digital camera to take pictures of your tools on the light panel, then load the pictures into the HK designer software to process and design the hard foam insert

HK contour scanner system no. 50537 988:
Tools and components placed on the scanning surface (750 x 400 mm) are scanned in a quick and simple process. The scanner can be simply connected to a PC/laptop via a USB cable. No further software needs installing. Thanks to the plug & play function, the images and contours are transferred directly to our designer software, where they are available for you to process. The scanner also records small and slender components with great precision; and with tall components, no shadows are captured and no perspective distortions result. With its compact flight case with trolley function, the scanner is mobile and can be moved around easily.

Can be used to store tools and parts up to an overall height of 115 mm



Saves a great deal of time compared to conventional scanning systems with photographs

Online tool cabinet configurator
For independent planning of drawer cabinets

Individuality for your tool cabinets - just click to start planning!

You can now plan our HK tool cabinet systems online and combine them according to your individual requirements. The easy-to-use configurator enables you to plan your cabinet in only a few minutes. Admire your cabinet from all sides in the 3D view and order directly.

www.werkzeugschrank-konfigurator.de

Advantages:

- Easy to configure your ideal cabinet
- Clearly organised, intuitive and easy to use
- Large choice of insert assortments and tool inserts for the drawers
- Can be ordered directly

Drawer cabinets, system 700 S - standard versions

Depth 700 mm, width 722 mm

Execution:
- Solidly welded steel sheet construction
- Tilt-proof due to built-in individual drawer pull-out locking
- The drawers have high-quality Delrin rollers which means that they run quietly
- Drawers with slots all around for inserting compartment rails and dividers
- Perforated steel sheet base (25 mm hole spacing) for fastening and fixing components
- Aluminium grip handles with paper and cellophane strips and lateral cover caps

- **Ident. No. 035–038, 065–078, 100–102:** For drawer front height 60 mm, the load capacity is 70 kg with evenly distributed load

Advantage:
- Optimum operating characteristics of drawers
- High quality - made in Germany

Notes:

To order customised hard foam inserts, please use the following clear internal dimensions: Width 587 mm, depth 587 mm.

Front height = FH, cabinet height = KH, see illustrations.

Technical data:
- Drawer width (inner dimension): 600 mm
- Drawer depth (inner dimension): 600 mm
- Pullout type: Full extension
- Load-carrying capacity per drawer: 100 kg
- With SOFT-CLOSE closing function: No
- Drawer surface: 0.36 m²
- Lock type: DOM® locking system
- Material of cover panel: Wood, plastic-coated
- Material: Sheet steel
- Functions: RFID possible
- Surface: Powder-coated

Drawer cabinets, system 700 S - standard versions with SOFT-CLOSE

Depth 700 mm, width 722 mm

Application:
Particularly suitable for careful storage of delicate, sensitive tools and parts in drawers.

Execution:
- Solidly welded steel sheet construction
- Tilt-proof due to built-in individual drawer pull-out locking
- The drawers have high-quality Delrin rollers which means that they run quietly
- Drawers with slots all around for inserting compartment rails and dividers
- Perforated steel sheet base (25 mm hole spacing) for fastening and fixing components
- Aluminium grip handles with paper and cellophane strips and lateral cover caps
- **Ident. No. 735–738, 765–778, 784–786:** For drawer front height 60 mm, the load capacity is 70 kg with evenly distributed load

Advantage:
- The damping system brakes the drawer while closing; it closes the drawer smoothly and soundlessly by means of the self-closing mechanism
- Impact load on tools and parts stored in the drawer is reduced to a minimum due to the smooth-closing drawers
- High quality - made in Germany

Notes:
To order customised hard foam inserts, please use the following clear internal dimensions: Width 587 mm, depth 587 mm. Front height = FH, cabinet height = KH, see illustrations.

Prod. Gr. 586

Cabinet housing, system 700 S

Depth 700 mm, width 722 mm

Application:
For individual configuration, can be fitted with drawers and shelves.

Execution:
- Robustly welded sheet steel construction
- Tilt-proof due to built-in single drawer extension locking
- Central locking with central combination safely lock, optional installation of electronic combination lock, see no. 50392 010
- **Ident. No. 184–186, 205–210:** With plastic-coated cover panel 8 mm

Advantage:
- The plug-in system means that the cylinder lock can easily be replaced without removing the drawer
- The empty cabinet housing can be individually fitted with drawers in accordance with tool and part storage requirements

Notes:
Suitable floor or wall mounting is required if the cabinet housing is fitted with extending shelves

Technical data:
- With doors: No
- Door design
- With single pull-out safety brake: Yes
- With cover panel: Yes
- Central locking: Yes
- Lock type: DOM® locking system
- Material: Sheet steel
- Surface: Powder-coated

Drawer cabinets, system 700 B - standard versions

Depth 700 mm, width 1,022 mm

Execution:
- Solidly welded steel sheet construction
- Tilt-proof due to built-in individual drawer pull-out locking
- The drawers have high-quality Delrin rollers which means that they run quietly
- Drawers with slots all around for inserting compartment rails and dividers
- Drawers with perforated steel sheet base (25 mm hole spacing) for attaching and fixing individual items
- Aluminium grip handles with paper and cellophane strips and lateral cover caps
- **Ident. No. 035–038:** For drawer front height 60 mm, the load capacity is 70 kg with evenly distributed load

Advantage:
- Optimum operating characteristics of drawers
- High quality - made in Germany

Notes:
To order customised hard foam inserts, please use the following clear internal dimensions: Width 887 mm, depth 587 mm.

Drawer cabinets, system 700 B - standard versions with SOFT-CLOSE

Depth 700 mm, width 1,022 mm

Application:
Particularly suitable for careful storage of delicate, sensitive tools and parts in drawers.

Execution:
- Solidly welded steel sheet construction
- Tilt-proof due to built-in individual drawer pull-out locking
- The drawers have high-quality Delrin rollers which means that they run quietly
- Drawers with slots all around for inserting compartment rails and dividers
- Drawers with perforated steel sheet base (25 mm hole spacing) for attaching and fixing individual items
- Aluminium grip handles with paper and cellophane strips and lateral cover caps
- **Ident. No. 735–738:** For drawer front height 60 mm, the load capacity is 70 kg with evenly distributed load

Advantage:
- The damping system brakes the drawer while closing; it closes the drawer smoothly and soundlessly by means of the self-closing mechanism
- Impact load on tools and parts stored in the drawer is reduced to a minimum due to the smooth-closing drawers
- High quality - made in Germany

Notes:
To order customised hard foam inserts, please use the following clear internal dimensions: Width 887 mm, depth 587 mm. Front height = FH, cabinet height = KH, see illustrations.

Technical data:
- Drawer width (inner dimension): 900 mm
- Drawer depth (inner dimension): 600 mm
- Pullout type: Full extension
- Load-carrying capacity per drawer: 100 kg
- With SOFT-CLOSE closing function: Yes
- Drawer surface: 0.54 m²

Light case and light panel

for scanning contours and creating individual hard foam inserts

Application:
For simple and rapid arrangement of your individual hard foam insert, for your existing tool stock.

Execution:
- LED panel 600 x 600 mm incl. transformer and socket
- Step 1: Decide how you want your tools to be arranged and partitioned and place them within the reference frame on the white area of the light box/light panel.
- Step 2: Take a photograph with your digital camera, transfer it to your computer and then upload it to the HK Designer Software for hard foam inserts.
- Step 3: The shapes of the photographed tools, parts or items are digitised, processed individually by you using the HK Designer Software and provided with recessed handles.
- Step 4: After the order has been placed and confirmed, the customised hard foam insert will be manufactured and delivered.
- Please request log-in and access details for the HK Designer Software.
- **Ident. No. 980:**
  - Case lid equipped with hard foam insert for all accessories
  - Digital camera with memory card and accessories
  - Flight case with combination lock for the secure transport of reusable items without additional packaging
- **Ident. No. 985:** LED panel inserted in a hard foam insert, colour black/blue

Advantage:
- Existing tools can be captured directly on site and ordered and partitioned as you wish
- simple and straightforward recording using a digital camera (for version with light panel no. 50537 985, not included in scope of delivery)
- Little effort required
- Can be ordered as a hard foam insert from lot size 1

Delivery:
Ident. No. 980: Incl. flight case with combination lock, digital camera with memory card and accessories
Ident. No. 985: LED panel incl. transformer inserted in hard foam insert

Notes:
Our device is, of course, also available on a lease basis.

Ident. No. 980

Ident. No. 985

Use the digital camera to take pictures of your tools on the light panel, then load the pictures into the HK designer software to process and design the hard foam insert

Contour scanner

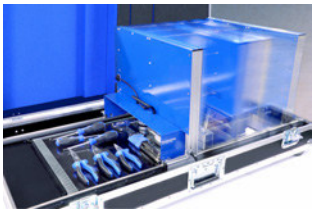
for scanning contours and creating individual hard foam inserts

Application:
For simple, straightforward and rapid scanning of all kinds of tools and components, and designing custom hard foam inserts.

Execution:
- scanning area: 750 x 400 mm, max. load capacity of scanning area: 10 kg (with uniform distribution)
- scanning height: max. 115 mm (component height)
- depending on range of parts, up to 10x more precise recording of contours than with conventional scanning systems with cameras

Advantage:
- immediately ready to use with plug & play function
- works with HK Designer planning software for custom hard foam solutions, no further software needs installing
- no need to transfer images, contours can be called up directly from the HK Designer planning software after scanning
- highly accurate and precise recording of small and narrow components, no shadowing, even with tall components
- no distortion of perspective and independent of ambient conditions (light, brightness etc.)

Delivery:
incl. USB connection cable, power connection cable and case with trolley function



Saves a great deal of time compared to conventional scanning systems with photographs

Can be used to store tools and parts up to an overall height of 115 mm

Includes case with trolley function

ELECTRONIC CODE combination lock - surcharge

Locking system for drawer cabinets from HK

Application:
Ideal for shift work, schools and training workshops where a variety of people require access to the cabinet.

Execution:
- Cabinet opened using a 4- to 8-digit numerical code
- Battery-operated, no main power required
- Battery empty warning via LED display
- For hinged door version see no. 50392 020

Advantage:
- Up to 100 individual user PIN numbers can be programmed for one cabinet
- No key is required for opening and closing – no keys to lose
- Programmed directly on the cabinet or a PC/ laptop programming kit, see programming kit no. 50392 015

Delivery:
Incl. 3 x Lithium batteries 1.5 V type Micro/AAA

Notes:
The price shown is the extra price charged. Retrofitting of existing cabinets, trolleys or workbenches is not possible.

Technical data:
- Type: For HK drawer cabinets (extra charge)

ELECTRONIC CODE combination lock

keyless locking system for hinged door cabinets from HK

Application:
Ideal for shift work, schools and training workshops where a variety of people require access to the cabinet.

Execution:
- Cabinet opened using a 4-digit to 8-digit numeric code
- Battery-operated, no mains power required
- Battery discharge warning via LED display
- **Ident. No. 020:** Additional charge only applies when ordered together with a cabinet with doors.
- **Ident. No. 025:** Retrofit kit for existing HK cabinets with turning handle lock with three-point locking and Euro holes

Advantage:
- No key is required to open and close - no keys to lose

- **Ident. No. 020:**
  - Up to 100 individual user PINs can be programmed on a single cabinet
  - Programming possible directly on the cabinet or via a PC/laptop programming kit, see programming kit no. 50392 015
- **Ident. No. 025:**
  - Simple conversion of existing doors with twist lock to electronic locking system with numeric code
  - Up to 100 individual user PINs can be programmed on a cabinet
  - Programmed directly on the cabinet or via a PC/laptop programming kit, see programming kit no. 50392 015

Emergency unlocking device

for ELECTRONIC CODE combination lock

Application:
For rapid emergency unlocking of the ELECTRONIC CODE combination lock. The required power is supplied by batteries. Simple plug connection.

Execution:
- Battery-powered emergency unlocking device with plug
- Battery compartment for 3 x 1.5 V AA batteries

Advantage:
- Quick and easy emergency unlocking

Notes:
Supplied without batteries.

Prod. Gr. 586

Programming kit

for ELECTRONIC CODE combination lock

Application:
For connection to an ELECTRONIC CODE combination lock and for connection with a PC or laptop. Can also be used for emergency unlocking.

Execution:
- Interface converter for connection with a PC so that data can be transferred to the system
- USB cable 2.0 for connecting a converter to a PC or laptop
- Software on USB stick for convenient management of access rights (PIN codes) at the PC or laptop

Advantage:
- Easy and convenient programming and management of PIN numbers via a PC or laptop
- If the batteries have been completely discharged, emergency opening can be carried out together with a laptop or USB power supply

Prod. Gr. 586

Drawer with full-extension slide for drawer cabinet system 700 S

Depth 600 mm, width 600 mm, load capacity 70 kg and 100 kg

Application:
For individual fitting of the HK cabinet housing 700 B. The drawers can be installed in the housing in arbitrary sequence. The sum of the front heights must be the effective height of the housing.

Execution:
- Made of sheet steel metal with a reinforced, perforated bottom (25 mm hole grid)
- Run on Delrin rollers in rails which are suspended in the housing with plug caps
- Inner sides slotted all around, for attaching and fixing insert material such as compartment rails and dividers
- Equipped with aluminium handle strip, paper and cellon strips and lateral cover caps
- SOFT-CLOSE-AUTOMATIC for smooth and silent drawer closing, see no. 50392 005

Notes:
Clear internal dimensions for hard foam inserts: 15 mm less than specified internal dimensions

Technical data:
- Pullout type: Full extension
- Drawer with slots: Yes
- Perforated drawer base: Yes
- Material: Sheet steel
- Surface: Powder-coated

Hard foam inserts, equipped with high-quality ATORN tools

Width 293 mm, depth 587 mm, for HK drawer cabinets, system 700 S

Application:
For flexible and modular equipping of drawers from the HK drawer cabinet system 700 S and 700 B.

Execution:
- The PE foam is lightweight, resistant, durable, odour-neutral and even food safe
- One tool insert fills half of the usable area of drawers with internal dimensions 600 x 600 mm
- Two tool inserts fill the entire usable area of drawers with internal dimensions 600 x 600 mm
- Three tool inserts fill the entire usable area of drawers with internal dimensions 900 x 600 mm
- For flexible and modular drawer configuration in HK drawer cabinet system 700 S and 700 B.

- **Ident. No. 701–705:**
  - Two-tone polyethylene (PE) foam inserts equipped with tool assortments
  - Closed-cell foam is resistant to most oils and chemicals
- **Ident. No. 900:**
  - two-tone foam inserts made of polyethylene (PE) equipped with tool assortments
  - resistant against most oils and chemicals due to closed cells

Advantage:
- Clearly arranged, organised and protected storage of tools in the drawers
- Accurately fitting cut-outs in contrasting blue make it easy to spot when tools are missing and help to prevent loss of tools
- Expensive tools can be stored securely and safely in the insert

Technical data:
- Depth: 587 mm
- Height: 30 mm
- Length: 587 mm
- Width: 293 mm
- Material: PE - Polyethylene
- Colour of top hard foam inlay: Black
- Colour of bottom hard foam inlay: Blue

Hard foam insert

A perfectly organised workplace increases productivity and safety in every process. For optimal performance, this perfect organisation must be maintained down to the last detail. Hard foam inserts can help: Already equipped with high-quality tools or individually planned, the inserts maintain order down to the tiniest screw. High-quality materials and the latest technology allow detailed outlines and a wide range of different cavities to be cut – always near to the surface for easy removal. Each part has its dedicated space. Hard foam inserts also secure the contents during storage and transport. The two-tone material lets you see at a glance if an item is missing.

A strong material:

PE-foam is lightweight yet resilient.

Furthermore it is oil-resistant and water-resistant.

It also has shock-absorbing properties.

The hard foam is durable, odour-free and even suitable for use with foodstuffs.

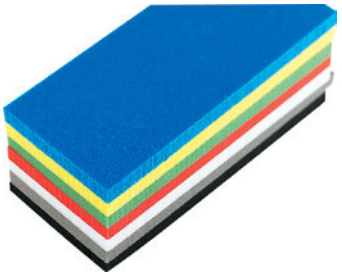
ESD foam is available for electronic parts.

Use the laser engraver to add your personal signature and give the
hard foam insert an individual finish.

Versatile applications – many possibilities:

The largest available hard foam insert is 1500 mm long and 1000 mm wide. Almost all dimensions and shapes smaller than this are possible.

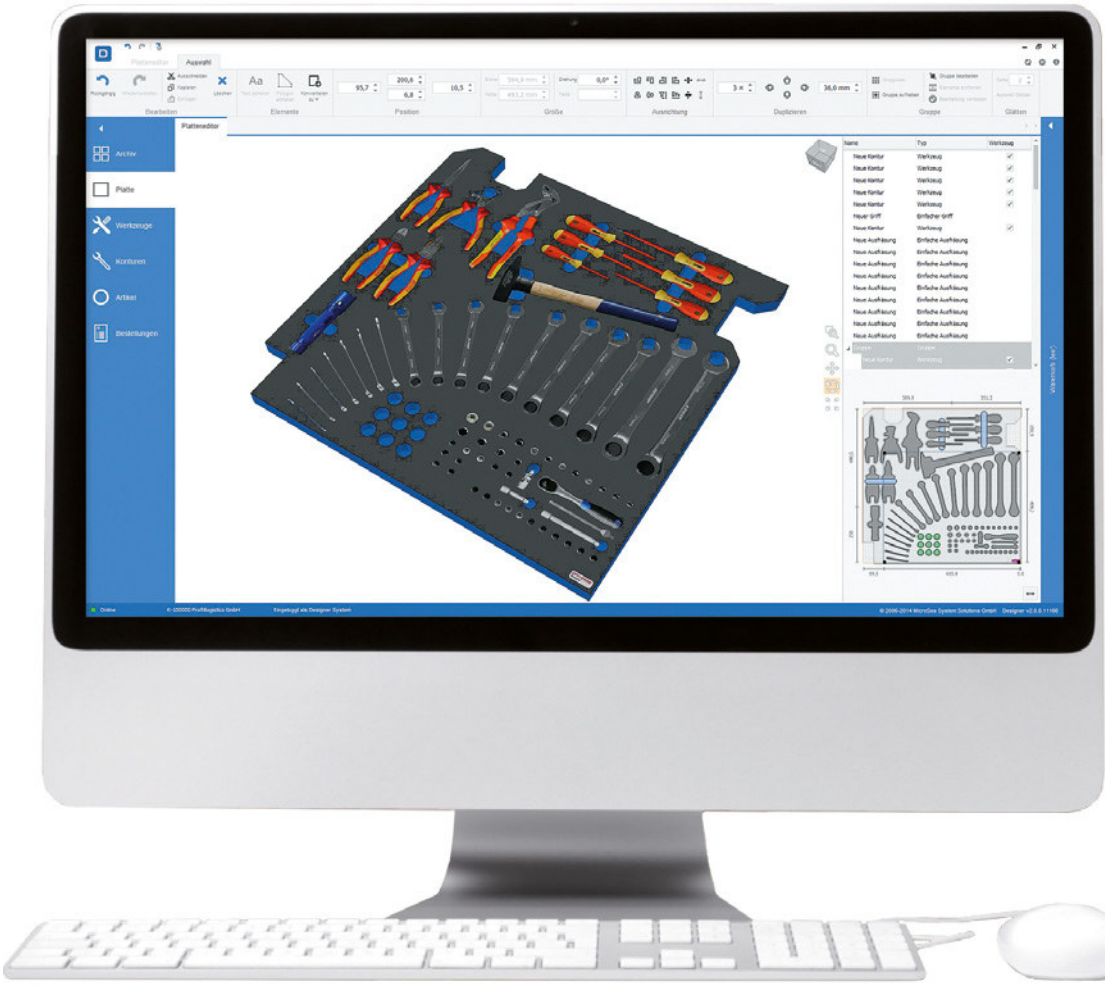
Standard versions of the material are 30 mm, 60 mm or 90 mm thick. Individual versions are possible with smaller and larger thicknesses up to a maximum of 210 mm.

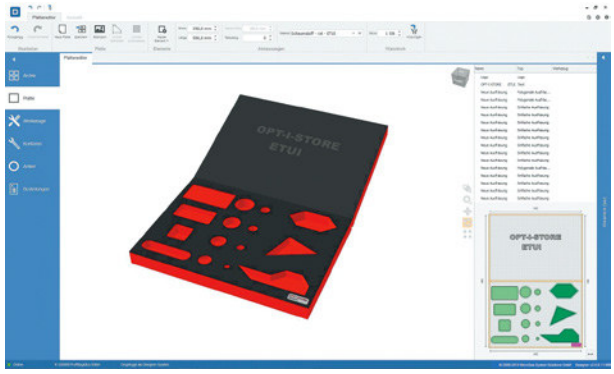


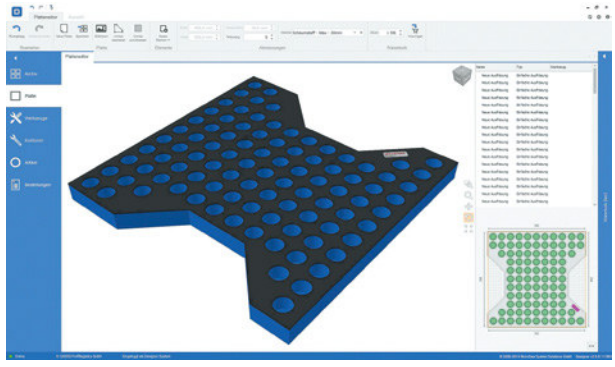
There are many colour options available. The black surface layer can be combined with the following contrasting colours: Standard blue, as well as the optional colours red, green, yellow, white or grey.

Designer software for hard foam inserts
The quick and easy configurator for your individual hard foam inserts

Hard foam inserts can be custom-made for tools from the current HAHN+KOLB-product range and tailored to your existing drawer dimensions. Plan and design fully customised tool-equipped hard foam inserts adapted to your requirements in just a few clicks – either using your existing tool collection by photographing with light box no. 50537 980 or light panel no. 50537 988 and loading the images into our designer software via an SD card, or using the contour scanner no. 50537 988 to transfer the scanned contours directly into our designer software via the USB cable supplied – quick and simple. You also of course have the option of designing the hard foam inserts using new tools from our database, using photo-realistic 3D graphics. Once this is done, order the complete package online. The free Designer Software is easy to use and clearly laid out. In this way, you can make your own personal and completely unique hard foam insert quickly and easily. Planning errors are eliminated by real-time calculation, integrated contour collision testing and technical feasibility checks. Simply position each tool roughly and move it to the required location. Use the laser labeller to add your personal signature and give the hard foam insert a certain individual finish.







The software can be used to create any geometric shape.

Our systems for recording contours
For simple and rapid designing of custom hard foam inserts

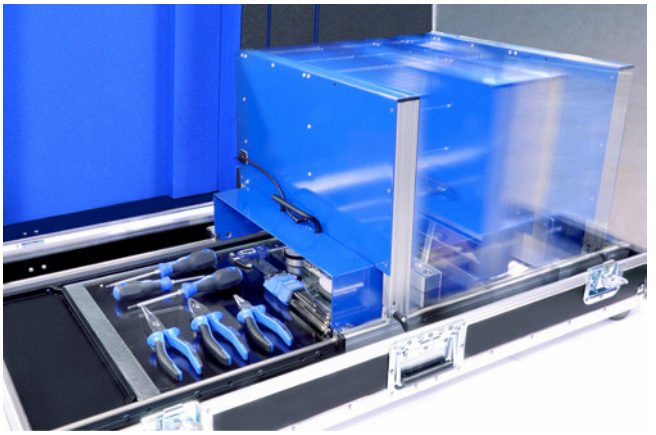
We offer various options for recording the contours of tools, components and other objects directly at your location in order to produce custom hard foam inserts.

HK light panel system no. 50537 985 and HK light case no. 50537 980:
Place the tools and components on the white surface within the reference frame (556 x 556 mm) and photograph these with a digital camera. Transfer the photos produced to your computer and then load these into our designer software for hard foam inserts. The contours of the photographed tools, components or objects can be individually edited in the software and given designated recessed handles.

Use the digital camera to take pictures of your tools on the light panel, then load the pictures into the HK designer software to process and design the hard foam insert

HK contour scanner system no. 50537 988:
Tools and components placed on the scanning surface (750 x 400 mm) are scanned in a quick and simple process. The scanner can be simply connected to a PC/ laptop via a USB cable. No further software needs installing. Thanks to the plug & play function, the images and contours are transferred directly to our designer software, where they are available for you to process. The scanner also records small and slender components with great precision; and with tall components, no shadows are captured and no perspective distortions result. With its compact flight case with trolley function, the scanner is mobile and can be moved around easily.

Can be used to store tools and parts up to an overall height of 115 mm



Saves a great deal of time compared to conventional scanning systems with photographs

Drawer cabinets, system 800 S - standard versions

Depth 800 mm, width 722 mm

Execution:
- Solidly welded steel sheet construction
- Tilt-proof due to built-in individual drawer pull-out locking
- The drawers have high-quality Delrin rollers which means that they run quietly
- Drawers with slots all around for inserting compartment rails and dividers
- Drawers with perforated steel sheet base (25 mm hole spacing) for attaching and fixing individual items
- Aluminium grip handles with paper and cellophane strips and lateral cover caps
- **Ident. No. 020–032, 060–062:** Load capacity of 100 kg with a drawer front height of 90 mm
- **Ident. No. 040–052:** Load capacity of 70 kg with a drawer front height of 60 mm and 100 kg with a drawer front height of 90 mm

Advantage:
- Optimum operating characteristics of drawers
- High quality - made in Germany

Notes:

To order customised hard foam inserts, please use the following clear internal dimensions: Width 587 mm, depth 687 mm.

Front height = FH, cabinet height = KH, see illustrations.

Suitable floor or wall anchoring is necessary if the individual drawers are loaded with 200 kg with the weight evenly distributed. Otherwise, drawers may be loaded to max. 150 kg with evenly distributed weight to ensure the structural integrity of the cabinet.

Technical data:
- Drawer width (inner dimension): 600 mm
- Drawer depth (inner dimension): 700 mm
- Pullout type: Full extension
- Load-carrying capacity per drawer: 200 kg
- With SOFT-CLOSE closing function: No
- Drawer surface: 0.42 m²
- Lock type: DOM® locking system
- Material of cover panel: Wood, plastic-coated
- Material: Sheet steel
- Functions: RFID possible
- Surface: Powder-coated

Prod. Gr. 5BB

For colours available without a surcharge, see page 1759

Drawer cabinets, system 800 S - standard versions with SOFT-CLOSE

Depth 800 mm, width 722 mm

Application:
Particularly suitable for careful storage of delicate, sensitive tools and parts in drawers.

Execution:
- Solidly welded steel sheet construction
- Tilt-proof due to built-in individual drawer pull-out locking
- The drawers have high-quality Delrin rollers which means that they run quietly
- Drawers with slots all around for inserting compartment rails and dividers
- Drawers with perforated steel sheet base (25 mm hole spacing) for attaching and fixing individual items
- Aluminium grip handles with paper and cellophane strips and lateral cover caps
- **Ident. No. 720–732, 760–762:** Load capacity of 100 kg with a drawer front height of 90 mm
- **Ident. No. 740–752:** Load capacity of 70 kg with a drawer front height of 60 mm and 100 kg with a drawer front height of 90 mm

Advantage:
- The damping system brakes the drawer while closing; it closes the drawer smoothly and soundlessly by means of the self-closing mechanism
- Impact load on tools and parts stored in the drawer is reduced to a minimum due to the smooth-closing drawers
- High quality - made in Germany

Notes:
To order customised hard foam inserts, please use the following clear internal dimensions: Width 587 mm, depth 687 mm. Front height = FH, cabinet height = KH, see illustrations. Drawer cabinets, system 800 S - cabinet housing

Depth 800 mm, width 722 mm

Application:
For individual configuration, can be fitted with drawers and shelves.

Execution:
- Robustly welded sheet steel construction
- Tilt-proof due to built-in single drawer extension locking
- Central locking with central combination safely lock, optional installation of electronic combination lock, see no. 50392 010
- **Ident. No. 192–194, 196–210:** With plastic-coated cover panel 8 mm

Advantage:
- The plug-in system means that the cylinder lock can easily be replaced without removing the drawer
- The empty cabinet housing can be individually fitted with drawers in accordance with tool and part storage requirements

Notes:
Suitable floor or wall mounting is required if the individual drawers have a uniformly distributed load of 200 kg, otherwise the drawers may be loaded with a uniformly distributed load of max. 150 kg.

Technical data:
- With doors: No
- Door design
- With single pull-out safety brake: Yes
- Central locking: Yes
- Lock type: DOM® locking system

Cabinet housing with doors system 800 S, height 1,036 mm

Depth 800 mm, width 722 mm

Application:
For individual configuration, can be fitted with drawers and shelves.

Execution:
- Robustly welded sheet steel construction
- With plastic-coated cover panel 8 mm
- Hinged doors with rotary bolt lock and linkage

Advantage:
- The empty cabinet housing can be individually fitted with shelves in accordance with tool and part storage requirements

Notes:
Suitable floor or wall mounting is required if the individual drawers have a uniformly distributed load of 200 kg, otherwise the drawers may be loaded with a uniformly distributed load of max. 150 kg.

Technical data:
- With doors: Yes
- Door design: Full-sheet panel
- With single pull-out safety brake: Yes
- With cover panel: Yes
- Material of cover panel: Wood, plastic-coated
- Central locking: Yes
- Lock type: DOM® locking system
- Material: Sheet steel
- Surface: Powder-coated

Drawer cabinets, system 800 B - standard versions

Depth 800 mm, width 1,022 mm

Execution:
- Solidly welded steel sheet construction
- Tilt-proof due to built-in individual drawer pull-out locking
- The drawers have high-quality Delrin rollers which means that they run quietly
- Drawers with slots all around for inserting compartment rails and dividers
- Drawers with perforated steel sheet base (25 mm hole spacing) for attaching and fixing individual items
- Aluminium grip handles with paper and cellophane strips and lateral cover caps
- **Ident. No. 020–032, 060–062:** Load capacity of 100 kg with a drawer front height of 90 mm
- **Ident. No. 040–052:** Load capacity of 70 kg with a drawer front height of 60 mm and 100 kg with a drawer front height of 90 mm

Advantage:
- Optimum operating characteristics of drawers
- High quality - made in Germany

Notes:
To order customised hard foam inserts, please use the following clear internal dimensions: Width 887 mm, depth 687 mm.
Front height = FH, cabinet height = KH, see illustrations.

Technical data:
- Drawer width (inner dimension): 900 mm
- Drawer depth (inner dimension): 700 mm
- Pullout type: Full extension
- Load-carrying capacity per drawer: 200 kg
- With SOFT-CLOSE closing function: No
- Drawer surface: 0.63 m²
- Lock type: DOM® locking system
- Material of cover panel: Wood, plastic-coated
- Material: Sheet steel
- Functions: RFID possible
- Surface: Powder-coated

Drawer cabinets, system 800 B - standard versions with SOFT-CLOSE

Depth 800 mm, width 1,022 mm

Application:
Particularly suitable for careful storage of delicate, sensitive tools and parts in drawers.

Execution:
- Solidly welded steel sheet construction
- Tilt-proof due to built-in individual drawer pull-out locking
- The drawers have high-quality Delrin rollers which means that they run quietly
- Drawers with slots all around for inserting compartment rails and dividers
- Drawers with perforated steel sheet base (25 mm hole spacing) for attaching and fixing individual items
- Aluminium grip handles with paper and cellophane strips and lateral cover caps

- **Ident. No. 720–732, 760–762:** Load capacity of 100 kg with a drawer front height of 90 mm
- **Ident. No. 740–752:** Load capacity of 70 kg with a drawer front height of 60 mm and 100 kg with a drawer front height of 90 mm

Advantage:
- The damping system brakes the drawer while closing; it closes the drawer smoothly and soundlessly by means of the self-closing mechanism
- Impact load on tools and parts stored in the drawer is reduced to a minimum due to the smooth-closing drawers
- High quality - made in Germany

Notes:
To order customised hard foam inserts, please use the following clear internal dimensions: Width 887 mm, depth 687 mm. Front height = FH, cabinet height = KH, see illustrations.

Technical data:
- Drawer width (inner dimension): 900 mm
- Drawer depth (inner dimension): 700 mm

Drawer cabinets, system 800 B - cabinet housing

Depth 800 mm, width 1,022 mm

Application:
For individual configuration, can be fitted with drawers and shelves.

Execution:
- Robustly welded sheet steel construction
- Tilt-proof due to built-in single drawer extension locking
- Central locking with central combination safely lock, optional installation of electronic combination lock, see no. 50392 010
- **Ident. No. 192–194, 196–210:** With plastic-coated cover panel 8 mm

Advantage:
- The plug-in system means that the cylinder lock can easily be replaced without removing the drawer
- The empty cabinet housing can be individually fitted with drawers in accordance with tool and part storage requirements

Technical data:
- With doors: No
- Door design
- With single pull-out safety brake: Yes

Light case and light panel

for scanning contours and creating individual hard foam inserts

Application:
For simple and rapid arrangement of your individual hard foam insert, for your existing tool stock.

Execution:
- LED panel 600 x 600 mm incl. transformer and socket
- Step 1: Decide how you want your tools to be arranged and partitioned and place them within the reference frame on the white area of the light box/light panel.
- Step 2: Take a photograph with your digital camera, transfer it to your computer and then upload it to the HK Designer Software for hard foam inserts.
- Step 3: The shapes of the photographed tools, parts or items are digitised, processed individually by you using the HK Designer Software and provided with recessed handles.
- Step 4: After the order has been placed and confirmed, the customised hard foam insert will be manufactured and delivered.
- Please request log-in and access details for the HK Designer Software.
- **Ident. No. 980:**
  - Case lid equipped with hard foam insert for all accessories
  - Digital camera with memory card and accessories
  - Flight case with combination lock for the secure transport of reusable items without additional packaging
- **Ident. No. 985:** LED panel inserted in a hard foam insert, colour black/blue

Advantage:
- Existing tools can be captured directly on site and ordered and partitioned as you wish
- simple and straightforward recording using a digital camera (for version with light panel no. 50537 985, not included in scope of delivery)
- Little effort required
- Can be ordered as a hard foam insert from lot size 1

Delivery:
Ident. No. 980: Incl. flight case with combination lock, digital camera with memory card and accessories
Ident. No. 985: LED panel incl. transformer inserted in hard foam insert

Notes:
Our device is, of course, also available on a lease basis.

Ident. No. 980

Ident. No. 985

Use the digital camera to take pictures of your tools on the light panel, then load the pictures into the HK designer software to process and design the hard foam insert

Prod. Gr. 586

Contour scanner

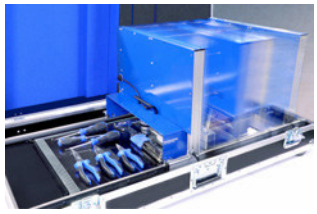
for scanning contours and creating individual hard foam inserts

Application:
For simple, straightforward and rapid scanning of all kinds of tools and components, and designing custom hard foam inserts.

Execution:
- scanning area: 750 x 400 mm, max. load capacity of scanning area: 10 kg (with uniform distribution)
- scanning height: max. 115 mm (component height)
- depending on range of parts, up to 10x more precise recording of contours than with conventional scanning systems with cameras

Advantage:
- immediately ready to use with plug & play function
- works with HK Designer planning software for custom hard foam solutions, no further software needs installing
- no need to transfer images, contours can be called up directly from the HK Designer planning software after scanning
- highly accurate and precise recording of small and narrow components, no shadowing, even with tall components
- no distortion of perspective and independent of ambient conditions (light, brightness etc.)

Delivery:
incl. USB connection cable, power connection cable and case with trolley function



Saves a great deal of time compared to conventional scanning systems with photographs

Can be used to store tools and parts up to an overall height of 115 mm

Includes case with trolley function

ELECTRONIC CODE combination lock - surcharge

Locking system for drawer cabinets from HK

Application:
Ideal for shift work, schools and training workshops where a variety of people require access to the cabinet.

Execution:
- Cabinet opened using a 4- to 8-digit numerical code
- Battery-operated, no main power required
- Battery empty warning via LED display
- For hinged door version see no. 50392 020

Advantage:
- Up to 100 individual user PIN numbers can be programmed for one cabinet
- No key is required for opening and closing – no keys to lose
- Programmed directly on the cabinet or a PC/laptop programming kit, see programming kit no. 50392 015

Delivery:
Incl. 3 x Lithium batteries 1.5 V type Micro/AAA

Notes:
The price shown is the extra price charged. Retrofitting of existing cabinets, trolleys or workbenches is not possible.

Technical data:
- Type: For HK drawer cabinets (extra charge)

ELECTRONIC CODE combination lock

keyless locking system for hinged door cabinets from HK

Application:
Ideal for shift work, schools and training workshops where a variety of people require access to the cabinet.

Execution:
- Cabinet opened using a 4-digit to 8-digit numeric code
- Battery-operated, no mains power required
- Battery discharge warning via LED display
- **Ident. No. 020:** Additional charge only applies when ordered together with a cabinet with doors.
- **Ident. No. 025:** Retrofit kit for existing HK cabinets with turning handle lock with three-point locking and Euro holes

Advantage:
- No key is required to open and close - no keys to lose
- **Ident. No. 020:**
  - Up to 100 individual user PINs can be programmed on a single cabinet
  - Programming possible directly on the cabinet or via a PC/laptop programming kit, see programming kit no. 50392 015
- **Ident. No. 025:**
  - Simple conversion of existing doors with twist lock to electronic locking system with numeric code
  - Up to 100 individual user PINs can be programmed on a cabinet
  - Programmed directly on the cabinet or via a PC/laptop programming kit, see programming kit no. 50392 015

Delivery:
incl. batteries

Emergency unlocking device
for ELECTRONIC CODE combination lock

Application:
For rapid emergency unlocking of the ELECTRONIC CODE combination lock. The required power is supplied by batteries. Simple plug connection.

Execution:
- Battery-powered emergency unlocking device with plug
- Battery compartment for 3 x 1.5 V AA batteries

Advantage:
- Quick and easy emergency unlocking

Notes:
Supplied without batteries.

Prod. Gr. 586

Programming kit
for ELECTRONIC CODE combination lock

Application:
For connection to an ELECTRONIC CODE combination lock and for connection with a PC or laptop. Can also be used for emergency unlocking.

Execution:
- Interface converter for connection with a PC so that data can be transferred to the system
- USB cable 2.0 for connecting a converter to a PC or laptop
- Software on USB stick for convenient management of access rights (PIN codes) at the PC or laptop

Advantage:
- Easy and convenient programming and management of PIN numbers via a PC or laptop
- If the batteries have been completely discharged, emergency opening can be carried out together with a laptop or USB power supply

Hard foam insert

A perfectly organised workplace increases productivity and safety in every process. For optimal performance, this perfect organisation must be maintained down to the last detail. Hard foam inserts can help: Already equipped with high-quality tools or individually planned, the inserts maintain order down to the tiniest screw. High-quality materials and the latest technology allow detailed outlines and a wide range of different cavities to be cut – always near to the surface for easy removal. Each part has its dedicated space. Hard foam inserts also secure the contents during storage and transport. The two-tone material lets you see at a glance if an item is missing.

A strong material:

PE-foam is lightweight yet resilient.

Furthermore it is oil-resistant and water-resistant.

It also has shock-absorbing properties.

The hard foam is durable, odour-free and even suitable for use with foodstuffs.

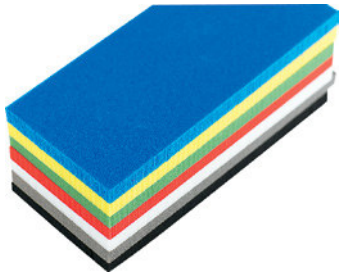
ESD foam is available for electronic parts.

Use the laser engraver to add your personal signature and give the
hard foam insert an individual finish.

Versatile applications – many possibilities:

The largest available hard foam insert is 1500 mm long and 1000 mm wide. Almost all dimensions and shapes smaller than this are possible.

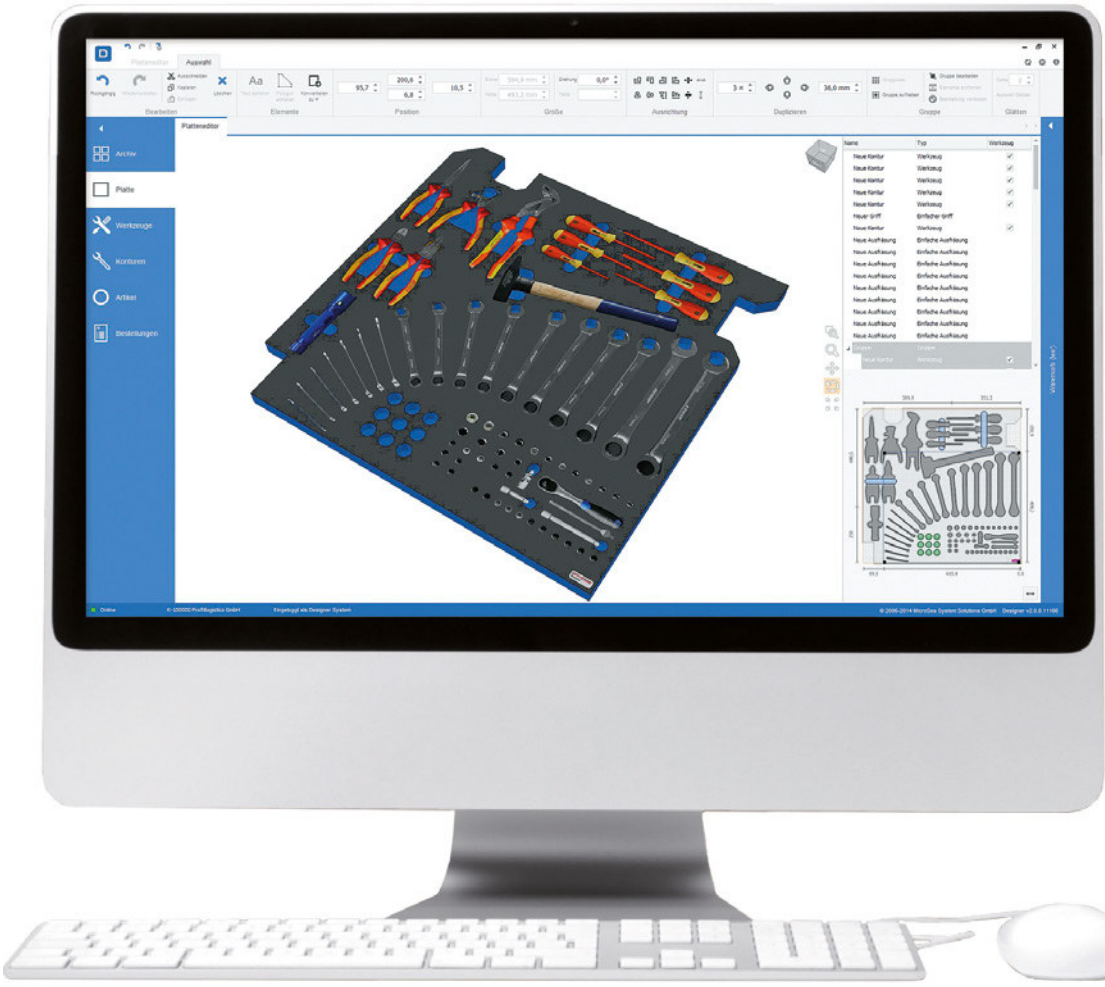
Standard versions of the material are 30 mm, 60 mm or 90 mm thick. Individual versions are possible with smaller and larger thicknesses up to a maximum of 210 mm.

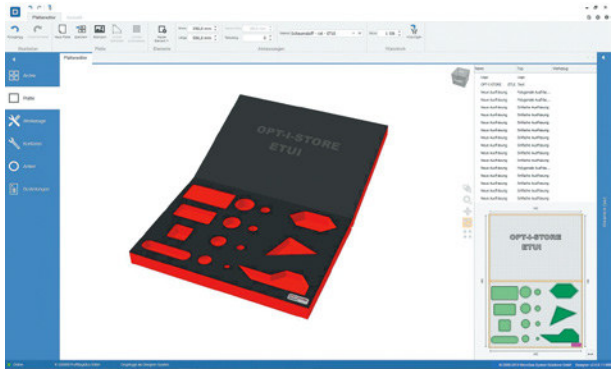


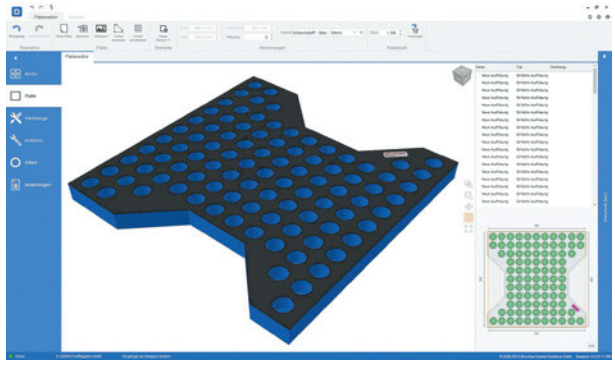
There are many colour options available. The black surface layer can be combined with the following contrasting colours: Standard blue, as well as the optional colours red, green, yellow, white or grey.

Designer software for hard foam inserts
The quick and easy configurator for your individual hard foam inserts

Hard foam inserts can be custom-made for tools from the current HAHN+KOLB-product range and tailored to your existing drawer dimensions. Plan and design fully customised tool-equipped hard foam inserts adapted to your requirements in just a few clicks – either using your existing tool collection by photographing with light box no. 50537 980 or light panel no. 50537 988 and loading the images into our designer software via an SD card, or using the contour scanner no. 50537 988 to transfer the scanned contours directly into our designer software via the USB cable supplied – quick and simple. You also of course have the option of designing the hard foam inserts using new tools from our database, using photo-realistic 3D graphics. Once this is done, order the complete package online. The free Designer Software is easy to use and clearly laid out. In this way, you can make your own personal and completely unique hard foam insert quickly and easily. Planning errors are eliminated by real-time calculation, integrated contour collision testing and technical feasibility checks. Simply position each tool roughly and move it to the required location. Use the laser labeller to add your personal signature and give the hard foam insert a certain individual finish.







The software can be used to create any geometric shape.

Our systems for recording contours
For simple and rapid designing of custom hard foam inserts

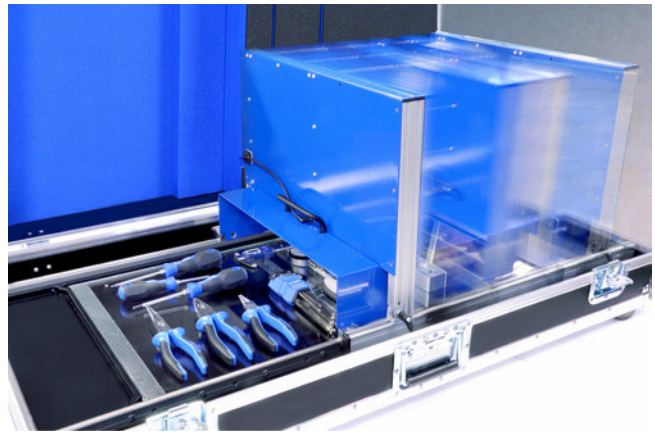
We offer various options for recording the contours of tools, components and other objects directly at your location in order to produce custom hard foam inserts.

HK light panel system no. 50537 985 and HK light case no. 50537 980:
Place the tools and components on the white surface within the reference frame (556 x 556 mm) and photograph these with a digital camera. Transfer the photos produced to your computer and then load these into our designer software for hard foam inserts. The contours of the photographed tools, components or objects can be individually edited in the software and given designated recessed handles.

Use the digital camera to take pictures of your tools on the light panel, then load the pictures into the HK designer software to process and design the hard foam insert

HK contour scanner system no. 50537 988:
Tools and components placed on the scanning surface (750 x 400 mm) are scanned in a quick and simple process. The scanner can be simply connected to a PC/ laptop via a USB cable. No further software needs installing. Thanks to the plug & play function, the images and contours are transferred directly to our designer software, where they are available for you to process. The scanner also records small and slender components with great precision; and with tall components, no shadows are captured and no perspective distortions result. With its compact flight case with trolley function, the scanner is mobile and can be moved around easily.

Can be used to store tools and parts up to an overall height of 115 mm



Saves a great deal of time compared to conventional scanning systems with photographs

ORION® Drawer cabinets, system 700

Depth 700 mm, width 722 mm and 1022 mm

Application:

Ident. No. 070, 072–080, 082: ideally suited to the storage of various tools and parts.

Ident. No. 071, 081: Ideally suited to the storage of various tools and parts.

Execution:

- **Ident. No. 070, 072–080, 082:**
  - welded sheet-steel construction guarantees high loadability and stability
  - central locking mechanism with safety lock and individual extension lock for drawers
  - drawers capable of holding an evenly distributed load of up to 100 kg
  - drawers with rows of slots for inserting dividers
  - grid division (30:30 mm) facilitates custom compartmentalisation of drawers in housing
  - plastic-coated worktop (black) with a thickness of 8 mm
  - handle strips made from aluminium with labelling strips with transparent covers and cover caps
- **Ident. No. 071, 081:**
  - Welded sheet-steel construction guarantees high loadability and stability
  - Central locking mechanism with safety lock and individual extension lock for drawers
  - Drawers capable of holding an evenly distributed load of up to 100 kg
  - Drawers with rows of slots for inserting dividers
  - Grid division (30:30 mm) facilitates custom compartmentalisation of drawers in housing
  - Plastic-coated worktop (black) with a thickness of 8 mm
  - Handle strips made from aluminium with labelling strips with transparent covers and cover caps

Technical data:

- Drawer depth (inner dimension): 598 mm
- Pullout type: Full extension
- Load-carrying capacity per drawer: 100 kg
- With SOFT-CLOSE closing function: No
- With cover panel: Yes
- Lock type: Cylinder lock
- Material of cover panel: Wood, plastic-coated
- Material: Sheet steel
- Functions: RFID possible
- Surface: Powder-coated

Prod. Gr. 586

HK-MAT tool distribution system

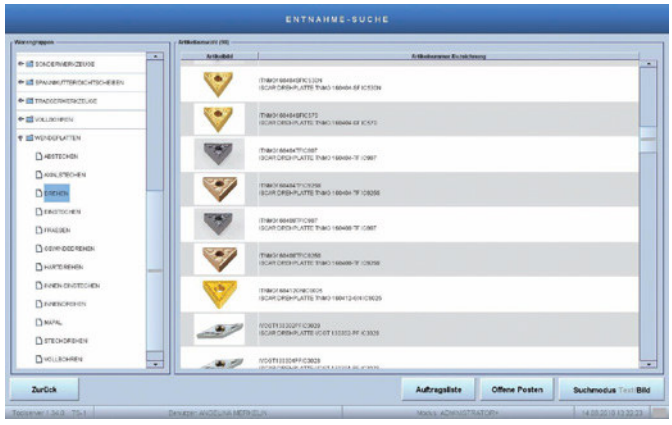
application:
thanks to the electronically locked tool dispensing cabinet, the right tool is always provided at the right time at the right place. personalised access with PIN entry allows only authorised personnel to have controlled access to your tools around the clock. automatic re-ordering after removal guarantees restocking. this eliminates tool-related production downtime. procurement and storage costs are minimised.

advantages:
- full cost and consumption control
- comprehensive evaluation options
- full availability ensures high productivity
- in a consignment warehouse, the supplier retains the ownership of the goods until the customer withdraws the products
- only pay for products that have been genuinely removed
- reduction of excess stocks
- true inventory, 'concealed' inventories are minimised
- quick access without warehouse management
- prevention of wastage
- individual removal possibility, e.g. of reversible tips from entire packing units
- 24h availability
- no more tedious searching for the right tool
- immediate information where a tool is currently in use (e.g. measuring equipment/rented items)
- non manufacturer-specific device, can be filled with items from different suppliers
- minimisation of storage costs
- no more manual orders: email sent automatically to suppliers when a tool is removed
- interfaces with PPS and ERP systems
- expandable with all modules of the HK-MAT series

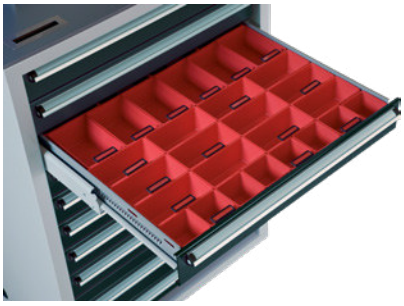
easy selection of the required tool on the PC, controlled and documented tool distribution

our service:
we will prepare an individual cost model for you encompassing rental and a contractually agreed increase in sales tailored to your requirements.
please contact us. ☎ **hotline +49 (0)800 9813-187**

no more tedious searching for tools



find the desired tool quickly using a simple search function. the software provides an overview of the tool stock and automatically triggers orders.



individual drawer partitioning material as per customer request

Rechargeable battery charging cabinets - securely store and recharge batteries and machines

height options 1,030 mm and 1,950 mm, with solid sheet metal doors or doors with viewing window

Application:
For clean, tidy and clearly-arranged storage of chargers and battery machines, optimum protection against damage or theft.

Execution:
- Sturdy welded sheet steel structure
- Doors with ventilation slots for optimum air circulation, lockable using a triple-point security lock incl. 2 keys
- 3 or 4 height-adjustable storage levels with 6-way power socket strips for 230 V with on/off switches
- Cabinet, hinged doors and 3 top shelves are earthed separately
- **Ident. No. 002–003, 012:** One 16 A accessory equipment plug for plugging in 400 V connectors incl. distribution box and three circuit breakers accommodated on the right side of the cabinet
- **Ident. No. 004–005, 008–009, 014, 018:** One 16 A accessory equipment plug for attaching 400 V plugs incl. distribution box and 3 circuit breakers fitted in cabinet on right-hand side (connection and fan can be mounted on the left on request)
- **Ident. No. 006–007, 016:**
  - 16 A accessory equipment plug on the right-hand side for attaching 400 V connectors
  - Distribution box and 3 circuit breakers fitted in cabinet

Advantage:
- Central storage of the batteries
- Overview and check for your expensive tool

Delivery:
Fully wired and tested in line with CE specifications and ready for immediate operation. Incl. operating instructions.

Notes:
Only suitable for installation in dry rooms. Max. 6 chargers to be connected per charging level.

Technical data:
- Shelf width: 925 mm
- Shelf depth: 370 mm
- Load-carrying capacity per shelf: 60 kg
- Number of drawers: 1 PCS
- Drawer front height: 1 x 90 mm
- Drawer width (inner dimension): 884 mm
- Drawer depth (inner dimension): 388 mm
- Load-carrying capacity per drawer: 50 kg

Roller-shutter top-mounted cabinets

Back panel with square perforations, optional widths 722 mm or 1,022 mm

Application:

Ident. No. 002–005: Cabinet suitable for mounting on top of HK S system drawer cabinets (722 mm wide) or on tables and workbenches.

Ident. No. 012–015: Cabinet suitable for mounting on top of HK B system drawer cabinets (1022 mm wide) or on tables and workbenches.

Execution:

- Robust, welded sheet steel construction with plastic roller shutters (light grey)
- Rear panel with square 10 x 10 mm perforations, axis distance 38 mm
- Integrated aluminium handle strip in roller shutter and DOM pressure cylinder lock incl. 2 keys

Advantage:

- Square 10 x 10 mm perforations in rear panel for individual attachment options, e.g. with tool hooks and support elements.
- 360 mm depth means folders, documents, boxes etc. can be stored on the cabinet floor

Delivery:

Without decorative materials, empty housing for customised fitting

Notes:

RasterPlan support elements and tool holders for inserting into perforated metal plate walls, see from no. 50638 300 in the Workplace chapter

Technical data:

- Door design: Plastic shutters
- Back panel design: Perforated
- Central locking: Yes
- Lock type: DOM® cylinder lock
- Material: Sheet steel
- Colour of front: Light grey
- Surface: Powder-coated

Hinged door cabinet with solid sheet metal doors, height 1,950 mm

with shelves

Application:
For secure and clearly-visible storage of tools, accessories, files or many other parts.

Execution:
- Stable spot-welded steel sheet structure with base
- Safety bevels to prevent injuries
- 2 reinforced hinged doors, mounted on 4 sturdy internal steel pins
- 4 galvanised shelves, can be adjusted in the grid by 50 mm
- Can be locked using three-point security levers and black turning knob with cylinder security lock, incl. 2 keys

Notes:
The cabinet can be fitted with an ELECTRONIC CODE combination lock at extra charge as an option, see no. 50045 015

Technical data:
- Number of shelves: 4 PCS
- Load-carrying capacity per shelf: 80 kg
- Load-carrying capacity: 300 kg
- With partition wall: No
- Central locking: Yes
- Lock type: Twist-grip lock with three-point fastening

ELECTRONIC CODE combination lock

keyless locking system for hinged door cabinets, no. 50045 010-14 and 50046 035-040

Application:
Ideal for shift work, schools and training workshops where a variety of people require access to the cabinet.

Execution:
- cabinet opened using a 4-digit to 8-digit numeric code
- battery-operated, no mains power required
- battery empty warning via LED display
- **Ident. No. 015:** Additional charge only applies when ordered together with a cabinet with doors.
- **Ident. No. 017:** retrofit kit for existing cabinets no. 50045 010, 012, 014 and 50046 035, 040 with turning handle lock with three-point locking and Euro holes

Advantage:
- **Ident. No. 015:**
  - up to 100 individual user PINs can be programmed on a single cabinet
  - No key is required to open and close – no keys to lose
  - programmed directly on the cabinet or via a PC/ laptop programming kit, see programming kit no. 50392 015
- **Ident. No. 017:**
  - Simple conversion of existing doors with twist lock to electronic locking system with numeric code
  - Up to 100 individual user PINs can be programmed on a cabinet
  - No key is required to open and close - no keys to lose
  - Programmed directly on the cabinet or via a PC/ laptop programming kit, see programming kit no. 50392 015

Delivery:
incl. batteries

Emergency unlocking device

for ELECTRONIC CODE combination lock

Application:
For rapid emergency unlocking of the ELECTRONIC CODE combination lock. The required power is supplied by batteries. Simple plug connection.

Execution:
- Battery-powered emergency unlocking device with plug
- Battery compartment for 3 x 1.5 V AA batteries

Advantage:
- Quick and easy emergency unlocking

Notes:
Supplied without batteries.

CNC tool shelf - for open storage of CNC tools

For personalised configuration with support profiles nos. 50658 110-158

Application:
For clearly-laid-out storage and retrieval of CNC tools. Customised fitting with support profiles, no. 50658 110-158 and tool holders, no. 50655 020-126.

Execution:
- Sturdy steel sheet metal structure, made of steel sections, welded
- Can be installed back to back or side by side in a row
- Depending on the protruding length of the tools, the shelf can be fitted with up to 7 levels (support profiles)
- Do not exceed max. load capacity of 50 kg per level (support profile)
- For heavy tools and attachments, we recommend our HK cabinets no. 50658 020-045/50658 005-016 with load-bearing capacities of up to 1000 kg

Advantage:
- Flexible storage of various tool holders
- Tool holder no. 50655 020-126 can also be used in the shelf if hook-in profile ident. no. 165 is installed

Delivery:
Does not include support brackets, hook-on profiles or support profiles, these must be ordered in addition to the shelf

Notes:
Do not exceed max. load capacity of 50 kg per level (support profile). Must be screwed to the floor or wall (mounting materials not included). One pair of support brackets no. 50658 160 per storage level must be ordered together with shelf no. 50658 050-052.

Technical data:
- Depth: 513 mm
- Width: 1019 mm
- Height: 1740 mm
- Load-carrying capacity: 350 kg
- Material: Sheet steel

Ident. No. 050
Configuration example: Shelf ref. no. 050 fitted with 6 support profiles for holding SK 40 no. 50658 115 combined with support angles ref. no. 160

Configuration example: Rack ref. no. 050 fitted with WTS support profiles no. 50658 110-158 combined with support angles ref. no. 160 and tool carrier no. 50655 020-126 combined with hook-on profile ref. no. 165

Support profiles for CNC tool holders

For shelf nos. 50658 050-052

Application:
For clearly-laid-out storage and retrieval of CNC tools.

Execution:
- Made of sheet steel
- Equipped with plastic inserts to accommodate CNC tools

Notes:
One pair of support brackets no. 50658 160 per storage level must be ordered for fitting in shelf no. 50658 050-052. One pair of support rails no. 50658 100 per storage level must be ordered for fitting in cabinet housing no. 50658 005-074. Please consider when ordering. Other holders such as Capto C3 or Capto C4 available upon request.

Technical data:
- Type: For racks/cabinet housings
- Depth: 160 mm
- Width: 942 mm
- Colour: Light grey RAL 7035
- Load-carrying capacity per carrier section: 50 kg

vertical cabinets
maximum storage capacity in minimum space

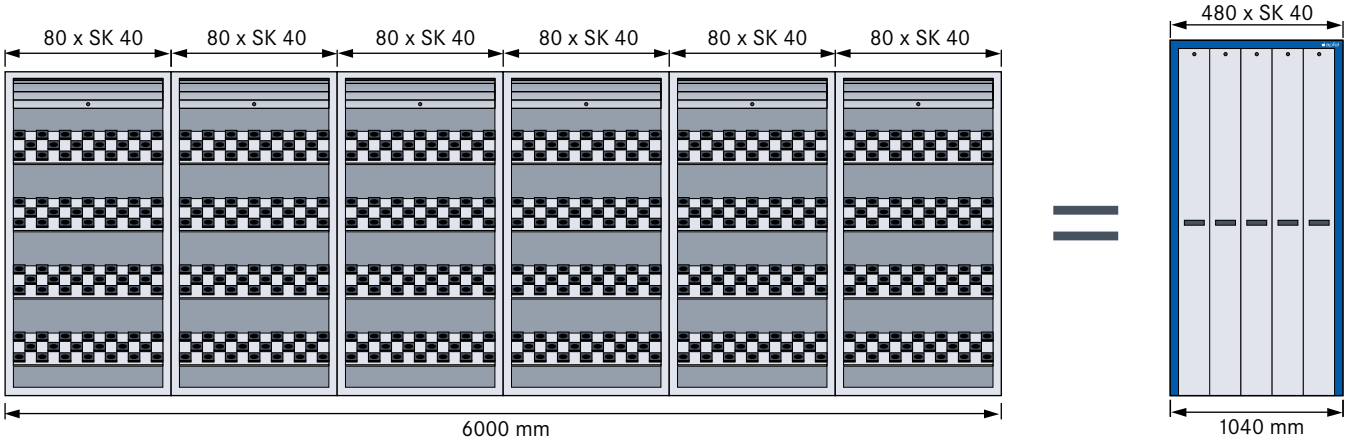
Apfel vertical cabinets make optimum use of space. they minimise large storage areas to the smallest possible space and provide safe and convenient storage of tools, small items and bulk goods. the robust construction allows loads of up to 5400 kg per cabinet. The drawers run smoothly and securely.

direct, double-sided access to the tools

storage space in each drawer for small material

highest load capacity thanks to running castors

carrying bags for easy change of location



Conventional roller-shutter cabinets (shown to scale)

Tool cabinet with 3 vertical extensions

For very space-saving storage of CNC tools

Execution:
- Robust design made of 3 mm steel sheet
- Sturdy plastic rollers with needle bearings that withstand heavy loads
- Includes tool holders with receptacles for optimum use of space and precise fit
- Access on both sides reduces the injury risk
- Drawers separately lockable and with label field for easy identification
- Lateral fork pockets for quick and easy relocation using a pallet truck or forklift truck
- Store up to 144/288 metal cutting tools over a width of 660 mm
- Variable attachment of tool holders in holes with 25-mm hole spacing
- Other paint colours deliverable on request.

Advantage:
- Clean, secure and careful storage of all common drilling and milling tools
- Optimum visibility and quick access thanks to a unique system with plastic holders
- Maximum load-bearing capacity and steady drawer guidance with revolving wheels

Notes:
Number of respective tool adapters is indicated in the separate information shown. When ordering, please specify the tool fixtures with which you would like to equip the cabinet. Different tool fixtures can be combined in one cabinet. Further configurations can be found in subsection Vertical Cabinets from no. 50640080-093.

Technical data:
- Lock type: Cylinder lock
- Material: Sheet steel
- Colour of front: Grey white RAL 9002

Workbenches
Height-adjustable via hand crank or base

Ident. No. 052

Version:
- **Ref. no. 002-010:**
  - Base made of square steel tubing, outer 60 x 60 x 2 mm, inner 55 x 55 x 2 mm, central cross-brace, with level compensation on all four feet
  - Continuously adjustable height from approx. 740-1,040 mm via hand crank (removable)
  - Bevel gear with hardened steel gear wheels
  - Gear housing made of fibreglass-reinforced plastic
  - Fully assembled including hand crank
- **Ref. no. 050-057:**
  - Base frames made of sturdy U-profile steel 80 x 50 x 2 mm, height x depth 800 x 630 mm, incl. crossbrace between bases
  - Working height adjustable via notches in the base in increments of 25 mm, from approx. 640-990 mm
  - Delivered as individual parts, unassembled

Advantage:
- Perfect ergonomics at the workplace
- High-quality workmanship
- The workbench can quickly and easily be adjusted to the desired working height

Note:
Transparent soft PVC mats for protecting work surfaces, see no. 50233 905-930.

Technical data:
- Load-carrying capacity: 800 kg
- Mandatory testing according to DGUV (UVV): No

Heavy-duty workbenches

Electrical height adjustment

Version:

- Fully welded tubular steel frame with bolted stabilisation panels
- Height-adjustable via 4 electric motors, coupled via electronic control unit, 370 mm stroke, controlled via keypad
- Front sides with cover, incl. 10 x 10 mm square perforation, fixed intervals of 38 mm
- Table top protrudes over base frame by 80 mm along each long side and by 62 mm along each short side
- Square base plates, 140 x 140 mm, with perforation for ground anchoring
- Tray shelf 640 mm deep, load capacity 100 kg
- Multiplex beech worktop, 50 mm thick, oiled surface
- Electrical connected load: 230 V/720 watts
- Equipped with emergency stop switch and 3 CEE 7/4 socket outlets (front right)

Advantage:

- Capable of withstanding dynamic loads up to 2,000 kg
- Table can be quickly and easily adjusted to the desired work height
- Perfect ergonomics at the workplace

Note:

For optional accessories such as workbench attachments with pegboards, workstation lighting, swivel arm elements and open trays for the ergonomic provision of tools and materials, see from no. 50202206-256, drawer block for table available on request. Looking for a customised heavy-duty table to suit your requirements? Contact us.

More products can be found online at **www.hahn-kolb.de**

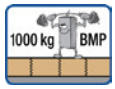
VG series group workbenches
With solid beech panel, 50 mm thick

Design:
- Worktop in solid beech, plate thickness 50 mm, sandable, glued structure, special interlinking, thus extremely robust and with almost unlimited durability.
- Base cabinets made of robust welded sheet steel.
- Total load capacity of 1000 kg with evenly distributed load
- Can be individually equipped with drawers and doors. A 30 mm grid system enables the installation of drawers with a front height of 60-360 mm and doors with a front height of 360, 540 and 720 mm.
- Drawers with 100% full extension. 100 kg load-bearing capacity and individual pull-out locks.

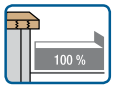
Delivery:
Drawer cabinets and worktops not fitted. Installation service on request.

Example with drawing holder, panels, energy panel and cover panel

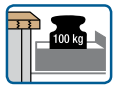
Standard features:



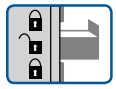
Max. load-bearing capacity



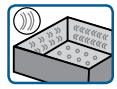
Drawers with 100% full extension



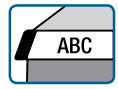
Load capacity 100 kg per drawer



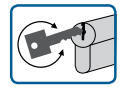
Individual drawer locking: only one drawer can be opened at a time



Drawers with perforated floors and slotted walls for individual partitioning



Aluminium handle strips with inscription tapes and PVC protective profile



Central lock, incl. 2 keys

Powder-coated surface: Body RAL 7035 light grey with fronts available in RAL 5010 gentian blue or RAL 7016 anthracite grey

Mobile workbenches

Mobile - 4 drawers (XXL)

Application:

The mobile workstation with versatile options for use.

Version:
- Robust welded sheet steel construction
- Push handlebar on one face side
- Workbench worktop made of solid beech, glued together longitudinally in bars (thickness 40 mm)
- XXL drawers

Advantage:
- Wide range of versions, mobile and ready for use anywhere
- Rests absolutely stable on four feet when lowered
- Available in different RAL colours!

Technical data:
- Number of drawers: 4 PCS
- Worktop height: 40 mm
- Worktop depth: 650 mm
- Pullout type: Single extension slide
- On castors: Yes
- Moving device, can be lowered: No
- With single pull-out safety brake: No
- With wheel lock: Yes
- Surface: Powder-coated
- Lock type: Cylinder lock
- Drawer front height: 1 x 150 mm | 1 x 90 mm | 1 x 180 mm | 1 x 270 mm
- Load-carrying capacity: 600 kg
- Load-carrying capacity per drawer: 100 kg
- Material: Sheet steel
- Material of worktop: Solid beech
- Material of wheel: Polyurethane
- Central locking: Yes

Workbench construction for table lengths 1500 and 2000 mm

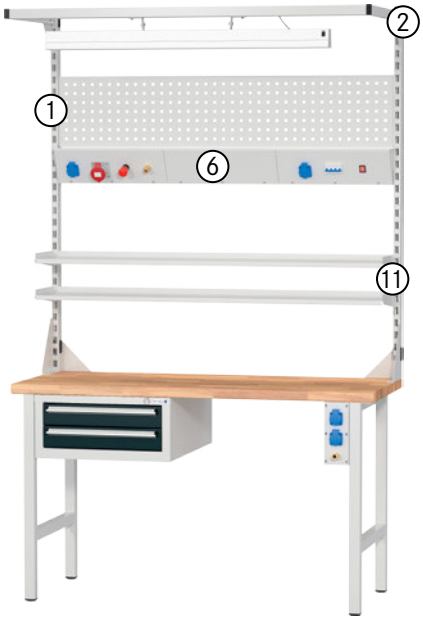
Design:
Modular and flexible plug-in system made of sheet steel, support elements with detent positions for hooking on elements and accessories, perforated sheet metal walls with square perforation 10 x 10 mm, distance from hole centre to hole centre 38 mm

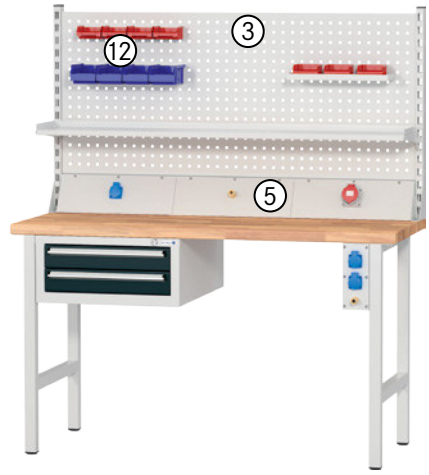
Application:
Thanks to the flexible and modular system, workstations in production, assembly, development, training and further education can be optimally designed and adapted to the individual work sequences.

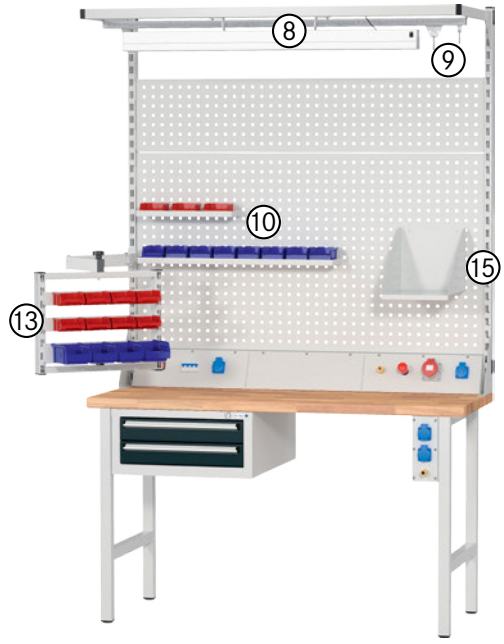
Advantages:
- Flexible system due to simple plug-in assembly of the elements
- Convenient adjustment of workstation to individual requirements and needs
- Various combination options thanks to extensive accessories

Colour:
RAL 7035, light grey, powder-coated. Other colours available on request.

Note:
Workbench construction system for other lengths of table available on request.







① Support strut for workbench construction, see from no. 50239 104
② Boom supporting arm, see no. 50239 121
③ Perforated metal plate wall, see from no. 50239 270
④ Power block for base, see no. 50239 135
⑤ Power strip, see from no. 50239 136

SOFT-CLOSE

for smooth and quiet closing of drawers

Application:

Particularly suitable for the safe storage of delicate tools and parts in drawers in HK drawer cabinets, workbenches, undercounter cabinets, drawer blocks, group workbenches, assembly trolleys, roll containers and workbench trolleys. For drawers with a load capacity of up to 100 kg.

Version:

- The damping system brakes the drawer while closing; it closes the drawer smoothly and soundlessly by means of the self-closing mechanism

Advantage:

- Impact load on tools and parts stored in the drawer is reduced to a minimum due to the smooth-closing drawers

Note:

When ordering, please indicate the required number of SOFT-CLOSE drawers. The price shown is the extra price per drawer. Cannot be retrofitted on existing drawers

Technical data:

- Load-carrying capacity: 100 kg

Tool trolley

Width 650 mm, with swing columns, lowerable intermediate boxes

Execution:

- Sturdy sheet-steel construction with large floor tray, table surface with rubber mat
- 2 intermediate boxes each with 4 sheet metal dividers for versatile partitioning
- Useful area of intermediate boxes W x D 480 x 315 mm, load capacity per intermediate box 15 kg
- With swivel columns for space-saving transport, can be folded down to the lowest height of the tool trolley in order to save space and act as handles
- The intermediate boxes can be lowered using the fold-down columns, total lowered height 500 mm
- Table top and intermediate boxes with rubber protection strips to protect against damage
- Lockable with padlock with shackle diameter 6.5 mm (not included in scope of delivery)

Technical data:

- With single pull-out safety brake
- Height: 965 mm
- With single-locking drawers
- With SOFT-CLOSE closing function: No
- Load-carrying capacity: 300 kg
- Central locking: No
- Lock type: Padlock
- Punched-hole, sidewall: No
- Punched-hole
- With edge protection: No
- With sliding handle: No

Tool trolley

Width 778 mm, with fully extending drawers

Execution:
- Sturdy sheet steel construction with solvent-resistant plastic worktop and 2 integrated storage compartments
- Plastic-coated metal sliding handle attached directly to the frame
- Central locking with cylinder lock secures all drawers, incl. 2 keys
- 4 abrasion-proof transport wheels, 100 mm diameter, 2 of which can be steered, 1 lockable steering roller
- For accessories such as can holder, document holder, suspended bin, waste basket, see no. 50278 578-590, attachment for cable box, see no. 50278 813, add-on frame with 12 transparent tilt bins, see no. 50278 815, tool hooks for attachment to rectangular hole grid on sidewalls, see no. 50638 300-650.
- Suitable products for equipping the drawers include our ATORN hard foam inserts with tool assortments, see no. 50537 505-591 or AQURADO dimpled mat for drawers, see no. 50540 620, boxes from no. 50540 150.

Advantage:
- Indented side walls protect additional add-on parts from damage since they are located within the overall trolley dimensions
- Rectangular hole grid on the sidewalls for individual attachment options using e.g. hooks for tools or other add-on parts, e.g. can holder, waste basket etc.

Delivery:

Incl. 1 sheet metal divider per drawer

Notes:

To order customised hard foam inserts suitable for these drawers, please use the following clear internal dimensions: Width 520 mm, depth 345 mm.

Technical data:
- Pullout type: Full extension
- With single pull-out safety brake: No
- Height: 915 mm

Prod. Gr. 5BA

Tool trolley incl. 151 pcs tool assortment in 7 hard foam inserts

Width 778 mm, with 7 fully extending drawers

Application:
Can be used as a mobile workshop – all tools securely housed and at your fingertips

Execution:
- Sturdy sheet steel construction with solvent-resistant plastic worktop and 2 integrated storage compartments
- Plastic-coated metal sliding handle attached directly to the frame
- Central locking with cylinder lock secures all drawers, incl. 2 keys
- 4 abrasion-proof transport wheels, 100 mm diameter, 2 of which can be steered, 1 lockable steering roller
- 7 ATORN hard foam inserts fitted with 151 ATORN tools fill 4 drawers of the tool trolley
- Additional ATORN hard foam inserts equipped with tools for the flexible configuration of drawers, see no. 50537 505-591, additional accessories such as can holders, document holders, add-on trays, waste baskets, see no. 50278 578-590, cable box holder, see no. 50278 813, mounting frame incl. 12 transparent tip-out bins, see no. 50278 815

Advantage:
- Clearly-arranged and safe storage of tools in the drawers
- Precisely dimensioned cut-outs in the inserts and the use of a contrast colour (blue) means that missing tools can be detected at a glance
- Expensive tools can be stored securely and safely in the insert
- Indented side walls protect additional add-on parts from damage since they are located within the overall trolley dimensions
- Rectangular hole grid on the sidewalls for individual attachment options using e.g. hooks for tools or other add-on parts, e.g. can holder, waste basket etc.

Delivery:
Incl. 1 sheet metal divider per drawer, incl. 7 ATORN hard foam inserts equipped with 151 ATORN tools

Notes:
To order customised hard foam inserts suitable for these drawers, please use the following clear internal dimensions: Width 520 mm, depth 345 mm.

Technical data:
- Pullout type: Full extension
- With single pull-out safety brake: No
- Height: 913 mm
- With single-locking drawers: Yes
- With SOFT-CLOSE closing function: No
- Load-carrying capacity: 300 kg
- Central locking: Yes
- Lock type: Cylinder lock
- Punched-hole, sidewall: Yes
- Punched-hole: 10 x 10 mm
- With edge protection: No
- With sliding handle: Yes
- Number of fixed rollers: 2 PCS
- Number of steering rollers: 2 PCS
- With wheel lock: Yes
- Material of wheel: Solid rubber
- Wheel diameter: 100 mm
- Material of worktop: Plastic
- Material: Sheet steel
- Surface: Powder-coated

Trolley incl. 7 hard foam inserts equipped with 151-piece tool assortment:

Tool trolley with safety drawer lock

Width 786 mm, with fully extending drawers

Execution:
- Extremely robust design due to double-walled construction, completely welded construction of the entire body for daily rigorous use in the workshop
- Plastic worktop, solvent-resistant, with integrated storage compartments
- drawers with integrated self-closing mechanism and SOFT-CLOSE
- Impact protection at all four corners of the vehicle
- 2-stage locking concept:
- Central locking via cylinder lock locked with 2 hinged keys
- individual locking of the drawers, integrated into the drawer front plate
- mutual drawer lock, minimises the risk of overturning
- 4 ball-bearing wheels, diameter 125 mm, 2 of which are steering rollers with brakes; all wheels with thread guards which protect the bearings from dirt and threads

Advantage:
- High-quality chassis
- inserted side walls protect the additionally attached add-on parts from damages, since they are within the carriage dimensions
- Individual fastening options thanks to rectangular hole grid on the side walls, e. g. with hooks for tools or other attachments (can holder, paper roll holder, waste basket, etc.)

Notes:
Drawers are supplied without separating plates

Prod. Gr. 5BA

ATORN Tool trolley incl. 136 pcs tool assortment, with safety drawer lock

Tools in 4 hard foam inserts, + bit box + bit holder

Execution:
- Sturdy sheet steel construction with solvent-resistant plastic worktop, 2 integrated storage compartments and 2 can holders
- Full-height edge protection on all 4 corners of the trolley, plastic-coated metal sliding handle attached directly to the frame
- Drawers with labelling space for individual identification with pictogram stickers
- individual fastening possibilities thanks to rectangular hole grid on the side walls, e. g. with hooks for tools or other add-on parts, e. g. can holder, waste basket etc.
- Central locking with cylinder lock secures all drawers, incl. 2 articulated wrenches
- Transportable thanks to 2 ball-bearing fixed wheels and 2 guide rollers, diameter 125 mm, with locking brake
- 4 ATORN hard foam inserts fitted with 74 ATORN tools fill 2 drawers of the tool trolley
- Incl. 4 ATORN hard foam inserts no. 50537 509/515/517/530, made from black/blue two-tone polyethylene (PE), resistant to most oils and chemicals thanks to closed-cell structure, equipped with 74 ATORN tools, ATORN bit box (52841030) + bit holder (52841220), 1 divider per drawer and pictogram labels for drawer marking.
- (For additional ATORN hard foam inserts with tools for flexible drawer configuration, see no. 50537 505-591, AQURADO dimpled mat for drawers, see no. 50540 620, additional accessories such as can holder, document holder, suspended bin, waste basket, see no. 50278 578-590, attachment for cable box, see no. 50278 813, add-on frame with 12 transparent tilt bins, see no. 50278)

Advantage:
- With individual drawer pull-out locking which means that only one drawer can be opened, protecting the trolley against tipping
- Clearly-arranged and safe storage of tools in the drawers
- Precisely dimensioned cut-outs in the inserts and the use of a contrast colour (blue) means that missing tools can be detected at a glance
- indented sidewalls protect additional add-on parts from damage since they are located within the overall trolley dimensions

Prod. Gr. 506

Tool trolley, model 2004

With fully extending drawers

Execution:
- Working platform made of ABS, with 3 shaped compartments for small parts and a raised wide edge, oil and acid-resistant
- Sturdy ergonomic steering handle for self-assembly
- All-round collision protection bumper with heel protection
- Lockable side storage space with 4 removable drawers for small parts, lockable via the central drawer locking system with a cylinder lock
- Load capacity of 60 kg with a drawer front height of 207 mm (evenly distributed load)
- The basic equipment includes 10 or 15 longitudinal and 2 or 3 cross-partitions, 4 removable drawers for small parts and 2 spacer boxes, 1500 ED-70K
- **Ident. No. 040:**
  - heavy-duty chassis on rollers, with 2 fixed castors, diameter 200 mm and steering rollers, diameter 125 mm, with complete stop
  - storage compartment on the access side with perforated metal plate wall, 10 x 10 mm, for affixing accessories and tools
- **Ident. No. 045:**
  - Heavy-duty chassis on rollers, with 2 fixed wheels, diameter 200 mm and guide rollers, diameter 125 mm, 1 with complete stop
  - Storage compartment on the access side with perforated metal plate wall 9 x 33 mm for affixing accessories and tools

Advantage:
- Stable, robust tool trolley with optimum ease of use (e.g. one-handed drawer opening)
- Safety lock ensures precise operation of drawer stopping mechanism when moving

ATORN Hard foam inserts, equipped with high-quality ATORN tools

Width 293 mm, depth 587 mm, for HK drawer cabinets System 700

Application:
For flexible and modular equipping of drawers from the HK drawer cabinet system 700 S and 700 B.

Execution:
- The PE foam is lightweight, resistant, durable, odour-neutral and even food safe
- One tool insert fills half of the usable area of drawers with internal dimensions 600 x 600 mm
- Two tool inserts fill the entire usable area of drawers with internal dimensions 600 x 600 mm
- Three tool inserts fill the entire usable area of drawers with internal dimensions 900 x 600 mm
- For flexible and modular drawer configuration in HK drawer cabinet system 700 S and 700 B.

- **Ident. No. 701–705:**
  - Two-tone polyethylene (PE) foam inserts equipped with tool assortments
  - Closed-cell foam is resistant to most oils and chemicals
- **Ident. No. 900:**
  - two-tone foam inserts made of polyethylene (PE) equipped with tool assortments
  - resistant against most oils and chemicals due to closed cells

Advantage:
- Clearly arranged, organised and protected storage of tools in the drawers
- Accurately fitting cut-outs in contrasting blue make it easy to spot when tools are missing and help to prevent loss of tools
- Expensive tools can be stored securely and safely in the insert

Technical data:
- Depth: 587 mm
- Height: 30 mm
- Length: 587 mm
- Width: 293 mm
- Material: PE - Polyethylene
- Colour of top hard foam inlay: Black
- Colour of bottom hard foam inlay: Blue

CLIP-O-FLEX® Wheeled workbenches with CLIP-O-FLEX hook-on system

Height 958 mm, including 12 or 14 CLIP-O-FLEX trays

Application:
Thanks to the flexible and modular CLIP-O-FLEX system, the wheeled workbench can be optimally designed and adapted to the individual work sequences in production, assembly, development, training and further education. CLIP-O-FLEX sets your work/storage area or your organisation system with one clip and at the same time gives the highest level of horizontal and vertical flexibility.

Execution:
- Solidly welded steel sheet construction
- Workbench panel with CLIP-O-FLEX support rails installed on the left, right and at the rear
- **Ident. No. 140–143:** With fixed support brackets on the inside for CLIP-O-FLEX trays
- **Ident. No. 144–147:** With convenient pull-out system for CLIP-O-FLEX trays

Advantage:
- Simply remove the trays from the cabinet and hang on the hook-in rails at the side
- Flexible hook-on system with only one hooking movement
- Ergonomic workplace design thanks to different inclines and can be relocated horizontally
- Quick access to work equipment, very clear overview
- Rapid conversion and replacement, highest possible level of mobility, less walking required, optimum use of space

Notes:
The spacing between the tray base and CLIP-O-FLEX mounting profiles is max. 52 mm. Please consider the amount of tool protrusion (max. 22 mm) when using trays equipped with ATORN tool inlays (height 30 mm). Trays of tools with greater protrusion must be stored in the first storage level.

Technical data:
- Pullout type: Full extension
- With single pull-out safety brake: No
- Load-carrying capacity: 550 kg
- Dynamic load-carrying capacity: 225 kg
- Central locking: Yes
- Lock type: Cylinder lock
- With sliding handle: Yes
- Number of fixed rollers: 2 PCS
- Number of steering rollers: 2 PCS
- With wheel lock: Yes
- Material of wheel: Solid rubber
- Wheel diameter: 100 mm
- Material of worktop: Multiplex beech
- Material: Sheet steel
- Surface: Powder-coated

Ident. No. 140–141, 144–145

Ident. No. 142–143, 146–147

Incl. CLIP-O-FLEX trays

The tray can be fixed into the rail with one hooking movement and detached again

Version with support angles

Version with convenient pull-out system

Wheeled workbench, model 1504

Working height 985 mm

Application:
The mobile workstation with versatile options for use.

Execution:
- Large locking side section with fixed storage tray
- Basic configuration contains 10 longitudinal and 2 cross-partitions and 4 spacing boxes 1500 ED-70 K for drawers

Notes:
To order customised hard foam inserts suitable for these drawers, please use the following clear internal dimensions: Width 478 mm, depth 390 mm.

Technical data:
- Pullout type: Full extension
- With single pull-out safety brake: No
- With single-locking drawers: No
- Load-carrying capacity: 700 kg
- Number of drawers: 7 PCS
- Dynamic load-carrying capacity: 500 kg
- Central locking: Yes
- Lock type: Cylinder lock
- With sliding handle: No
- Number of fixed rollers: 2 PCS
- Number of steering rollers: 2 PCS
- With wheel lock: Yes

V series mobile workbenches
Either stationary or with retractable transport wheels

Workbench version:

- Worktop in solid beech, plate thickness 50 mm, sanding possible, glued stats structure, special interlinking, thus extremely robust and with almost unlimited durability
- Working height 850 mm
- Sturdy, welded sheet steel frame, base made of square steel tube 45 x 45 x 2 mm, load capacity 1,500 kg for evenly distributed load when stationary, 450 kg when mobile, load capacity includes dead load of workbench
- Can be individually fitted with drawers and doors; a 30 mm grid system enables the installation of drawers with a front height of 60-360 mm and doors with a front height of 360 and 540 mm
- Drawers with 100 % full-extension slide, 100 kg load capacity and individual pull-out lock
- Retractable transport wheels: the drive/stop position is adjusted by a simple turn of the lever on the front side of the workbench
- Vice: 100 mm jaw width with 360° folding, swivelling and height-adjustable lift. The vice compartment is equipped with a door. After folding out the vice, the door can be closed again

System structure version:

- 1 pair CONNECT assembly supports, height 800 mm above the worktop
- Very stable connection between the assembly supports and the worktop through a 2-point screw connection through the worktop from beneath
- Perforated metal plate wall with 10 mm square holes and 38 mm spacing
- Attached module such as power supply strip, support rails for easy-view storage bins in a 50 mm grid, height-adjustable without tools
- Energy power strip ready wired using plug-in connectors; a qualified electrician is required for connecting the CEE socket (not included in the scope of the services)

Delivery:

Ready assembled, system components can be ordered individually for retrofitting; they will, however, be supplied unassembled.

Accessories:

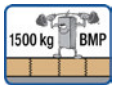
- Support elements for perforated metal plate wall, see no. 50638,
- Easy-view storage bins for support rails, see no. 50638 810-837,
- Drawer partitioning sets, compartment dividers and partition strips, see no. 50228
- AQUARDO textured mats for drawers, to be equipped with universal boxes, see no. 50540 660

Colour:

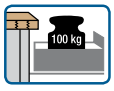
Body housing, assembly supports, support rails in RAL 7035 light grey, drawer fronts, power strip available in RAL 5010 gentian blue or RAL 7016 anthracite grey, powder-coated.

See RAL colour table below for colours available as a free-of-charge option.

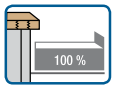
Standard features:



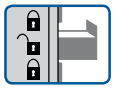
Maximum load per workbench



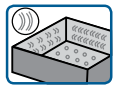
Maximum load per drawer



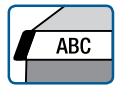
Full-extension slide



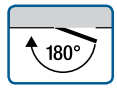
Individual pull-out lock



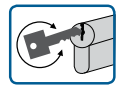
Perforated floors + slotted walls



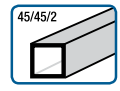
Aluminium handle strips with label strips and protective PVC profile



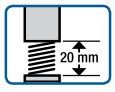
Door opening angle



Central lock



Base



Level compensation

Assortment case with removable compartment inserts “Boxxer”

Made of polypropylene and polycarbonate

Application:
For orderly storage of small parts.

Execution:
- Carry handle with latching mechanism for one-handed operation and safety locking
- Resistant to most solvents and oils
- **Ident. No. 430–465:**
  - With double-walled polypropylene case base and extremely robust polycarbonate lid
  - Removable polypropylene inserts allow partitions to be placed as required
  - Exchangeable identification label (3 colours included)
  - 2 built-in fixed partitions
- **Ident. No. 470–485:**
  - with double-walled polypropylene case base and extremely robust polycarbonate lid
  - removable polypropylene inserts allow partitions to be placed as required
  - exchangeable identification label (3 colours included)
  - Two built-in fixed partitions

Advantage:
- Profile grid in lid prevents contents becoming mixed up, even with heavy contents
- Support feet in rear wall for stability even when in an upright position

Technical data:
- Material: Plastic
- Colour: Dark blue | Grey
- Compartment type, boxes: Adjustable
- Mandatory testing according to DGUV (UVV): No

K 470 universal case

Foam seal in the lid

Application:
Space-saving, secure storage and transport

Execution:
- Large and ergonomic handle and locks for ease of use, even when wearing gloves
- Foam seal in the lid protects against dust and moisture, optionally with IP65 or IP 67 degree of protection
- Insensitive to heat and cold, tested from -54 °C to +80 °C
- Numerous quality features, including fully welded profiles, high-grade steel hinges, beads and solid rivets, ensure a long service life. Extra-strong 1.5 mm sheet for all K 470 from dimensions 750 × 550 mm provides extra stability
- Lid with high-grade steel hinge, two straps and foam seal in the lid
- Can be stacked securely thanks to cast aluminium stacking corners
- High stability thanks to three fully welded aluminium frames
- UN approval for transporting dangerous goods available for an additional fee
- Snap locks: Can be secured using a key lock, lead seal, spring anti-opening mechanism or padlock (max. bar thickness 6 mm)
- Extra-strong 1.5 mm sheet for all K 470 from dimensions 750 × 550 mm

Advantage:
- Ergonomic and durable comfort locks for at least 20,000 actuation cycles

Technical data:
- Material: Aluminium

ZARGES

Battery safety container K 470

Special containers made of aluminium

Application:
For the safe storage and transport of damaged or defective lithium batteries in accordance with Packaging Instructions 908.

Execution:
- Suitable for up to 3 lithium batteries up to 500 Wh each.
- Equipped with fire-resistant cushioning and absorbent material made of textured fibreglass
- High stability thanks to 3 fully welded aluminium frames
- Weight: 11.5 kg
- Fire test successfully passed: no spreading of flames to neighbouring batteries, temperature on container surface remains below 100°C
- Tested and approved in line with UN provisions as hazardous goods packaging, i.e. proper public transport in line with P908 possible

Technical data:
- Volume: 66 l
- External length: 600 mm
- External width: 600 mm
- External height: 250 mm
- With lid: Yes
- With handle: Yes
- With rollers: No
- Internal length: 550 mm
- Material: Aluminium
- Colour: Silver

DO YOU NEED YOUR WORKPLACE TO BE TIDY?
WE HAVE WHAT IT TAKES.
Do you need more than just a hammer, pair of pliers or a screwdriver? We have the full range for you. Machining tools, handling systems and measuring technology. However, we also offer tailor-made system solutions, large and small machinery and complete factory equipment. In total, more than 120,000 products.
www.hahn-kolb.com
HAHN+KOLB GROUP
LET'S WORK TOGETHER.

Better workplaces and processes with CLIP-O-FLEX

The innovative CLIP-O-FLEX® mounting module is a genuine multi-talent. It enables equipment and tools to be attached, prepared and stored securely, flexibly and in a space-saving manner. This can optimise entire workplaces and processes in the sense of increasing productivity - including by retrofitting existing workshop equipment. It is precisely because of this that it now forms the core element of a new product range for complete workplace solutions that are more flexible, efficient and ergonomic, and so better overall in terms of quality, than the previous workshop equipment.

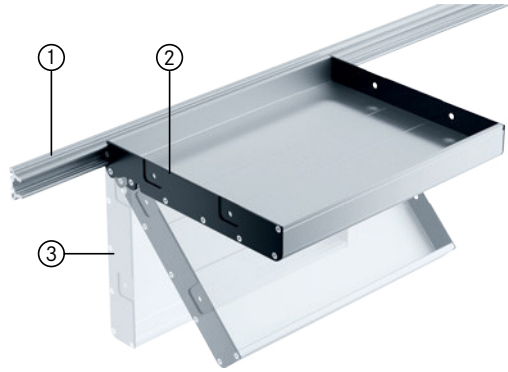
The CLIP-O-FLEX® mounting module is a relatively small module with enormous effects of different kinds. Initially developed as a flexible attachment system, it has since optimised entire workplaces and processes. It resolves the apparent contradiction between the necessary stability and the greatest possible flexibility in the workplace environment in production and workshops with a sophisticated mechanism.

What are the multiple effects of this small module?

- **It is as secure as required in production and at the workstation and as flexible as possible in this environment:** The user can easily and securely change the mount vertically with an angle of inclination of up to 90°, and it can also be moved horizontally.
- **User-friendly and ergonomic:** Operating the clip mechanism and therefore flexibly attaching and releasing different components, equipment and tools is greatly simplified and facilitated, which benefits the operator at the workstation.
- **Saves time and space in production and the workshops:** The vertically and horizontally flexible mounting module enables work material to be made available exactly where it is processed and needed. This reduces walking distances and the space occupied throughout production.
- **Specifically implements quality assurance:** Ensures greater order and cleanliness in the workplace. It changes behaviour and therefore becomes an effective instrument for implementing quality assurance systems such as 5S in the workplace.

How does the flexible mounting module work?

- On one side of the CLIP-O-FLEX® mounting module, a stable support rail ① is mounted on the workstation or suitable places for its accommodation in production.
- The counterpiece for the mounting module forms a sophisticated clip-on profile ② on the other side. It features a clip system for securely and durably attaching workplace surfaces and equipment, trays, tools or containers etc.
- The intelligent connection of support rail and clip-on profile makes it possible to easily and immediately release, tilt and move what is securely fastened in a unique way ③.



To what extent does CLIP-O-FLEX® have the potential to revolutionise the world of work?

Whether the first installation, tuning or an individual addition: Whatever the circumstances, the CLIP-O-FLEX® interface has the potential to revolutionise whole workplaces and processes in production. If a customer converts a part of their workshop to CLIP-O-FLEX®, the employees' usual processes and actions change very quickly. The agility and flexibility of the entire system require different thinking and ultimately different actions and behaviour. On the one hand it is a motivation to keep more order and cleanliness at the workstation, above all in combination with the hard foam inserts from OPT-I-STORE®. On the other hand it also provides a great deal of relief with regard to ergonomics and efficiency. Tools, materials and work surfaces can be attached, removed, moved and adjusted much more easily. Setup times and long routes are eliminated, space and time are no longer wasted but used in an optimised way.

Better workplaces and processes with CLIP-O-FLEX

Workplace system range

Your company requires new workstations: Why not order the best workplace solution now?

For the first time we can offer complete workplace systems with our new CLIP-O-FLEX® Workplaces product range. They all have a multitude of advantages, which primarily result from the optimised installation of the CLIP-O-FLEX® mounting module. The workplaces we have developed ensure stability and safety combined with maximum flexibility. Work is made easier and more efficient for users due to the ergonomic benefits, particularly since no elements are permanently fixed and thus immobile. Our workstations can also be converted easily at any time in such a way that they are geared to the different needs of users and, conversely, there is no need for the operator to adjust to the workstation. A feel-good design and the use of the most suitable materials are a matter of course for us.

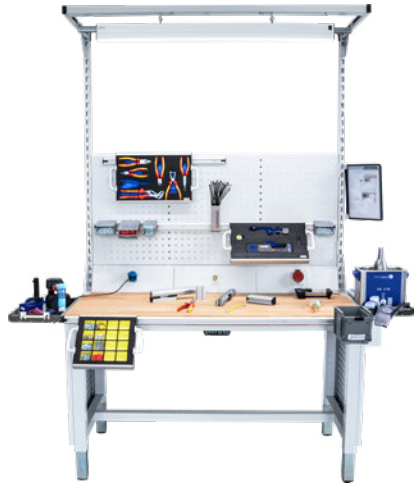
Our workplace system range of innovative workshop equipment includes several versions:

- CLIP-O-FLEX® system workstations with or without hub, light basic versions, add-on variants or heavy-duty workbench versions
- CLIP-O-FLEX® system trolley, multi-purpose trolley, media trolley
- CLIP-O-FLEX® Workplace - customer-specific workshop furniture

Workplace tuning range

Your company would like to optimise existing workplaces: Being the reason why "tuning" is also possible for workplaces.

'Tuning' is an additional increase in the performance of technical devices compared to a standard version. We usually use it to describe a fine tuning of a car's components, which leads to significant improvements in performance. We apply this basic principle to optimising workplaces and processes using the CLIP-O-FLEX® mounting module. Existing workplaces can be easily upgraded or retrofitted with it. This leads to a more flexible, yet at the same time still secure attachment, preparation or storage of equipment and materials in the workplace.



Our modular workplace tuning range is compatible with common workplace systems, including those from other manufacturers. The following can be expanded with the CLIP-O-FLEX:® mounting module, for example:

- Tool, transport and assembly trolleys
- Tool cabinets and cases
- Workbenches and work tables

Accessories and components range

Your company wants to procure CLIP-O-FLEX® ACCESSORIES: Are CLIP-O-FLEX® parts also available separately?

The CLIP-O-FLEX® mounting module comprises two parts: A support rail and clip-on profile as the matching counterpart. The effect is produced firstly through the combination of both components, which can also be ordered individually in a variety of versions and materials. Be it to optimise workplaces and processes on your own or to expand or supplement existing CLIP-O-FLEX® Workplace Solutions.

Our accessories and components range includes a variety of products and individual parts, with the following core products available in our shop:

- CLIP-O-FLEX® support rail
- CLIP-O-FLEX® clip-on profile
- CLIP-O-FLEX® trays
- CLIP-O-FLEX® accessories

CLIP-O-FLEX® System workstations for seated activities

CLIP-O-FLEX support rail on side and front

Application:
Suitable for assembly, logistics, measuring and production workstations. When outstanding productivity and ergonomics are needed. Full integration of the CLIP-O-FLEX® interface to optimise workflows through flexible workstation design. Easily expandable with CLIP-O-FLEX® trays, boxes, tool holders and other accessories.

Execution:
- Modern 10 mm HPL worktop
- CLIP-O-FLEX support rail on side and front
- Multiple socket outlet with three safety sockets
- **Ident. No. 331–355:** Dimmable LED lighting
- **Ident. No. 331–357:**
  - 3x CLIP-O-FLEX multi-purpose supply station
  - Equipment rail incl. tool hangers
- **Ident. No. 355–356, 358:** Drawer block with 2 drawers
- **Ident. No. 358–359:** 1x CLIP-O-FLEX multi-purpose supply station

CLIP-O-FLEX® Mobile system workstations for seated activities

CLIP-O-FLEX support rail on side and front

Application:
Suitable for assembly, logistics, measuring and production workstations. When outstanding productivity and ergonomics are needed. Full integration of the CLIP-O-FLEX® interface to optimise workflows through flexible workstation design. Easily expandable with CLIP-O-FLEX® trays, boxes, tool holders and other accessories.

Execution:
- Modern 10 mm HPL worktop
- CLIP-O-FLEX support rail on side and front
- Multiple socket outlet with three safety sockets
- Mobile
- **Ident. No. 349, 351, 353:** Drawer block with 2 drawers
- **Ident. No. 349–350:** Dimmable LED lighting
- **Ident. No. 349–352:**
  - 3x CLIP-O-FLEX multi-purpose supply station
  - Equipment rail incl. tool hangers
- **Ident. No. 353–354:** 1x CLIP-O-FLEX multi-purpose supply station

CLIP-O-FLEX® System workstation for measurement, height-adjustable

With hard stone panel, accuracy 0

Application:
Specially designed for use as a measuring workstation with an integrated hard stone worktop. For when outstanding productivity and ergonomics are needed. Full integration of the CLIP-O-FLEX® interface to optimise workflows through flexible workstation design. Easily expandable with CLIP-O-FLEX® trays, boxes, tool holders and other accessories.

Execution:
- **Incl. hard stone worktop, accuracy class 0, integrated into the table top**
- Adjustable feet incl. levelling function
- Working height is infinitely adjustable, four memory positions available
- 10 mm HPL worktop
- CLIP-O-FLEX® support rail on side and front
- 3x CLIP-O-FLEX® multi-purpose levels
- Multiple socket outlet with three safety sockets
- Central on/off switch; light switch
- Dimmable LED lighting

Advantage:
- The fitted hard stone worktop is accuracy class 0.

Technical data:
- Type: Measuring systems
- Width: 1500 mm
- Depth: 800 mm
- Worktop width: 1470 mm
- Worktop depth: 695 mm
- Worktop thickness: 10 mm
- Min. working height: 840 mm
- Max. working height: 1240 mm
- Min. height: 2000 mm
- Max. height: 2400 mm
- With lighting: Yes
- ESD-capable: No
- With rollers: No
- Anodised: Yes
- Load-carrying capacity: 400 kg
- Material of worktop: Hard pressure laminate board
- Colour temperature: 4000 K
- Material: Aluminium
- Luminous flux: 3294 lm
- Life time of illuminant: 100000 h
- Operating voltage: 230 V/AC
- Operating temperature: 40 °C
- Min. colour rendering index (CRI): 85
- IP protection type, lamp: IP 20
- Light length: 953 mm
- Luminaire efficacy: 86 lm/W
- Current consumption: 16 A
- Lamp power rating: 40 W
- Protection class lamp: Protection class I/protective grounding
- Mandatory testing according to DGUV (UVV): Yes

CLIP-O-FLEX® System workstation tuning set

Retrofit kit for existing workbenches

Application:
Retrofit kit for existing workbenches. Continue to use existing workbench feet or drawer cabinets, or combine with new workbench feet or drawer cabinets. For when outstanding productivity is needed. Full integration of the CLIP-O-FLEX® interface to optimise workflows through flexible workstation design.

Execution:
- Multiplex beech worktop
- CLIP-O-FLEX® support rail on side and front
- 3x CLIP-O-FLEX® multi-purpose levels
- Multiple socket outlet with three safety sockets
- Central on/off switch; light switch
- Dimmable LED lighting
- Equipment rail incl. tool hangers

Technical data:
- Type: Table top tuning kit
- Width: 1500 mm
- Depth: 800 mm
- Worktop width: 1470 mm
- Worktop depth: 695 mm
- Worktop thickness: 10 mm
- Height: 1240 mm
- With lighting: Yes
- ESD-capable: No
- With rollers: No
- Anodised: Yes
- Load-carrying capacity: 400 kg
- Material of worktop: Hard pressure laminate board
- Colour temperature: 4000 K
- Material: Aluminium
- Luminous flux: 3294 lm
- Life time of illuminant: 100000 h
- Operating voltage: 230 V/AC
- Operating temperature: 40 °C
- Min. colour rendering index (CRI): 85
- IP protection type, lamp: IP 20
- Light length: 953 mm
- Luminaire efficacy: 86 lm/W
- Current consumption: 16 A
- Lamp power rating: 40 W
- Protection class lamp: Protection class I/protective grounding
- Included in delivery: Fully assembled, on pallet,
- incl. upper structure
- Mandatory testing according to DGUV (UVV): Yes

CLIP-O-FLEX® System workbench with CLIP-O-FLEX mounting rail

As a single workstation or in combination as a group workbench

Application:
For the highest demands in regards to productivity and flexibility. Full integration of the CLIP-O-FLEX® interface to optimise workflows through flexible workstation design. Suitable as a single workstation or in combination as a group workbench. Easy to expand with CLIP-O-FLEX® trays, boxes, tool holders and other accessories.

Execution:
- Adjustable feet incl. level compensation
- 40 mm beech worktop (multiplex, oiled)
- CLIP-O-FLEX mounting rail on side and front
- Multiple socket outlet with three safety sockets
- Central on/off switch; light switch
- 3x CLIP-O-FLEX® multi-purpose levels
- Equipment rail incl. tool hangers

Advantage:
- Optimised system dimensions
- Can be set up in a variety of combinations
- Can be expanded infinitely
- Easy to customise
- Several integrated CLIP-O-FLEX interfaces

Technical data:
- Width: 1440 mm
- Depth: 720 mm
- Worktop width: 1410 mm
- Worktop depth: 615 mm
- Worktop thickness: 40 mm
- Working height: 900 mm
- With lighting: Yes
- ESD-capable: No
- With rollers: No
- Anodised: Yes
- Load-carrying capacity: 400 kg
- Material of worktop: Multiplex beech
- Colour temperature: 4000 K
- Material: Aluminium
- Luminous flux: 3294 lm
- Life time of illuminant: 100000 h
- Operating voltage: 230 V/AC
- Operating temperature: 40 °C
- Min. colour rendering index (CRI): 85
- IP protection type, lamp: IP 20
- Light length: 953 mm
- Luminaire efficacy: 86 lm/W
- Current consumption: 16 A
- Lamp power rating: 40 W
- Protection class lamp: Protection class I/protective grounding
- Mandatory testing according to DGUV (UVV): Yes

Prod. Gr. 586

CLIP-O-FLEX® System trolley made of aluminium profile

Application:
Ident. No. 337: Mobile workstation ideally suited for use as a PC workstation with a specially raised work surface. The top CLIP-O-FLEX® level can be optimally equipped with up to two monitor brackets on each side. Monitors can be mounted on both sides. Tray shelf for printer or PC incl. dedicated power supply.

Execution:
- 4x swivel castors incl. brake
- **Ident. No. 336:**
  - Basic version of a multi-purpose trolley for materials with integrated CLIP-O-FLEX® interface that can be equipped as desired
  - Can be equipped with tool trays, small parts storage boxes and tool holders as well as other CLIP-O-FLEX® accessories
  - 5x CLIP-O-FLEX® levels for equipping on both sides
  - 4x push handles
- **Ident. No. 337:**
  - 10 mm HPL worktop
  - HPL tray shelf, 360 mm deep
  - Incl. CLIP-O-FLEX® level on the side and front
  - Central on/off switch
  - 2x multiple socket outlets with three safety sockets (one on top of and one beneath the table top)
  - 2x CLIP-O-FLEX® multi-purpose level with one compartment
  - 1x CLIP-O-FLEX® multi-purpose level with two compartments
- **Ident. No. 338:**
  - Basic version of a multi-purpose trolley with integrated CLIP-O-FLEX® interface that can be equipped as desired
  - Can be equipped with tool holders e.g. for brooms, shovels or various cleaning tools. The load area is ideally suited for waste bins
  - 10 mm HPL shelf
  - 2x CLIP-O-FLEX® levels on both sides
  - 1x CLIP-O-FLEX® level at the top
  - 2x push handles

Technical data:
- Depth: 800 mm
- Height: 1650 mm

CLIP-O-FLEX® Aluminium trays

Application:
Just one click enables you to expand your individual workstation, thereby providing flexibility both horizontally and vertically. Tools and small parts are always within reach - at the machine, at the assembly station, in your tool case or stored neatly in the cabinet.

Execution:
- Angle adjustment: 0/45/90°
- Integrated anti-slip surface
- For front side and table top use
- Natural/black anodised

Technical data:
- Material: Aluminium
- Colour: Black | Aluminium silver
- Surface: Anodised
- Interior height: 31 mm

CLIP-O-FLEX® Clip-on profiles

Application:

Ident. No. 213: For attachment to CLIP-O-FLEX support rails; various materials can also be screwed, riveted or affixed.

Execution:

- **Ident. No. 085:**
  - Length 105 mm, made of aluminium with black cover caps on left and right
  - The hook-on profile is simply slotted in on the rear of W-KLT® storage boxes no. 50057 012-013
- **Ident. No. 213:**
  - Made of aluminium 54 mm wide, naturally oxidised
  - With black cover caps, left- and right-hand side

Advantage:

- **Ident. No. 085:** The hook.on profile allows W-KLT® storage boxes no. 50057 012-013 to be flexibly and ergonomically attached to any workstation with CLIP-O-FLEX support rails no. 50237 005-257.

Delivery:

Ident. No. 213: 1 pair = 2 pieces

CLIP-O-FLEX® Mounting rails

Application:

Ident. No. 005–019: For attachment to the wall, workbench, trolley, workbench structure or perforated metal plate walls As a holder for CLIP-O-FLEX insert profiles and trays.

Ident. No. 294: For mounting on a wall, workbench, trolley, workbench attachment or perforated metal plate wall. As a holder for CLIP-O-FLEX clip-on profiles and trays.

Execution:

- Total length = nominal length + 5 mm (cover caps)
- **Ident. No. 005–019:**
  - Made of naturally anodised aluminium
  - Pre-drilled, suitable for perforated metal plate walls with centre-to-centre distance 38 mm
  - Incl. lateral (left- and right-hand) cover caps
- **Ident. No. 294:**
  - Made of natural anodised aluminium
  - Includes cover caps for the left and right sides

Advantage:

- A tray, storage compartment or shelf can be inserted into the rail or detached again with only one movement
- Optimum horizontal and vertical flexibility
- **Ident. No. 005–019:**
  - Elements can be inserted into the sophisticated rail profile in various angles from 0–90° using the insert profiles and trays no. 50237 091-106
  - The profiles are can be easily moved sideways within the rails
  - Ergonomic and flexible workplace design
- **Ident. No. 294:**
  - Elements can be inserted into the ingenious rail profile at various angles ranging from 0-90° using clip-on profiles and trays no. 50237 091-106
  - The profiles can be easily moved sideways within the rails
  - Ergonomic and flexible workstation design

Delivery:

Ident. No. 005–019: Incl. lateral cover caps on left and right

Notes:

CLIP-O-FLEX® Tool holders and tool hooks

Application:

Ident. No. 293: For safely storing commercially available packing tape and adhesive tape dispensers.

Ident. No. 295–308: CLIP-O-FLEX® tool holders keep your workplace neat and tidy. Unique due to the 2 mounting angles available (0/12.5°) and its ability to be repositioned horizontally. The ideal complement to tool trays or other CLIP-O-FLEX® products.

Ident. No. 327: The FlipClip Regular allows up to six elements to be clipped into the system rail from the front and easily secured. The spacing between the individual clips can be adjusted as desired. Efficient use of space from a wall width of just one metre is guaranteed. FlipClip Regular is available with either a PVC or a steel plate. A maximum load capacity of 15 kg per clip (with the steel base plate) makes it possible to store even heavy objects easily and above all securely.

Execution:

- **Ident. No. 306:** Flexible holder for round tools such as brooms, shovels and similar products with a handle measuring between 20 and 30 mm
- **Ident. No. 307:** For various tools and objects such as screwdrivers, cutter knives, pens, folding rules and more
- **Ident. No. 308:** Pair of holders for heavy and large tools such as torque wrenches and similar products
- **Ident. No. 327:**
  - Load capacity per clip: up to 15 kg
  - 0° angle to the mounting surface
  - Aluminium mounting rail
  - FlipClip metal base plate
  - Operation is very easy due to the synchronous clamping jaws. The trick behind this is that the weight determines the clamping pressure.

W-KLT® storage boxes with front flap

Stackable, made of polypropylene

Application:
In Euro dimensions with integrated dispenser function for clearly arranged storage of small parts, consumables and bulk materials.

Execution:
- Box made from polypropylene, dispenser made from ABS
- Circumferential stack edge for easy stacking
- Reinforced base, high load-bearing capacity and dimensional stability
- Recessed handles for optimum grip when transporting
- Smooth internal walls facilitate easy cleaning of boxes
- Label field for clear labelling of box or goods

Advantage:
- Allows access to contents when stacked, space-saving storage of containers with integrated dispensers
- The open front flap allows you to identify and remove contents easily even when stacked
- Up to 50% less shelf space and surface area required
- Maximum efficiency and optimisation of work processes
- Impact-resistant and break-proof

Notes:
Accessories: W-KLT®-CLIP hook-on profile no. 50237 085 is simply slotted onto the back of W-KLT® storage boxes. This allows the storage box to be mounted easily on CLIP-O-FLEX support rails. For optimum and ergonomic provision of storage boxes in the workplace.

Technical data:
- Load-carrying capacity: 30 kg
- Material: PP - Polypropylene
- Min. temperature resistance: -20
- Max. temperature resistance: 90
- With handle: Yes

HK system trolley – the UNIVERSAL TROLLEY for individual configuration

With extensive equipment elements

Customise your TROLLEY according to your requirements and expectations.
With 10 x 10 mm square perforation in the central or asymmetrical divider and in the two outer walls, we offer a comprehensive range of accessories and flexible options for individually equipping your basic trolley according to your application.
Use the trolley, for example, as a cleaning station, mobile workstation, 5S assembly trolley, LEAN workplace trolley, mobile workshop trolley, material picking trolley, for storage and mobile transport for slings or long, bulky tools, parts, cables, etc.
We would be happy to address any special requirements for additional equipment elements. Please contact us.

Design:

- Robust, welded sheet steel construction
- Outer walls and divider with 10x10 mm square perforation, 38 mm grid spacing and slotted perforation, for attaching tool holders, support elements, hooks and various accessories
- Four integrated handles in outer walls for moving the trolley easily
- Powder-coated surface: Body RAL 7035 light grey, accent roof available in RAL 5010 gentian blue or RAL 7016 anthracite grey.

Example as tool picking trolley – equipped with CLIP-O-FLEX support rails, trays and tool inlays

Example as material/tool trolley – equipped with various accessory parts such as shelves, tool holders and bins

Advantages:

- The UNIVERSAL TROLLEY with numerous equipment options – configure YOUR OWN individual trolley
- With square and slotted perforation in walls, the trolley can be customised to meet your requirements
- Diverse and extensive accessories range for equipping the trolley
- Rapid retrofitting and conversion of accessory parts to cope with new workplace requirements
- Up to 24 RAL colours deliverable on request at no extra charge

Example as clearing station – equipped with paper dispenser, recyclable materials collector and broom set

Example as cleaning station – equipped with cleaning equipment

Further information and advice on request.

System trolley

For personalised configuration

Application:
basic trolley can be individually equipped with various elements, e.g. as a cleaning trolley, 5S assembly trolley, tool/material provision trolley, for storage and mobile transport for slings or long, bulky tools, parts, cables etc.

Execution:
- sturdy sheet steel construction, fully welded
- outer walls and divider with 10x10 mm square perforations, grid spacing 38 mm, and slotted perforations for attaching support elements, hooks and various accessories
- mobile thanks to 4 steering rollers Ø 125 mm, with trackless light-grey solid rubber tread and thread protection, 2 rollers with wheel blocks
- easy to move with four integrated handles in outer walls
- ref. no. 110: centre divider – usable depth 300/300 mm
- ref. no. 112: asymmetrical divider – usable depth 400/200 mm
- additional colours (at no extra charge) and special equipment requirements deliverable on request

Advantage:
- THE UNIVERSAL TROLLEY with numerous equipment options – configure YOUR OWN individual trolley
- square and slotted perforations in walls enable the trolley to be custom-equipped as per requirements
- versatile and comprehensive accessories range for equipping trolley
- rapid retooling and conversion of accessories for changing workplace requirements

Notes:

All-round stool with castors (DIN 68877)

The comfortable and versatile solution for short periods of sitting

Application:
The stool is a comfortable and flexible solution for short-term sitting in industrial applications, the service sector, healthcare settings and laboratories. Get more out of your stool with the optional flex support.

Execution:
- Seat height can be infinitely adjusted between 450 and 650 mm
- Seat cushion: Large, rounded seat cushion with extra-thick, comfortable padding
- Optional flex support: height-adjustable for arms and back
- **Ident. No. 112–114:** Fabric cover: breathable, comfortable and soft
- **Ident. No. 115–117:** Synthetic leather cover: washable, soft, comfortable and resistant to oils and disinfectants
- **Ident. No. 118–120:** PU foam: extremely durable, washable, resistant to mechanical influences
- **Ident. No. 121–123:** Supertec: comfortable, breathable and highly resistant thanks to micro-plating. Cut-resistant, non-slip and easy to clean

Advantage:
- Height adjustment via pneumatic spring using the practical ring trigger
- Coloured ring for protecting edges and cushions, provides durability
- Space-saving thanks to an elegant, compact, star-shaped base with a diameter of 540 mm

Technical data:
- Load-carrying capacity: 120 kg
- Material of frame: Plastic
- Min. seat height: 450 mm
- Max. seat height: 650 mm
- Seat diameter: 400 mm
- Colour of seating: Black
- Adjustable in height: Yes
- Height adjustment: Gas pressure spring
- With foot ring: No

bimos All-round stool with castors, ESD (DIN 68877)

Application:
The ESD stool is a comfortable and flexible solution for short periods of sitting in ESD workplaces.

Execution:
- Infinitely variable seat height adjustment between 450 and 650 mm
- ESD PU foam: extremely durable, washable, resistant to mechanical influences
- Seat cushion: Large, rounded seat cushion with extra-thick comfortable padding
- ESD-capable in accordance with EN 61340-5-1

Advantage:
- Height adjustment via pneumatic spring using the practical ring trigger
- Black coloured ring for protecting edges and upholstery, provides durability
- Space-saving thanks to an elegant, compact five-star base with a diameter of 540 mm

Technical data:
- Load-carrying capacity: 120 kg
- Material of seating: PU foam
- Material of frame: Aluminium
- Min. seat height: 450 mm
- Max. seat height: 650 mm
- Seat diameter: 400 mm
- Colour: Black
- Adjustable in height: Yes
- Height adjustment: Gas pressure spring

bimos All-round stool with castors, clean room (DIN 68877)

Application:
The clean room stool is a comfortable and flexible solution for short periods of sitting in clean room workplaces.

Execution:
- Infinitely variable seat height adjustment between 450 and 650 mm
- The synthetic leather cover is washable, soft, comfortable and resistant to disinfectants
- Seat cushion: Large, rounded seat cushion with extra-thick comfortable padding
- Clean room class 3 in accordance with EN ISO 14644-1
- ESD-capable in accordance with EN 61340-5-1

Advantage:
- Height adjustment via pneumatic spring using the practical ring trigger
- Hygienic design, suitable for clean rooms
- Space-saving thanks to an elegant, compact five-star base with a diameter of 540 mm
- Synthetic leather cover, washable and resistant to disinfectants
- soft and comfortable

Combined rolling/reclining seat

For fast, easy switching between sitting and lying position

Application:
For comfortable working in seated and lying position.

Execution:
- Stable, robust steel tube frame with six large wheels, diameter 63 mm, tilt-proof
- Load capacity up to 150 kg
- Padded seat/reclining surface, easy to clean off dirt
- Dimensions for lying position: L x W x H 1198 x 450 x 130 mm
- Seat height 420 mm, seat 300 x 310 mm
- Colour: black and headrest or seat HAZET blue

Advantage:
- Creeper and creeper seat “in-one”, quick and uncomplicated switch between both functions

Delivery:
Supplied flat-packed, easy assembly

Technical data:
- Load-carrying capacity: 150 kg
- With foot strut: No
- Adjustable seat inclination: No
- Adjustable in height: No
- On castors: Yes
- ESD-capable: No
- Material of frame: Steel

ISITEC swivel work chair (DIN 68877)

Seat and backrest made of integral foam

Execution:
- Seat and backrest made of robust integral foam
- Height of backrest can be easily adjusted by ratcheting mechanism
- Ref. no. 026: Height-adjustable foot rest ring
- **Ident. No. 022:**
  - Seat height adjustment with pneumatic spring, Seat incline adjustment to -8°
  - Accessories: Ident. no. 150, arm rests (1 pair)
- **Ident. No. 024–026:**
  - Seat height adjustment with pneumatic spring, seat angle adjustment up to -8°
  - Accessories: Ref. no. 150 armrests (1 pair)

Advantage:
- Contact backrest that continuously adjusts to the movements of the upper body or can be easily locked in any position with a control lever
- **Ident. No. 022:**
  - Seat and back rest resistant against light acids and alkalis, can be easily wiped and cleaned without problem
  - Lumbar support ensures optimal support to fit natural back curvature
  - The light weight of the unit itself and the integrated carry handle make it possible to place the chair conveniently to the side
- **Ident. No. 024–026:**
  - Seat and backrest resistant to weak acids and alkalis, washable and easy to clean
  - Lumbar support ensures optimal support to follow the natural back curvature
  - The light weight of the unit itself and the integrated carry handle allow the chair to be conveniently moved out of the way.

Unique interchangeable padding system

The permanent contact backrest follows the person's movements and ensures that the back is always ideally supported. The weight regulation system ensures that the back rest resistance and body weight are always balanced. The permanent contact backrest is particularly suitable for work that requires a stance of predominantly bending forwards with a short distance between the workpiece and the eyes (e.g. in precision engineering or in a laboratory)

ESD-Basic swivel work chair (DIN 68877)

with different cushions

Application:

Ident. No. 142, 145, 148–149: The ESD-compliant work chair makes a key contribution to reliable ESD protection measures at electronic workstations. An optimum choice of materials and joining technologies mean that BIMOS ESD Basic chairs are protected against the occurrence of electrostatic charge. It also ensures that any charge carried by the user is reliably transferred to the conductive base.

Ident. No. 143, 146: The ESD-compliant work chair makes a key contribution to reliable ESD protection measures at electronic workstations. An optimum choice of materials and joining technologies mean that BIMOS ESD Basic chairs are protected from electrostatic charge. It also ensures that any charge carried by the user is reliably transferred to the conductive base.

Execution:

Anti-slip adhesive tapes

With rough surface

Application:
Versatile use and easy to glue, e.g on stair steps, ladders, ramps, paths, entry areas, loading zones or in front of machines, for use inside and outside.

Execution:
- Self-adhesive, anti-slip adhesive tape with rough surface made of aluminium oxides on a polymer backing
- Slip prevention R13 in accordance with EN 13552
- Temperature-resistant from -20 °C to +60 °C and UV-resistant
- 1 roll width 50 mm, length per roll 18.3 m

Advantage:
- Suitable for fast marking of hazardous areas
- Increases slip safety on slippery surfaces

Technical data:

Example application

Anti-slip mats

With nubbed structure

Application:
The mats can be used for numerous purposes, e.g. as drawer inserts or tool trays for workbenches, cabinets, tool boxes and tool trolleys, on machines as tool trays, also suitable in vehicle luggage compartments as loading and transport protection and as a work surface.

Execution:
- Reinforced fabric mat with textured structure made of adhesive plastic
- Lightweight, can be cut to size, highly resistant to tearing and extremely durable
- Washable at 40°C

Advantage:
- The mat remains firmly in place without being glued, even on rough or sloping surfaces

Technical data:
- Material: Rubber
- Surface structure: Open burling
- Suitable for wet areas: Yes
- Antistatic: No
- Non-slip: Yes
- Compliant with REACH: Yes

Rubber mats

From natural rubber, with fine grooves

Application:
For dry areas of application and normal use such as on workbenches, assembly laboratory areas, packing tables, inspection stands. For use as a floor runner with many applications in production settings, in front of machinery or anywhere that objects may slip, and for cutting to fit drawer inserts, tool trays or work surfaces for workbenches, cabinets, tool trolleys, cases and boxes.

Execution:
- Finely grooved surface profile
- Fine longitudinal grooves
- Base covering with excellent resistance to wear and tears
- Limited resistance to diluted acids and solutions

Technical data:
- Material: Rubber
- Surface structure: Fine notches
- Resistance against: Acid (limited)
- Suitable for wet areas: No
- Antistatic: No
- Non-slip: Yes
- Compliant with REACH: Yes

Rubber mat

Made of nitrile rubber, with fine grooves

Application:
For medium stresses in indoor and outdoor use. Normal application, such as for workbenches, assembly and laboratory areas, pack tables, inspection stands. For use as a floor runner with many applications in production settings, in front of machinery or anywhere that objects may slip, and for cutting to fit drawer inserts, tool trays or work surfaces for workbenches, cabinets, tool trolleys, cases and boxes.

Execution:
- Made from 3 mm thick rubber, resistant against oil
- Surface made of fine-groove profile, grooved in longitudinal direction

Technical data:
- Material: Rubber
- Surface structure: Fine notches
- Resistance against: Oil (limited)
- Suitable for wet areas: Yes
- Antistatic: No
- Non-slip: Yes
- Compliant with REACH: Yes

BasicDry workplace mat

Single mat

Application:
The multifunctional workplace mat with the AGR (Healthy Back Campaign) seal of approval. Elasticated material: Work ergonomically when stationary. The elastic properties of the high-quality rubber compound and the special product geometry increase productivity. ERGOLASTEC® BASIC increases concentration and promotes health. In addition, the ERGOLASTEC® mat is non-slip on the floor and provides additional safety in the industrial environment. For dry workplaces where high rotational flexibility is required. Typical areas include logistics, assembly and picking workplaces.

Execution:
- Type A: Individual mat

Advantage:
- High position stability
- Modular system, made to measure upon request
- Long service life and high abrasion resistance

Technical data:
- Material: Rubber
- Min. temperature resistance: 5
- Max. temperature resistance: 80
- Suitable for wet areas: Yes
- Antistatic: Yes
- Anti-fatigue: Yes
- Compliant with REACH: Yes
- Type: Type A: Individual mat
- ESD-capable: No
- Length: 1350 mm

Workplace mats made of PVC

Checker plate structure, height 9 mm

Application:
Ideal for dry workstations and light- to medium-duty applications.

Execution:
- Single-layer, ergonomic PVC mat with non-slip diamond plate surface
- Non-slip and impact resistant, insulates against cold and protects the industrial floor
- R10 slip resistance in accordance with EN 13552
- Fire protection class B2 according to DIN 54332/ DIN 4102
- Weight approx. 3.5 kg/m²
- Ref. no. 164-167: with yellow safety marking strips on sides

Advantage:
- Relieves the back and leg muscles and prevents premature fatigue during extended periods of standing
- Increases general safety underfoot
- Easy to cut to the requested dimensions and shape

Delivery:
Mats delivered with bevelled edges, even if cut to size

Notes:
Sold by the metre up to max. length 18.3 m: We will be happy to cut the desired length to size. Mats which have been cut to size cannot be returned.

Technical data:
- Material: PVC - Polyvinyl chloride
- Mat design: Individual mat
- Min. temperature resistance: 0 °C
- Max. temperature resistance: 60 °C
- Suitable for wet areas: No
- Antistatic: No
- Anti-fatigue: Yes
- Non-slip: Yes
- Compliant with REACH: Yes

Workplace mats made of PVC

Grooved structure, height 9 mm

Application:
Ideal for dry workstations and light- to medium-duty applications.

Execution:
- Single-layer, ergonomic PVC mat with non-slip ribbed surface
- Non-slip and impact resistant, insulates against cold and protects the industrial floor
- R10 slip resistance in accordance with EN 13552
- Fire protection class B2 according to DIN 54332/ DIN 4102
- Weight approx. 3.5 kg/m²
- Ref. no 182/187/192/197: with yellow safety marking strips on sides

Advantage:
- Relieves the back and leg muscles and prevents premature fatigue during extended phases of standing
- Increases general step safety
- Easy to cut to the requested dimensions and shape

Delivery:
Mats delivered with bevelled edges, even if cut to size

Notes:
Sold by the metre up to max. length 18.3 m: We will be happy to cut the desired length to size. Mats which have been cut to size cannot be returned.

Technical data:

Prod. Gr. 5AD

Workplace mat made of SBR/nitrile rubber compound, low-wear

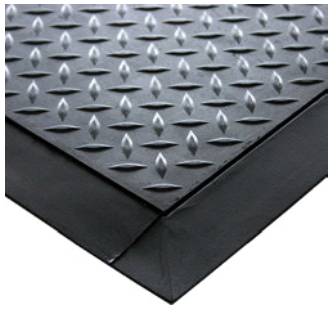
In checker plate look, height 12.5 mm

Application:
Suitable for work areas subject to high temperatures, and also for workbenches, assembly and laboratory areas, packing tables or inspection stands.

Execution:
- Black closed mat, surface in checker plate design allows easy turning on the spot, made of SBR/nitrile rubber mixture
- Temperature-resistant from -30 °C to +70 °C
- Good resistance against oils and greases
- Slip prevention R9 according to EN 13552
- Material: Natural rubber/25% nitrile mixture
- **Ident. No. 300:** With all-round bevelled edges for safe access
- **Ident. No. 310–320:**
  - Dovetail connections mean that any length can be achieved (width of 700 mm)
  - With bevelled edges on 3 sides

Advantage:
- **Ident. No. 310–320:** Effortless design of production lines thanks to dovetail connection

Technical data:
- Material: Nitrile rubber
- Resistance against: Oil | Fats | Petrol | Coolant
- Min. temperature resistance: -30 °C
- Max. temperature resistance: 70 °C
- Suitable for wet areas: Yes
- Antistatic: No
- Anti-fatigue: Yes
- Non-slip: Yes
- Compliant with REACH: Yes
- Length: 800 mm



Ident. No. 310–320

Prod. Gr. 5AD

PVC workplace mats, made to measure

Nubbed structure, height 12.7 mm

Application:
For average durability in dry areas.

Execution:
- Microcellular vinyl with Dyna-Shield™ layer, non-slip surface R10 according to DIN 51130 and BG Rule BGR181
- Fire protection class 2 according to NFPA 101
- Mats delivered with four bevelled edges
- Weight: 4 kg per m^2
- Available upon request: Surface with wide transverse or longitudinal grooves, in bulb plate look

Advantage:
- Excellent standing comfort and increased durability thanks to Dyna-Shield™ surface - 50% more compared to conventional microcell vinyl floor covering

Notes:
Sold by the metre up to max. length 18.3 m: We will be happy to cut the desired length to size. Mats which have been cut to size cannot be returned.

Technical data:
- Material: PVC - Polyvinyl chloride
- Mat design: Bulk stock
- Min. temperature resistance: -10 °C
- Max. temperature resistance: 70 °C
- Suitable for wet areas: No
- Antistatic: No
- Anti-fatigue: Yes

PVC workplace mats, made to measure

Checker plate structure, height 14 mm

Application:
For high durability in dry industrial environments.

Execution:
- Extremely robust PVC mat, surface with checker plate design
- Dual layer: foamed PVC underside, extremely robust, self-extinguishing PVC upper section
- Moderate resistance to oils and greases
- Meets or exceeds the requirements of the Consumer Product Safety Commission, FF1-70
- Thickness: 14 mm
- Four all-round-chamfered safety edges, thus no risk of tripping

Advantage:
- Checker plate design enables easy turning on the spot
- Premium ergonomic mat for effective and reliable protection against the effects of standing for long periods
- Mat with yellow borders for safety marking

Notes:
Sold by the metre up to max. length of 18.3 m: we will be happy to cut the desired length to size. mats which have been cut to size cannot be returned.

Technical data:
- Material: PVC - Polyvinyl chloride
- Mat design: Bulk stock

Workplace mats

With nubbed surface, made of either natural or nitrile rubber

Application:
Ident. No. 400–431: For dry areas of application and normal use such as on workbenches, assembly laboratory areas, packing tables, inspection stands.
Ident. No. 500–530: For high durability in wet, oily and industrial environments.

Execution:
- Black, closed mat with textured surface
- **Ident. No. 400–411, 500–510:**
  - Can be used as an individual mat
  - With all-round bevelled edges for safe access
- **Ident. No. 420–431, 520–530:**
  - Central piece can be combined lengthwise with end piece
  - Dovetail connections mean that any length can be achieved (width of 600 mm)
  - With bevelled edges on 3 sides
- **Ident. No. 500–530:** Material: Natural rubber / 25% nitrile mixture

Advantage:
- Textured surface continuously stimulates the circulation in order to reduce symptoms of fatigue when standing for extended periods
- Effortless design of production lines thanks to dovetail connection

Technical data:
- Min. temperature resistance: -30 °C
- Max. temperature resistance: 50 °C
- Antistatic: No
- Anti-fatigue: Yes
- Non-slip: Yes
- Compliant with REACH: Yes

ATORN Polyurethane workplace mats, flame retardant

Nubbed structure, height 13 mm

Application:
For industrial work areas, e. g. welding stations.

Execution:
- Hardness 25 - 30 Shore
- with all-round bevelled edges for safe access
- Fire protection class B1 according to DIN 54332/ DIN 4102

Advantage:
- Relief for back and leg muscles during extended periods of standing

Technical data:
- Material: Polyurethane
- Mat design: Individual mat
- Suitable for wet areas: No
- Antistatic: No
- Anti-fatigue: Yes
- Non-slip: Yes
- Compliant with REACH: Yes

Workplace mats Oil & Fire
Nitrile rubber mats (NBR), in three surface textures

Application:
The modern and ergonomic workplace mats protect the joints and spine, prevent slipping and thus ensure optimum sure-footedness in the workplace. The mats are ideal for walking and standing workplaces such as at workbenches, conveyor belts, assembly tables and turning and milling machines. The additional flame retardant effect allows them to easily be used on workstations with weld spatter and flying sparks.

Design:
- 100% nitrile rubber mats (NBR), colour black, with flat surface structure, height 16 mm, with diamond textured surface, height 18 mm, with hemispherical textured surface, height 19 mm

Advantages:
- Thanks to the Puzzle system, any surfaces can be laid out
- The easy solution for more safety, health, comfort and productivity
- Firm stop for secure standing

On request:
Special dimensions and any shapes

The individual interlocking mats can be placed on any surface using the flexible interlocking system.

Resistant against oils, fats and gasoline

Flame protection in accordance with EN 13501-1, fire-protection class Bfl-S1, temperature resistant -35 °C to +95 °C

Very high stability, therefore also suitable as underlay when using transportation equipment (up to approx. 200 kg)

The nitrile rubber mats (NBR), colour black, are delivered in three surface structures:

Flat surface structure, height 16 mm

Type B-N

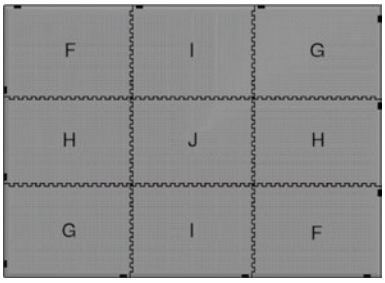
Hemispherical textured surface, height 19 mm

Type B-N

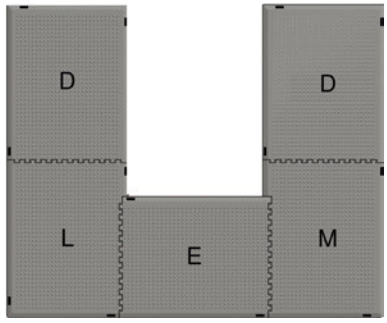
Diamond textured surface, height 18 mm

Type B-N

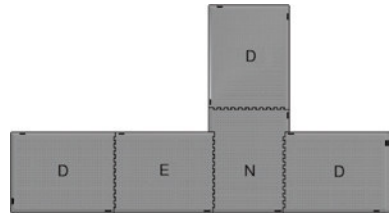
Easy transfer of the ERGOLASTEC workplace mats in the Puzzle system, here some examples:



in surface area

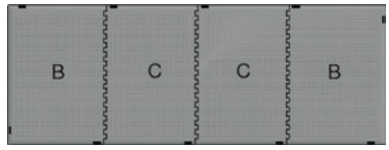


U-arrangement

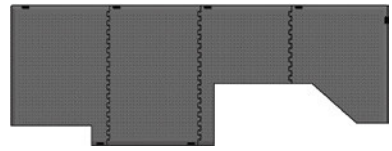


T-arrangement

in length



in width



Special dimensions and a multitude of forms deliverable on request

Workplace mats made of SBR rubber

Perforated structure, height 14 mm

Application:

Ident. No. 150: For dry and wet (but not oily) industrial working areas, e. g. on packing tables, workbenches, assembly/laboratory areas or inspection stands.

Ident. No. 155: For high durability in wet, oily and industrial environments.

Execution:

- Raised surface for improved anti-slip feature with chamfered safety edges all around
- Slip prevention R10 in accordance with EN 13552

Advantage:

- Anti-slip - impact resistant - anti-fatigue - insulated against cold
- Easy drainage of liquids using special knobs on the lower side
- **Ident. No. 155:** Highly resistant against oils, greases and chemicals

Technical data:

- Mat design: Individual mat
- Min. temperature resistance: -20 °C
- Antistatic: No
- Anti-fatigue: Yes
- Non-slip: Yes
- Compliant with REACH: Yes
- Length: 1500 mm

Workplace mats made of nitrile rubber, oil-resistant

Perforated structure, height 22 mm

Application:

For high durability in wet, oily and industrial environments.

Execution:

- 100% nitrile rubber, resistant against the majority of industrial oils and chemicals
- Firm grip, non-slip surface R10 in accordance with DIN 51130 and BG Rule BGR 181
- Supplied with three ready-mounted bevelled orange safety edges
- Weight: 13 kg per m^2
- REACH-compliant and silicone-free
- Special models upon request – CAD drawing included with our quotation

Advantage:

- Very comfortable, high-quality anti-fatigue mat with holes for excellent drainage and ventilation
- Ensures a dry, clean workplace in oily industrial areas

Technical data:

- Material: Nitrile rubber
- Mat design: Individual mat
- Resistance against: Oil | Acid | Fats | Petrol | Coolant
- Min. temperature resistance: -20 °C
- Max. temperature resistance: 150 °C

MATE anti-fatigue mats

Individual mats with HAM-O® anti-fatigue mat, heavy

Application:
For increased comfort when standing at wet workstations by relaxing muscles and joints and providing dry, secure ground.

Execution:
- Combined absorbent and anti-fatigue mat with an ergonomic nitrile tray
- Made from 100% polypropylene
- Can be refilled
- Nitrile base (LxW: 163 x 91 cm)

Delivery:
10 anti-fatigue mats and 1 nitrile tray

Technical data:
- Type: Universal
- Absorptive capacity: High

Floor grate

High-pressure polyethylene

Application:
For machine and workbench workstations.

Execution:
- Anti-slip and non-skid, can support loads of up to 40000 kg/m²
- Highly resistant against oils, acids, solvents and alkalis
- Easy to move individually in a longitudinal or transverse direction thanks to hook connections

Technical data:
- Surface structure: Serrated
- Material: PE - Polyethylene
- Resistance against: Oil | Acid | Fats | Petrol | Coolant
- Min. temperature resistance: -10 °C
- Max. temperature resistance: +80 °C
- Suitable for wet areas: Yes
- Anti-fatigue: Yes
- Non-slip: Yes

Example application

Safety wooden floor grids in special versions

Any shape is possible: Simply indicate the dimensions and we can produce any shape to meet your specifications. Using special connectors, multi-component wooden floor grids can also be connected to each other. Do not hesitate to get in touch with us. Technical hotline +49 (0)7141 498-5819

ZARGES

MultiMaster 5 aluminium multi-purpose ladders with steps (EN standard 131)

One ladder, five applications

Application:
One ladder, five modes: A stepladder, stepladder for use on stairs, single-section ladder with standoff, single-section ladder and extended single-section ladder all in one.

Execution:
- 80 mm deep steps with ZARGES Safer Step technology for effortless standing
- Increased flexibility and versatility thanks to the specially shaped top, which can also be positioned against inner and outer corners as well as uprights
- Top with magnetic compartment for small parts as well as two clip holders and central recess to accommodate cordless drills or similar tools
- Ladder length as a single-section ladder: 2.88 m
- Ladder length as a stepladder: 1.88 m
- Working height as a single-section ladder: 3.70 m
- Working height as a stepladder: 3.15 m

Advantage:
- Switch between modes quickly and easily using just one hand
- Flexible working and a comfortable grip thanks to anodised struts
- Easy and ergonomic transport thanks to two castors on the climbing section and the handle beneath the top

Technical data:
- Accessibility: One-sided
- Material: Aluminium
- With Safer Step technology: Yes
- With storage tray: Yes
- Folding: Yes
- EN standard: 131
- Max. load capacity: 150 kg
- Type: Combination ladder
- Surface: Anodised
- Mandatory testing according to DGUV (UVV): Yes

Max. height (m)		3.7
Step depth (mm)		80
50260...	Ident. No.	505

Prod. Gr. 5AK

MUNK GÜNZBURGER STEIGTECHNIK **Aluminium free-standing ladders with steps** (EN standard 131)

Access from both sides, nivello® ladder end caps

MADE IN

Execution:
- Stable rectangular tube side-rails
- 80 mm deep, grooved steps
- 4-fold flanged step/side-rail connection
- Conical side-rail guide for a secure footing
- nivello® ladder shoes with patented 2-axis inclination technology
- ergo-pad® grip area with clamping mechanism
- 4-way bolted, solid aluminium ladder joint
- Two high-strength polyester straps to prevent spreading
- Step spacing: 235 mm
- Ladder inclination: 70°

Technical data:
- Max. load capacity: 150 kg
- Material: Aluminium
- EN standard: 131
- Beam height: 73 mm
- Beam width: 25 mm
- Mandatory testing according to DGUV (UVV): Yes

ATORN **Aluminium standing ladder with steps** (EN standard 131)

Double-sided access - wide steps

Application:
For ensuring all work at height is reached and completed safely

Execution:
- High-strength extruded aluminium strut profiles in C-profile shape = light weight and maximum torsional rigidity
- Particularly deep aluminium treads allow safe, fatigue-free standing
- The joints between the stiles and the rungs use highly shear-resistant steel rivets to guarantee the highest possible level of safety and maximum durability for the aluminium ladder
- 12 sturdy aluminium cross struts ensure optimum stability of the stepladder
- Special soft plastic shoes guarantee superb resistance to displacement when standing

Advantage:
- steps with 85 mm deep outlet areas

Technical data:
- Max. load capacity: 150
- Material: Aluminium
- EN standard: 131

ATORN **Aluminium standing ladder with steps** (EN standard 131)

Single-sided access - wide steps

Execution:
- comfortable and secure footing on non-slip safety platform
- 85 mm deep steps
- High non-bendable safety bar
- Slip-proof ribbing of steps
- High level of stability with low weight
- GS-tested

Advantage:
- With practical aluminium tray for storing tools and other materials

Technical data:

Prod. Gr. 5AF

Rolling stool (EN standard 14183)

Shatterproof plastic

Application:
mobile, secure and non-slip ‘mini ladder’

Execution:
- 2-step platform, round, without corner guards
- Mobile, secure and non-slip ‘mini ladder’
- TÜV and GS-tested in accordance with EN 14183-F
- Runs smoothly on 3 rollers which retract into the housing when someone stands on the stool

Technical data:
- Surface area diameter: 440 mm
- Standing area diameter: 290 mm
- Height: 430 mm
- Heigh with load: 425 mm
- Load-carrying capacity: 150 kg
- Material: Plastic
- EN standard: 14183
- Colour: Light grey RAL 7035
- Mandatory testing according to DGUV (UVV): Yes

50260...	Ident. No.	005 ●

Prod. Gr. 505

ATORN Step stool (EN standard 14183)

Accessible from both sides; can be folded away

Application:
Access possible on steps and platform.

Execution:
- Extra-large standing platform for safe and comfortable working
- central platform with small gap – for carrying without crushing fingers
- Ribbed steps and standing platform
- Wide and deep aluminium steps
- Steps and struts are made from aluminium extruded sections and have a torsion-resistant connection
- Non-slip plastic feet for secure standing

Notes:
Can be used as a work platform with the ATORN telescopic plank. No other measures required since the platform height is less than 1 m. This type of step is subject to the EN 14183 standard. At present, the standard does not distinguish between commercial and non-commercial use

Technical data:
- Platform dimension: 61 x 39 cm
- Folding: Yes
- Material: Aluminium
- Load capacity: 150 kg
- EN standard: 14183

ATORN Aluminium service platforms (EN standard 14183)

rigid

Application:
The proven and lightweight aluminium machine step for demanding industrial applications with non-slip steps.

Execution:
- Sturdy, welded tube construction made of sturdy aluminium
- 240 mm deep steps made from aluminium checker plate ensure safe ascent and descent
- Upper base area 520 x 305 mm for a secure stand
- Non-slip foot caps

Technical data:

raaco **Rotary tower for drawer magazine, 150 mm depth**

Empty or equipped with 12 drawer magazines with a depth of 150 mm

Application:
For clearly-arranged and dust-free storage of small parts in transparent drawers

Execution:
- Frame made of steel sheet metal, colour dark blue
- Polypropylene drawers, transparent and shatter-proof with pull-out safety device; resistant to most solvents and oils
- Stable, secure stand on height-adjustable feet
- Smooth-running turntable on maintenance-free roller bearings

- For all cabinets with a height of 554 mm
- Equipped with 12 drawer units, dimensions of each unit HxWxD: 555 x 307 x 150 mm: 4 pieces with no. 50002 092 - (48 drawers per unit), 4 pieces with no. 50002 102 - (24 drawers per unit) and 4 pieces with no. 50002 122 - (8 drawers per unit).

Technical data:

Prod. Gr. 500

Drawer magazines, 250 mm depth

Made of sheet steel, with unbreakable drawers

Application:
Order, overview and quick access: the functional storage cabinet provides space-saving, dust-protected storage for small parts. It can be wall-mounted, free-standing or used as part of a system.

Execution:
- The housing of the high-quality cabinet is made of galvanised sheet steel (corrosion-protected), painted in RAACO blue. Rubber feet protect the base material from scratches and ensure secure footing.
- The drawers are made of durable polypropylene and are resistant to most acids, oils and alkali. An stop edge prevents the drawers from falling out. They can be divided and labelled.

Notes:
Drawers can be labelled or divided, see accessories from 50002520-524

Technical data:
- Material: Sheet steel
- Cabinet colour: Dark blue
- Material of drawer: PP - Polypropylene

Euronorm stacking containers

Made of polypropylene

Application:
Storage, picking and transport container

Execution:
- Stable plastic containers in Euro dimensions, made of unbreakable polypropylene which is safe for foodstuffs and is 100% recyclable , with smooth base
- High carrying comfort due to ergonomically rounded open grips on the front sides (except for height 120 mm)
- Document holder integrated on all sides
- High stacking safety thanks to surrounding stacking border
- Resistant to many acids and lyes

Advantage:
- Ideal for use on conveying and roller tracks thanks to rounded corners and flat bases, container dimensions tailored to Euro pallet, large internal volume thanks to optimal side wall design, easy cleaning due to closed design with smooth bases and walls

Technical data:
- Material: PP - Polypropylene
- Suitable for use with food products: Yes
- Min. temperature resistance: -20 °C
- Max. temperature resistance: 90 °C
- With handle: Yes

fetra Transportgeräte **Transport dolly for Euro-standard crates** (EN standard 1757-3)

Angle steel, load capacity 250 kg

Application:
For transport Euronorm containers, for constant industrial use.

Execution:
- Angle steel, load-bearing capacity 250 kg

Advantage:
- Safe transport of Euronorm containers thanks to precisely dimensioned frame
- Durable thanks to robust design

Technical data:
- Material of loading surface: Angle steel
- Load-carrying capacity: 250 kg
- Loading surface height: 182 mm
- Number of steering rollers: 4
- With wheel lock: Yes
- Total stop optional: No
- Wheel width: 32 mm

Table trolley with 2 wooden load areas (EN standard 1757-3)

Suitable for Euro-standard containers, total load capacity 250 kg

Application:
For transporting Euronorm containers or as a serving trolley for small parts in production and assembly.

Execution:
- Welded angular steel frame
- Suitable for Euro crates 600 x 400 mm
- Loading surfaces made from wooden panel board, edge 10 mm
- Clear floor distance 400 mm
- Thermoplastic rubber tyres, grey, non-chalking
- Plastic rims with precision deep groove ball bearings and thread guards
- Sliding handle with soft hose casing

Advantage:
- EasySTOP central brake
- Smooth-running ball-bearing-mounted castors
- With thread and foot guard
- Non-marking tyres
- Softgrip push handle - soft handle sleeve

Delivery:
Disassembled

Technical data:
- Load-carrying capacity: 250 kg
- Load-carrying capacity of loading surfaces: 80 kg
- Length: 675 mm
- Width: 415 mm
- Height: 635 mm
- Material of loading surface: Wood composite board
- Loading surface length: 605 mm
- Loading surface width: 410 mm
- Number of loading surfaces: 2
- Colour: Anthracite grey RAL 7016
- Number of steering rollers: 4

Easy-view storage bin

Made of sheet steel

Application:
Storage and transport of heat-treated parts in the production process, can be used as a collection container for metal parts directly from the machine

Execution:
- High capacity, service life and temperature resistance, impact-resistant
- High visibility of material stored due to front-side opening
- Parts can also be added and removed when the bins are stacked
- three-sided stacking border for longitudinal and transverse stacking of different sizes
- With label holder for identification labels
- Temperature resistance for painted bins: -10°C to +90°C, for galvanised bins: -30°C to +150°C

Technical data:
- Material: Sheet steel
- Resistance against: Oil | Acid
- With lid: No
- Suitable for impact work: Yes
- Mandatory testing according to DGUV (UVV): No

Prod. Gr. 504

Easy-view storage bin

Impact-resistant, fracture-resistant polypropylene

Application:
For ideal storage of small parts, consumables and bulk materials.

Execution:
- Impact-resistant, unbreakable
- With circumferential stack edge
- Reinforcement ribs for excellent stability
- Reinforced recessed handles

Delivery:
Minimum order quantity: 10 pieces

Notes:
Front flaps, lids, dividers and labels available as accessories.

Technical data:
- Material: PP - Polypropylene
- Resistance against: Fats | Oil
- Min. temperature resistance: -20 °C
- Max. temperature resistance: 90 °C
- With lid: Optional
- Suitable for impact work: Yes

®RasterPlan Easy-view storage bin

Made of shatterproof and impact-resistant polyethylene

Execution:
- 8 different box sizes in 5 colours: grey, green, blue, red and yellow, with surrounding stacking border
- Shatterproof and stable in form, highly resilient, environment-friendly, fully recyclable
- Temperature-resistant: -40°C to +80°C, can therefore also be used under extreme climatic conditions , resistant against acids, oils and lyes
- Smooth inside walls, i.e. easy to clean and safe for foodstuffs
- Suitable for use on conveying and roller tracks
- Label holder with special clamps, prevents labels from slipping out

Advantage:
- Length 85 mm, 160 mm, 230 mm and 290 mm, for mounting, suitable for RasterPlan slotted panels

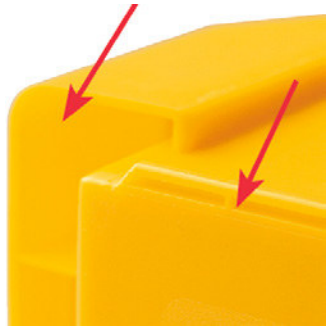
Delivery:
Deliverable without labels, accessories upon request.

Technical data:
- Material: PE - Polyethylene
- Resistance against: Oil | Acid | Lye
- Min. temperature resistance: -40 °C
- Max. temperature resistance: 80 °C
- With lid: Optional
- Suitable for impact work: Yes

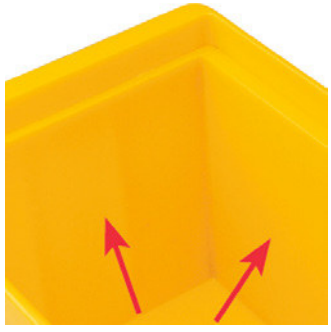
A special hanging strip enables horizontal attachment of the box

Sturdy label holder with clamping action

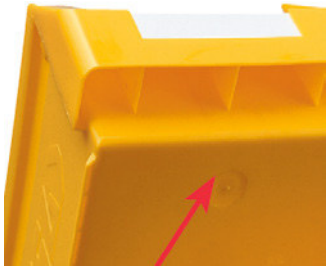
Continuous stacking rim



Reinforced ridges



Smooth inside walls for easy cleaning



Strong handle and push grip with multiple reinforcement on the inspection hole

Wall shelf

Equipped with easy-view storage bins made of polystyrene

Application:
The shelves are particularly suitable for the storage of small items where space is limited. Rails can be hooked in so that the easy-view storage bins can be mounted in the side profiles (shelf must be attached to the wall).

Execution:
- Stable profile steel construction (sheet steel, galvanised)

Delivery:
Colours of easy-view storage bins as shown

Notes:
To reorder individual HK easy-view storage bins, see no. 50057 005-425 in the Workstation chapter.

Technical data:
- With bins: Yes
- Material: Sheet steel

Trolley

Equipped with easy-view storage bins made of polystyrene

Application:
For transporting and providing spare and small parts on the work floor and in the warehouse.

Execution:
- Sheet steel trolley with 2 steering rollers, 2 fixed castors and 2 wheel blocks
- Easy-view storage bins made of polystyrene, impact-resistant and stackable
- Sliding handles on the side profiles make the trolley easier to operate, even when loaded

Delivery:
Colours of easy-view storage bins as shown

Notes:

Prod. Gr. 504

Hinged door cabinets, height 1028 mm, 1680 mm, 1950 mm

Equipped with easy-view storage bins made of polystyrene

Application:
For clearly-arranged storage of small parts in HK easy-view storage bins.

Execution:
- Doors with multiple edges and reinforced
- All components with safety edgings
- Galvanised and height-adjustable shelves

- **Ident. No. 530–531, 538:** Door load: 20 kg where the load is evenly distributed

Delivery:
Colours of easy-view storage bins as shown

Notes:

®RasterPlan Perforated plate

With 10 x 10 mm square perforation

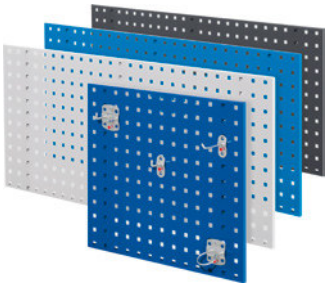
Application:
For attachment to the wall or workbenches.

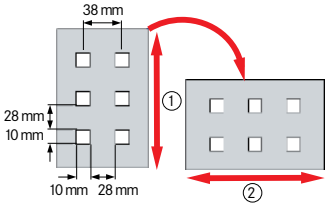
Execution:
- From high-quality processed sheet steel, 1.25 mm thick, 10 x 10 mm square holes, distance between hole centres 38 mm in vertically and horizontally
- Edged all round and stiffened with support members
- For heavy loads, simple wall mounting
- Perforated panels without support elements, plastic-coated

- other colours are deliverable on request: slate grey RAL 7015; traffic yellow RAL 1023; light blue RAL 5012; jet black RAL 9005
- RasterPlan support elements and tool holder for insertion in perforated sheet panels from no. 50638 300, RasterPlan easy-view storage bins see no. 50638 816-837

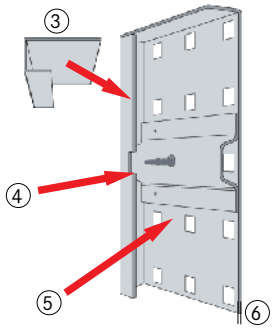
Notes:
workbench bracket: 2 brackets are required for one perforated panel 500-1500 mm wide, 3 brackets are required for one perforated panel 2000 mm wide, see no. 50637 738-739

Technical data:
- Distance between centre of hole and centre of hole: 38 mm
- Overall thickness: 1.25 mm
- Punched-hole: 10 x 10 mm
- Material: Sheet steel





1 = vertical
2 = horizontal flexibility - the perforated plates can be inserted vertically and horizontally



3 = multiple-angled
4 = precise positioning of the underbeams
5 = back side reinforced with specially formed underbeams, spot-welded on both sides
6 = 1.25 mm sheet steel

TITALIUM™ series 54TI padlocks

With hardened steel shackle

Application:
Secure storage of items with low risk of theft, e.g. bags, cash boxes, cases, lockers, tool boxes etc.

Execution:
- Lock bodies made of TITALIUM™
- Hardened steel shackle
- Double shackle locking
- Round key head

Delivery:
2 keys per lock

Technical data:
- Lock type: Padlock
- Material of padlock shackle: Steel
- Material of housing: Titalium® aluminium alloy
- Colour: Aluminium coloured
- With corrosion protection: No
- With plastic sleeve: No

Padlocks, series 45 and 85

Precision cylinder lock with lock cylinder

Execution:
- **Ident. No. 030–050:**
  - Lock made of solid brass, hardened steel shackle, tried-and-tested brass pin cylinder technology
  - Keyed to differ, increased stability thanks to tried-and-tested double locking action
  - Quick operation by snapping in the shackle without putting in key
- **Ident. No. 055–110:**
  - Lock made of solid brass, springs and interior parts made of rust-proof material
  - All nickel-plated steel shackles are case-hardened to protect against attacks, with NANO Protect coating for extremely high corrosion protection
  - Automatic function - shackle can be snapped into place without inserting the key
  - High number of truly keyed to differ locks
  - An off-centre key profile increases the security of the locking mechanism from manipulation
  - Ident. No. 062-064, 086-087, 106-107 with extra-high U-bar

Delivery:
2 keys per lock

Technical data:
- Lock type: Padlock
- Material of padlock shackle: Steel

Identification labels

Magnetic

Application:
Ideal for attaching labels to metallic surfaces such as storage racks and metal containers.

Execution:
- Label holder with two rear magnetic strips
- Suitable for scanning, document-quality film
- The slot-in labels are quick to replace
- **Ident. No. 260:** Compatible printable slot-in labels: Article number 102202

Delivery:
Ident. No. 260: Does not include slot-in labels

Notes:
Ident. No. 260: Downloadable template for slot-in labels can be found at www.duraprint.de

Technical data:
- Material: PP - Polypropylene
- Colour: Blue
- Number of pieces per packet: 50
- Mandatory testing according to DGUV (UVV): No

DURABLE

Information frame

With magnetic closure, self-adhesive and magnetic

Application:

Ident. No. 135–139, 143–168, 176–179: Ideal for alarm plans (red), warning and safety notices (red), machine and operating instructions (blue), hazardous materials ordinances (orange), technical drawings and parts lists. Can be read from both sides on glass surfaces thanks to transparent base film.

Ident. No. 140–142, 170–174: A4 safety and hazard symbols, e.g. green/white: First aid, emergency exit routes. Red/white: Fire protection plans. Yellow/black: operational safety.

Execution:

- **Ident. No. 135–139, 143–146:**
  - Magnetic pocket made of rigid PVC film with magnetic back
  - Adheres to all metallic surfaces
- **Ident. No. 135–139, 143–168, 176–179:**
  - Removable and reusable on smooth surfaces
  - Flexible mounting: Portrait or landscape format
- **Ident. No. 140–142:**
  - Magnetic information frame for info in A4 size
  - Easy to attach to metallic surfaces such as whiteboards, presentation boards and lockers as well as lean cubes and machines in production
- **Ident. No. 140–142, 170–174:**
  - Frame colour according to ISO 3864-4 for safety colours
  - Can be used in portrait or landscape format
- **Ident. No. 160–168, 176–179:**
  - Magnetic pocket made of rigid PVC film with self-adhesive reverse side
  - Adheres to smooth surfaces, e.g. glass, wood or metal
- **Ident. No. 170–174:**
  - Two inserts for visibility from both sides on glass surfaces
  - Frame appears identical from both sides

Advantage:

- **Ident. No. 135–139, 143–168, 176–179:** Quick and easy insertion/removal of documents
- **Ident. No. 140–142:** Magnetic frame for fast insertion and replacement of documents
- **Ident. No. 140–142, 170–174:** Professional, high-quality presentation of information
- **Ident. No. 170–174:**
  - Fold-open magnetic frame for fast insertion and replacement of documents
  - Easy attachment to smooth, load-bearing surfaces without tools. Can be removed from e.g. glass

Technical data:

- Mandatory testing according to DGUV (UVV): No

Relax-Plus foot rest

Made of shatterproof polystyrene

Application:
the foot platform can be positioned using the buttons on the rounded side panels. the angle of the footrest can be infinitely adjusted by gently applying pressure with your foot and is supported by a micro-grid.

Execution:
- adjustable to 4 height levels
- foot platform 45 x 35 cm
- floor protectors prevent slipping

Technical data:
- Length x width x height: 52 x 35 x 14 cm
- Material: HIPS - Impact-resistant polystyrene
- Adjustable in height: 4 steps
- Colour: Light grey (bright grey)
- Height adjustment: 5-7-9 and 11 cm
- Surface structure: Ribbed

Premium fabric adhesive tapes 389

Temperature-resistant up to 70 °C, watertight, very high long-term adhesive force

Application:
For industrial applications such as marking, strengthening, repairing, sealing joints and air-conditioning ducts, bundling pipes, materials etc.

Execution:
- Close-meshed fabric adhesive tape with matt surface
- Polyethylene coating

Advantage:
- Excellent adhesive strength on a variety of surfaces
- Outstanding moisture resistance
- Adapts easily for use on uneven surfaces
- Good tear resistance and flexibility

Technical data:
- Width of tape x length of strap: 50 mm x 50 m
- Thickness: 0.26 mm
- Type of adhesive: Rubber/resin
- Adhesive tape backing material: PE-coated rayon fabric
- Breaking elongation: 6 %

Prod. Gr. 504

Hand dispenser for stretch films

Application:
For manual stretching over pallets.

Execution:
- Easily adjustable resistance brake
- Chrome-plated
- For a roll of up to 500 mm width

Advantage:
- Rapid, simple and safe handling of stretch films
- Avoid “hot hands”

Hand roller (without film)

50007...	Ident. No.	676 ●

Prod. Gr. 504

Stretch film for unrolling by hand

On roll, pre-stretched, 500 mm wide

Application:
For the securing of loads on pallets, protection against damp, dirt and dust. Can be used as a wrapping or banding foil.

Execution:
- Stretch film optimally pre-stretched by machine
- Turned film edges to increase resistance
- Slippery outer side available in order to avoid pallets sticking to each other in trucks
- Must be wound with only minimal tension
- Reset forces are released after unwrapping (memory effect)
- Increased puncture resistance combined with reduced film thickness
- Good adhesion properties, high transparency, good tear propagation strength

Advantage:
- Easier to use since rolls are extremely light
- Avoids fatigue-inducing bending
- Higher working speed and less effort required
- Improved load unit securing thanks to higher retention forces
- Prevents pallets from sticking to each other

Technical data:
- Foil thickness: 8 µm
- Length: 600 m
- Width: 430 mm
- Colour: Transparent
- Number of pieces per packet: 6 PCS

50007...	Ident. No.	639 ●

Prod. Gr. 504

OLFA CUTTERS & KNIVES Plastic film cutter

Application:
For cutting close-fitting film without damaging the material underneath.

Execution:
- Safety knife with concealed blade
- Ergonomically shaped plastic handle

Advantage:
- Blade is easy to replace using snap-open mechanism

Length (mm)		160
Blade width (mm)		10
53651...	Ident. No.	200 ●

Stretch film for mechanical dispensing

On roll, made of LLDPE, 500 mm wide

Application:
For wrapping goods on pallets on all semi- and fully-automated stretch systems. Protection from damp, dirt, dust or theft.

Execution:
- Machine stretch film made of LLDPE (Linear Low Density Polyethylene) with good adhesion (one-sided)
- High transparency, good tear propagation strength and good stretchability
- Thin but with good puncture resistance
- Environmentally compatible and recyclable

Advantage:
- Economical way of securing pallets
- Excellent mechanical properties
- Secures pallets reliably

Technical data:
- Width: 500 mm
- Colour: Transparent
- Number of pieces per packet: 30 PCS

Foil thickness (µm)		17	20	23

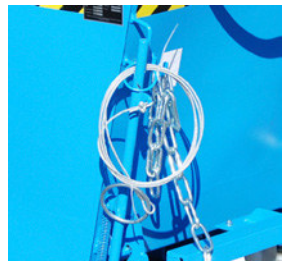
Information and overview for tilting containers

Tilting containers are available in many designs. A key consideration when ordering is whether the process of emptying is to performed exclusively manually or using a forklift.

manual tipping:
if no forklift is available for emptying, the tipping process must be performed manually. for manual tipping procedures, the selection of a mobile version or alternatively rollers as accessories is therefore recommended.
Tilting containers for manual emptying are designed such that ground-level emptying is possible. This option should only be selected if no heavy material is collected and tipping out at high altitude is not required.

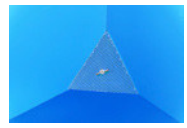
tipping from the forklift operator's seat:
this container variant features a special device that facilitates ergonomic yet safe emptying of the container. Container is released via a steel rope.
All containers with this function are protected against sliding via a link chain and are also protected against unintentional tipping.

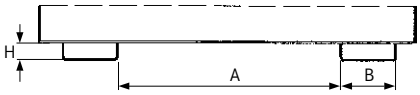


Self-tipping containers:
Exhibit a favourable centre of gravity that allows the tipping procedure to be performed automatically on unlatching when the container is loaded.

Dispenser systems:
Containers with a dispenser system are tilted more slowly, making the procedure gentler for the forklift. Furthermore, the container automatically "rolls" back into its actual position after emptying.

Chip containers:
A chip collection version must be selected for chip collection and fluid and solid separation. Our chip containers are equipped with a perforated plate and drain valve as standard and are welded so that they are oil-tight and watertight.





Dimensions of fork pockets:
Spacing of fork pockets (A)
Width of fork pockets (B)
Height of fork pockets (H)

Swarf containers, manual tipping - mobile

With floor-level emptying option

Application:
An indispensable aid for collecting and separating liquids from solids and for transporting waste, bulk materials, chips and mass produced parts of all types.

Execution:
- Skip with sliding handle
- Stable sheet steel structure with edge reinforcement, base frame made of section steel
- With perforated sheet insert for chip collection, hole diameter 3 mm, division 6 mm and drain valve 1"
- Fork pockets with protection against accidental slipping and tipping
- Easily movable with two wheels and one steering wheel (from content of 600 litres with two steering wheels) made of solid rubber, diameter 250 x 60 mm, one steering wheel with wheel brake

Advantage:
- With floor-level emptying option
- Portable thanks to the integrated wheels, meaning they can be used anywhere
- Manual tilting of the trough ensures that it can be emptied without leaving any material behind, with locking protection that prevents it tipping over

Delivery:
Goods supplied without packaging as standard.
Packaging on request.

Technical data:
- Load-carrying capacity: 300 kg
- Surface: Lacquered
- Fork pocket clearance: 465 mm
- Fork pocket width: 170 mm
- Fork pocket height: 55 mm
- With drain valve: Yes
- With perforated sheet: Yes
- With stacker seat tilt function: No
- Oil and watertight: Yes
- Made in: Germany
- Mandatory testing according to DGUV (UVV): No

Swarf containers, manual tipping - mobile with total stop brake system

With floor-level emptying option

Application:
An indispensable aid for collecting and separating liquids from solids and for transporting waste, bulk materials, swarf and mass produced parts of all types.

Execution:
- skip with sliding handle
- robust sheet steel construction, double-folded top rim, double-folded dumping edge
- with filter for separating liquids and solids
- 2 steering and 2 fixed castors, 200 x 40 mm TPE wheels, hubs with grooved ball bearings, Totalstop braking system
- no link chain as slide guard (see no. 50266034)

Advantage:
- Totalstop brake system for ideal locking of container for tipping
- with floor-level emptying option

Technical data:
- Surface: Powder-coated
- Fork pocket width: 194 mm
- Fork pocket height: 72 mm
- With drain valve: Yes
- With perforated sheet: Yes
- With stacker seat tilt function: No
- Oil and watertight: Yes
- With wheel lock: Totalstop
- Number of wheels: 4
- Made in: Germany

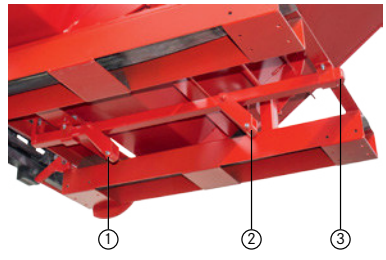
Product details

For time-saving and safe handling of the container and to offset tilting over the container. The driver can stay in the cab to attach the safety chain for picking up and dropping.

Automatic locking of the fork pockets prevents the fork prongs from slipping.

The lock closes as soon as the container is lifted.



Release for tilting at three points on the underside of the tipper possible.

Swarf container, tipping from the seat of a forklift truck - mobile

Load capacity 1,000 kg, can be emptied from the ground

Application:
For the collection and separation of liquids from solids and for the transport or disposal of all types of waste, bulk materials, chips and mass-produced parts.

Execution:
- High flexibility for the transport and unloading of bulk materials
- Wheelset and pushing handle for easy manual transport
- Fork pockets for transport with forklift truck
- Ground-level emptying or with fork-lift truck in the case of large containers
- Robust steel sheet structure, base frame with fork pockets
- Tiltable trough
- Protections against accidental slipping and tipping
- 2 steering and 2 fixed castors made of polyamide, diameter 180 mm, of which one steering castor with locking device—design height 225 mm, max. carrying capacity 1000 kg

Advantage:
- Particularly suitable for collecting chips

Delivery:
Goods supplied without packaging as standard. Packaging available for an additional charge.

Technical data:
- Load-carrying capacity: 1000 kg
- Surface: Lacquered
- Fork pocket width: 200 mm
- Fork pocket height: 80 mm
- With drain valve: Yes
- With perforated sheet: Yes
- With stacker seat tilt function: Yes
- Oil and watertight: Yes
- Number of wheels: 4 PCS
- Made in: Germany

Swarf container, tipping from the seat of a forklift truck

Load capacity of up to 1,250 kg, mobile with unwinding system

Application:
For the collection and separation of liquids from solids and for the transport or disposal of all types of waste, bulk materials, chips and mass-produced parts.

Execution:
- Stable base frame with rollers, sliding handle and fork pockets
- Sheet metal tray with surrounding edge profile, welded oil-resistant and watertight
- Screen plate, hole diameter 3 mm, partition 6 mm, drain valve 1" for draining off liquids
- Protection against accidental slipping and tipping
- Mobile with wheels made of polyamide

Advantage:
- Particularly suitable for collecting chippings
- Favourable load centre, tilting at any height using a wire rope, anti-roll-off mechanism ensures convenient forwards and backwards tipping from the forklift seat
- Mobile thanks to wheels which mean it can be used everywhere

Delivery:
Goods supplied without packaging as standard. Packaging available for an additional charge.

Notes:
Upon request: galvanised lid, opening on two sides

Technical data:
- Surface: Lacquered
- Fork pocket width: 200 mm
- Fork pocket height: 70 mm
- With drain valve: Yes
- With perforated sheet: Yes
- With stacker seat tilt function: Yes
- Oil and watertight: Yes
- Made in: Germany

Swarf container, tipping from the seat of a forklift truck - perforated metal plate over the entire base

Load capacity up to 1,500 kg

Application:

For the collection and separation of liquids from solids and for the transport or disposal of all types of waste, bulk materials, chips and mass-produced parts.

Execution:

- Perforated metal plate screwed across the entire base, 100 mm above the base, hole diameter 3 mm, spacing 6 mm
- Drain valve 1" for draining off liquids
- Tilting at any height using a wire rope from the stacker seat
- Sheet metal tray with surrounding edge profile
- Sturdy base frame with fork pockets
- Protection against accidental slipping and tipping

Delivery:

Goods supplied without packaging as standard. Packaging available for an additional charge.

Notes:

On request: galvanised lid, openable on two sides

Technical data:

- Surface: Lacquered
- Fork pocket width: 200 mm
- Fork pocket height: 60 mm

Tilting container, manual tilting

Load capacity 300 kg

Application:
For the collection and disposal of all types of bulk goods and solid materials with floor-level emptying option.

Execution:
- Robust sheet steel structure with edge reinforcement
- Tiltable trough with handle
- Base frame with fork pockets
- Easily mobile using stacker
- Oil-resistant and watertight
- Protection against accidental slipping and tipping
- Optionally box-shaped or low trough
- All dimensions without wheels

Advantage:
- With floor-level emptying option

Delivery:
Goods supplied without packaging as standard. Packaging available for an additional charge.

Notes:
Upon request: galvanised lid, opening on two sides

Technical data:
- Load-carrying capacity: 300 kg
- Fork pocket width: 170 mm
- Fork pocket height: 55 mm
- With drain valve: No
- With perforated sheet: No
- With stacker seat tilt function: No
- Oil and watertight: Yes

Tilting container, manual tilting - mobile

Load capacity 300 kg

Application:
For the collection and disposal of all types of bulk goods and solid materials with floor-level emptying option.

Execution:
- Sturdy sheet steel structure with edge reinforcement, base frame made of section steel, oil- and waterproof
- Anti-tilt securing device
- 2 wheels + 1 steering wheel (from content 600 l = + 2 steering wheels) from solid rubber diameter 250 x 60 mm, among which one steering wheel with a locking device, with a push handle
- With fork pockets with protection against accidental slipping and tipping

Advantage:
- With floor-level emptying option
- Wheels mean that it is mobile and can therefore be used anywhere

Delivery:
Goods supplied without packaging as standard. Packaging available for an additional charge.

Notes:
Upon request: galvanised lid, opening on two sides

Technical data:
- Load-carrying capacity: 300 kg
- Surface: Lacquered
- Fork pocket clearance: 465 mm
- Fork pocket width: 170 mm
- Fork pocket height: 55 mm
- With drain valve: No
- With perforated sheet: No

Tilting container for tipping from the seat of a forklift truck

Extremely low height. The ideal tilting container beneath machines

Application:
To collect and dispose of bulk materials and solids of any kind. Wherever there is little space.

Execution:
- Sheet metal tray with surrounding edge profile
- Stable base frame with fork pockets for fork prongs
- Fork pockets with protection against accidental slipping and tipping
- Favourable tilting angle

Technical data:
- Length: 1385 mm
- Height: 450 mm
- Fork pocket width: 200 mm
- Fork pocket height: 60 mm
- With drain valve: No
- With perforated sheet: No
- With stacker seat tilt function: Yes
- Oil and watertight: No
- Tipper edge height: 350 mm
- Made in: Germany

BAUER SÜDLOHN "Automatic" tilting container with 3 release points

Application:
For time-savings when picking up and depositing containers and to offset tipping over the container

Version:
- 3 automatic release points
- automatically closing protection against accidental slipping
- Protection against accidental tipping
- Favourable centre of gravity
- Sheet metal tray with surrounding edge profile
- Sturdy base frame with fork pockets

Technical data:
- Fork pocket clearance: 640 mm
- Fork pocket width: 200 mm
- Fork pocket height: 91 mm
- With drain valve: No
- With perforated sheet: No
- With stacker seat tilt function: Yes
- Oil and watertight: No
- Made in: Germany
- Mandatory testing according to DGUV (UVV): No

SAFE waste baskets with ashtray

With 2 litre waste basket and flame-extinguishing lid

Application:
Ideal for use in smoking areas or entrances

Execution:
- 17 litre waste basket made of metal with 2 litre ashtray and flame-extinguishing lid
- Round waste basket with removable container and ashtray for easy emptying and cleaning
- The self-extinguishing aluminium lid cuts off the oxygen supply in the ashtray and suffocates the flames.
- Dimensions of flame-extinguishing lid: 60 x 240 mm (H x diameter)
- Dimensions of opening: 150 x 125 mm (W x H)
- Dimensions of container interior: 380 x 220 mm (H x diameter)

Technical data:
- Type: Removable aluminium flame-extinguishing lid
- Volume: 17 l
- External height: 630 mm
- Outer diameter: 250 mm
- Material: Sheet steel
- Surface: Epoxy coating
- Volume of insert: 2 l
- Mandatory testing according to DGUV (UVV)

Steel collection container for cotton waste, self-extinguishing

Filling volume 73 litres

Application:
the classic Feuertrotz - also known as robust universal collector for industry and workshop

Execution:
- with a swing lid - very easy deposit
- recessed side handles for easy handling
- made of galvanised quality sheet steel or stainless steel
- self-extinguishing, non-flammable, TÜV/GS-tested

Technical data:
- Material: Sheet steel
- Self-extinguishing: Yes
- Surface: Powder-coated
- With internal container: No
- Foot-operated: No
- Building material class: A1 - Non-flammable

Recyclable materials collector made of zinc-plated sheet steel

Filling volume of 45-120 litres, with waste bag holder or galvanised inner container

Execution:
- **Ident. No. 151–165:** Bag holder with ball-bearing telescopic rails to pull out (ProSlide System) – this makes changing waste bags much simpler
- **Ident. No. 151–173:**
  - Made of galvanised quality sheet steel
  - Self-closing lids dampened and silent closing
  - Ergonomic handle and foot pedal made of stainless steel
  - Hinged doors locked with square socket key
  - Adjustable feet to compensate for uneven surfaces
  - Can be retrofitted to the mobile version using the roller kit
- **Ident. No. 167–181:** With galvanised inner container – self-extinguishing
- **Ident. No. 175–181:**
  - made of galvanised quality sheet steel
  - self-closing lids dampened and silent closing
  - ergonomic handle and foot pedal made of stainless steel
  - hinged doors locked with square socket key
  - adjustable feet to compensate for uneven surfaces
  - can be retrofitted to the mobile version using the roller kit

Advantage:
- **Ident. No. 151–173:**
  - For every need – the most comprehensive program on the market
  - Silent closing due to lid damping
  - Door colour selectable
- **Ident. No. 175–181:**
  - for every need - the most comprehensive program on the market
  - silent closing due to lid damping
  - door colour selectable

Delivery:

Ident. No. 151–173: Incl. Pro-Pads glue set (in anthracite, blue, yellow and green) for individual colour coding of the self-closing lids

Ident. No. 175–181: incl. Pro-Pads glue set (in anthracite, blue, yellow and green) for individual colour coding of the self-closing lids

ORION® Mobile floor stand

For attachment of rubbish bags and paper towels

Execution:
- For cleaning cloth rolls up to 40 cm in width
- Metal
- Mobile

69726...	Ident. No.	011 ●

Prod. Gr. 650

ORION® Wet wipe and cleaning cloths

Robust, lint-free and food-safe

Application:
Ident. No. 111–112: Suitable for cleaning or degreasing a wide range of surfaces
Ident. No. 121–122: Suitable for wet and dry cleaning. Particularly suitable for sensitive work areas such as precision engineering, the electrical and vehicle industry and in paint shops.
Ident. No. 131–132: Especially good for cost-effective polishing of large porous surfaces

Execution:
- **Ident. No. 111, 121:** 20x 25 wipes, 30 x 38 cm in size
- **Ident. No. 111–112:** For wet-cleaning smooth surfaces (sponge effect)
- **Ident. No. 112, 122, 132:** 500 perforated wipes, 30 x 38 cm in size
- **Ident. No. 121, 131:** Z fold
- **Ident. No. 121–122:**
  - For wet and dry cleaning
  - High-quality textile-like non-woven material
- **Ident. No. 131:** 10x 50 wipes, 40 x 38 cm in size
- **Ident. No. 131–132:**
  - For sensitive surfaces
  - Viscose non-woven material, soft as cotton

Advantage:
- **Ident. No. 111–112:** Can be wrung out, solvent-resistant, anti-static, low-lint, durable, tear-resistant when wet, washable, absorbent, abrasion-resistant, silicone and chloride-free
- **Ident. No. 121:** Very absorbent, extremely tear-resistant when wet, solvent-resistant, extremely low-lint, silicone-free, can be used without chemical cleaning agents, soft
- **Ident. No. 121–122:** Solvent-resistant, soft, virtually lint-free - making it suitable for sensitive areas, above-average absorption speed,
- fluid absorption up to 7.8 times its own weight, tear-resistant, tear-resistant when wet, can be sterilised, abrasion-resistant
- **Ident. No. 122:** Very absorbent, extremely tear-resistant, solvent-resistant, extremely low-lint, silicone-free, can be used without chemical cleaning agents, soft
- **Ident. No. 131–132:** Solvent-resistant, soft, low-lint - suitable for sensitive areas, above-average absorption speed, fluid absorption up to 10 times its own weight, tear-resistant, tear-resistant when wet, can be sterilised, abrasion-resistant

Cleaning station, equipped

With paper dispenser and two recyclable materials

Application:
The multifunctional waste and cleaning station for central and mobile provisioning and storage of cleaning equipment can be moved around to where it is needed, meaning staff no longer have to cover long distances to stationary cleaning points.

Execution:
- sturdy sheet steel construction, fully welded
- with accent roof, RAL 5010 gentian blue
- outer walls and divider with 10x10 mm square perforation, grid spacing 38 mm, and slotted perforation for attaching additional equipment elements and accessories, see from no. 50240 124-138
- easy to move with four integrated handles in outer walls
- centre divider – useful depth 300 mm each
- mobile thanks to 4 steering rollers Ø 125 mm, with trackless light-grey solid rubber tread and thread protection, 2 rollers with wheel blocks
- other colours (at no extra charge) and special equipment requirements deliverable on request

Advantage:
- mobile for quick transfer to where it is needed
- square and slotted perforations in walls enable the trolley to be custom-equipped with additional accessories as per requirements
- versatile and comprehensive range of further trolley accessories
- rapid retooling and conversion of accessories
- ensures order and cleanliness in the workplace

Technical data:
- Design: Divider centric
- Load-carrying capacity: 600 kg
- Number of steering rollers: 4 PCS
- Wheel diameter: 125 mm
- With wheel lock: Yes
- Equipped: Yes
- Material: Sheet steel
- Surface: Powder-coated

Broom set with silhouette film for pegboards

Practical set with broom, hook and magnetic silhouette film

Application:
Ideal combination set for keeping any workshop clean. Shadow image foil makes it more likely that the broom will be returned properly to its place after use.

Execution:
- Metal dustpan with rubber lip
- Hand brush made of horsehair
- Broom with fine natural bristle mixture and 1400 mm long wooden broom handle
- 3 sturdy metal hooks for attaching to a perforated metal plate wall
- Shadow image foil, black with good magnetic adhesion

Notes:
Perforated metal plate wall not included in the scope of delivery.

Absorbent mats Oil-Only - in brown or white

Absorbs oils, hydrocarbons and lubricants, water-repellent

Application:
Suitable for any applications requiring absorption of oil only, but not of water, e.g. for soaking up oil leaks in water tanks.

Execution:
- Made from 100% polypropylene
- Medium durability

Advantage:
- 8-ply for outstanding tear resistance
- Will not leave any fluid or fibre residue behind
- White mat indicates directly where the machine is dripping
- **Ident. No. 440:** Dispenser box allows easy access and stores the mats in perfect condition

HAZ-MAT absorbent mat

Absorbs acids, caustics, corrosive substances, chemicals and unidentified liquids

Application:
Specially treated mat, withstands even highly concentrated chemicals like 98% sulphuric acid and 30% sodium hydroxide solutions.

Execution:
- Made from 100% polypropylene
- Medium durability
- Flame-retardant (will not ignite immediately)

Advantage:
- Lights up pink to indicate hazard
- 8-ply for outstanding tear resistance
- Dispenser box allows easy access and stores the mats in perfect condition

Notes:
To ensure the effectiveness of the product and for your own safety, we recommend that you check your chemicals for compatibility with the PIG Haz-Mat prior to purchase.

Technical data:
- Type: HAZ-MAT
- Type description: MAT 351
- Absorptive capacity: High
- Length x width: 33 x 25 cm
- Suction volume: 37.0 l

HAM-O® absorbent mat - in UNIVERSAL and OIL-ONLY versions

Drops, leaks and dirt disappear in the unique camouflage pattern

40

Application:
Unique camouflage pattern hides drips, leaks and dirt. Ideal for covering large areas and for soaking up leaks.

Execution:
- Made from 100% polypropylene
- Extremely durable

Advantage:
- Dirt blends into the pattern, so the mat does not need to be replaced as frequently
- Extremely durable and absorbent

Notes:
Solvents and aggressive chemicals may affect the print.

Technical data:

Grippy® absorbent mat - with self-adhesive coating

Absorbs oils, water, coolants and solvents

Application:
Suitable for passageways and routes used by pedestrians and vehicles - even areas with heavy forklift traffic!

Execution:
- made of polypropylene with polyester seams
- with self-adhesive back (proprietary adhesive)
- outstanding durability

Advantage:
- Full-coverage adhesive backing holds the mat in place so that it cannot bunch up, slip or be blown away
- Sticks without leaving any residue
- Zigzag seams increase stability and durability
- Polyethylene coating prevents absorbed liquid escaping
- Tested and certified by the National Floor Safety Institute (NFSI)

Technical data:
- Type: Universal GRIPPY®
- Absorptive capacity: Middle
- Number of pieces per packet: 1 PCS
- Delivery unit: Mat roll in bag

Ident. No. 325

The GRIPPY® MAT always sits securely! Does not roll or slip, even under heavy load.

Prod. Gr. 6PA

GRIPPY FLOOR MAT® floor mats from polypropylene fibres

Absorbs oils, water, coolants and solvents

Execution:
- Absorbent layer takes up liquids and draws them away from the centre of the mat
- Interwoven fibres catch dirt and fine particles, preventing their spread
- Tested and certified (by NFSI)
- Classified as slip-resistant R13 as per DIN51130 - suitable for use in work rooms and work areas with an increased risk of slipping due to grease, oil, food, debris, dust, flour, paint residues etc
- Tested in accordance with BS 7976-2:2002+A1:2013, with proven low slip potential, both in wet and dry conditions
- Complies with fire protection class Bfl-s1 in accordance with the requirements of BS EN 13501-1
- Adheres to the most common commercial floor surfaces, including: Concrete, vinyl and ceramic tiles, natural stone slabs and linoleum
- Easy cleaning: Simply sweep, wipe, vacuum or clean with wet vacuum cleaner or floor cleaner - the mat will not slide

Advantage:
- Absorbs moisture, catches dirt and prevents slips, trips and falls
- The adhesive developed by New PIG keeps the mat fully fixed to the floor but enables it to be removed easily
- No overnight floor cleaning necessary
- Very easy to lay

Notes:
The extreme durability withstands the toughest traffic - even forklift trucks - and allows up to 12 weeks of use; the environmental impact is 91% LOWER than with rental floor mats.

Technical data:
- Type: Universal Grippy
- Absorptive capacity: Middle
- Number of pieces per packet: 1 PCS

TRAFFIC MAT® runner - ideal for absorbing liquids in heavily used areas

Absorbs oils, water, coolants and solvents

Application:
Suitable for large workstations, passageways and routes used by pedestrians and vehicles – even areas with heavy forklift traffic!

Execution:
- Made from 100% polypropylene
- Outstanding durability
- Roll in bag
- **Ident. No. 223:** With poly coating on bottom of mat

Advantage:
- Easy to cut to size
- **Ident. No. 223:**
  - Poly coating keeps the mat flat on the application surface, thereby reducing trip hazards and the risk of accidents
  - Poly coating enhances the absorption performance to ensure that floors are always kept dry

Technical data:
- Type: Universal TRAFFIC
- Absorptive capacity: Middle
- Number of pieces per packet: 1 PCS

Oil-Only absorbent socks - water-repellent and highly absorbent

Absorb oils, hydrocarbons and lubricants

Application:
Ident. No. 070: For everyday maintenance applications such as skimming oil-based contamination from water treatment systems, for absorbing oil from drainage channels and rivers, and for separating oil in refining processes
Ident. No. 080: For use inside buildings or outdoors, for car parks, bodies of water, waste water tanks and drains

Execution:
- **Ident. No. 070:**
  - Resistant to chemicals and therefore suitable for acid baths and phosphating tanks
  - With polypropylene filling
- **Ident. No. 080:**
  - Made from 100% recycled material
  - With cellulose filling

Advantage:
- Float on the water surface – even when saturated
- **Ident. No. 070:**
  - UV resistant for up to 12 months
  - Meets NFPA 99 requirements for static degradation
- **Ident. No. 080:** White colour for clear visual indication of absorption

Notes:
Ident. No. 080: Not suitable for use with aggressive liquids.

Parts cleaners - Your benefits

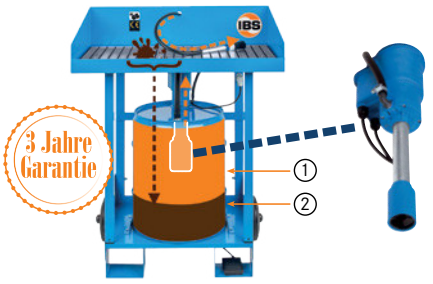
For cleaning metallic and plastic components contaminated by grease. Industrial parts cleaning and surface degreasing through manual brush cleaning.

Advantages:
- Save time and operating costs because heating of the cleaning agents is not necessary
- Enormous cost saving and environmental protection due to the multiple uses of the cleaner

Free service:
Contaminated cleaning fluids are collected free of charge when a new drum is delivered. A certified waste disposal company will be responsible for collection.

Here's how it works:
- The pump extracts fresh cleaner from the drum centre and delivers it to the hollow brush of the device.
- The used cleaner settles: It sinks to the bottom of the drum
- The cleaning fluid is replaced by a simple drum change. And the cycle starts again from the beginning!

You have full control over your costs with an effective, efficient and user-friendly system solution!



1. The upper part contains the cleaner
2. The lower part collects dirt and particles

A recirculation principle that helps the environment and your wallet.

IBS Scherer GmbH

Part cleaning device with closed base

For 50 litre drums with head plug connection

Execution:
- Closed, compact design
- **Ident. No. 044, 047:** Industrial version device
- **Ident. No. 045:**
  - Industrial-version device
  - 150 kg carrying capacity
- **Ident. No. 045–047:**
  - including cleaner
  - GS-tested in this combination

Delivery:
Ident. No. 044: part cleaning device, pump, brush.
Ident. No. 045–047: Part cleaning device, pump, brush and cleaner.

Notes:
FREE SERVICE: Contaminated cleaning fluids are collected free of charge when a new drum is delivered. A certified waste disposal company will be responsible for collection.

Technical data:
- Width x depth x height (external dimension): 800 x 500 x 1100 mm
- Working height: 895 mm
- Working surface: 790 x 490 mm
- Load-carrying capacity: 150 kg
- Suitable for container: 50 litres
- Container connection: Top plug
- Operating voltage: 230 V/AC/DC
- Colour: Blue

IBS Scherer GmbH

Part cleaning device, mobile

For 50 litre drums with head plug connection

Application:
for mobile cleaning at varying locations – with a large work surface.

Execution:
- device can be moved on wheels like a sack truck
- connection of a 50-l cleaning agent drum by means of a head tap connection
- **Ident. No. 036–037:**
  - including cleaner
  - GS-tested in this combination

Advantage:
- Portable and manoeuvrable
- the leverage of a sack truck makes it user-friendly and easy to operate

Delivery:
Ident. No. 035: Part cleaning device, pump, brush.
Ident. No. 036–037: part cleaning device, pump, brush and cleaner.

Notes:
Ident. No. 035, 037: FREE SERVICE: Contaminated cleaning fluids are collected free of charge when a new drum is delivered. A certified waste disposal company will be responsible for collection.
Ident. No. 036: FREE SERVICE: contaminated cleaning fluids are collected free of charge when a new drum is delivered. a certified waste disposal company will be responsible for collection.

Technical data:
- Width x depth x height (external dimension): 800 x 615 x 1020 mm
- Working height: 920 mm
- Working surface: 790 x 490 mm
- Load-carrying capacity: 100 kg
- Suitable for container: 50 litres
- Container connection: Top plug
- Operating voltage: 230 V/AC/DC

IBS Scherer GmbH

Part cleaning device with large work surface and high load capacity

For 200 litre drums with jacket plug connection

Application:
ideal for cleaning, especially large and heavy parts.

Execution:
- Connection of a 200 l cleaning agent drum by means of a mantle tap connection
- at workbench height with very large work surface.
- **Ident. No. 025:** Collection tray not included in scope of delivery.
- **Ident. No. 026–027:**
  - including cleaner
  - GS-tested in this combination

Advantage:
- strong, solid construction for durability.

Delivery:
Ident. No. 025: Part cleaning device, pump and brush.
Ident. No. 026–027: part cleaning device, pump, brush, collection tray and cleaner.

Notes:
FREE SERVICE: Contaminated cleaning fluids are collected free of charge when a new drum is delivered. A certified waste disposal company will be responsible for collection.

Technical data:
- Width x depth x height (external dimension): 1145 x 670 x 1050 mm
- Working height: 870 mm
- Working surface: 1135 x 660 mm
- Load-carrying capacity: 250 kg
- Suitable for container: 200 litres
- Container connection: Sheath plug
- Operating voltage: 230 V/AC/DC
- Colour: Blue

Prod. Gr. 559

IBS Scherer GmbH

PURGASOL special cleaner

Easy re-lubrication, typical odour

Application:
Special cleaner for heavy oil and grease contamination, can be used in all kinds of workshops, slightly relubricating for temporary rust protection.

Execution:
- Properties: scent-free hydrocarbon mixture
- colourless liquid, with light mineral oil or solvent smell
- Cannot be mixed with water
- Evaporates quickly and evenly, light relubrication
- No classification as per Industrial Safety Regulation

Notes:
A FREE SERVICE is available on request: Contaminated cleaning fluids are collected free of charge when a new drum is delivered. A certified waste disposal company will be responsible for collection.

EL/Extra special cleaner

Evaporates without residue, very low odour

Application:
Special industrial cleaner (including the food industry, NSF K1 rating), also suitable for manufacturing, precision engineering and electrotechnical operations for rapid and residue-free cleaning and immediate use of the cleaned product.

Execution:
- Properties: scent-free hydrocarbon mixture
- Colourless liquid, almost odourless (very mild)
- Cannot be mixed with water
- Evaporates quickly without residues
- No classification as per Industrial Safety Regulation

Delivery:
FREE SERVICE: Contaminated cleaning fluids are collected free of charge when a new drum is delivered. A certified waste disposal company will be responsible for collection.

Prod. Gr. 559

Absorber cabinet with pneumatic extraction system

For cleanliness and air pollution control at the workplace

Application:
Chips and droplets are vacuumed from the interior of the container. this way, the absorber cabinet ensures clean floors and air. ideal for any workplace where workpieces and tools must be kept clean.

Execution:
- Stable and sturdy sheet steel housing with built-in injection system (operated with compressed air) and collection container
- The compressed-air gun and the injection system are actuated with a foot valve attached on the front side, so that only as much compressed air as required for the cleaning is consumed.
- The parts to be cleaned are simply blown off on the grating with the compressed-air gun
- portable like a sack truck with two wheels on the rear side
- The injector system extracts all contamination downwards into a collection container which must be emptied on a regular basis

Advantage:
- Swarf, oil and coolant residues are no longer simply blown out into the premises, but are purposely sucked into the collecting container provided.
- No emulsion or oil vapour in the air—no dust and no chips flying around—no contamination of the workplace
- Rapid connection to existing compressed-air system
- can be installed directly in or near machines so that the processed workpieces and parts can be immediately blown off

Delivery:
Fully ready for use with connection for compressed-air quick-release coupling (plug-in nipple DN 7.2), incl. compressed-air gun and hose

Technical data:
- Height: 1300 mm
- Depth: 500 mm
- Working height: 850 mm
- Clear opening depth: 480 mm
- Min./max. operating pressure: 5-10 bar
- Min./max. sound-pressure-level: 60-70 dB
- Surface: Powder-coated

Other helpful equipment elements for absorber cabinets

EXACTLY AS YOU NEED. Not yet 100% suitable for you? We can supply you with absorber cabinets tailored exactly to your needs. The following options have been made many times. Ask us!

Design with wash basin.
The work surface is divided into 2 parts. On the left-hand side, blowing-off/suction is possible as with the standard designs. On the right-hand side there is also a container for washing small parts. This container is closed with a flap for blowing-off/suction.

Design with turntable.
The design with turntable is ideal for blowing off heavy workpieces. This allows these materials to be blown off gently from all sides.

A **Makrolon cover plate** also protects the user from flying chips and other particles.

Design with activated carbon filter.
It is possible to equip the absorber cabinet with an activated carbon container. This post-filtering ensures that volatile aromatics that cause unpleasant odours are retained. Also a connection to the existing ventilation system on site is no problem!

Mobile welding fume extractor

With filter and flexible extractor arm, hose version, > 99% filtration efficiency

Application:

Ident. No. 011: For extracting fumes, dust and also gases that are released during welding processes for cutting and joining when machining unalloyed steels, including high-alloy chromium/nickel steels.

Ident. No. 020: For extracting fumes during welding work with unalloyed steels and precious metals.

Execution:

- With flexible suction arm in hose version
- With filter
- Suction arms can be swivelled through 360° and can be moved into any desired position, which is self-supporting
- **Ident. No. 011:**
  - When the filter is saturated, an indicator lamp shows that a filter change is necessary
  - The particles and gases are filtered out of the air stream in a multi-stage filtering process and the clean air is fed back to the working area
  - Filter elements are accessible via a maintenance hatch and therefore can be easily and quickly removed
- **Ident. No. 020:**
  - Monitoring of the volume flow and filter indicates when a filter change is necessary
  - Thanks to effective air guidance in the unit, the operator cannot come into contact with the harmful substances
  - Air discharge on the rear of the unit is via an outlet grille facing upwards, rendering undetectable disruptive air flow at a distance of 1 m
  - With operating hours counter
  - With powerful fan using high negative pressure, which guarantees a high volume flow even when the filter is saturated

Advantage:

- **Ident. No. 011:** Tested based on DIN EN ISO 15012-1 (2005) and IFA (previously BGIA) certified (IFA no. 1102002) for welding fume class W3
- **Ident. No. 020:**
  - Complies with the safety requirements for equipment in welding fume class W3 (highly alloyed steels)
  - When used as intended, the system can be used for air circulation, as the prerequisites for exemption clauses in accordance with the new statutory German Hazardous Materials Ordinance (GefstoffV) are satisfied
  - Seal seat raising unit guarantees complete seal integrity and thus the filtration efficiency of the filter equipment

storing hazardous materials properly

The German regulations concerning the storage of substances hazardous to water are:
- The WHG (Wasserhaushaltsgesetz - German Water Resources Act) sections 62 and 63
- The AwSV (Verordnung über Anlagen zum Umgang mit wassergefährdenden Stoffen - German ordinance on installations for the handling of substances hazardous to waters)

Explanation of relevant hazardous material symbols according to GHS/Reach:

classification	hazard symbol	H set	hazard category
acute		H 400	GHS category 1
chronic		H 410	GHS category 1
chronic		H 411	GHS category 2
chronic		H 412	GHS category 3
chronic		H 413	GHS category 4

classification	hazard symbol	H set	hazard category
corrosive action on metals		H 290	GHS category 5
caustic effect on the skin/skin irritation		H 314	GHS category 5
serious eye damage		H 318	GHS category 5

classification	hazard symbol	criteria	H set	hazard category
extremely flammable		flash point < 23°C boiling point < 35°C	H 400	GHS category 1
easily flammable		flash point < 23°C boiling point < 35°C	H 412	GHS category 3
flammable		flash point >23°C <60°C	H 413	GHS category 4

GHS – Globally Harmonised System of Classification and Labelling of Chemicals.
the GHS is a globally harmonised system for the classification of chemicals as well as their labelling on packaging and safety data sheets.

REACH
regulates the registration, evaluation, authorisation and restriction of chemical substances.

Which collection tray for which substances?

steel collecting trays

ÜBER-EINSTIMMUNGS-ERKLÄRUNG (ÜHP) gemäß Bauregelliste A Teil 1, DIBt, Berlin

for flammable liquids of GHS categories 1-3

for water-hazardous liquids of GHS categories 1-4

PE collection tray

Allgemeine bauaufsichtliche Zulassung DIBt, Berlin

for corrosive liquids

how much must be collected?
- size of largest container
- at least 10 % of the total stored quantity
- 100 % in water protection areas

Collection tray for shelving system

Steel

Application:
For adjusting in common pallet shelving systems. For the proper and safe storage of barrels for flammable liquids in GHS categories 1–3 and liquids which pose a hazard to water in GHS categories 1–4.

Execution:
- 3-mm thick welded sheet steel structure
- **Ident. No. 450–452, 456–458, 462–464, 468–470, 474–476, 480–482:** 100 mm ground clearance
- **Ident. No. 453–455, 459–461, 465–467, 471–473, 477–479, 483–485:** 100 mm ground clearance

Mobile collection trays for 60-litre and 200-litre drums

made of steel

Application:
For safe storage and filling and for mobile applications. Approved for flammable liquids in GHS categories 1–3 and liquids which pose a hazard to water in GHS categories 1–4.

Execution:
- 3-mm thick welded sheet steel structure
- With removable, galvanised grating
- Optional drum support for horizontal storage of drums and for filling
- 2 steering rollers and 2 fixed castors made from polyamide, 1 steering roller with locking device
- **Ident. No. 611–616:** Roller Ø 100 mm, structural height 125 mm
- **Ident. No. 621–646:** Roller Ø 180 mm, structural height 225 mm
- **Ident. No. 671–686:**
  - Roller Ø 180 mm, structural height 220 mm
  - With profiled edges on both sides - therefore particularly robust

Notes:
Dimensions including sliding handle

Technical data:
- With container rest: No
- With sliding handle: Yes
- Declaration of conformity in acc. with StawaR: Yes
- With grating: Yes

50060... Drum support made of sheet steel For the horizontal storage and filling of drums on collection trays	Ident. No.	245 ○+

Coolant mixing trolley

Ideal for transporting a 200-litre drum

Application:
Easy filling directly at the machine.

Execution:
- Perforated plate bracket on the lower level for fixing cable and hose drums
- Perforated plate on the upper level for fixing other accessories
- with practical holes for grommet
- Includes tether
- Roller dia. 100 mm, structural height 125 mm

Advantage:
- Certified collection tray integrated
- numerous customisation options

Technical data:
- With wheel lock: Yes
- With sliding handle: Yes
- Max. number of 200-litre containers: 1 PCS
- Declaration of conformity in acc. with StawaR: Yes
- Load-carrying capacity: 760 kg
- With grating: Yes

Hazardous material roller shutter cabinets for the storage of drums and small containers

Made of sheet steel, with collection tray, locking

MADE IN

Application:
For the storage of flammable liquids in GHS categories 1–3 in line with regulations, for indoor and outdoor use or in attic space

Execution:
- robust sheet steel construction
- aluminium roller shutter, lockable with cylinder lock
- natural ventilation
- with general technical approval
- collection tray/intermediate shelf galvanised, unit painted
- **Ident. No. 071:** with one collection tray
- **Ident. No. 072:** with one collection tray and one grating floor
- **Ident. No. 073:** with one collection tray and one small cask tray
- **Ident. No. 074:** With 4 small container trays of 45 litres

Technical data:
- Depth: 870 mm
- Cabinet colour: Yellow orange RAL 2000
- Height: 1610 mm
- Width: 1300 mm
- Material: Steel
- For flammable liquids GHS 1-3: Yes
- For liquids hazardous to water GHS 1-4: Yes
- Surface of the cabinet: Laquer
- Mandatory testing according to DGUV (UVV): No

Floor protection tray

With galvanised grating

Application:
Traversable floor protection trays for the storage and filling of flammable liquids in GHS categories 1-3 and liquids presenting a water contamination risk in GHS categories 1-4.

Execution:
- Surface carrying capacity 5000 kg/m²
- permissible wheel load over an area of 100 x 100 mm (forklift truck wheel load capacity) = 500 kg
- Traversable by forklift trucks
- With galvanised grating

Notes:
Deliverable in a stainless steel version or with special dimensions according to your requirements

Technical data:
- Height: 78 mm
- Declaration of conformity in acc. with StawaR: Yes
- Permissible load capacity (100 x 100 mm): 500 kg
- With grating: Yes

CLASSIC line safety cabinet, type 90

Fire-resistant (FR) for 90 minutes

Application:
For safe and legally compliant storage of hazardous materials and flammable liquids in work areas in line with TRGS 510, DIN EN 14470-1 and DIN EN 14727.

Execution:
- External corpus, powder-coated sheet steel, light grey RAL 7035
- Internal corpus made of high quality decorative panels, light grey RAL 7035
- Lockable hinged doors, door front in zinc yellow RAL 1018
- Standard features: height-adjustable tray bases, base tray, 1 perforated insert made from powder coated sheet steel, height-adjustable base
- Hinged doors with standard integrated locking system and temperature monitoring, automatic self-closing in case of fire
- Ventilation and air extraction on each cabinet level
- Viewing window provided for visual check of ventilation shut-off flaps
- Tray bases and base trays are galvanically connected with the cabinet housing – avoids risk of ignition (BGR 132 TRBS 2153)
- Feet adjustable from inside and outside
- Underpinning guaranteed due to removable base

Advantage:
- Tested safety on high level: Prototype testing by MPA, TÜV, GS/CE-marks, fire resistant for 90 minutes and High Quality seal for superior design, user-friendliness and increased service life.
- Fire resistant for 90 minutes

Technical data:
- Fire resistance rating: F90
- Door design: Full-sheet panel
- External height: 2080 mm
- Depth: 595 mm
- Interior height: 1830 mm
- Internal depth: 446 mm
- With base basin: Yes
- Number of tray bases: 3 PCS
- Colour of front: Zinc yellow RAL 1018
- Cabinet colour: Light grey RAL 7035
- Mandatory testing according to DGUV (UVV): Yes

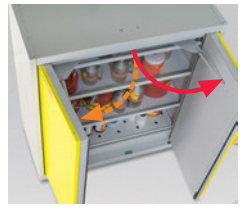
Product details single-handed operation

The single-handed wing door solution offers maximum user comfort.



Single-hand hinged door system offers max. operating convenience

Filter attachment for solvent vapours

With super silent fan and exhaust air control, for safety cabinet no. 50069002-012

Application:
For ventilating and monitoring safety cabinets by filtering almost 100% of harmful solvents (hydrocarbons) via molecular adsorption. The filtering provides optimum protection for the user. No need for an additional exhaust air connection. The purified air is released into the ambient air.

Execution:
- Sheet steel housing in silver with pearl-mica effect
- Integrated LED error indicator
- Plug and play: simply connect to a 230-V/50-Hz power supply using the CEE 7/7 plug
- Built-in fan in accordance with DIN EN 14986
- Removable activated carbon filter element (2 kg fill content)
- Removable particle filter in accordance with DIN EN 779.
- Filter performance (activated carbon): 30% of the filling quantity for all media of the supplied materials list.
- Visual and audible alarm in the event of faults.
- One dry contact (24 V/2 A).
- Conformity of the manufacturer according to ATEX Guideline RL94/9EC and Low Voltage Directive 2006/95/EC

Advantage:
- Multi-stage filter system with safety factor 2
- Filter warning system
- Quiet fan
- Plug and play for easy installation

Technical data:
- Width: 415 mm
- Height: 310 mm
- Material: Sheet steel
- Surface: Powder-coated/ steel plate
- Mandatory testing according to DGUV (UVV): Yes

BATTERY CLASSIC XL

Application:
with BATTERY XL for compliance with all laws, regulations and directives, in particular the guidelines for storage in accordance with the German Insurance Association's (GDV) technical information sheet on loss prevention for lithium-ion batteries from VdS and FM Global. With additional facilities for hazard control in the case of spontaneous combustion of the battery, process reliability is ensured and can be taken into account during hazard analysis.

Execution:
- doors fitted with integrated hold-open device as standard
- self-closing and locking doors for protection against backdraft from the inside
- Separate thermal elements for automatic door closing and locking in all storage levels in the event of a fire
- can only be unlocked by authorised personnel after a fire
- extraction of harmful vapours above the collecting tray as well as on each cabinet level
- Lower tray with perforated metal sheet rust
- bearing base, collecting tray and perforated metal inserts made from sheet steel
- hinged doors and outer body made of powder-coated sheet steel

Advantage:
- airing and ventilation on each cabinet level for optimised air exchange
- in the event of a fire inside or outside, the blockage-free door closure is automatically activated via a thermal element
- automatic locking in the event of a fire to prevent backdraft

Notes:
Optional temperature sensors and Cabi2Net or Smart Control as an early warning system for the detection of thermal events deliverable on request.

Technical data:
- Model: BATTERY XL
- Fire resistance rating: F90
- Number of doors: 2 PCS
- With single-handed swing door technology: No
- External height: 2085 mm
- External width: 1094 mm
- Depth: 612 mm
- Interior height: 1697 mm
- Internal width: 979 mm
- Internal depth: 457 mm
- With base basin: Yes
- Number of shelves: 3 PCS
- Colour of front: Light-tan PANTONE 389 C
- Cabinet colour: Light grey RAL 7035
- Mandatory testing according to DGUV (UVV): Yes

YOU TAKE ON DIFFICULT CHALLENGES.
WE HAVE WHAT IT TAKES.
Do you need more than just a hammer, pair of pliers or a screwdriver?
We have the full range for you. Machining tools, handling systems and
measuring technology. However, we also offer tailor-made system solutions,
large and small machinery and complete factory equipment.
In total, more than 120,000 products.

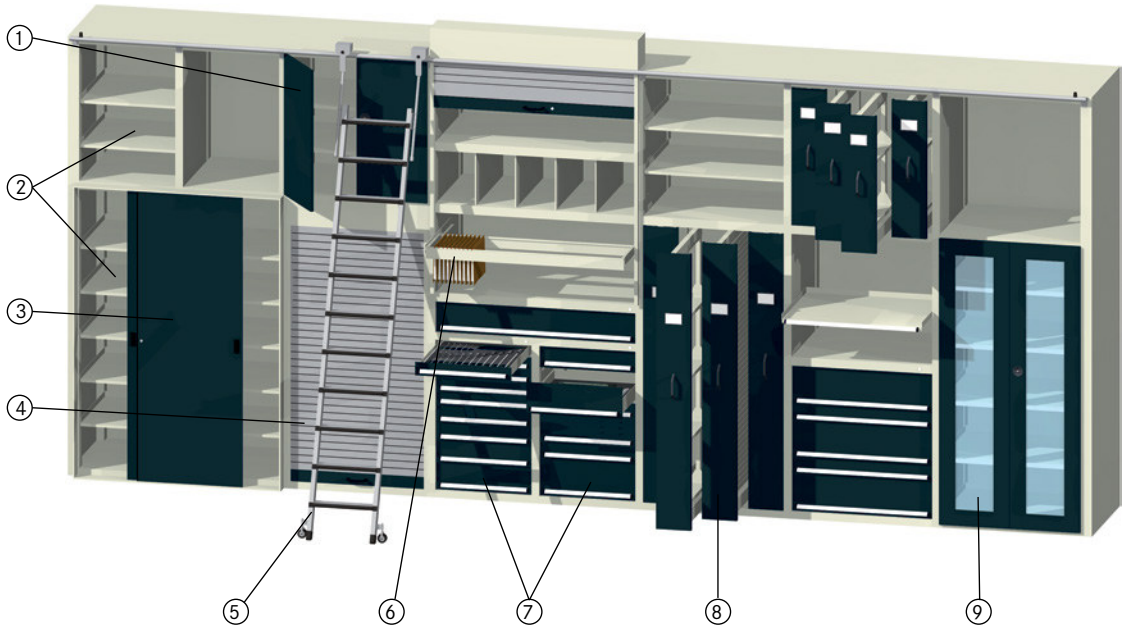
GROUP
LET'S WORK TOGETHER.

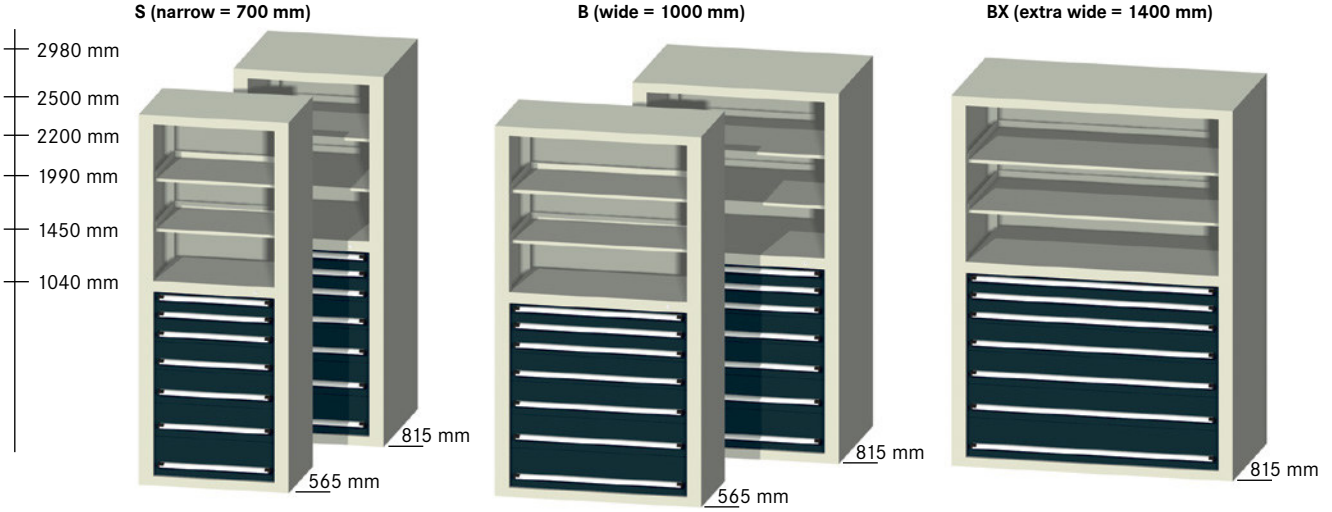
HK tool shelves
System 550 and system 800

These HK tool shelves are based on the proven series of our HK tool cabinets. This means that there are virtually no limits to the individual combinations that can be selected to suit your requirements. Any individual parts such as shelves, drawers, vertical extensions or different door variants can be combined. The shelves are made precisely for the existing operating conditions. You will receive a **CAD planning drawing** with each quotation.

Planning dimensions:
Width: Overall width = rack nominal width (700, 1000 or 1400 mm) + 100 mm
Depth: System 550 = 563 mm + possibly hinged door 25 mm, sliding door 94 mm, roller shutters 30 mm
System 800 = 813 mm + possibly hinged door 25 mm, sliding door 94 mm, roller shutters 30 mm
Height: Total height = rack nominal height + possibly roller shutter box 211 mm



① **Front-mounted hinged doors with solid sheet metal doors**
② **Shelves removable or fixed, height-adjustable**
③ **Front-mounted sliding doors**
④ **Front-mounted roller shutters**
⑤ **Front-mounted step ladder mobile or suitable for suspension**
⑥ **Extension with frames for suspended folders**
⑦ **Drawers**
⑧ **Vertical pull-out mechanisms**
⑨ **Front-mounted hinged doors with viewing windows**



Powder coating: Body RAL 7035, light grey with fronts RAL 5010, gentian blue.

Drawer - 100 % full extension

for HK tool rack system 550

Application:
For individual configuration of the HK cabinet housing/tool shelves. The drawers can be installed in the housing in any sequence, but the sum of the front heights must be equal to the useful height of the housing.

Execution:
- Made of sheet steel with a reinforced, perforated bottom (25 mm hole grid)
- Run on Delrin rollers in rails which are suspended in the housing with plug caps
- Inner sides slotted all around, for attaching and fixing insert material such as compartment rails and dividers
- Equipped with aluminium handle strip, paper and cellon strips and lateral cover caps
- SOFT-CLOSE-AUTOMATIC for smooth and silent drawer closing, see no. 50392 005.

Notes:
Clear internal dimensions for hard foam inserts: 15 mm less than specified internal dimensions

Technical data:
- Pullout type: Full extension
- Drawer with slots: Yes
- Perforated drawer base: Yes
- Material: Sheet steel
- Surface: Powder-coated

Rack step ladder (EN standard 131)

for HK tool rack

Execution:
- ZARGES shelf stepladder
- 80 mm deep steps
- cushioned front step edge
- **Ident. No. 207–209:**
  - wear-resistant anodised rails
  - Ladder head device suitable for rail of diameter 30 mm
  - Trolley brakes itself when someone stands on it
  - The ladder can be positioned vertically against the shelf without being unhooked
  - Ladder incline 22°
- **Ident. No. 217–218:**
  - Corrosion-proof lightweight metal rectangular tubes
  - Two suspension and attachment hooks each for guide rails up to a diameter of 36 mm

Notes:
Ident. No. 207–209: when ordering, please specify the measurement from the ground to the upper edge of the pipe rail!

Technical data:
- Material: Aluminium
- Step depth: 80 mm
- EN standard: 131
- Mandatory testing according to DGUV (UVV): Yes

Tool shelf case study

Tool rack case study

ATORN Boltless shelving rack, load capacity per bay 100 kg

single-row, with pre-assembled frame

Basic rack in combination with add-on rack

Application:
Universal shelving system for all storage applications, quick set-up or conversion through simple plugging of the shelves, can be assembled without tools.

Execution:
- Galvanised plug-in rack, pre-assembled frames, simple and quick set-up and conversion without tools
- Shelves height-adjustable in increments of 25 mm
- Shelves with a 50 mm perforation grid to accommodate accessories
- Rear diagonal strut for longitudinal stiffening
- Comprehensive accessories including compartment dividers, partition grid available on request
- Planning dimensions: Basic shelf = nominal length + 56 mm, nominal depth + 36 mm

Advantage:
- Quick plug-in assembly without tools

Delivery:
Delivery contents basic unit: 2 frames, 4 shelves

Delivery contents add-on unit: 1 frames, 4 shelves

Notes:
- **Shelves with a height/depth ratio of ≥ 5: 1 must be secured against tilting (wall or base anchoring)**
- **Loads per bay/unit apply to evenly distributed loads**
- **Bay load indications apply to shelving rows with 3 or more bays**
- **Load-bearing capacity, cover floor max. 200 kg**

Technical data:
- Depth: 436 mm
- Grid dimension: 25 mm
- Number of shelves: 4 PCS
- Nominal depth: 400 mm
- Nominal length: 1000 mm
- Type of assembly: To insert
- Height: 2000 mm
- Quality label: RAL-RG 614/1
- Load-carrying capacity per shelf: 100 kg
- Load-carrying capacity per field: 900 kg

Prod. Gr. 587

Shelf plug-in rack – single-row, with disassembled frame
Galvanised or RAL 7035, light grey, powder-coated

Design:
- With disassembled frame
- Quick plug-in assembly without tools
- Shelf loads 100, 150 and 230 kg
- Shelf edge height 40 mm
- Shelves with a 50 mm perforation grid to accommodate accessories
- Shelves height-adjustable every 25 mm
- Note: Depth bracing always zinc plated, even if the frame is coated

Advantages:
- More cost-efficient than a rack with a pre-assembled frame
- Quick plug-in assembly without tools
- Variable adjustment to the stock by means of grid dimensions

Planning dimensions:
Length of basic rack = nominal length + 56 mm, length of add-on rack = nominal length + 6 mm,
Depth of basic rack = nominal depth + 36 mm, depth of add-on rack nominal depth + 36 mm

Safety instructions:
- **Shelves with a height/depth ratio of ≥ 5: 1 must be secured against tilting (wall or base anchoring)**
- **Loads per bay/unit apply to evenly distributed loads**
- **Bay load indications apply to shelving rows with 3 or more bays**
- **Load-bearing capacity, cover floor max. 200 kg**

META CLIP boltless shelving rack - load capacity per bay 100 kg

Application:
Universal shelving system for all storage applications, quick setup or conversion through simple plugging of the shelves, can be assembled without tools

Execution:
- Shelves height-adjustable in increments of 25 mm for variable adaptation to stored goods
- Shelves with a 50 mm hole grid to accommodate accessories, shelf edge height 40 mm
- For technical reasons, depth reinforcements are always zinc plated, even with coated frames
- Basic rack planning dimensions: Nominal length + 56 mm, nominal depth + 36 mm
- With dismantled or pre-assembled frame

Advantage:
- Quick plug-in assembly without tools
- Stable and reliable
- Different versions available

Notes:
Shelves with a height/depth ratio equal to or greater than 5:1 must be secured against tilting (wall or foot anchoring). The loads indicated per shelf and per bay apply to evenly distributed loads. Bay load indications apply to shelving rows with 3 or more bays. Cover shelf max. 200 kg.

Technical data:
- Length: 1056 mm
- Nominal length: 1000 mm
- Design: Shelving unit
- Type of assembly: To insert
- Material: Steel
- Design of the frame: Disassembled
- Grid dimension: 25 mm
- Load-carrying capacity per shelf: 100 kg
- Number of frame: 2 PCS
- Quality label: RAL-RG 614/1
- Made in: Germany
- Mandatory testing according to DGUV (UVV): Yes

➥ Shelves with 330 kg capacity available on request.

shelf plug-in rack – single-row, with pre-assembled frame
Galvanised or in RAL 7035, light grey, powder-coated

Design:
- With pre-assembled frame = clinched frame
- Quick plug-in assembly without tools
- Shelf loads 100, 150 and 230 kg
- Shelf edge height 40 mm
- Shelves with a 50 mm perforation grid to accommodate accessories
- Shelves height-adjustable every 25 mm
- With diagonal struts attached to the reverse

Advantages:
- Quick plug-in assembly without tools
- Variable adjustment to the stock by means of grid dimensions
- Comprehensive range of accessories

Planning dimensions:
Basic rack = nominal length + 56 mm, add-on rack = nominal length + 6 mm, basic rack = nominal depth + 36 mm, add-on rack = nominal depth + 36 mm

Safety instructions:
- **Shelves with a height/depth ratio of ≥ 5: 1 must be secured against tilting (wall or base anchoring)**
- **Loads per bay/unit apply to evenly distributed loads**
- **Bay load indications apply to shelving rows with 3 or more bays**
- **Load-bearing capacity, cover floor max. 200 kg**

Figure: 1x basic shelf + 1x add-on shelf
Delivery with clinched frame

dispatched from the supplier's warehouse within 10 days

META CLIP boltless shelving rack - load capacity per bay 150 kg

single-row, with pre-assembled frame

Application:
Universal shelving system for all storage applications, quick setup or conversion through simple plugging of the shelves, can be assembled without tools

Execution:
- Shelves height-adjustable in increments of 25 mm for variable adaptation to stored goods
- Shelves with a 50 mm hole grid to accommodate accessories, shelf edge height 40 mm
- For technical reasons, depth reinforcements are always zinc plated, even with coated frames
- Basic rack planning dimensions: Nominal length + 56 mm, nominal depth + 36 mm
- With dismantled or pre-assembled frame

Advantage:
- Quick plug-in assembly without tools
- Stable and reliable
- Different versions available

Notes:
Shelves with a height/depth ratio equal to or greater than 5:1 must be secured against tilting (wall or foot anchoring). The loads indicated per shelf and per bay apply to evenly distributed loads. Bay load indications apply to shelving rows with 3 or more bays. Cover shelf max. 200 kg.

Technical data:
- Length: 1056 mm
- Nominal length: 1000 mm
- Design: Shelving unit
- Type of assembly: To insert
- Material: Steel
- Design of the frame: Pre-assembled
- Grid dimension: 25 mm
- Load-carrying capacity per shelf: 150 kg
- Number of frame: 2 PCS
- Quality label: RAL-RG 614/1
- Made in: Germany
- Mandatory testing according to DGUV (UVV): Yes

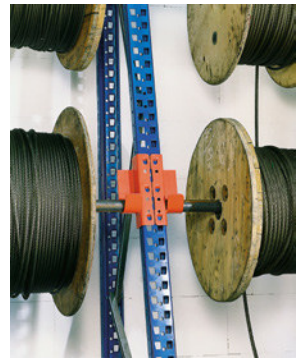
Cable drum shelves
for efficient supply of cables

Individual business models require individual solutions. This especially applies to cable storage and provision. Together with our partners, we are able to find exactly the solution that you need for efficient and space-saving cable provision. Contact us.



Kardex Remstar Megamat RS

Application:
Overwhelming benefits for the economical and safe storage of your small parts in a paternoster lift.

Version:
- available as a stand-alone version or as an integrated solution
- modular structure, variety of options, versatile retrofitting options
- suitable for all common storage containers and storage boxes
- low-wear operation due to automatic chain tensioner
- Equipment controller with optional Power Pick Global warehouse management
- Emergency crank handle for power failure
- Retrofit and conversion packages available for application changes

Advantages:
- optimal utilisation of available space combined with minimal footprint
- Increased storage space thanks to high-density storage
- high rotation speed - quick access to all stored goods - clearly organised storage of small parts - short routes, quick access
- up to 60 percent more storage capacity
- very high picking performance - short picking times - lower error rate in picking
- “Goods-to-man” principle
- Operate on sight

Our service:
We plan customised solutions adapted exactly to your individual storage requirements. Do not hesitate to get in touch with us.

Picking solutions: “Man-to-goods” order picking. The solution for small and medium-sized companies.

“Man-to-goods” order picking, supported by connecting conveyor systems to increase picking efficiency.

“Goods-to-man” order picking for applications in the higher performance range (> 300 access operations per employee per hour)

Kardex Remstar — special applications available as standard modules:

Trockenraum
Relative Luftfeuchtigkeit beträgt maximal 5%

Reinraum
Staubschutz, Sicherheit und Schutz vor unbefugten Zutritt

Kühlung + Lager
Branchen-Lösungen für konditionierte Lagerbedingungen von -20 bis +70°C

Feuerschutz
Brandschutz, Brandsicherheit und Feuerschutz

Technical hotline +49 (0)7141 498-5819

Kardex Remstar Shuttle XP

Application:

Optimum utilisation of storage space on minimal floor space area for combined storage of small and large parts

Version:

- Height: from 2.55 m to 30 m; in 100 mm grid
- Width: from 1.58 m to 4.38 m, depth: from 2.31 m to 4.29 m
- Load profiles: Payload up to 67/120 t
- The shelves can be organised for any type of goods using individual subdivisions. The right trays for your requirements: different dimensions are available for a wide range of applications. Easy and clear division of trays accelerate pick times enormously.
- The service opening is the area in which the tray of goods is made available in an ergonomic way. Up to six service openings per device are possible. Shutter doors in the service opening ensure safety for operators and goods.
- The sidewalls of the service opening are continuously equipped with brackets. Working positions can be individually adjusted to suit the height of the operating personnel using bearing angle modules.
- Light grid for protrusion control
- Automatic height measurement system; identification of stored goods in 25 mm raster

Advantages:

- Maximum space utilisation with minimal footprint
- Reduction of access times - quick and safe access
- Precise inventory stocks thanks to integration into the internal goods management system
- More safety for operator and stored goods
- Increasing of inventory turnover

Divider system
Options and possible combinations

The divider system is manufactured from flat grid mesh and C-profile frame to ensure maximum safety. The profile frames allow various fillings to be inserted instead of the grid mesh, such as acrylic glass, sheet metal, coated chipboard and combinations of the various fillings (upon request). In addition, all partition wall combinations are available as mobile screen wall systems. The well-designed, angled feet allow the partition walls to be installed at 45/60°. Integrated threaded holes for attaching steering rollers turn the screen walls into mobile partitions in a flash. The maximum width of the elements is 1000 mm.

Different designs available on request

Available upon request: Steering rollers

Inclined arrangement of the adjustment feet

Machine protection system
For safe demarcation of automatic systems and robots

Application:
Variable and versatile system for maximum safety on automatic equipment and robots. The flexible modular design enables elements to be combined according to your individual desires and needs and rearranged or exchanged at any time. Installing the elements on post profiles provides users with unlimited layout options.

Design:
Elements made of high-quality processed steel with the correct mesh size 50 x 25 mm to prevent reaching through. Complies with EN ISO 13857. Designed according to Machinery Directive 2006/42/EC. Request now or enquire in our online shop.

Painting: All elements of the machine protection system are deliverable in the following paints at no extra charge. Other paints and a hot-dip galvanised version for use in outdoor areas are available on request.

Steel-construction modular platforms

Stand-alone steel construction that can be designed according the requirements and for the respective loads. The extreme stability allows versatile use of the upper levels, for example, for offices, break areas or as additional storage space or further production areas.

Design:

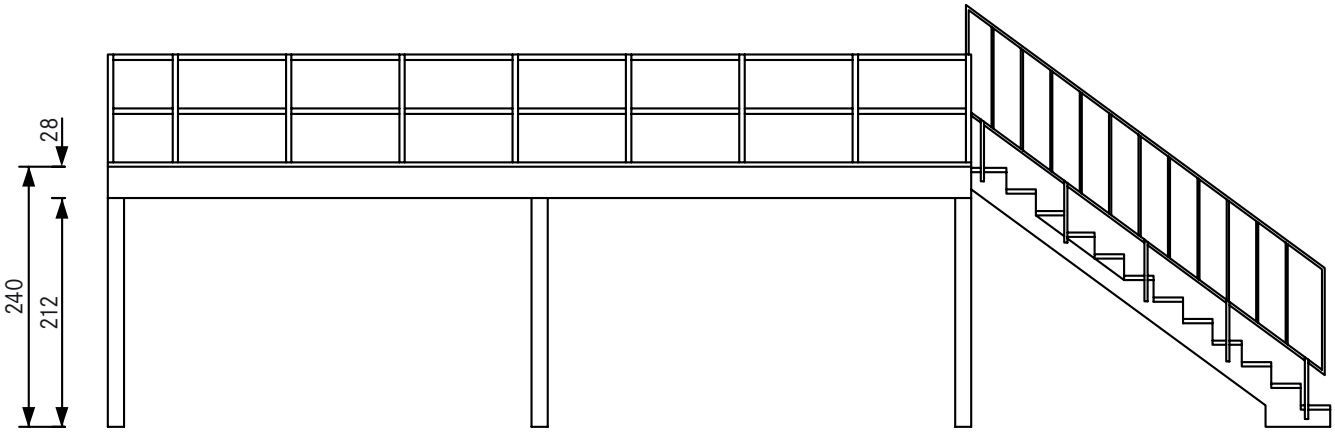
- Individual grid of support columns to suit your installations and traffic routes beneath the storage platform. Overhangs and projections make the best possible use of all available space.
- Self-supporting structure, made of hot-rolled steel sections or square tubing.
- Different platform coverings (wood, grating, non-slip surface) are available.

Your benefits:

- Optimisation of available usable surfaces in height
- Alternative to the construction of new halls
- Individual variants for different applications and all trades
- Can be extended at any time by adding further modules; likewise, the platform can be disassembled, relocated and reinstalled elsewhere
- Corresponds to the guidelines of the employer's liability insurance association according to BGR 234
- Easy and quick mounting by our specialised personnel

Our service:

We plan customised solutions adapted exactly to your requirements, integrate staircases, pallet transfer areas, safety railings or even office cabins. Select your personal colour scheme from our extensive range of colours.



Plastic collision protection for rack supports

Application:
Optimal safety and protection, suitable for almost all brands of shelf racks.

Execution:
- Highly flexible inner foam for optimal force distribution
- **Ident. No. 501–507:**
  - Almost indestructible ballistic plastic outer shell (HDPE) with a wall thickness of more than 7 mm
  - Bright colour for excellent visibility
  - Suitable for cold storage, withstands extreme temperatures down to -40 °C
  - Solid, rounded design deflects forklift tines away from the rack support
  - Very high shock absorption for frontal impact force of up to 2.4 t
  - Tested in accordance with European and international standards FEM 10.2.02, AS4084
- **Ident. No. 513–527:**
  - Virtually indestructible ballistic plastic body armour
  - Excellent visibility
  - Suitable for cold storage - withstands extreme temperatures down to -40 °C

Advantage:
- Prevents accidents and minimises repair work and costs
- Ideal slim design – no loss of shelf space
- Non-toxic and fully recyclable
- Quick, easy installation, does not need to be fixed to the floor
- **Ident. No. 501–507:** Elastic, spring-back, dimensionally stable, returns to its original shape
- **Ident. No. 513–527:** Elastic, spring-back, dimensionally stable - returns to its original shape

Notes:
Installation tool required for sizes L and XXL, recommended for sizes S and M

Assembly aid for rack collision protection

Size M to XXL

Application:
Required for installing Rack Armour® and ECO RACK in sizes L and XXL

Execution:
- Made of hot-dip galvanised steel, painted yellow

Advantage:
- Easy to use
- Stainless

Notes:
Can also be used for installing Rack Armour® crash protection for racks in sizes S and M - but using the assembly aid is not a requirement.

Impact protection

Application:
Warns of and protects persons from hazardous areas, removes hazard from sharp edges and prevents impact injuries. For indoor and outdoor applications.

Execution:
- high-quality protective elements produced from flexible ageing-resistant polyurethane foam
- UV- and solvent-resistant, silicone-free
- temperature-resistant from -40°C to +90°C
- fire classification UL94
- no open-pore cutting edges (important for hygiene and external areas)
- simple to cut to size
- **Ident. No. 601, 610:** The self-adhesive impact protection elements adhere permanently and securely to smooth, clean surfaces, corners and edges.
- **Ident. No. 603:** Simple attachment to all metallic surfaces (steel joists, cabinets, frames). Simple to reposition and remove again. Also suitable for temporary applications or as transport protection.

Borderline crash protection system

For indoor use

Application:
For maximum protection of certain areas from collision damage, to protect machines, storage areas, shelves etc. Easy-assembly plug-in and screw connection system that meets the highest demands of quality, force absorption and variability. The Borderline crash protection system can be expanded as required and so can be adapted to your individual operating requirements.

Example application, incl. centre support and corner protector

Example application with corner protectors

Crash protection planks, height 400 mm

for Borderline crash protection system

Application:
For maximum protection of certain areas against contact damage, e.g. for protecting machines, storage spaces and shelves.

Execution:
- Easy-to-mount plug and screw system that meets the highest standards of quality, energy absorption and variability
- The Borderline crash protection system can be expanded as required and can thus be adapted to your individual operating requirements
- From high-quality processed profile steel 3 mm thick
- Boards can be extended from 50-150 mm

Anti-slip adhesive tapes

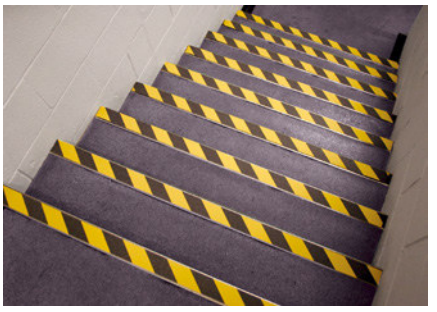
with rough surface

Application:
Versatile use and easy to glue, e.g on stair steps, ladders, ramps, paths, entry areas, loading zones or in front of machines, for use inside and outside.

Execution:
- Self-adhesive, anti-slip adhesive tape with rough surface made of aluminium oxides on a polymer backing
- Slip prevention R13 in accordance with EN 13552
- Temperature-resistant from -20 °C to +60 °C and UV-resistant
- 1 roll width 50 mm, length per roll 18.3 m

Advantage:
- Suitable for fast marking of hazardous areas
- Increases slip safety on slippery surfaces

Technical data:
- Material: Aluminium oxide/polymer
- Surface structure: Coarse
- Suitable for wet areas: No
- Antistatic: No
- Non-slip: Yes
- Compliant with REACH: Yes



Example application

Length (m)			18.3
Width (mm)			50
Min. temperature resistance (°C)			-20
Max. temperature resistance (°C)			60

Prod. Gr. 5AD

Floor marking templates

Application:

Ident. No. 300: For professional and economical indoor and outdoor marking of parking spaces and car parks, open spaces, industrial markings, safety markings, factory halls, warehouses etc.

Ident. No. 311–312, 314–315, 317: Spray stencils for marking on company premises

Ident. No. 313, 316: Spray stencils for marking in operational areas

Execution:

- **Ident. No. 300:**
  - Simple line width adjustment from 3 to 10 cm
  - Quick conversion to a marking stick
  - Side striper for markings close to walls - supplied with the marking unit
  - Ergonomic handle for easier dispensing of the spray can
  - Patented can holder - can automatically adjusts to the correct spray position
  - Reinforced, very robust housing
  - Adjustable directional arrow for following the pre-marking
  - Wind protector for precise markings
  - Holder for three spare cans for quick access to paint
  - Wide wheels for better stability and straighter lines
- **Ident. No. 311:** Consisting of 8 stencils:
- Entrance/Exit (letter height 230 mm, word width 655 mm)
- Car park (letter height 195 mm, letter width 65 mm, word width 705 mm)
- Reserved (letter height 230 mm, letter width 65 mm, word width 705 mm)
- Visitor (letter height 235 mm, letter width 70 mm, word width 700 mm)
- Stop (letter height 400 mm, letter width 100 mm, word width 700 mm)
- Disabled symbol (height 570 mm, width 710 mm)
- 2 arrow combinations (height 380 mm, width 530 mm and height 60-140 mm, width 410-530 mm)
- **Ident. No. 311–317:**
  - Made from oiled and reinforced special cardboard
  - Reusable
- **Ident. No. 312:** Consisting of 6 stencils with numbers:
- 1 2 (number height 380 mm, number width 250 mm)
- 3 4 (number height 380 mm, number width 250 mm)
- 5 6 (number height 380 mm, number width 250 mm)
- 7 8 (number height 380 mm, number width 250 mm)
- 9 0 (number height 380 mm, number width 250 mm)
- 1 2 3 4 5 / 6 7 8 9 0 (number height 230 mm, number width 105 mm)
- **Ident. No. 313:** Includes six stencils with capital letters, symbols and icons:
- A B C D E F G H I J (letter height 230 mm, letter width 100 mm)
- K L M N O P Q R S T (letter height 230 mm, letter width 100 mm)
- U V W X Y Z - • / (letter height 230 mm, letter width 102 mm)
- Disabled symbol (height 570 mm, width 710 mm)
- Pedestrian (height 570 mm, width 710 mm)
- Bicycle (height 570 mm, width 710 mm)
- **Ident. No. 314:** Consisting of 8 stencils with symbols:
- Disabled person symbol (height 600 mm, width 500 mm)
- Disabled person symbol (height 300 mm, width 250 mm)
- Arrow (length 600 mm, width 400 mm)
- Collection point (height 500 mm, width 500 mm)
- Charging station (height 293 mm, width 590 mm)
- Pedestrian (height 620 mm, width 400 mm)
- Bicycle (height 710 mm, width 570 mm)
- Stop (letter height 400 mm, word width 700 mm, letter width 160 mm)
- **Ident. No. 315:** Consisting of 8 stencils:
- Arrow (length 600 mm, width 400 mm)
- Stop (letter height 400 mm, word width 700 mm, letter width 160 mm)
- Circle (Ø 460 mm)
- Permitted maximum speed - 10 km/h (Ø 180 mm, height of number 180 mm)
- No entry (Ø 460 mm)
- No stopping (Ø 360 mm)
- Fire extinguisher (height 492 mm, width 510 mm)
- Wall hydrant (height 492 mm, width 515 mm)
- **Ident. No. 316:** Includes 12 stencils with footprints:
- Footprint/walking route (length of footprint 300 mm)
- **Ident. No. 317:** Consisting of 6 stencils with symbols and signs:
- Safety distance '2m' (height 400 mm, width 600 mm)
- Safety distance '1m' (height 400 mm, width 600 mm)
- Circle (Ø 460 mm)
- Arrow (length 600 mm, width 400 mm)
- Walkway (length 300 mm)
- Pedestrian (height 620 mm, width 400 mm)

Floor marking paint

Application:
Ident. No. 301–309: For professional, economical marking indoors and outdoors. Crisp marking lines on parking spaces and traffic routes.
Ident. No. 310: Clear special sealing varnish to protect floor markings from contamination

Execution:
- **Ident. No. 301–307:**
  - With high pigment content
  - Abrasion- and weather-resistant (abrasion resistance may vary depending on the ground and weather conditions)
  - Can be emptied to the last drop
  - Special nozzle for extremely crisp marking lines
  - Grey and black paint can be used to cover unwanted marking
  - No CFC, lead, cadmium or toluene
- **Ident. No. 301–309:** Insensitive to temperature fluctuations
- **Ident. No. 308–309:** With very high pigment content
- **Ident. No. 308–310:** Highly resistant to abrasion and weathering
- **Ident. No. 310:**
  - Varnish protects the marking and prevents contamination
  - After the marking has dried, simply apply the Traffic Protektor special sealing varnish using the New Perfect Striper floor marker
  - Provides long-term protection and preservation of the marking

Advantage:
- Dries quickly
- **Ident. No. 301–307:** Grüner Punkt certification for easy disposal

Notes:
Test the paint before applying as the shelf life may vary depending on the ground and weather conditions. The floor should be cleaned and dusted before application. When marking sealed or waterproofed floors, we recommend testing the compatibility, drying time and adhesion of the paint. It may be necessary to lightly sand the surface or apply a primer to ensure optimum adhesion. If the surface is not treated appropriately, the marking paint can rub off after a short time. To prevent the nozzle from clogging, briefly spray the valve clear after use.

Technical data:
- Container: Can
- Contents: 500 ml
- Number of pieces per packet: 12

REGISTERED SAFETY IDENTIFIERS (DIN 51130)

Application:
self-adhesive safety label for attaching to floors in the interior

Execution:
- in accordance with ASR A1.5/1.2 “Floors” as per DIN 51130 slip prevention (R-Group) R 9
- in accordance with ASR A1.3 and DIN EN ISO 7010

Advantage:
- slip prevention R9
- abrasion-resistant and durable

Technical data:
- Thickness: 0.4 mm
- Number of pieces per packet: 1
- DIN: 51130
- Mandatory testing according to DGUV (UVV): No

3M Warning marking tapes 766i/767i

All-purpose soft PVC adhesive tape for use on many surfaces

Application:
For marking, barricading, bundling, protecting and covering. Also suitable for making the floor. Ideal for indicating hazards.

Execution:
- Highly elastic backing material

Advantage:
- Solvent-resistant
- High initial adhesive strength
- Supple even on uneven surfaces

Technical data:
- Width of tape x length of strap: 50 mm x 33 m
- Type of adhesive: Rubber/resin
- Adhesive tape backing material: PVC
- Breaking elongation: 180 %

Safety mirror 180°

Application:
For safety at tight T-junctions on company premises. Creates visibility in critical areas, narrow passage-ways and blind spots. For indoor use.

Execution:
- acrylic glass
- distortion-free 3-way mirror
- extreme wide-angle effect
- especially flat design for minimal space requirements
- wall fixture with conventional screws (not included in scope of delivery)

Advantage:
- prevents accidents and theft
- simple mounting

Prod. Gr. 559

Safety mirror 360°

Application:
Facilitates a 360° all-round view and thus ideal visibility at junctions and in areas with restricted visibility. Ideal for forklift truck traffic, for indoor applications.

Execution:
- acrylic glass
- distortion-free 360° all-round view
- extreme wide-angle effect
- attachment directly onto level ceiling using conventional screws (not included in scope of delivery) or to optional assembly set no. 50179526

Advantage:
- prevents accidents and theft
- simple mounting

Cable bridge

Flexible rubber compound

Application:
For protecting cables and hoses and for preventing trip hazards.

Execution:
- suitable for use on trucks and forklifts
- flexible, high-strength mixed rubber
- profiled, slip-resistant surface, can be easily driven over
- underside with non-slip rubber lips
- cable duct size: 2 x 20 mm and 1 x 45 mm

Technical data:
- Length x width x height: 1200 x 210 x 65 mm
- Number of ducts: 3

Colour		Yellow	Black
50226...	Ident. No.	001 ○	003 ○

Prod. Gr. 504

Cable bridge

with cable duct

Application:
Ident. No. 010: Allows cables, hoses and piping to be driven over without issue and drastically reduces the risk of tripping. Designed for occasional heavy loads, tested up to 12 t axle load.

Execution:
- **Ident. No. 010:**
  - cable duct size: 2 ducts 68 x 50 mm (W x H), 1 duct 55 x 50 mm (W x H)
  - extendible modular system
  - cable bridge dimensions (L x W x H): 960 x 600 x 75 mm
  - combined net length: 870 mm

Advantage:
- **Ident. No. 010:**
  - high load-bearing capacity owing to special solid rubber compound
  - ribbed, non-slip surface
  - permanent attachment possible owing to integrated dowel mounts

Technical data:
- Number of ducts: 3

temperature-resistant up to 70 °C, watertight, very high long-term adhesive force

Application:
For industrial applications such as marking, strengthening, repairing, sealing joints and air-conditioning ducts, bundling pipes, materials etc.

Execution:
- Close-meshed fabric adhesive tape with matt surface
- Polyethylene coating

Advantage:
- Excellent adhesive strength on a variety of surfaces
- Outstanding moisture resistance
- Adapts easily for use on uneven surfaces
- Good tear resistance and flexibility

Technical data:
- Width of tape x length of strap: 50 mm x 50 m
- Thickness: 0.26 mm

Advantage:
- Excellent price/performance ratio
- Modular dimensions tailored to pallet dimensions
- Environmentally friendly as largely made from recycled paper
- Delivered flat to save space

Technical data:
- Corrugated cardboard design: Double-fluted

Internal length (mm)		280	320	380	380	400	480	685	1180

Pallet boxes made of corrugated cardboard

Double-fluted

Application:
For transporting lightweight small parts easily on pallets.

Execution:
- Dimensions tailored to Euro pallet dimensions
- Sturdy double-fluted corrugated cardboard
- With practical loading flap

Advantage:
- Economical alternative to plastic versions
- Stable and durable
- Easy to load and unload thanks to ergonomic loading flap

Technical data:
- Internal length: 1180 mm
- Internal width: 780 mm
- Corrugated cardboard design: Double-fluted
- Number of pieces per packet: 10 PCS

NT Cutter Safety carton opener

Application:
For opening cardboard boxes, undoing packaging straps and films, and for pulling out packaging staples.

Execution:
- High-quality, ergonomically shaped plastic handle
- Replaceable blade

Advantage:
- Metal bow with internal blade protects the package contents from being damaged

Length (mm)		195
Blade width (mm)		10
53651...	Ident. No.	010 ●

Edge protectors

made of elastic, sturdy PE

Application:
To protect the edges of transported goods and as a base for strapping band.

Execution:
- Robust edge protection angles made of plastic
- For band widths up to 23.5 mm

Advantage:
- Protects edges against damage from denting
- Increased safety by diverting forces into the strapping band

Technical data:
- Limb length: 40 mm
- Limb length 2: 40 mm
- Length: 41 mm
- Material: PE - Polyethylene
- Number of pieces per packet: 2000 PCS

50007...	Ident. No.	289 ●

Prod. Gr. 504

Edge protectors

made of 3 mm solid cardboard

Application:
To protect packaging, prevents the denting of light-weight goods, stabilises pallets, prevents strapping bands cutting into the packaged goods.

Execution:
- Made of cardboard (recycled paper)
- Can be stacked (nested)

Advantage:
- Easy to apply
- Saves storage space
- 100% recyclable
- Also available in a thinner version

Technical data:
- Material thickness: 3 mm
- Material: Cardboard

Limb length (mm)		50	50	50	60

Stacking protection stand-up display

3 pieces made of corrugated cardboard

Application:
Pallet marker to prevent the stacking of several pallets on top of each other.

Execution:
- Inscription: Bitte nicht stapeln – Do not stack
- Colour: red/white
- Corrugated cardboard quality 1.20 B
- Dimensions 155 x 155 x 210 mm

Advantage:
- Environmentally-friendly
- Flat delivery in sheets saves space

Delivery:
Sheet (perforated) with 3 pallet stand-up displays

Prod. Gr. 586

Packing foam film

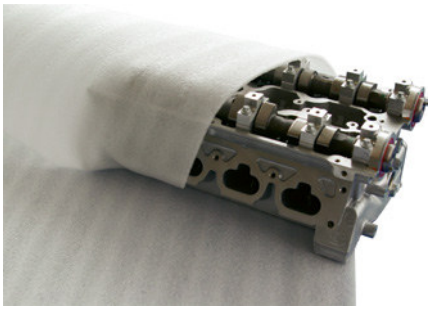
On roll, made of PE

Application:
For protecting edges and surfaces and as insulation and padding. Anti-slip insert layer, insulating and vibration-reducing.

Execution:
- Closed-cell, non-polymerised, foamed white padding material made of LDPE (Low Density Polyethylene)
- Extremely resistant to solvents, fuels, oils and other chemicals
- CFC-free foamed, colour white

Advantage:
- Many different uses, elastic, flexible
- Odour-neutral, water-resistant
- Dirt-resistant, dust-free, lightweight and heat-sealable
- Excellent padding properties

Technical data:
- Width: 1250 mm
- Colour: White



Length (m)		500	350	250	175	100

Prod. Gr. 586

Packing foam film in dispenser box

On roll, made of PE

Application:
For protecting edges and surfaces and as insulation and padding. Anti-slip insert layer, insulating and vibration-reducing.

Execution:
- On rollers, perforated at every 300 mm

Advantage:
- Many different uses, elastic, flexible
- Odour-neutral, water-resistant
- Dirt-resistant, dust-free, lightweight and heat-sealable
- Excellent padding properties

Delivery:
2 boxes with 1 roll each

Technical data:
- Length: 0.08 m
- Width: 285 mm
- Material thickness: 2.0 mm
- Colour: White

50007...	Ident. No.	595 ●

Prod. Gr. 586

Pallet cover sheets

On roll, made of LDPE film

Application:
For protected goods on pallets from above, stretched and laid on the pallet (top sheet).

Execution:
- Transparent, tear-proof LDPE cover sheets made of polyethylene
- With perforations for manual use

- Sheet dimensions: 1200 x 1600 mm
- Thickness 25 µm
- Packing unit: 1 roll with 300 sheets

Advantage:
- Easy to use thanks to perforations
- Protection against damp, dirt and dust

50007...	Ident. No.	665 ●

Prod. Gr. 586

Bubble wrap

On roll, made of PE

Application:
For secure packaging, for use as padding and protection for large, impact- and pressure-sensitive goods and scratch-sensitive areas.

Execution:
- Modern two-layered material of high-quality, environmentally friendly plastic
- Many small air bubbles absorb impact and pressure
- Tough, tear-resistant, waterproof, sealable, dust-resistant and watertight
- Insulates against extreme cold and heat

Advantage:
- For simple and versatile use
- Lightweight and safe padding material
- Tough, tear-resistant, waterproof, sealable
- Physiologically safe pursuant to Food Safety Act

Technical data:
- Number of plies: 2 PCS
- Bubble diameter: 10 mm
- Material: PE - Polyethylene

Prod. Gr. 504

Set of miniature rolls of stretch film

30 rolls, pre-stretched, 10 µm thick

Application:
For bundling, fixing, sealing and binding.

Execution:
- Pre-stretched mini hand-stretch film

Advantage:
- For universal use
- Easy to use
- Environmentally friendly due to lack of cardboard core
- Integrated thumb brake for optimum tensioning

Delivery:
Including 2 dispensers and cardboard box with 30 rolls each

Technical data:
- Foil thickness: 10 µm
- Length: 300 m
- Width: 85 mm
- Colour: Transparent

50007...	Ident. No.	641 ●

Prod. Gr. 504

Set of miniature rolls of stretch film

40 rolls, thickness 20 µm

Application:
For bundling, fixing, sealing and binding.

Execution:
- Traditional mini hand-stretched film

Advantage:
- For universal use
- Easy to use
- Integrated thumb brake for optimum tensioning

Delivery:
Including 1 dispenser and cardboard box with 40 rolls each

Technical data:
- Foil thickness: 20 µm
- Length: 150 m
- Width: 100 mm
- Colour: Transparent

50007...	Ident. No.	642 ●

Prod. Gr. 504

Hand dispenser for stretch films

Application:
For manual stretching over pallets.

Execution:
- Easily adjustable resistance brake
- Chrome-plated
- For a roll of up to 500 mm width

Advantage:
- Rapid, simple and safe handling of stretch films
- Avoid “hot hands”

Hand roller (without film)

50007...	Ident. No.	676 ●

Prod. Gr. 504

Stretch film to be unrolled by hand

On roll, pre-stretched, 500 mm wide

Application:
For the securing of loads on pallets, protection against damp, dirt and dust. Can be used as a wrapping or banding foil.

Execution:
- Stretch film optimally pre-stretched by machine
- Turned film edges to increase resistance
- Slippery outer side available in order to avoid pallets sticking to each other in trucks
- Must be wound with only minimal tension
- Reset forces are released after unwrapping (memory effect)
- Increased puncture resistance combined with reduced film thickness
- Good adhesion properties, high transparency, good tear propagation strength

Advantage:
- Easier to use since rolls are extremely light
- Avoids fatigue-inducing bending
- Higher working speed and less effort required
- Improved load unit securing thanks to higher retention forces
- Prevents pallets from sticking to each other

Technical data:
- Foil thickness: 8 µm
- Length: 600 m
- Width: 430 mm
- Colour: Transparent
- Number of pieces per packet: 6 PCS

50007...	Ident. No.	639 ●

Prod. Gr. 504

Stretch film to be unrolled by hand

On roll, width 500 mm

Application:
For securing loads on pallets and protecting against damp, dirt and dust. Can be used as a wrapping or banding foil.

Execution:
- Manual stretch foils with good adhesive properties (one-sided)
- Highly transparent, good tear resistance and stretch
- Thin but with good puncture resistance
- Environmentally-friendly, harmless to groundwater and recyclable

Advantage:
- Easy to use
- Excellent mechanical properties
- Secures pallets reliably

Technical data:
- Length: 270 m
- Width: 500 mm
- Number of pieces per packet: 6 PCS

FETRA transport devices – professional “Made in Germany” quality

FETRA is a family run company proud of its German credentials.
FETRA transport devices, with one or two exceptions, are built in Germany using cutting edge and environmental friendly manufacturing technology. The company is committed to maintaining its production facilities in Germany!

fetra Transportgeräte

Wooden flooring in absolute furniture quality.
No unconcealed trimmed edges, no weakening or splitting of flooring, no risk of injury, great look and feel. All steel surfaces are optimally prepared with shot-blasting. Produces perfect adhesion of high-quality powder coating. This lavish finish guarantees longevity and a great enduring visual appearance!

Virtually all FETRA brand transport carts are equipped with specially engineered TPE tyres as standard.
- Very low starting, rolling and swivelling resistance
- Quiet movement over level surfaces
- Traceless, non-chalking
- Maintenance-free deep groove ball bearings and thread protection
- PAK-compliant in accordance with EU ordinance 1272/2013 in force since 2015

10-year Fetra quality guarantee!
FETRA transport devices are highly efficient and are precision-manufactured in state-of-the-art production facilities. High-quality materials and discernibly clean workmanship guarantee maximum quality at market-driven prices! Sound investment owing to 10-year Fetra quality guarantee.

TOTALSTOP central brake system for simple and secure locking of both steering wheels with just one step.
- Brake pedal always within the operator’s field of vision
- Can be actuated in any running position
- Works with all tyre materials, very easy to adjust
- Swivelling movement and wheel turning simultaneously blocked
- Innovative, comfortable, ergonomic and secure

{78}Perfect link{79} between base cart and superstructure with ingenious FETRA plug and screw principle with two-point bearing. Variability of a modular system with the robustness of a welded construction!

Order the TOTALSTOP central brake system at the same time as your transport device.
Look out for the TOTALSTOP symbol
See page page 2060 for appropriate order numbers

Total stop brake for FETRA transport devices

Application:
Alternative brake for transport trolleys. Locks two castors simultaneously with just one foot action. Suitable for all trolleys with technical characteristics: TOTALSTOP optional: Yes.

Execution:
- Placed centrally on the trolley
- Wheel block made of rubber

Advantage:
- The wheel rotation and swivel motion of both castors can be locked with a single touch of the foot
- The brake pedal always remains within the operator’s field of vision.
- Braking possible in every castor position
- Easy-release brake thanks to high pedal ground clearance
- Optimum braking performance on all tyre materials, easy to adjust

50268...	Ident. No.	609 ●

Prod. Gr. 5AB

Zinc-plated pallet trolleys with corner braces
Load capacity: 800 kg

Application:
Ident. No. 177–193, 212: Easy and safe transport of Euro pallets and crates.
Ident. No. 195: Ideal for the transport for Euro half pallets and Euroboxes.
Ident. No. 214: Ideal for the transport of Euro half pallets, Euroboxes and crates

Execution:
- **Ident. No. 177:**
  - Galvanised and securely welded pallet carriage with pallet holder
  - 2 fixed castors and 2 swivel castors made of solid rubber, 200 x 50 mm
- **Ident. No. 193:** Zinc-plated and securely welded pallet carriage with pallet holder
- **Ident. No. 193, 212:** 2 fixed wheels and 2 castors made of solid rubber, 200 x 50 mm
- **Ident. No. 195, 214:** High-quality and long-lasting zinc plating
- **Ident. No. 212:** Height-adjustable from 655-835 mm
- **Ident. No. 214:** Height adjustment range: 655-835 mm

Advantage:
- **Ident. No. 195, 214:** Supports more efficient material transport
- **Ident. No. 212:** Ergonomic - adjustable working height
- **Ident. No. 214:** Ergonomics - height-adjustable

Technical data:
- Load-carrying capacity: 800 kg
- Material: Steel / steel
- Material of loading surface: Steel frame
- Colour: Silver coloured
- Surface: Zinc plated
- Number of steering rollers: 2
- Number of fixed rollers: 2
- ESD-capable: No
- Wheel diameter: 200 mm
- Material of wheel: Solid rubber

Running gear for Euronorm pallets (EN standard 1757-3)

Angle steel, load capacity of up to 2,200 kg

Application:

No. 50257 146–50257 150, 50267 146, 50267 148, 50267 150: For transporting Euro pallets and Euro crates

No. 50267 145, 50267 147, 50267 149: For transporting half pallets and Euroboxes

Execution:

- Robust welded angular steel construction with four corner braces
- High-quality powder coating
- Two swivel castors and two fixed castors
- Locking device on the swivel castors in accordance with EN 1757-3

Advantage:

- Low breakaway, rolling and swivelling resistance

Technical data:

- Material of loading surface: Angle steel
- Surface: Powder-coated
- Number of steering rollers: 2
- Number of fixed rollers: 2
- ESD-capable: No
- Wheel diameter: 200 mm
- Total stop optional: Yes

Mounting frame for pallet running gear

Height 140 mm, 270 mm and 370 mm

Application:
For placing flat pallets and crates at a reasonable ergonomic height.

Execution:
- Welded angular steel frame structure with corner braces
- Sturdy support tubes with base plates; can be inserted into tubular sleeves on the corners of the mounting frame

Notes:
The mounting frames can be securely screwed to the pallet truck via the base plates using the mounting hardware (included in the scope of delivery).

ProfiPlus transport roller made of plastic

For Euro formats: 600 x 400 mm or 2x 400 x 300 mm

Application:
Transport roller for common Euro containers

Execution:
- Load-bearing capacity 300 kg, with even load
- 4 ball-bearing-mounted castors with light grey solid rubber binding

Advantage:
- Quiet-running wheels, no tracks

Technical data:
- Material of loading surface: Plastic
- Height: 170
- Load-carrying capacity: 300 kg
- Loading surface height: 145 mm
- Number of steering rollers: 4
- Length: 615
- Width: 415

- **Ident. No. 131:**
  - Welded construction with steel checker plate platform
  - Two castors with brake, in accordance with EN 1757-3

Advantage:
- **Ident. No. 127:**
  - Easy to manoeuvre thanks to high-quality castors
  - For universal use

Technical data:
- Load-carrying capacity: 400 kg
- Loading surface size: 500 x 500 mm
- With wheel lock: Yes
- Wheel width: 32 mm
- Wheel diameter: 125 mm
- Material of wheel: TPE
- Colour: Brilliant blue RAL 5007
- Surface: Powder-coated

Tyre trolley (EN standard 1757-3)

TYRE TROLLEY

Application:
Clever roller for easy transport and effective storage of wheels and tyres from cars to SUVs

Execution:
- Platform made of glass-fibre-reinforced polypropylene.
- Designed for 8 tyres or 4 complete wheels.
- Practical material trough for storing small parts.
- Easy and secure stacking.
- Compatible with FETRA tyre carts.

Technical data:
- Material of loading surface: Polypropylene, fibreglass-reinforced
- With handle: No
- Number of steering rollers: 4
- With wheel lock: Yes
- Total stop optional: No
- Wheel width: 25 mm
- Colour of loading area: Blue
- Colour: Blue

hand trolley (EN standard 1757-3)

Application:
For transporting crates.

Execution:
- Made of steel tube with steel tube handle
- Platform made of derived timber material board in frame, beech decor surface
- Bolted-on handle, grip area with blue plastic coating
- Thermoplastic rubber tyres, non-chalking
- Plastic rims with precision deep groove ball bearings and thread guards

Advantage:
- One-handed sliding handle for ergonomic transport
- Elegant HK design

Delivery:
Disassembled

Technical data:
- Load-carrying capacity: 250 kg
- Loading surface length: 605 mm
- Loading surface width: 410 mm
- Loading surface height: 185 mm
- Colour: Anthracite grey RAL 7016
- Material of loading surface: Wood composite board
- Number of fixed rollers: 2 PCS

fetra Transportgeräte **Transport dolly for Euro-standard crates** (EN standard 1757-3)

Plastic, load capacity 250 kg

Application:
For transporting Euronorm containers.

Execution:
- Plastic, load-bearing capacity 250 kg

Advantage:
- Safe transport of Euronorm containers thanks to precisely dimensioned frame
- extremely flexible thanks to low tare weight

Technical data:
- Material of loading surface: Plastic
- Loading surface size: 605 x 405 mm
- Load-carrying capacity: 250 kg
- Loading surface height: 145 mm
- Number of fixed rollers: 0 PCS
- Number of steering rollers: 4 PCS
- With wheel lock: Yes
- Total stop optional: No
- Wheel width: 35 mm
- Wheel diameter: 100 mm

fetra Transportgeräte — Transport dolly for Euro-standard crates (EN standard 1757-3)

Angle steel, load capacity 250 kg

Application:
For transport Euronorm containers, for constant industrial use.

Execution:
- Angle steel, load-bearing capacity 250 kg

Advantage:
- Safe transport of Euronorm containers thanks to precisely dimensioned frame
- Durable thanks to robust design

Technical data:
- Material of loading surface: Angle steel
- Load-carrying capacity: 250 kg
- Loading surface height: 182 mm
- Number of steering rollers: 4
- With wheel lock: Yes
- Total stop optional: No
- Wheel width: 32 mm
- Wheel diameter: 125 mm

Trolley for Euro-standard crates (EN standard 1757-3)

Application:
For transporting Euronorm containers or as a serving trolley for small parts in production and assembly.

Version:
- Welded angular steel frame
- Suitable for Euro-standard crates 600 x 400 mm
- Load areas made of engineered wood, edge 10 mm
- Clear shelf distance 400 mm
- Thermoplastic rubber tyres, grey, non-marking
- Plastic rims with precision deep groove ball bearings and thread guards

Advantage:
- Ideal combination of transport trolley and serving trolley
- Robust design
- Elegant HK design

Delivery:
disassembled

Technical data:
- Load-carrying capacity: 250 kg
- Load-carrying capacity of loading surfaces: 80 kg
- Length: 675 mm
- Width: 415 mm
- Height: 635 mm
- Material of loading surface: Wood composite board
- Loading surface length: 605 mm
- Loading surface width: 410 mm
- Number of loading surfaces: 2

fetra Transportgeräte Platform trolley with push handle, folding (EN standard 1757-3)

Platform made of sheet steel, load capacity 150 kg and 250 kg

Application:
For goods and materials which need to be transported in a car or van, if the trolley is not constantly in use and needs to be stored on a temporary basis.

Execution:
- with affixed non-slip mat and all-round protective strip
- Foldable tubular push handle with broad crossbar
- Folding hinge bright galvanised

Advantage:
- takes up very little storage space thanks to fold-up sliding handle
- Economical design

Technical data:
- Design: With hinged bow handle
- Material of loading surface: Steel plate
- Colour: Brilliant blue RAL 5007
- Surface: Powder-coated
- Number of steering rollers: 2 PCS
- Number of fixed rollers: 2 PCS
- Material of wheel: Solid rubber
- Total stop optional: No

Platform made of plastic, load capacity 200 kg

Application:
For goods and materials which need to be transported in a car or van, if the trolley is not constantly in use and needs to be stored on a temporary basis.

Execution:
- Tubular push handle, folding with wide cross strut
- Folding hinge bright galvanised

Advantage:
- Low folding dimensions thanks to sliding handle
- Durable plastic platform
- Trolley with low tare weight but high carrying capacity

Technical data:
- Loading surface size: 810 x 500 mm
- Load-carrying capacity: 200 kg
- Design: With hinged bow handle
- Length: 815 mm

Platform trolley with push handle (EN standard 1757-3)

Platform made of durable hard PVC

Application:
For transporting heavy, bulky goods and materials, for continuous use in industrial applications.

Execution:
- construction kit system, can be completely fixed with screws
- steel tube/profile steel welded
- Weather-resistant rigid PVC board, dark grey
- Platform flush with frame
- Highly chemical-resistant, flame-resistant

Advantage:
- Robust design and high load capacity ensure a long service life even when used for high industrial loads
- FETRA plug-and-screw design allows trolleys and accessories to be altered easily

Technical data:
- Material of loading surface: Polyvinyl chloride - PVC hard
- Colour: Brilliant blue
- Surface: Powder-coated
- Number of steering rollers: 2
- Number of fixed rollers: 2

RUXXAC by SECO Transportgeräte Dandy platform trolley

Platform with unique cross-shaped grid structure

Application:
Move heavy loads easily

Execution:
- Platform - unique cross-shaped grid structure
- Reduces the noise produced during travel, which may escape through the recesses of the platform
- Handle in the centre of the platform - easy transport
- Cross-shaped rubber coating on the platform - additional ability to secure the load during transport
- Screw-free wheel mounting
- The trolley can be folded easily with just a tap of the foot and stowed away effortlessly
- Accessories: Spannfix system, optionally available

Advantage:
- The trolley is both lightweight and strong
- Exceptionally smooth running
- Ergonomically shaped push handle
- Stackable - space-saving
- Non-marking wheels

Technical data:
- Material of loading surface: Plastic
- Number of steering rollers: 2
- Number of fixed rollers: 2
- ESD-capable: No
- Number of loading surfaces: 1
- Colour of loading area: Light grey

Stainless steel platform trolley

Load capacity: 100 kg

Application:
Ideal for the versatile transportation of goods on site

Execution:
- Platform height 180 mm
- Loading area 820 x 520 mm
- 4 castors, including 2 with brake
- Wheel diameter 100 mm
- DIN EN ISO 9223
- C2 - EN 1.4372, AISI 201, 18/0

Advantage:
- Durable and rust-proof
- Space-saving thanks to folding push handle
- Quiet-running castors

Technical data:
- Loading surface size: 820 x 520 mm
- Load-carrying capacity: 100 kg
- Design: With hinged bow handle
- Length: 830 mm
- Width: 530 mm
- Height: 940 mm
- Loading surface length: 820 mm
- Loading surface width: 520 mm
- Material of loading surface: Stainless steel
- Colour: Silver coloured

Platform trolley, load capacity 300 kg

With levelling system

Application:
Ergonomic and flexible trolley for many different applications

Execution:
- Maximum height of upper load area 810 mm
- Lowest height of upper load area 390 mm
- The upper load area automatically adjusts the height for loads between 0-90 kg
- The load area is at its lowest level when loaded with 90 kg

Advantage:
- Nestable = can be pushed into each other = saves space

Technical data:
- Load-carrying capacity: 300 kg
- Length: 960 mm
- Width: 525 mm
- Height: 1030 mm
- Colour: Silver coloured
- Number of steering rollers: 4 PCS
- Wheel diameter: 125 mm
- Material of wheel: TPE
- Number of loading surfaces: 2 PCS
- Mandatory testing according to DGUV (UVV): No

Platform trolley with 4 wire mesh walls (EN standard 1757-3)

Platform made of wood, load capacity 500 kg and 600 kg

Application:
For transporting heavy stackable parts, for permanent use in industrial applications.

Execution:
- Modular system, entirely screwed
- Steel tube/profile steel welded
- Front and longitudinal walls made of wire grid (50 x 50 x 4 mm)
- Wall height 500 mm
- Other tyres upon request

Advantage:
- Robust design and high carrying capacity ensure a long service life even when used for industrial loads
- FETRA plug-and-screw design allows simple changes to the trolley and accessories
- Robust external walls prevent loads from falling and protect them from external damage
- Removable longitudinal wall allows simple loading and unloading of the trolley

Technical data:
- Material of loading surface: Wood composite board
- Number of panels: 4 PCS
- Material of wall: Wire mesh
- Design: With walls
- Number of fixed rollers: 2 PCS
- Number of steering rollers: 2 PCS
- With wheel lock: Yes
- Total stop optional: Yes
- Wheel width: 40 mm
- Material of wheel: TPE
- Surface: Powder-coated

Clax folding trolley

Complete with one folding box!

Application:
Picking trolley, lab trolley, shopping trolley, shelf trolley, serving trolley, mail distribution trolley, folding trolley for field service.

Version:
- Load capacity, upper shelf: 20 kg
- Load capacity, lower shelf: 40 kg
- Front wheel diameter: 90 mm, rear: 170 mm
- Durable plastic - aluminium construction
- Platform trolley with 2 levels

Advantage:
- Easy to unfold and fold together in just 2 seconds, using only a single button
- Transport standard folding boxes, beverage crates and much more
- Locking brake for safe loading and unloading
- Tie-down strap for securing the folding box to the upper shelf
- Firm stand when closed thanks to the support props

Technical data:
- Loading surface size: 505 x 355 mm
- Load-carrying capacity: 60 kg
- Length: 910 mm
- Width: 550 mm

Service trolley with 3 load areas

Application:
For transporting lighter goods and materials. Ideal as provisioning trolley in workshop and assembly settings.

Execution:
- 15x height adjustment (middle shelf)
- Robust sheet steel design
- With thread protection – protects the bearings and threads against dirt
- Robust steering handle, permanently mounted on the body

Notes:
Please note: The trolley is delivered disassembled and requires assembly.

50267...	Ident. No.	960 ●

Prod. Gr. 504

Table trolley with 2 wooden load areas (EN standard 1757-3)
Simple version, load capacity 250 kg

Application:
Multi-functional transport trolleys for more efficient goods transport and a wide range of applications.

Execution:
- welded steel tube and profile steel, bolted construction
- Shelves made of wooden plate, beech decoration surface, mounted in steel frames
- Load areas with 15 mm high rim.
- High sliding handle
- With soft hose casing

Advantage:
- EasySTOP central brake
- Smooth-running ball-bearing-mounted castors
- With thread and foot guard
- Non-marking tyres
- Softgrip push handle - soft handle sleeve

Delivery:
Disassembled

Technical data:
- Load-carrying capacity: 250 kg
- Load-carrying capacity of loading surfaces: 80 kg
- Height: 1010 mm
- Material of loading surface: Wood composite board
- Number of loading surfaces: 2
- Colour: Anthracite grey RAL 7016
- Number of steering rollers: 2
- Number of fixed rollers: 2
- Wheel diameter: 125 mm

Table trolley with 3 wooden load areas (EN standard 1757-3)

Simple version, load capacity 300 kg

Application:
Multi-functional transport trolleys for more efficient goods transport and a wide range of applications.

Execution:
- shelves made of wooden plate, beech decor surface, in steel frame, edge 15 mm
- high sliding handle
- load for central and upper load area 80 kg
- thermoplastic rubber tyres, grey, non-chalking

Advantage:
- EasySTOP central brake
- Smooth-running ball-bearing-mounted castors
- With thread and foot guard
- Non-marking tyres
- Softgrip push handle - soft handle sleeve

Technical data:
- Load-carrying capacity: 300 kg
- Material of loading surface: Wood composite board
- Load-carrying capacity of loading surfaces: 80 kg
- Number of loading surfaces: 3 PCS
- Loading surface height: 215 mm | 525 mm | 835 mm

Prod. Gr. 504

Table trolley ERGO

Application:
Ideal for carrying out tasks at different heights or handling large and small products.

Execution:
- High-quality powder-coated, with MDF board
- Two fixed castors, two swivel castors with brake, castor diameter: 200 mm
- Spacing between the load areas: 580 mm
- Load capacity per load area: 250 kg
- 2 fixed castors and 2 swivel castors made of solid rubber 200x50 mm

Advantage:
- No need to go far to find your tools - work equipment is provided directly at the workstation
- Non-marking tyres

Technical data:
- Load-carrying capacity: 500 kg
- Load-carrying capacity of loading surfaces: 250 kg
- Number of loading surfaces: 2
- Number of fixed rollers: 2
- Number of steering rollers: 2

Prod. Gr. 5AB

Table trolley with 2 wooden load areas

robust version, load capacity up to 600 kg

Application:
Ideal for large, bulky and heavy parts or for exacting industrial requirements.

Execution:
- Welded steel tube and profile steel, bolted construction
- Loading surfaces made of wooden plates, beech decoration, mounted flush with frame
- 2 steering wheels and 2 fixed castors, TPE tyres
- Hubs with grooved ball bearings
- Locking device on the steering rollers
- Powder-coated, long-lasting surface protection, impact- and scratch-resistant

Advantage:
- Reliable and durable - firmly welded construction
- No tracks on the tyres
- Deep groove ball bearing - runs smoothly even under heavy load

Technical data:
- Material of loading surface: Wood
- Load-carrying capacity of loading surfaces: 200 kg
- Number of loading surfaces: 2
- Number of fixed rollers: 2
- Number of steering rollers: 2
- With wheel lock: Yes
- Total stop optional: Yes
- Wheel width: 40 mm
- Material of wheel: TPE
- Surface: Powder-coated
- Mandatory testing according to DGUV (UVV): No

fetra Transportgeräte — Table trolley with 2 hard-PVC load areas (EN standard 1757-3)

High chemical resistance, load capacity up to 600 kg

MADE IN

Application:
For transporting goods and heavy materials, for heavy-duty industrial requirements.

Execution:
- Welded steel tube and profile steel, bolted construction
- Weather-resistant rigid PVC board, dark grey
- Highly chemical-resistant, flame-resistant

Advantage:
- robust design and high load capacity ensure a long service life even when used for industrial loads
- Large storage space for bulky parts incl. on lower loading surface
- High-quality frame design with rounded corners

Technical data:
- Material of loading surface: Polyvinyl chloride - PVC hard
- Load-carrying capacity of loading surfaces: 200 kg
- Number of loading surfaces: 2 PCS
- Number of fixed rollers: 2 PCS
- Number of steering rollers: 2 PCS
- Design: Robust
- With wheel lock: Yes
- Total stop optional: Yes
- Wheel width: 40 mm
- Material of wheel: TPE
- Surface: Powder-coated

fetra Transportgeräte — Table trolley with 2 sheet steel load areas (EN standard 1757-3)

Welded oil-tight, with grating and drain valve, total load capacity 300 kg

Application:
For cleaning parts and transporting freshly cleaned or oily parts.

Execution:
- Steel frame with oil-and watertight welded sheet steel trays
- Lower sheet steel tray 25 mm high, oil-tight
- Upper sheet steel tray 100 mm high, oil-tight. Taper shelf with 1/2" drain valve
- Grating mesh width 31 x 31 mm, loosely inserted, flush at the top

Advantage:
- Avoid the contamination of workstations and floors thanks to oil-tight welded trays
- Large collection volume for upper load area thanks to high tray
- Parts can be cleaned on the upper shelf thanks to the integrated grating
- Simple drainage of liquids thanks to tapered base and 1/2" drain valve

Technical data:
- Material of loading surface: Steel plate
- Loading surface size: 1000 x 600 mm
- Load-carrying capacity: 300 kg
- Length x width x height: 1136 x 611 x 1030 mm
- Load-carrying capacity of loading surfaces: 100 kg
- Number of loading surfaces: 2 PCS
- Loading surface height: 181 mm | 901 mm
- Number of fixed rollers: 2 PCS
- Number of steering rollers: 2 PCS
- Length: 1136 mm
- Design: Welded oil-tight
- With wheel lock: Yes
- Total stop optional: Yes

fetra Transportgeräte — Table trolley with 2 wooden load areas (EN standard 1757-3)

Extremely robust, total load capacity 1,200 kg

Application:
For transporting large and particularly heavy loads.

Execution:
- Steel tube and profile steel welded
- Platforms made of non-slip waterproof plywood boards

Advantage:
- Extremely high carrying capacity thanks to robust design
- High-quality rollers ensure outstanding convenience and very light running even under heavy loads

Technical data:
- Load-carrying capacity: 1200 kg
- Design of the floor: Waterproof screen printing plate
- Load-carrying capacity of loading surfaces: 500 kg
- Number of loading surfaces: 2 PCS
- Loading surface height: 283 mm | 925 mm
- Number of fixed rollers: 2 PCS
- Number of steering rollers: 2 PCS
- Design: Heavy load
- With wheel lock: Yes
- Total stop optional: Yes
- Wheel width: 50 mm
- Wheel diameter: 200 mm
- Material of wheel: Elastic solid rubber
- Surface: Powder-coated
- Mandatory testing according to DGUV (UVV): No

Execution:
- Welded steel tube
- Shelves made of wooden plate, beech decor surface, in steel frame
- Lockable steel cabinet: D x W x H 600 x 500 x 600 mm with 1 fixed and 2 adjustable shelves
- 3 load areas with surrounding edge 12 mm high
- Load per shelf in cabinets 30 kg
- Sheet steel structure and fronts RAL 5007, brilliant blue, body grey RAL 7035, durable surface protection, impact- and scratch-resistant

Advantage:
- Ideal combination of table and workshop trolley
- Low-cost alternative to workshop trolley for normal requirements in terms of carrying capacity and resistance

Technical data:
- Material of loading surface: Wood
- Loading surface size: 1000 x 600 mm
- Load-carrying capacity: 300 kg
- Length x width x height: 1130 x 600 x 1040 mm
- Load-carrying capacity of loading surfaces: 80 kg
- Number of loading surfaces: 3 PCS
- Loading surface height: 200 mm | 510 mm | 820 mm
- Number of fixed rollers: 2 PCS
- Number of steering rollers: 2 PCS
- Length: 1130 mm
- Design: With steel cabinet
- Width: 600 mm
- With wheel lock: Yes
- Total stop optional: Yes
- Wheel width: 32 mm
- Wheel diameter: 125 mm
- Material of wheel: TPE
- Surface: Powder-coated

Table trolley with 3 wooden load areas (EN standard 1757-3)

Total load capacity 300 kg

Application:
For transporting goods and materials, as a simple assembly trolley.

Execution:
- Welded steel tube
- Shelves made of wooden plate, beech decor surface, in steel frame
- Centrally locking drawer cabinet with 4 drawers (3 x 120 mm high and 1 x 180 mm high)
- Drawers with ball-bearing runners and lock, 4/5 extension. Cabinet dimensions D x W x H 600 x 500 x 600 mm
- 3 load areas with surrounding edge 12 mm high
- Sheet steel structure and fronts RAL 5007, brilliant blue, body grey RAL 7035, durable surface protection, impact- and scratch-resistant

Advantage:
- Ideal combination of table and workshop trolley
- Low-cost alternative to workshop trolley for normal requirements in terms of carrying capacity and resistance

Technical data:
- Material of loading surface: Wood
- Loading surface size: 1000 x 600 mm
- Load-carrying capacity: 300 kg
- Length x width x height: 1130 x 600 x 1040 mm
- Load-carrying capacity of loading surfaces: 80 kg
- Number of loading surfaces: 3 PCS
- Loading surface height: 200 mm | 510 mm | 820 mm
- Number of fixed rollers: 2 PCS
- Number of steering rollers: 2 PCS
- Length: 1130 mm
- Design: With drawer cabinet
- Width: 600 mm
- With wheel lock: Yes
- Total stop optional: Yes
- Wheel width: 32 mm
- Wheel diameter: 125 mm
- Material of wheel: TPE
- Surface: Powder-coated

fetra Transportgeräte — Roller desk with 2 wooden load areas and horizontal writing surface (EN standard 1757-3)

2 wooden tray shelves, total load capacity 100 kg

Application:
Mobile workplace for operational, warehousing and dispatch settings, only takes up a small amount of space

Execution:
- Steel tube and profile steel welded, bolted construction
- Horizontal writing surface 605 x 589 mm, with pen stand
- 2 tray shelves, variable, screwable
- 2 rows of folders possible
- Load per shelf 50 kg

Advantage:
- Extremely practical and easy to manoeuvre
- Easy to move over edges and thresholds thanks to large rollers

Technical data:
- Material of loading surface: Wood
- Loading surface size: 600 x 500 mm
- Load-carrying capacity: 100 kg
- Length x width x height: 610 x 605 x 1195 mm
- Load-carrying capacity of loading surfaces: 50 kg
- Number of loading surfaces: 2 PCS
- Number of fixed rollers: 0 PCS
- Number of steering rollers: 4 PCS
- Length: 610 mm
- Design: With writing surface
- Width: 605 mm
- With wheel lock: Yes
- Total stop optional: No

Wheeled container

Load capacity: 500 kg

Application:
For safely and easily transporting and storing goods.

Execution:
- Wheeled platform made of HDPE plastic in jet black RAL 9005, with two horizontal and one diagonal reinforcement plate
- Two swivel castors and two fixed castors made of polypropylene, white, with thread guards, roller bearings
- Useful height of the lateral grids 1350 mm
- Capacity: 718.2 litres
- **Ident. No. 000:** High-quality powder-coated lateral grids in gentian blue RAL 5010
- **Ident. No. 001:** High-quality powder-coated lateral grids and rear panel grid in gentian blue RAL 5010
- **Ident. No. 002:** Full-length door for easy loading and unloading
- **Ident. No. 002–003:** High-quality galvanised lateral grids and rear panel grid
- **Ident. No. 003:** Hinged half-flap door for easy loading and unloading

Advantage:
- Improves the flow of material and goods
- Optimised to make loading trucks more efficient
- Smooth movement and versatile
- **Ident. No. 002:** The door prevents goods from falling out
- **Ident. No. 003:** The hinged half-flap door prevents goods from falling out

Technical data:
- Width x depth x height: 720 x 815 x 1530 mm
- Wheel diameter: 108 mm
- Material of wheel: PP - Polypropylene
- Number of fixed rollers: 2
- Number of steering rollers: 2
- Total stop optional: No

Textile tie-down straps and rubber straps

Application:
Ref. no. 008: For short-term insulation of refrigerated goods
Ref. no. 009: Prevents goods in wheeled container from falling out
Ref. no. 010-011: To secure the load

Version:
- **Ref. no. 008:**
  - Thermal cover without floor section
  - Roll-up door with 100 mm wide hook-and-loop fastener
  - Document pouch DIN A4
  - Oxford fabric inside and outside, very robust and durable in use
  - Inner lining made of Isolon, density 400 g/sqm; strong hook-and-loop fastener 100 mm wide
- **Ref. no. 009:**
  - Made from textile material including 6-point clip system
  - Centre panel black, stretch fabric
  - Outer panels in blue similar to RAL5010
  - Complete with fastening material consisting of 3 securing wedges
- **Ref. no. 010-011:** With cam buckles and a zinc-plated hook
- **Ref. no. 012-013:** 400 x 40 mm, black

Advantage:
- **Ref. no. 008:**
  - Maintains cold bridges
  - Can be cleaned and washed
  - Robust and durable

Note:
- Full product information can be found in the online shop

Prod. Gr. 5AB

Cabinet trolley with 5 load areas - with total stop feature

Grating on three sides and door, total load capacity 750 kg

Application:
For the safe transport and storage of materials and goods.

Execution:
- Made of rigid sandwich plates
- 2 fixed castors and 2 swivel castors, including TOTALSTOP
- With shootbolt rod
- **No. 50258:**
  - Angular steel structure completely welded with tubular push handle
  - Front walls, 1 longitudinal wall and roof made from wire grid (40 x 40 x 4 mm)
  - With double winged door made of angular steel with welded in wire grid
  - Double winged door with vertical locking rod with swivelling lever and cylinder lock
  - 1 fixed and 4 loose bases
  - Clear floor distance 280 mm
- **No. 50268:**
  - Angle steel structure completely welded with tubular push handle
  - Front walls 1 longitudinal wall and roof made from wire grid (40 x 40 x 4 mm)
  - With double winged door made of angle steel with welded in wire grid
  - Double-folding door with vertical locking rod with swivelling lever and cylinder lock
  - 1 firm and 4 loose bottoms
  - Distance of shelf light 280 mm

Advantage:
- **No. 50258:** Convenient total stop included
- **No. 50268:** Convenient Total Stop included

Delivery:
Assembled

Technical data:
- Material of loading surface: Wood
- Suitable for transporting
- Load-carrying capacity: 750 kg
- Load-carrying capacity of loading surfaces: 90 kg
- Number of loading surfaces: 5 PCS
- Loading surface height: 292 mm | 582 mm | 882 mm | 1182 mm | 1482 mm
- Height: 1792 mm
- Number of panels: 4 PCS
- Material of wall: Wire mesh
- Number of fixed rollers: 2 PCS
- Number of steering rollers: 2 PCS
- With wheel lock: Totalstop
- Wheel width: 40 mm
- Wheel diameter: 200 mm
- Material of wheel: TPE
- Lock type: Cylinder lock
- Surface: Powder-coated

fetra Transportgeräte ESD pallet trolley (EN standard 1757-3)

Load capacity 750 kg

Ident. No. 046

Application:

Ident. No. 045: For transporting half pallets and Euroboxes.

Ident. No. 046: For transporting Euro pallets and crates. Suitable for transportation on commercially available tugger-train trailers.

Execution:

- Robust welded angular steel frame structure with 4 corner braces
- **Ident. No. 045:**
  - 2 castors and 2 fixed castors with TPE ESD tyres, hubs with grooved ball bearings
  - Locking device on the castors in accordance with EN 1757-3
- **Ident. No. 046:**
  - Steering rollers with total lock in forward motion, diagonally arranged
  - 1 black, electrically conductive, polypropylene roller

Advantage:

- **Ident. No. 045:**
  - Low starting, rolling and swivelling resistance
  - Quiet movement over level surfaces
  - No tracks on the tyres

Technical data:

- Load-carrying capacity: 750 kg
- Height: 329 mm
- Material of loading surface: Angle steel
- Colour: Slate grey RAL 7015
- Surface: Powder-coated
- Number of steering rollers: 2
- Number of fixed rollers: 2
- ESD-capable: Yes
- Wheel diameter: 200 mm
- Material of wheel: TPE-ESD
- Total stop optional: Yes

fetra Transportgeräte ESD table trolley with 2 wooden load areas (EN standard 1757-3)

Electrically conductive, total load capacity of 300 kg

Ident. No. 505

Application:

For transporting products which must be protected against damage from electric discharges.

Execution:

- High sliding handle

Advantage:

- Reliable dissipation of electric charges thanks to continuously conductive structure

Technical data:

- Load-carrying capacity: 300 kg
- Material of loading surface: Wood, electroconductive
- Load-carrying capacity of loading surfaces: 80 kg
- Number of loading surfaces: 2 PCS
- Loading surface height: 206 mm | 827 mm
- Number of fixed rollers: 2 PCS
- Number of steering rollers: 2 PCS
- Design: ESD-capable
- With wheel lock: Yes
- Total stop optional: Yes
- Wheel width: 32 mm
- Wheel diameter: 125 mm
- Material of wheel: TPE-ESD
- Surface: Powder-coated
- Mandatory testing according to DGUV (UVV): No

ESD table trolley with 2 wooden load areas (EN standard 1757-3)

Electrically conductive, robust version, total load capacity 500 kg and 600 kg

Application:
For transporting goods and heavy materials, for heavy-duty industrial requirements. Electrically conductive design.

Execution:
- steel tube and profile steel welded, bolted construction
- Shelves made of electrically conductive wooden plate in accordance with DIN 68765, light grey.

Advantage:
- Reliable dissipation of electric charges thanks to continuously conductive structure
- Robust design and high load capacity ensure a long service life even when used for high industrial loads
- Large storage space for bulky parts incl. on lower loading surface
- High-quality frame design with rounded corners

Technical data:
- Material of loading surface: Wood, electroconductive
- With handle: Yes
- Load-carrying capacity of loading surfaces: 200 kg
- Number of loading surfaces: 2
- Number of fixed rollers: 2
- Number of steering rollers: 2
- With wheel lock: Yes
- Total stop optional: Yes
- Wheel width: 40 mm
- Material of wheel: TPE-ESD
- Surface: Powder-coated
- Suitable for transporting: Electrical components
- Mandatory testing according to DGUV (UVV): No

fetra Transportgeräte ESD platform trolley with push handle (EN standard 1757-3)

Electrically conductive, load capacity of up to 600 kg

Application:
For transporting products which must be protected against damage from electric discharges.

Execution:
- Modular system, entirely screwed
- Steel tube/profile steel welded

Advantage:
- Reliable dissipation of electric charges thanks to continuously conductive structure
- Robust design for extremely high load capacity
- High-quality rollers ensure outstanding mobility and very light running even under heavy loads
- Robust design and high load capacity ensure a long service life even when used for industrial loads

Technical data:
- Colour: Slate grey RAL 7015
- Material of loading surface: Wood, electroconductive
- Number of fixed rollers: 2 PCS
- Number of steering rollers: 2 PCS

fetra Transportgeräte ESD material stand, height adjustable

Electrically conductive, load capacity of up to 150 kg

Application:
For providing materials in plastic and sheet steel boxes, wire baskets etc. directly at workstations.

Execution:
- Profile steel/tube construction with sheet steel platform
- Height-adjustable in increments of 25 mm
- **Ident. No. 013:**
  - Sheet steel platform with all-round edge 20 mm high
  - Platform does not tilt
- **Ident. No. 015–017:**
  - Sheet steel platform with support edge on one side
  - Platform tilts by 15° and 30°

Delivery:
Disassembled

Technical data:
- Material of loading surface: Steel plate
- Number of loading surfaces: 1
- Number of fixed rollers: 0
- Number of steering rollers: 4 PCS
- With wheel lock: Yes
- Total stop optional: No

fetra Transportgeräte — Transport dolly for drums

Steel, load capacity 250 kg

Application:
For transporting standing drums.

Execution:
- Welded steel construction
- **Ident. No. 140:** Outer ring internal diameter 610 mm for 200 l drums
- **Ident. No. 140, 142:** Cross struts bent downwards at a right angle, dia. 420 mm for 60-litre drums
- **Ident. No. 141: Ref. no.: 140, 142** cross struts offset downwards, 420-mm diameter for 60-l drums
- **Ident. No. 141–142:** Outer ring internal diameter 610 mm for 200-l drums

Advantage:
- Simple solution for transporting drums over short distances
- Easy to manoeuvre thanks to high-quality steering rollers

Technical data:
- Load-carrying capacity: 250 kg
- Loading surface height: 100 mm
- Number of steering rollers: 4
- With wheel lock: Yes
- Total stop optional: No
- Wheel width: 35 mm
- Wheel diameter: 80 mm

Sack truck made of steel tube, with additional folding toe plate and skids

Load capacity 300 kg, toe plate 250/500x320/250 mm

Ident. No. 305

Ident. No. 306

Application:
Ident. No. 305: Ideal for parcel handling
Ident. No. 306: Ideal for package handling

Execution:
- Wheels with plastic rims and roller bearings
- Safety handles
- Powder coating: RAL 5007, brilliant blue, durable surface protection, impact- and scratch-resistant
- **Ident. No. 305:**
  - handy steel tube truck with large steel tube folding shovel
  - Sheet steel shovel can be screwed on and is thus interchangeable
  - with interchangeable plastic skids
- **Ident. No. 306:**
  - Handy tubular steel truck with large tubular steel folding toe plate
  - Steel sheet toe plate can be screwed on and, thus, replaceable
  - With interchangeable plastic skids

Delivery:
Ident. No. 305: disassembled
Ident. No. 306: Flat-packed

Technical data:
- Total stop optional: No
- Colour: Brilliant blue RAL 5007
- Ability to climb stairs: Yes
- Toe plate width: 320/250 mm
- Toe plate depth: 250/500 mm
- Load-carrying capacity: 300 kg
- Folding: Shovel

Sack truck

Made of steel tube or aluminium

Ident. No. 311

Ident. No. 313

Application:
Ident. No. 310, 312: For safely transporting round goods, such as rollers, cans, buckets, etc.
Ident. No. 311, 313: For safely transporting round goods, such as rolls, cans, buckets etc.

Execution:
- Safety handles
- **Ident. No. 310:**
  - Sturdy welded structure
  - Steel sheet toe plate can be screwed on and, thus, replaceable
- **Ident. No. 310, 312:** Curved upper bracket and cross braces
- **Ident. No. 310–311, 313:** Wheels with plastic rims and roller bearings
- **Ident. No. 311, 313:**
  - sturdy welded structure
  - Bolt-on and thus interchangeable steel sheet front shovel
  - Curved top bar and transverse struts
- **Ident. No. 312:**
  - Cleanly welded and 'naturally conditioned'
  - Steel sheet dustpan can be screwed on and is thus replaceable
  - Wheels either with solid rubber or air tyres on plastic rims, hubs with roller bearings

Advantage:
- **Ident. No. 312:** Very light and manageable
- **Ident. No. 313:** very light and manageable

Delivery:
Ident. No. 310, 312: Flat-packed
Ident. No. 311, 313: disassembled

Technical data:
- Total stop optional: No
- Ability to climb stairs: No
- Toe plate width: 320 mm
- Toe plate depth: 250 mm
- Folding: No

Prod. Gr. 5AB

Sack truck made of steel tube, with 3-wheel centre

Load capacity 200 kg, toe plate 250x320 mm

Application:
For the safe transport of round goods, such as rolls, cans, buckets etc.
Ideal for frequent use on stairs and acceptable ground conditions on flat surfaces.

Execution:
- Sturdy welded structure
- Safety handles
- Bolt-on toe plates can be exchanged
- Curved upper bracket and cross braces
- With 2 three-spoked tri-wheel, 3 TPE wheels each 160 mm diameter

Advantage:
- Ideal for frequent use on stairs and good ground conditions

Delivery:
Ident. No. 350: Disassembled

Technical data:
- Total stop optional: No
- Ability to climb stairs: Yes
- Toe plate width: 320 mm
- Toe plate depth: 250 mm
- Load-carrying capacity: 200 kg
- Folding: No

Folding sack trucks

Ready to use in seconds!

Application:
Ident. No. 000–001: Versatile and can be taken anywhere for trips and field work
Ident. No. 002: Ideal if it gets wet
Ident. No. 003: Ideal for heavy and bulky transport goods
Ident. No. 005: For packages, boxes, cases and bulky goods

Execution:
- Special, patented RuXXac folding system
- Wheels and toe plate swing out together
- Large aluminium toe plate
-
- **Ident. No. 000:** Hybrid construction of steel or stainless steel and fibreglass-reinforced plastic
- **Ident. No. 001:** Hybrid construction comprising steel or stainless steel and fibreglass-reinforced plastic
- **Ident. No. 002:** Hybrid construction of stainless steel and fibreglass-reinforced plastic
- **Ident. No. 003:**
  - Hybrid construction of steel and fibreglass-reinforced plastic
  - Ready to use in seconds!
- **Ident. No. 005:**
  - Sturdy steel construction
  - Practical back grille - ideal for small packages

Advantage:
- The original!
- Extremely space-saving
- Runs smoothly even under heavy load
- Easy to roll when folded
- **Ident. No. 000–002, 005:** Ready to use in seconds!

- Colour: Grey
- Wheel diameter: 200 mm
- Brake: Yes

50291...	Ident. No.	430 ○+

Prod. Gr. 5AT

Forklift truck

Load capacity 2,000 kg to 2,500 kg

Application:
Ident. No. 460: Especially suitable for confined spaces and lorries.
Ident. No. 470: Pallet trucks can be used for different pallet types and sizes. This makes them extremely versatile and suitable for many industries.

Execution:
- Industrial version: Torsion-free single-shell frame and forks
- Robust steel tube drawbar with counter bearing for pushing operation
- Control lever for raise/move/lower functions
- Hydraulic hand pump, maintenance-free mounting
- Full lock: 2 x 100°
- **Ident. No. 458:**
  - Drawbar powder-coated, width across forks 540 mm
  - Polyurethane steering wheels, polyurethane single fork rollers. Low rolling resistance, non-marking
- **Ident. No. 460–486:** Rubber-encased handle
- **Ident. No. 470:** Polyurethane steering wheels, polyurethane tandem fork rollers. Low rolling resistance, elastic running. Good on sensitive floors, non-marking = no tracks. Low rolling noise.
- **Ident. No. 475:** Steering wheels, elastic solid rubber tyres, tandem fork rollers, polyurethane. Low roll resistance, smooth running, optimal operating comfort. Suitable for easily damaged and uneven floors, beneficial when frequently crossing edges and thresholds. Low rolling noise.

Advantage:
- **Ident. No. 470:**
  - Easier transport of pallets: Pallet trucks enable easy lifting and moving of pallets over short distances. They are ideal for handling pallets that are loaded with heavy or bulky goods.
  - Reduction in physical effort: Using a pallet truck reduces the need to lift heavy loads manually, which lowers the physical strain on the worker and minimises the risk of injuries such as back-ache or pulled muscles.
  - Increased efficiency: The pallet truck enables users to move pallets quickly and efficiently. This leads to increased productivity because moving pallets this way is much faster than lifting and carrying them.
  - Cost-effective: Compared to other material handling machines such as forklifts, pallet trucks are significantly cheaper to purchase and maintain. They offer great value for money.
  - Space-saving and flexible: Pallet trucks are relatively compact and don't need much space. This is particularly beneficial in confined storage rooms or in areas with limited space. They are also very flexible and can manoeuvre in narrow aisles or racks.

Notes:
Ident. No. 482–486: Reduced load capacity!

Technical data:
- Fork arm width: 160 mm
- Fork, external distance: 540 mm
- Min. lift height: 85 mm
- Lift height: 200 mm
- Castor-wheel diameter: 200 mm
- Colour: Melon yellow RAL 1028
- Surface: Powder-coated
- Mandatory testing according to DGUV (UVV): No

Forklift truck

Model GS 25

Application:
For lifting and carrying loads on pallets or in standardised containers

Execution:
- Entry-level model: Particularly easy to use
- Compact design
- Chrome-plated piston rod and oil seal: Prevents rust formation and oil leaks during use
- Overpressure valve: Opens in the event of overload to protect the forklift truck from damage
- On/off lowering valve
- Comfort control lifting: All functions (lower - neutral - lift) can be performed with a single lever
- Simple installation

Technical data:
- Load-carrying capacity: 2500 kg
- Fork length: 1150 mm
- Fork arm width: 150 mm
- Fork, external distance: 525 mm
- Min. lift height: 85 mm

Forklift truck

Model GS EVO

Application:
For lifting and carrying loads on pallets or in standardised containers

Execution:
- For intensive use
- Compact design
- Chrome-plated piston rod and oil seal: Prevents rust formation and oil leaks during use
- Adjustable lowering speed: The lowering speed can be controlled in proportion to the lever position on the drawbar. Perfect for fragile and sensitive loads such as crystal, glass and ceramic
- Retracting and extending rollers: Facilitate entry into closed pallets
- 3D superior ergonomic control: Thanks to the two large grip side areas that ensure a perfect position, this version enables the user to enjoy an even better operating position with less force required compared to conventional handles
- Simple installation

Manual scissorlift truck

Load capacity 1000 kg

Application:
For the transport and the lifting of palletised products on flexible working heights in manufacture, installation and dispatch.

Execution:
- Torsion-free construction, stable even under full load
- Hydraulic system with safety valve
- Double cylinder for reduced structural height and improved visibility
- One lever with 3 functions: Lower, neutral, lift
- The machine cannot be moved once a lifting height of 400 mm is exceeded
- Continuous manual lowering using handle

Advantage:
- Integrated stabilisers as standard for enhanced structural integrity

Delivery:
Installed, incl. operating instructions

Technical data:
- Load-carrying capacity: 1000 kg
- Fork length: 1150 mm
- Fork arm width: 160 mm
- Fork, external distance: 540 mm
- Min. lift height: 85 mm
- Lift height: 800 mm
- Fork castor design: Single
- Material of fork castor: Polyurethane
- Castor-wheel diameter: 200 mm

Scissorlift truck, electric

Load capacity 1000 kg

Application:
For the transport and the lifting of palletised products on flexible working heights in manufacture, installation and dispatch.

Execution:
- Torsion-free construction, stable even under full load
- Hydraulic system with safety valve
- Double cylinder for reduced structural height and improved visibility
- Lift and lower using rocker switch in drawbar
- The machine cannot be moved once a lifting height of 400 mm is exceeded

Advantage:
- Integrated stabilisers as standard for enhanced structural integrity
- Ergonomic height can be electrically adjusted at the touch of a button

Delivery:
Assembled, with external charger and operating instructions

Technical data:
- Load-carrying capacity: 1000 kg
- Fork length: 1150 mm
- Fork arm width: 160 mm
- Fork, external distance: 540 mm
- Min. lift height: 85 mm
- Lift height: 800 mm

Forklift truck, manual

Load capacity 1000 kg

Application:
Hand hydraulic stacker to lift and move palletised goods

Execution:
- Stable welded, torsion-proof sectional steel structure
- Safe position even under full load
- Hydraulic lifting by means of drawbar or pedal
- Manual lowering infinitely adjustable via handle
- Safety draw bar with rubberised handle
- Hydraulic system with safety valve
- Hard chromium plated pressure piston
- With protective grating, fixed down to the bottom of the frame, against falling objects and for free sight to the front
- Quiet polyurethane rollers facilitate the work
- 2 large steering wheels with parking brakes, for optimum manoeuvring even in narrow spaces, ground clearance of fork arms 40 mm, allows bumps in the ground to be travelled over effortlessly, all forklift trucks comply both with the requirements of the regulations of the employers' liability insurance association of BGV-D27 and the Euronorm colour: RAL 5012, light blue, powder-coated

Technical data:
- Load-carrying capacity: 1000 kg
- Fork length: 1150 mm
- Material of wheel: Polyurethane
- Material of fork castor: Polyurethane
- Fork roller diameter: 83 mm
- Fork roller width: 40 mm
- Material of steering wheels: Polyurethane
- Surface: Powder-coated
- Colour: Light blue RAL 5012
- Stroke height per pedal movement: 20 mm
- Min. lift height: 90 mm
- Length: 1705 mm

Prod. Gr. 559

Forklift truck, electro-hydraulic

Load capacity 1,200 kg

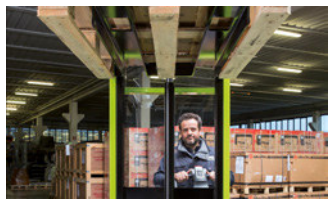
Application:
Suitable for use on long routes where electric drive provides many benefits, ideal device for semi-professional use in warehouse settings

Execution:
- torsion-free pole and frame construction, robot welding, signal green, powder coated
- With electric lifting and travel drive
- infinitely adjustable travelling speed, precise lifting and lowering processes, all functions (e.g. raising and lowering) via push buttons in drawbar
- Grip column made of sheet steel, safety knob and signal on the tiller head
- Ergonomic tow bar with large control elements for direction and speed
- The lifting shut off is designed such that in the event of 80% discharge, the lift function is blocked, however a drive to the next charging station is still possible
- Two-part plastic housing for easy access to the components
- With entry points made of special steel, forks correspond to the pallet standard
- Steering deflection 180°—compact construction ensures a manoeuvrable and quick operation, even at full load height
- starter batteries

Advantage:
- versatile and rapid operation, including at full load height with 4-point mounting, side steering and compact design

Delivery:
Including battery with low charge display, charger (24 V / 11.5 A) and operating instructions, ready to use

Technical data:
- Load-carrying capacity: 1200 kg
- Fork length: 1150 mm
- Fork arm width: 150 mm
- Fork, external distance: 560 mm
- Min. lift height: 90 mm
- Fork castor design: Single
- Castor-wheel diameter: 250 mm
- Material of steering wheels: Rubber
- Length: 1760 mm
- Width: 800 mm
- Battery voltage: 24 V
- Rechargeable battery/battery capacity: 85 Ah
- Output of lifting motor: 2.2 kW
- Stroke speed without load: 0.19 m/s
- Stroke speed at nominal load: 0.11 m/s
- Drive motor capacity: 0.7 kW
- Speed without load: 5.2 km/h
- Speed at nominal load: 4.7 km/h
- Max. surmountable tilt without load: 10 %
- Colour: Black | Green
- Max. surmountable tilt with load: 5 %
- Surface: Powder-coated
- Mandatory testing according to DGUV (UVV): Yes



Optimal view of the forks through wide window

Working platform made of steel tube

Approved for 2 persons

Application:
Work platforms offer safety during repairs and maintenance works.

Execution:
- Approved for two persons
- sturdy tube structure
- anti-slip working platform
- fork pockets with anti-slippage element
- galvanised tool tray

- TÜV tested in accordance with German Social Accident Insurance (DGUV)
- underrun protection ensures picking up only using the fork pockets

Technical data:
- Load-carrying capacity: 300 kg
- Max. number of people: 2
- Height: 1885 mm

- Material: Steel pipe
- Fork pocket width: 200 mm
- Colour: Yellow orange RAL 2000
- Fork pocket height: 80 mm
- Surface: Lacquered

Working platform 2-sided

secure mounting from 2 sides

Application:
Work platforms provide safety during repairs and maintenance tasks.

Execution:
- fork protection on the unused fork pockets
- robust square tube construction
- anti-slip working platform
- fork pockets with anti-slippage element
- galvanised tool tray
- TÜV tested in accordance with German Social Accident Insurance (DGUV)
- approved for 2 persons
- transverse and longitudinal mounting
- double-hinged protective grid

Advantage:
- Dimensions of fork pockets: A: 600| 190 mm B: 200| 200 mm H:80| 80 mm
- Can be mounted from both sides

Technical data:
- Load-carrying capacity: 300 kg
- Max. number of people: 2
- Length: 1040 mm
- Width: 1300 mm
- Height: 2155 mm
- Surface area length: 1200 mm

Prod. Gr. 770

Hydraulic lifting device with rotating lifting lug

Load capacity 6,000 kg, lifting height 115 mm

Application:
Universally applicable hydraulic lifting device for horizontal and vertical tasks.

Execution:
- Sturdy welded steel construction
- Rotating housing and strap
- Optimal stability since all components are welded to each other and form one unit
- Low total weight compared to similar devices
- 5-year warranty

Advantage:
- The shape of the top plate prevents tilting when in a horizontal position
- Thanks to its low weight, the jack can also be used outdoors

Technical data:
- Load-carrying capacity: 6000 kg
- Adjustability of lifting strap: Not adjustable
- Lift height: 115 mm
- Application height of head: 265 mm
- Min. application height of lifting strap: 18 mm
- Operating pressure: 720 bar
- Length: 306 mm
- Width: 146 mm
- Height: 265 mm

Prod. Gr. 5AH

Hydraulic lifting device with adjustable lifting lug

Load capacity 5,000-10,000 kg, lifting height 140-160 mm

Application:
For trouble-free and safe lifting of machines and heavy loads.

Execution:
- Sturdy steel welded construction
- Sturdy swivel feet prevent tilting
- Forged strap
- Precision guides for exact lifting movement and long service life
- Quick-action coupling for the connection of external hydraulic pumps
- 180° rotating pumping rod
- Easily movable with solid rubber wheels in conjunction with pump lever
- 5-year warranty

Rotating chassis

Load capacity 1-6 t

Application:
For transporting machines and other heavy loads. The specific characteristic is that very closely positioned heavy loads can be steered in any direction.

Execution:
- Sturdy, torsion-free steel welded construction
- Can be very easily moved and turned at 360° thanks to the special mounting
- GKS-alperfekt® roller, slightly steerable, low rolling resistance
- Support surfaces with non-slip waffle rubber
- 5-year warranty

Advantage:
- Several rotating transport trolleys can be used at the same time depending on the contact point and weight distribution of the heavy load as well as of the condition of the floor

Ident. No. 471

Prod. Gr. 5AH

Transport trolley

Load capacity 3-12 t

Application:
All adjustable and steerable wheel sets of the same height that can be combined and are suitable for safe transport of loads of up to 200 tons.

Execution:
- Very sturdy, torsion-free steel welded construction
- GKS-alperfekt® roller, slightly steerable, low rolling resistance
- High stability through closed cassettes
- Support surfaces with non-slip waffle rubber
- Transport wheel set with steering rod and turntable
- 5-year warranty

Advantage:
- High comfort during handling
- Material guarantees highest possible fail-safety and remains in shape, no distortion, even after years of use

Technical data:
- Design: Guidable
- Installation height of load rollers: 110 mm
- Diameter of contact surface: 170 mm

DAUPHIN Indeed Operator SLP office swivel chair

Application:
Indeed meets the requirements of a new generation primarily with respect to: lightness! Its slender, subtle design is a real team player when combined with lots of different interiors. Its ergonomic features make it easy for you to flexibly adapt to the individual needs of a dynamic everyday life. And resource-conserving production satisfies today's desire for sustainability in an innovative way. Indeed brings a new lightness to every workspace.

Execution:
- Standard mechanism: Mechanical backrest tilt, individually adjustable and can be locked in any position

Advantage:
- Stable yet lightweight: Approx. 20 % lighter - can withstand up to 150 kg
- Optimal comfort when sitting: Point-elastic micro-pocket spring core
- Quick and simple: Setup time of just two minutes

Technical data:
- Adjustable in height: Yes
- Height-adjustable backrest: Yes
- Min. seat height: 400 mm
- Max. seat height: 530 mm
- Seat width: 470 mm
- Load-carrying capacity: 150 kg
- Base frame design: Five-star base with rollers
- Adjustable seat inclination: Yes
- Base frame colour: Black
- Colour of the cushion: Black
- With armrests: Yes
- Replaceable cushion
- Material of frame: Plastic
- Type: Armrests adjustable by 8 cm in height and 7 cm in width (plastic, black), standard mechanism: mechanical backrest tilt, individually adjustable and can be locked in any position
- Colour: Black
- Width: 720 mm
- Length: 720 mm

DAUPHIN Lordo Flex

NEW

Application:
Dynamic and fatigue-free sitting during the working day - that's what Lordo has been developed for in a unique and distinctive design by Martin Ballendat. Due to alternative mechanism concepts and sophisticated movement technologies for the backrests, the chair anatomy follows the user's movements in a perfectly synchronous and ergonomic way. This ensures that the body is always kept in balance.

Execution:
- Syncro®-Dynamic Advanced mechanism: The seat and backrest follow the movement of the seated user synchronously at the correct angle. Continuous, immediately noticeable adjustment of the constant backrest counterpressure in all working positions (for approx. 40-125 kg body weight). Patented automatic weight compensation for a permanent upright seated posture (patent no. EP 06 35 228 B1). Synchronous movement can be locked in four different positions (SD I). Optional: Synchronous movement can be locked in any position (SD II). Integrated seat tilt adjustment up to -4° during the movement process due to a seat shell that is divided into three sections (active pelvic support). Standard seat depth adjustment via sliding seat (5 cm; can be locked in five different positions).
-

Advantage:
- Semi-transparent and fully flexible: Backrest with elasticated mesh fabric
- adjustable by up to 10 cm in height
- Natural movement impulses: Active sitting with significant relief
- High quality: Selected materials for even greater comfort and aesthetics

Technical data:
- Adjustable in height: Yes
- Height-adjustable backrest: Yes
- Min. seat height: 400 mm
- Max. seat height: 530 mm
- Seat width: 470 mm
- Load-carrying capacity: 110 kg
- Base frame design: Five-star base with rollers
- Adjustable seat inclination: Yes
- Base frame colour: Black
- Colour of the cushion: Black
- With armrests: Yes
- Replaceable cushion
- Material of frame: Plastic
- Type: Armrests adjustable by 10 cm in height and 6 cm in width (plastic, black), mesh backrest, Syncro®-Dynamic Advanced mechanism, 2F armrest
- Colour: Black
- Width: 720 mm
- Length: 720 mm

DAUPHIN Shape Mesh Comfort

NEW

Application:
Shape allows you to create your perfect workplace - this swivel chair adapts to your individual needs. Whether big or small, our Balance ergonomics concept allows everyone to sit with the correct posture. Our technologies are patented, have proven their worth millions of times and bear the AGR (Healthy Back Campaign) seal of approval for especially back-friendly products.

Execution:
- Syncro-3D-Balance® mechanism: Synchronous movement can be locked in any position; fast, fine adjustment of the backrest counterpressure with just a few rotations; automatic tilt adjustment of the seat (up to -8° forwards) and backrest (82° to 128° backwards); automatic movement of the seat and backrest to both sides (+/-6°); the Syncro-3D-Balance® mechanism can be locked in the zero setting or at -6° forward tilt; seat depth adjustment via sliding seat (6 cm)

Advantage:
- Always moving: Active, dynamic sitting in all working positions
- Greater freedom of movement: Healthy, fatigue-free sitting with the correct posture
- AGR (Aktion Gesunder Rücken - Healthy Back Campaign) seal of approval: This product is back-friendly!

Technical data:
- Adjustable in height: Yes
- Height-adjustable backrest: No
- Min. seat height: 400 mm
- Max. seat height: 530 mm
- Seat width: 500 mm
- Load-carrying capacity: 150 kg
- Base frame design: Five-star base with rollers
- Adjustable seat inclination: Yes
- Base frame colour: Black
- Colour of the cushion: Black
- With armrests: Yes
- Replaceable cushion
- Material of frame: Plastic
- Type: Armrests adjustable by 10 cm in height, 6 cm in width and 4 cm in depth (plastic, black), radially adjustable by 30° (on both sides), mesh backrest, Syncro-3D-Balance® mechanism, lumbar support
- Colour: Black
- Width: 720 mm

DAUPHIN AdJust Evo Mesh SLP office swivel chair

Application:
@Just evo is the ideal product family when it comes to ergonomics, timeless design, user-friendliness and optimal value for money. The chairs are deliberately timeless in design, focused on your individual requirements as a user. And with a few, simple movements, you can adjust your chair so that even sitting for long periods is no problem.

Execution:
- Standard mechanism: Mechanical backrest tilt, individually adjustable and can be locked in any position

Advantage:
- Individual: User-friendly adjustment options
- Comfortable support: Height-adjustable upholstered or mesh backrests
- AGR (Aktion Gesunder Rücken - Healthy Back Campaign) seal of approval: This product is back-friendly!

Technical data:
- Adjustable in height: Yes
- Height-adjustable backrest: Yes
- Min. seat height: 400 mm
- Max. seat height: 530 mm
- Seat width: 470 mm
- Load-carrying capacity: 150 kg
- Base frame design: Five-star base with rollers
- Adjustable seat inclination: Yes
- Colour of the cushion: Black
- With armrests: Yes
- Replaceable cushion
- Material of frame: Plastic
- Type: Armrests adjustable by 8 cm in height and 7 cm in width (plastic, black), standard mechanism: mechanical backrest tilt, individually adjustable and can be locked in any position
- Colour: Black
- Width: 720 mm
- Length: 720 mm

Bosse Desk

Height-adjustable, in various colours

Application:
The MSMP-24 desk with electronic height adjustment proactively promotes a healthy working posture. The controls can be used to intuitively adjust the desk to a suitable working height.

Execution:
- Frame colour: black

Advantage:
- High-quality workmanship
- Available in various colours
- Quick and easy assembly

Delivery:
Disassembled

Technical data:
- Type: Height adjustable
- Design: Electrically adjustable
- Width: 1600 mm
- Depth: 800 mm
- Adjustable in height: Yes
- Min. height adjustment: 625 mm
- Max. height adjustment: 1260 mm
- Material: Wood
- Min./max. height adjustment: 625-1260 mm
- Surface: High-gloss polished
- ESD-capable: No
- Mandatory testing according to DGUV (UVV): No

AUTOSTAT Positioner load capacity 0.5-6.0 kg

Type 5250, cable extension 1,500 mm

Execution:
- Housing made of extremely impact-resistant special plastic
- The load is attached via a safe screw snap hook
- Braking force adjustable using lateral adjusting screw
- Safety device: Fall arrester in line with DIN 15112 included in scope of delivery, riveted special spring for retracting the load-bearing cable, insulated suspension, highly shape-stabilised structure

Technical data:
- Model: 5250 0000 01
- Type: 5250
- Min./max. load-carrying capacity: 2-7 kg
- Spring design: Riveted special mainspring
- Max. cable pull-out length: 1500 mm
- Cord in-feed restriction: Rubber ball, absorbs impacts
- Replaceable cord: No
- Material of cable drum: Plastic
- Material of cord: PA - Polyamide
- Material of housing: Plastic
- With automatic locking: No
- Suspension type: Freely rotating and pivot screw karabiner hook
- Adjustable cord length: No
- Load attachment: Screw Karabiner hook
- Spring breakage protection: No
- Colour of housing: Orange
- Housing height: 150 mm
- Housing width: 105 mm
- Housing thickness: 53 mm
- Height: 330 mm

ORION® Spring balancers load capacity 0.5-2.0 kg

Type 5200, cable extension 2,000 mm

Application:
For the ergonomic support of assembly operations. Spring pullers keep tools close at hand at all times during assembly and at the same time ensure that the workplace is tidy. The spring balances are designed in such a way that each work tool is automatically pulled back to the original position after use. Suitable for lightweight tools.

Execution:
- Housing made of impact-resistant plastic
- Carrying capacity easy to adjust via hand wheel
- Suspension with robust steel eyelet, riveted special spring
- Polyamide cable
- 2000 mm cable extension

Advantage:
- Effortless work
- Saves space, lightweight design
- Low cost

Technical data:
- With overrotation protection: No
- Number of springs: 1 PCS
- Spring design: Special mainspring
- Spring breakage protection: No
- Max. cable pull-out length: 2000 mm
- Adjustable cord length: No
- Wire cable diameter: 2 mm
- Replaceable cord: No
- Cord in-feed restriction: Rubber ball, absorbs impacts
- Material of cable drum: Abrasion-proof plastic
- With automatic locking: No
- Suspension type: Ring grommet
- Load attachment: Karabiner hook
- Material of housing: Plastic
- Housing width: 112 mm
- Housing thickness: 55 mm
- Height: 225 mm

AUTOSTAT counterweights (balancers) and spring balancers (retrievers)

For a wide range of uses in industry and trade

“The ultimate solution has a name: AUTOSTAT!

When it comes to handling tools, equipment or auxiliary devices, AUTOSTAT series devices are unsurpassed. These devices successfully rise to every challenge — even under the most difficult conditions.

Spring balance (retractor)

Spring balances are designed so that the retraction force increases as more and more rope is pulled out. The workload is thus returned to its initial position after use by the spring balance. This keeps the workstation clear for other tools or devices. The extremely flat increase in the spring force ensures precise work.

Counterweights (balancers)

The characteristic feature of AUTOSTAT counterweights is their conical cable drum. This produces an almost uniform retraction force across the entire cable extraction. The result is that once the suspended load has been inserted, the position is retained. Furthermore, no increase in the retraction force is observed, particularly for extremely precise and sensitive work. Using Autostat counterweights facilitates effortless work, even over longer periods of time.

Automatic lock

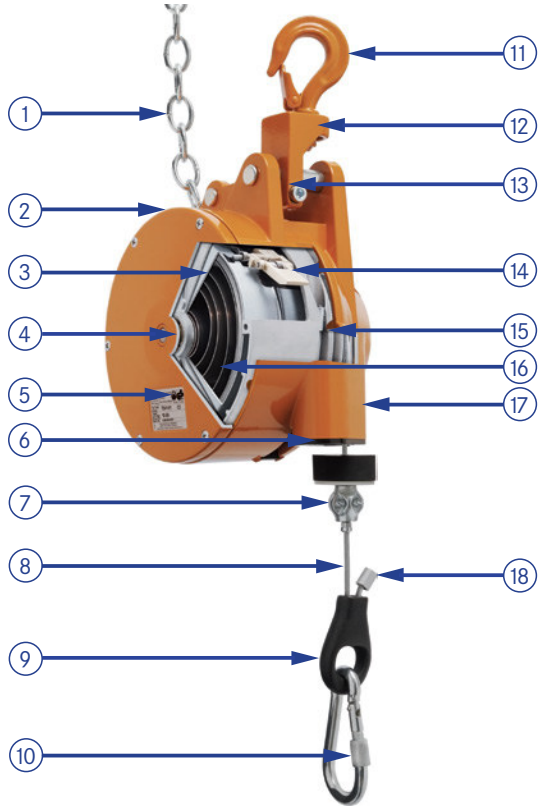
The automatic lock causes early retraction stops at predetermined positions. It is activated by retracting the workload slowly. If the work load is returned quickly, the lock does not engage. This significantly improves work ergonomics for some applications , for example, if you do not wish to return the attached load to the initial position between different work steps. The automatic lock is available for different spring balances and counterweights. Please refer to the corresponding product descriptions.

Patented freewheel

Our patented freewheel is a control guard against incorrect operation for counterweights of types 7241, 7248, 7251 and 7261. The freewheel prevents undesirable spring fractures when the spring is relaxed. It is now impossible for the device to relax too far, and this is no longer transferred to the spring. This prevents unintentional incorrect operation and significantly increases service life. This device is integrated as standard in all our devices in model series 7241, 7248, 7251 and 7261.”

Advantages at a glance:

- Trouble-free workflow
- Effortless work
- Less wear on personnel and machines
- Extremely high operational safety
- Extremely easy maintenance
- Very high durability
- Fast procurement channels
- Continuous further development of our product range
- Local point of contact



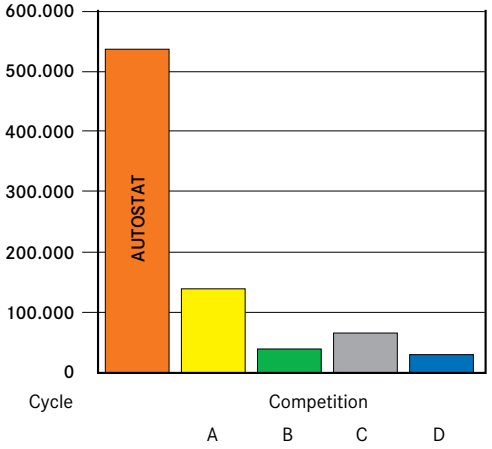
① Safety chain as separate fall protection device
② High-strength aluminium alloy or impact-resistant plastic
③ Strapped or riveted suspension spring
④ Double ball bearing cable drum
⑤ GS mark, 5-fold safety factor throughout
⑥ Cable guide nozzle
⑦ Adjustable cable retraction limit
⑧ Twist-resistant cable
⑨ Cable clamp for infinite adjustment of cable length
⑩ High-quality screw-on snap hook
⑪ High-strength forged hook
⑫ Ball bearing suspension
⑬ Infinitely adjustable suspension to prevent wear
⑭ Protection against spring fracture as standard from 3 kg load capacity
⑮ Patented over-twist safeguard on the suspension spring
⑯ High-strength special suspension spring
⑰ Easy and safe load adjustment
⑱ Free cable end for extending cable – special lengths on request

AUTOSTAT counterweights (balancers) and spring balancers (retrievers)
For a wide range of uses in industry and trade

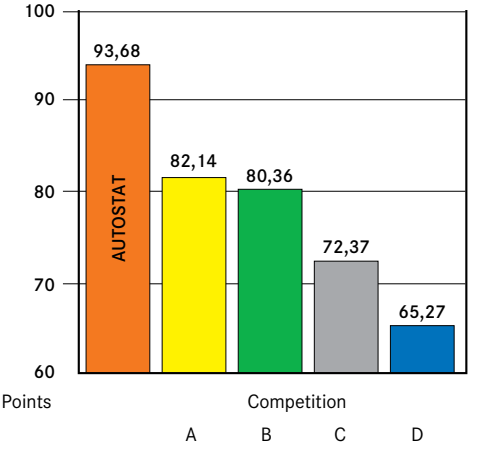
Unmatched performance

A neutral product comparison test was conducted at the University of Esslingen during research for a thesis.
AUTOSTAT spring balances and balancers lead the field by far - why settle for less?

Evaluation of the service life until failure due to fatigue occurs:



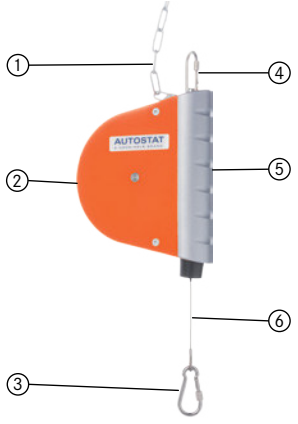
Overall evaluation:



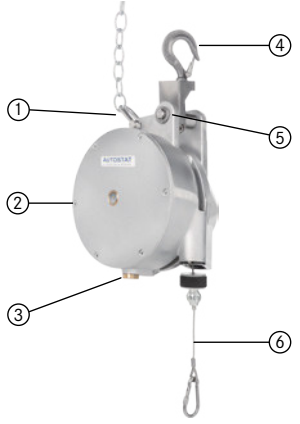
Evaluation criteria:
- Load-carrying range
- Pulling diagram
- Life
- Cable extraction
- Safety options
- Service life of cable / drum
- Life of the spring
- Availability of spare parts
- Delivery time
- Repair friendliness
- Materials used
- Product documentation
- Scope of delivery

AUTOSTAT rustproof design
of spring balances and counterweights

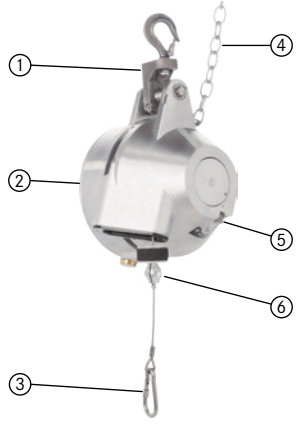
HAHN+KOLB has expanded its range for the food industry with handling systems and offers versions made entirely of rustproof material with the AUTOSTAT spring balances and counterweights (balancers). whereas aggressive cleaning agents and high-pressure cleaners for disinfection – for example in the meat-processing industry – attack the paint on systems as they age, the AUTOSTAT solutions feature a high-strength aluminium alloy. the installed moulded parts, screws, cables and snap hooks are made of stainless steel. the safety hooks and all bolts are also made of stainless steel.
this makes the systems totally safe to use, while also ensuring a significantly longer period of use.



① stainless steel safety chain
② extremely impact-resistant special plastic housing
③ stainless steel carabiner hook
④ stainless steel safety hook
⑤ stainless steel bracket
⑥ stainless steel rope



① stainless steel shackle
② stainless steel fittings
③ brass stop
④ stainless steel safety hook
⑤ stainless steel bolt, pipe, washer and split pin
⑥ stainless steel rope



① plain aluminium holder
② plain high-strength aluminium alloy
③ stainless steel carabiner hook
④ stainless steel safety chain
⑤ stainless steel screw
⑥ aluminium clip

AUTOSTAT Spring balancers load capacity 0.0-2.5 kg (DIN 15112)

type 7200

Application:

For the ergonomic support of assembly operations. Spring pullers keep tools close at hand at all times during assembly and at the same time ensure that the workplace is tidy. The spring balances are designed in such a way that each work tool is automatically pulled back to the original position after use. Suitable for lightweight tools.

Execution:

- Housing made of extremely shock-resistant special plastic
- Cable drum is made of non abrasive plastic
- High-strength special motive spring
- Simple load setting secured against incorrect operation
- Cable feed limitation is impact absorbing and adjustable
- The load is attached via a safe snap hook
- Suspension with screw snap hook
- Safety device: Fall arrester in line with DIN 15112 included in scope of delivery, insulated suspension, shape-stabilised structure
- Working area: Cable extraction: 1600 mm, ropes in special lengths available on request

Advantage:

- Effortless work

Technical data:

- With overrotation protection: No
- Number of springs: 1 PCS
- Spring design: Special mainspring
- Spring breakage protection: No
- Max. cable pull-out length: 1600 mm
- Adjustable cord length: No
- Wire cable diameter: 2 mm
- Replaceable cord: No
- Cord in-feed restriction: Absorbs impacts, adjustable
- Material of cable drum: Abrasion-proof plastic
- Material of cord: Steel
- With automatic locking: No
- Suspension type: Freely rotating and pivot screw karabiner hook
- Load attachment: Karabiner hook
- Material of housing: Plastic
- Housing height: 134.3 mm
- Housing width: 108 mm
- Housing thickness: 36.7 mm
- Design: Standard
- Height: 420 mm

AUTOSTAT Spring balancers with load capacity of 2.0-14.0 kg (DIN 15112)

Types 7221 and 7222

Application:

Can be used for following tools and devices, e. g.: Electrical and compressed air hand machines, engravers, exhaust hoses, compressed air devices, paint spray guns, film welding devices

Execution:

- Housing made of extremely shock-resistant special plastic
- Suspension via a freely turning and swivelling safety snap hook
- Infinitely variable load setting via an adjusting screw with over-twist safeguard
- The load is attached via a safe screw snap hook
- Cable feed limitation is impact absorbing and adjustable
- Rope is infinitely variable in its length via a rope clamp
- If required, the cable can be replaced very easily
- Safety device: Fall arrester according to DIN 15112 included in scope of delivery, spring breakage protection, high-strength and bandaged special mainspring, lockable cable drum
- **Ident. No. 411–414:** The automatic cable retraction stop allows the device to be locked. Locking not to be used for load change!

Advantage:

- Effortless work

Technical data:

- With overrotation protection: Yes
- Number of springs: 1 PCS
- Spring design: Special mainspring
- Spring breakage protection: Yes

AUTOSTAT Spring balancers with pneumatic spiral hose, load capacity 0.5-3.0 kg (DIN 15112)

Type 7211, cable extension 2,500 mm

Application:
Particularly suited for compressed air tools with high air consumption.

Execution:
- Larger load-bearing ranges
- Housing made of extremely shock-resistant special plastic
- Cable drum is made of non abrasive plastic
- Riveted load-bearing spring made from high-strength special steel
- Suspension with screw snap hook
- Cable feed limitation is impact absorbing and adjustable
- The load is attached via a safe screw snap hook
- Spiral hose: made of PU, 9 x 13 mm, colour yellow or 11 x 16 mm, colour blue, including straight inlets and outlets of 500 mm, operating pressure up to max. 10 bar, without compressed air connections
- Safety device: Fall arrester in line with DIN 15112 included in scope of delivery, insulated suspension, shape-stabilised structure
- Working area: Cable extraction: 2500 mm

Delivery:
Without compressed air connections and couplings, deliverable on request: with automatic locking

Technical data:
- Spring design: Special mainspring
- Spring breakage protection
- Max. cable pull-out length: 2500 mm
- Adjustable cord length: No
- Wire cable diameter: 2 mm
- Replaceable cord: No
- Cord in-feed restriction: Absorbs impacts, adjustable
- Material of cable drum: Plastic
- With automatic locking: No
- Connection thread: Without
- Max. hose extension length: 2500 mm
- Max. operating pressure: 10 bar
- Suspension type: Freely rotating and pivot screw karabiner hook
- Load attachment: Screw Karabiner hook
- Housing height: 166.5 mm
- Housing width: 133 mm
- Housing thickness: 45 mm
- Height: 420 mm

AUTOSTAT Spring balancers with pneumatic spiral hose, load capacity 2.0-14.0 kg (DIN 15112)

Type 7221, cable extension 3,000 mm

Application:
Particularly suited for compressed air tools with high air consumption. For large working areas (cable extension 3000 mm) and heavy compressed air tools (carrying capacity up to 14 kg).

Execution:
- Larger load-bearing ranges
- Housing made of extremely shock-resistant special plastic
- Suspension with screw snap hook
- The load is attached via a safe screw snap hook
- Cable feed limitation is impact absorbing and adjustable
- Rope is infinitely variable in its length via a rope clamp
- If required, the cable can be replaced very easily
- Spiral hose: made of PU, 9 x 13 mm, colour yellow or 11 x 16 mm, colour blue, including straight inlets and outlets of 500 mm, operating pressure up to max. 10 bar, without compressed air connections
- Safety device: Fall arrester in line with DIN 15112 included in scope of delivery, spring safety device, hooped special motive spring, cable drum, can be blocked, push clamp for securing the cable end
- Working area: Cable extraction: 3000 mm

Delivery:
Without compressed air connections and couplings, deliverable on request: with automatic locking

Technical data:
- Spring design: Special mainspring
- Spring breakage protection
- Max. cable pull-out length: 3000 mm
- Adjustable cord length: Yes
- Wire cable diameter: 3 mm
- Replaceable cord: Yes
- Cord in-feed restriction: Absorbs impacts, adjustable
- Material of cable drum: Plastic
- With automatic locking: No
- Connection thread: Without
- Max. hose extension length: 3000 mm
- Max. operating pressure: 10 bar

AUTOSTAT ATEX balancer with load capacity of 15.0-55.0 kg (DIN 15112)

Type 7235 EX, cable extension 2,000 mm, rustproof

Application:
For use in explosive atmospheres containing gases and dusts. Can be used for following tools and devices, e. g.: compressed air devices, electrical devices, paint spray guns, cable-binding pliers, nailing devices, flue gas swivelling arms, robot power supply line, welding pliers, packaging devices, etc.

Execution:
- Housing and housing cover made of gravity-die-cast aluminium
- Cable drum ball-bearing
- Suspension via a freely turning and swivelling safety snap hook
- Carrying force is infinitely variable via adjusting screw
- Load is attached via a screw snap hook
- cable feed limitation is impact absorbing and adjustable
- If required, the cable can be replaced very easily
- Safety device: Fall arrester in line with DIN 15112 included in scope of delivery, spring safety device, riveted special motive spring, cable drum, can be blocked with integrated locking device
- Working area: Cable extension: 2000 mm, ropes in special lengths available on request
- Integrated earth connection

Advantage:
- Effortless work, even over extended periods
- Easy positioning of loads in potentially explosive atmospheres
- Protects employees from being overloaded
- Reduce costs by reducing throughput times thanks to ergonomic workplace design
- Increases productivity thanks to improved handling of applications

Notes:
Application areas for flammable gases: II 2/2G EXH LLA + ethanol T6 GB/GB; for combustible dusts: II2/2D Ex h IIIC T85°C DB/DB

Technical data:
- Type: 7235 EX
- With automatic locking: No
- Max. cable pull-out length: 2000 mm
- Adjustable cord length: No
- Material of cord: Stainless Steel
- Wire cable diameter: 3 mm
- Replaceable cord: Yes
- Cord in-feed restriction: Absorbs impacts, adjustable
- Material of cable drum: Gravity die-cast aluminium
- Suspension type: Freely rotating and pivot screw karabiner hook
- Load attachment: Screw Karabiner hook
- Material of housing: Gravity die-cast aluminium
- Surface: Uncoated
- Housing width: 223 mm
- Housing thickness: 150.5 mm
- Design: All external components made of non-rusting material
- Height: 530 mm
- Spring design: Riveted special mainspring
- With overrotation protection: No
- Spring breakage protection: Yes
- Number of springs: 1 PCS
- DIN: 15112
- Mandatory testing according to DGUV (UVV): No

AUTOSTAT Balancer with extending pneumatic hose, load capacity 0.4-3.0 kg (DIN 15112)

Type 7223, 800 mm hose extension

Execution:
- Air supply via the AIR spring balance by installed compressed air hose directly to the compressed air machine
- Rate of air flow is identical in inserted and extracted hose
- Rotating joint for air connection is integrated in the device
- hose reel is particularly soft and free-moving
- Housing and hose drum made of extremely shock-resistant and abrasion-proof special plastic
- Safety device: freely rotating and swivelling suspension with a screw snap hook, fall protection in line with DIN 15112 included in scope of delivery, carrying capacity adjusted via notches, tools attached using quick-action coupling provided, adjustable elastic cable retraction limiter, riveted special motive spring
- Working area: Hose extension: 800 mm

Delivery:
Available upon request: Hose extensions

Technical data:
- Spring design: Special mainspring
- Spring breakage protection
- Adjustable cord length
- Replaceable cord
- Cord in-feed restriction: Absorbs impacts, adjustable
- Material of cable drum: Plastic
- With automatic locking: No
- Connection thread
- Max. hose extension length: 800 mm
- Inner hose diameter: 6 mm
- Outer diameter of hose: 8 mm
- Max. operating pressure: 10 bar
- Suspension type: Freely rotating and pivot screw karabiner hook
- Load attachment: Screw Karabiner hook
- Material of housing: Plastic
- Housing width: 141 mm
- Housing thickness: 71 mm
- Height: 385 mm

Prod. Gr. 772

AUTOSTAT Balancer with load capacity of 0.4-6.5 kg (DIN 15112)

Type 7228, cable extension 1,600 mm

Application:
Can be used with the following tools and devices, e.g. compressed air devices, electric devices, paint spray guns, cable-binding pliers, nailing devices, flue gas swivelling arms, robot power supply line, welding pliers, packaging devices etc.

Execution:
- Housing made of extremely shock-resistant special plastic
- Suspended with rotating screw snap hooks
- Infinitely adjustable load, via notches
- The load is attached via a safe screw snap hook
- Cable feed limitation is impact absorbing and adjustable
- Rope is infinitely variable in its length via a rope clamp
- If required, the cable can be replaced very easily
- Safety device: Fall arrester in line with DIN 15112 included in scope of delivery, spring safety device, riveted special motive spring, cable drum, can be blocked, push clamp for securing the cable end
- Working area: Cable extraction: 1600 mm, ropes in special lengths available on request

Advantage:
- Effortless work

Technical data:
- Type: 7228
- With automatic locking: No
- Max. cable pull-out length: 1600 mm
- Adjustable cord length: Yes
- Wire cable diameter: 3 mm
- Replaceable cord: Yes
- Cord in-feed restriction: Absorbs impacts, adjustable
- Material of cable drum: Highly abrasion-proof plastic
- Suspension type: Freely rotating and pivot screw karabiner hook
- Load attachment: Screw Karabiner hook
- Material of housing: Plastic
- Housing width: 141 mm
- Housing thickness: 71 mm
- Colour of housing: Orange
- Height: 460 mm
- Spring design: Riveted special mainspring
- With overrotation protection: No
- Number of springs: 1 PCS
- DIN: 15112
- Mandatory testing according to DGUV (UVV): No

AUTOSTAT Balancer with load capacity of 3.0-21.0 kg (DIN 15112)

Types 7230 and 7231

Application:

Can be used for following tools and devices, e. g.: compressed air devices, electrical devices, paint spray guns, cable-binding pliers, nailing devices, flue gas swivelling arms, robot power supply line, welding pliers, packaging devices, etc.

Execution:

- Housing made of extremely shock-resistant special plastic
- Infinitely adjustable load, via adjusting screw
- The load is attached via a safe screw snap hook
- Cable feed limitation is impact absorbing and adjustable
- Rope is infinitely variable in its length via a rope clamp
- If required, the cable can be replaced very easily
- Working area: Cable extraction: 2000 mm, ropes in special lengths available on request
- **Ident. No. 590, 600, 610, 620, 630, 640:**
  - Suspension via a freely turning and swivelling safety hook
  - Safety device: Fall arrester in line with DIN 15112 included in scope of delivery, spring safety device, riveted special motive spring, cable drum, can be blocked (with integrated locking device), push clamp for securing the cable end
- **Ident. No. 594, 604, 614, 624, 634, 644:**
  - suspension via a freely turning and swivelling safety hook
  - Safety device: Protection against falling in line with DIN 15112 included in scope of delivery, spring safety device, riveted special motive spring, cable drum, can be blocked (with integrated locking device), push clamp for securing the cable end
  - Automatic stop allows the device to be locked. Locking not to be used for load change!

Advantage:

- Effortless work

Technical data:

- Max. cable pull-out length: 2000 mm
- Adjustable cord length: Yes
- Material of cord: Steel
- Wire cable diameter: 3 mm
- Replaceable cord: Yes
- Cord in-feed restriction: Absorbs impacts, adjustable
- Material of cable drum: Highly abrasion-proof plastic
- Suspension type: Freely rotating and pivot safety hook
- Load attachment: Screw Karabiner hook
- Material of housing: Plastic
- Housing width: 180 mm
- Housing thickness: 130 mm
- Design: Standard
- Colour of housing: Orange
- Height: 520 mm
- Spring design: Riveted special mainspring
- With overrotation protection: No
- Spring breakage protection: Yes
- Number of springs: 1 PCS
- DIN: 15112
- Mandatory testing according to DGUV (UVV): No

Prod. Gr. 7EB

AUTOSTAT Balancer with load capacity of 15.0-55.0 kg (DIN 15112)

Types 7235 and 7236

Application:
Areas of application e. g.: Meat packing machines, welding tongs, sawing machines, etc.

Execution:
- Housing and the cable drum made of aluminium sand cast
- Cable drum ball-bearing
- Suspension via a freely turning and swivelling safety snap hook
- Carrying force is infinitely variable via adjusting screw
- Load is attached via a screw snap hook
- Cable feed limitation is impact absorbing and adjustable
- If required, the cable can be replaced very easily
- Safety device: Fall arrester in line with DIN 15112 included in scope of delivery, spring safety device, riveted special motive spring, cable drum, can be blocked with integrated locking device
- Working area: Cable extraction: 2000 mm, ropes in special lengths available on request
- **Ident. No. 681–684:** Automatic stop allows the device to be locked. Locking not to be used for load change!

Advantage:
- Effortless work
- **Ident. No. 671–674:** Can be used as a spring balance

Technical data:
- Max. cable pull-out length: 2000 mm
- Adjustable cord length: No
- Material of cord: Steel
- Wire cable diameter: 3 mm
- Replaceable cord: Yes
- Cord in-feed restriction: Absorbs impacts, adjustable
- Material of cable drum: Gravity die-cast aluminium
- Suspension type: Freely rotating and pivot screw karabiner hook
- Load attachment: Screw Karabiner hook
- Material of housing: Gravity die-cast aluminium
- Surface: Powder-coated
- Housing width: 223 mm
- Housing thickness: 150.5 mm
- Design: Standard
- Colour of housing: Orange
- Height: 530 mm
- Spring design: Riveted special mainspring
- With overrotation protection: No
- Spring breakage protection: Yes
- Number of springs: 1 PCS
- DIN: 15112
- Mandatory testing according to DGUV (UVV): No

AUTOSTAT Balancer with load capacity of 12.0-100.0 kg (DIN 15112)

Type 7241, cable extension 2,000 mm

MADE IN

Application:
Can be used for following tools and devices, e. g.: Multi-purpose screwdriver, butcher's machines, welding tongs, X-ray equipment, monitor suspensions, measuring robots, riveting machines.

Execution:
- Housing and the cable drum made of high-pressure die cast aluminium
- Cable drum double ball bearings
- Suspension can be positioned to the load which is done by a safety hook in free rotating and swivelling design with hook mouth securing
- Carrying force is infinitely variable via adjusting screw
- Load is attached via a screw snap hook
- Cable feed limitation is impact absorbing and adjustable
- Rope is infinitely variable in its length via a rope clamp
- If required, the cable can be replaced very easily
- Safety device: Fall arrester in line with DIN 15112 included in scope of delivery, patented over-twist safeguard of suspension spring, spring safety device, fully encapsulated special motive spring, cable drum, can be blocked with integrated locking device, push clamp for securing the cable end
- Working area: Cable extraction: 2000 mm, cables in special lengths available on request. Special design with manual cable retraction lock deliverable upon request. This allows the cable to be blocked with a single movement when working. Locking not to be used for load change!

Advantage:
- Effortless work

Technical data:
- Type: 7241
- With automatic locking: No
- Max. cable pull-out length: 2000 mm
- Adjustable cord length: Yes
- Material of cord: Steel
- Wire cable diameter: 5 mm
- Replaceable cord: Yes
- Cord in-feed restriction: Absorbs impacts, adjustable
- Material of cable drum: Die-cast aluminium
- Suspension type: Freely rotating and pivot safety hook, positionable
- Load attachment: Screw Karabiner hook
- Material of housing: Die-cast aluminium
- Surface: Powder-coated
- Housing width: 249 mm
- Housing thickness: 202 mm
- Height: 750 mm
- Spring design: Riveted special mainspring in separate spring housing
- With overrotation protection: Yes
- Spring breakage protection: Yes
- Number of springs: 1 PCS
- Mandatory testing according to DGUV (UVV): No

AUTOSTAT Balancer with load capacity of 12.0-100.0 kg, with 2 load cables (DIN 15112)

Type 7248, cable extension 2,000 mm

Application:
Can be used for following tools and devices, e. g.: Installing in devices, X-ray equipment, welding templates, in the automobile industry, multi-purpose screwdrivers, measuring arms etc.

Execution:
- Highest safety due to double bearing rope
- Product protection for very expensive tools, gauges and workpieces
- Personal protection in case of installations above the head
- Double load-bearing cable infinitely length-adjustable via cable clamps, cable very easy to replace when necessary
- Housing and cable drum made of high-pressure die cast aluminium, cable drum with double ball bearings
- Suspension can be positioned to the load which is done by a safety hook in free rotating and swivelling design with hook mouth securing, loads attached using screw snap hooks
- Carrying force is infinitely variable via adjusting screw
- Cable feed limitation is impact absorbing and adjustable
- Safety device: Fall arrester in line with DIN 15112 included in scope of delivery, patented over-twist safeguard of suspension spring, spring safety device, fully encapsulated special motive spring, cable drum, can be blocked with integrated locking device, push clamp for securing the cable end
- Working area: Cable extraction: 2000 mm, cables in special lengths available on request. Special design with manual cable retraction lock deliverable upon request. This allows the cable to be blocked with a single movement when working. Locking not to be used for load change!

Advantage:
- Effortless work

Technical data:
- Type: 7248
- With automatic locking: No
- Max. cable pull-out length: 2000 mm
- Adjustable cord length: Yes
- Material of cord: Steel
- Wire cable diameter: 5 mm
- Replaceable cord: Yes
- Cord in-feed restriction: Absorbs impacts, adjustable
- Material of cable drum: Die-cast aluminium
- Suspension type: Freely rotating and pivot safety hook, positionable
- Load attachment: Screw Karabiner hook
- Material of housing: Die-cast aluminium
- Surface: Powder-coated
- Housing width: 249 mm
- Housing thickness: 231 mm
- Height: 1080 mm
- Spring design: Riveted special mainspring in separate spring housing
- With overrotation protection: Yes
- Spring breakage protection: Yes
- Number of springs: 1 PCS
- Mandatory testing according to DGUV (UVV): No

Prod. Gr. 772

AUTOSTAT Balancer with load capacity of 150.0-300.0 kg (DIN 15112)

Type 7261, cable extension 1,500 mm

Application:
Can be used for following tools and devices, e. g.: Riveting tongs, butcher's machines etc.

Execution:
- Housing and the cable drum made of aluminium sand cast
- Cable drum double ball bearings
- Suspension can be tilted and positioned to the load
- Carrying force is infinitely variable via adjusting screw
- Load is attached via a safety hook with hook mouth protection on an encapsulated deflection roller
- Cable feed limitation is impact absorbing and adjustable
- Rope is infinitely variable in its length via a rope clamp
- If required, the cable can be replaced very easily
- Safety device: Fall arrester in line with DIN 15112 included in scope of delivery, patented over-twist safeguard of suspension spring, spring safety device, fully encapsulated special motive spring, cable drum, can be blocked with integrated locking device, push clamp for securing the cable end
- Working area: Cable extraction: 1500 mm, ropes in special lengths available on request

Advantage:
- Effortless work

Technical data:
- Type: 7261
- With automatic locking: No
- Max. cable pull-out length: 1500 mm
- Adjustable cord length: Yes
- Wire cable diameter: 5 mm
- Replaceable cord: Yes
- Cord in-feed restriction: Absorbs impacts, adjustable
- Material of cable drum: Gravity die-cast aluminium
- Suspension type: Freely rotating and pivot safety hook, positionable
- Load attachment: Screw Karabiner hook
- Material of housing: Gravity die-cast aluminium
- Housing width: 290 mm
- Housing thickness: 348 mm
- Height: 2500 mm
- Spring design: Riveted special mainspring in separate spring housing
- With overrotation protection: Yes
- Spring breakage protection: Yes
- Number of springs: 2 PCS
- DIN: 15112
- Mandatory testing according to DGUV (UVV): No

Yale Manual chain hoist (EN standard 818-7)

Made of sheet steel

Application:
For the ergonomic lifting of heavy materials and products.

Execution:
- Robust housing made entirely of steel
- Galvanised load chain in line with DIN EN 818-7 (quality class T)
- Galvanised manual chain
- 360° rotating hook
- High-quality enclosed bearings
- Reinforced handwheel lid
- Continuous stud bolts between the side panels and the lid fastening
- Precision-manufactured guide rollers
- Ball bearings and needle bearings in the gears, in the side panels and in the load chain wheel

Advantage:
- Increased stability
- Manual chain runs smoothly without catching or sticking
- Load chain wheel and driving pinion run faultlessly
- Long service life, extremely maintenance-friendly

Delivery:
Optionally deliverable with friction coupling and chain storer or with shorter or longer load and manual chain

Notes:
Optionally available with chain storer and overload protection. All technical specifications relate to a hook displacement of 3 m.

Technical data:
- Lift height: 3000 mm
- Mandatory testing according to DGUV (UVV): No

Yale 360° hand chain hoist (EN standard 818-7)

With 360° rotating hand chain guide

Application:
For the ergonomic lifting of heavy materials and products. Suitable for the most extreme of applications and outdoor use.

Execution:
- Robust steel housing (powder-coated)
- Galvanised load chain in line with DIN EN 818-7 (quality class T)
- Galvanised manual chain
- 360° rotating carrying and load hook
- 360° rotating manual chain
- Hook guard

Advantage:
- Can be used from all directions, even from above
- Side work outside the danger zone
- Horizontal drawing and clamping
- high operational reliability, low maintenance requirements
- Optimum sealing for protection against external soiling and damage

Technical data:
- Lift height: 3000 mm
- Number of load chains: 1 PCS
- Mandatory testing according to DGUV (UVV): No

PLANETA PREMIUM PRO chain hoist

Application:
The PREMIUM PRO chain hoist is the next development stage in the proven PREMIUM series and is a state-of-the-art product. Compared to its predecessors, it weighs considerably less and offers improved handling thanks to its more compact design. Despite its reduced weight, working stability has been improved thanks to its sophisticated design.

Advantage:
- Compact and lightweight
- Galvanised load chain in accordance with DIN EN 818-7-T
- Ball bearing-mounted chain sprocket shaft and cast hook safety mechanism

Technical data:
- Lift height: 3000 mm
- Length of lever: 2500 mm
- Mandatory testing according to DGUV (UVV): Yes

PLANETA PULLMASTER II chain hoist

Application:
The PLANETA PULLMASTER II chain hoist is the next development stage in the PULLMASTER series. It boasts a sturdy design combined with very compact dimensions. The asbestos-free safety brake features a reliable grip and retains the load securely in any position. The forged suspension and load hooks made from heat-treated, quenched and tempered steel are equipped with spring-loaded, zinc-plated hook safety mechanisms.

Advantage:
- Freely rotating hooks
- Load chain in accordance with EN-818-7-T
- Asbestos-free safety brake and sturdy steel housing

Technical data:
- Lift height: 3000 mm
- Length of lever: 2500 mm
- Mandatory testing according to DGUV (UVV): Yes

PLANETA PREMIUM PRO-E chain hoist

Application:
The new PLANETA PREMIUM PRO-E series is the next development stage in our reliable PREMIUM PRO chain hoist. Instead of using a hand chain, this chain hoist is powered by a cordless screwdriver. The material and corrosion protection remain at the same high standard. Work can now be completed with even less effort.

Advantage:
- Powered by cordless screwdriver
- Enclosed housing to protect against dust and dirt, zinc-plated load chain in accordance with EN 818-7-T
- 360° freely rotating suspension and load hooks, made of quenched and tempered steel

Delivery:
Cordless screwdriver not included

Notes:
Only operate in rechargeable battery or battery mode! Cannot be operated using pneumatic, hydraulic or mains powered means.

Technical data:
- Number of load chains: 1
- Mandatory testing according to DGUV (UVV): Yes

Yale Lever chain hoist (EN standard 818-7)

Made of sheet steel

Application:
For tensioning, hoisting, pulling and tying down.

Execution:
- Compact and robust sheet steel housing
- Smooth-running free-chaining feature for rapid load attachment
- 360° rotating carrying hook
- Chain end made of shatter-proof plastic
- Automatic threaded mechanical brake
- **Ident. No. 005–008:** Galvanised load chain in line with DIN EN 818-7 (quality class T)
- **Ident. No. 050–080:** Zinc-plated load chain in line with DIN EN 818-7 (quality class T)

Advantage:
- Requires low lifting power
- **Ident. No. 005–008:** Low tare weight
- **Ident. No. 050–080:** low tare weight

Technical data:
- Lift height: 1500 mm
- Mandatory testing according to DGUV (UVV): No

Lever chain hoist with ratchet mechanism (EN standard 818-7)

Made of sheet steel

Application:
For tensioning, hoisting, pulling and tying down.

Execution:
- Robust sheet steel housing (powder-coated)
- Galvanised load chain in line with DIN EN 818-7 (quality class T)
- Free-chaining feature for rapid passage of the unloaded chain
- Automatic operation, fully enclosed load pressure brake
- Reinforced hook protection

Advantage:
- Rapid passage of unloaded chain
- Suitable in industrial settings for lifting, pulling and tensioning
- Can also be used as a lashing device on lorries
- Vibration-resistant brakes
- Easy-release brakes, particularly when used as a lashing device

Technical data:
- Lift height: 1500 mm
- Number of load chains: 1 PCS

Yale Lever chain hoist YaleERGO 360

Hand lever with fold-out handle

Application:
the YaleERGO 360 ® redefines the world of hoists. the design of its revolutionary hand lever with an integrated foldable handle makes it possible to work efficiently in tight spaces for both lifting and pulling applications.

Execution:
- hand lever with integrated folding handle
- operating direction displayed on the lever
- smooth free-chaining feature
- reliable load management

Advantage:
- safe and comfortable body posture
- up to 30% reduction in pull force
- work up to 12 times faster
- functional design and maximum safety
- easy to maintain and inspect

Technical data:
- Lift height: 1500 mm
- Number of load chains: 1
- Mandatory testing according to DGUV (UVV): No

PLANETA PREMIUM PRO lever hoist

Application:
The PREMIUM PRO is the next development stage in the reliable PREMIUM lever chain hoist. Thanks to significantly reduced weight compared to its predecessor, it offers improved handling. The short hand lever allows for safe working even in confined spaces. Despite all of this, the frame has been reinforced compared to the predecessor model. The tried and proven quality also continues to ensure a long service life and its construction makes it highly robust.

Advantage:
- Industrial quality, robust and compact
- Ergonomic handle, additionally secured by screws
- With free-wheeling mechanism, chain end, powder coating and 1.5 m lift.

Technical data:
- Lift height: 1500 mm
- Mandatory testing according to DGUV (UVV): Yes

PLANETA PLX-III lever hoist

Application:
The PLX-III lever chain hoist is a versatile lifting and anchoring device and is also simple to operate. It can be used in the industrial sector, in the transport of goods, as an assembly tool and in construction and trade applications. The device excels with a high level of quality realised in series production and a long service life, even when subject to high loads.

Execution:
- **Simple free-wheeling mode**: Positioning the selector switch in the central position allows the unloaded chain to be pulled freely through the hoist
- **Practical chain end piece**: In addition to its function as a grip for positioning the chain, it also functions as an additional safety mechanism, as it cannot be pulled through the device with the chain
- **Robustness:** Galvanised screws, nuts and bolts prevent corrosion, even when used outdoors. The easy-grip, cast steel handwheel further enhances the robustness of the PLX-III lever chain hoist.
- **Rotating hooks**: The forged suspension and load hooks made from heat-treated, quenched and tempered steel are freely rotating and are equipped with spring-loaded, zinc-plated hook safety mechanisms.

Advantage:
- Industrial quality, completely zinc-plated and powder-coated
- With free-wheeling mechanism, chain end, powder coating and 1.5 m lift.
- Load chain in accordance with EN 818-7-T, integrated free-wheeling mechanism with precise guidance

Technical data:
- Mandatory testing according to DGUV (UVV): Yes

PLANETA PAH lever hoist

Application:
Thanks to its compact and lightweight design, the new PLANETA PAH aluminium lever chain hoist is an indispensable tool in industry and service. A closed, visually appealing die-cast aluminium housing protects the internal components from dirt. Equipped with two robust hook fasteners, the PAH meets all safety requirements and ensures safe working. The new robust chain end piece provides additional safety, as it prevents the chain from being pulled through the device. A release lever allows the chain to be pulled through quickly when not under load. Can be used in ambient temperatures from -20 °C to +60 °C. Hand lever with rubber handle (only for load capacities of 250 kg/500 kg). Standard lift is 1.5 m.

Advantage:
- Extremely lightweight and suitable for mobile use
- Closed aluminium die-cast housing with rotating load and carrying hook
- The upper and lower hooks are equipped with safety flaps

Delivery:
Incl. storage bag (for 250 and 500 kg versions)

Technical data:
- Lift height: 1500 mm
- Number of load chains: 1
- Mandatory testing according to DGUV (UVV): Yes

EEPOS ONE - the flexible crane system
Light. Flexible. Innovative

With the eepos crane systems from the eepos one aluminium modular system, loads of up to 2000 kg can be transported manually or mechanically with speed and accuracy.
Each eepos crane is made of standard elements and can be perfectly adapted to each individual workplace. Due to the high level of quality, an eepos crane system offers unparalleled smooth running and improves workplace ergonomics with lasting effect.
For transporting suspended loads in manufacturing plants, assembly halls or complete production lines, an eepos crane presents a fast and flexible solution that is 'made in Germany'.

Advantages of EEPOS ONE:
- Ergonomic, effortless work
- Low noise emissions
- Smooth running
- Intelligent modular system with a wide range of accessories
- Ensures that the highest level of quality and profitability is retained
- Acceleration of production, shortening of lead times and increase in operating speeds
- 5-year guarantee

Your eepos crane system in just a few steps:

Specify the number of single and double bridges.
Add up the total sum of the lifting load of all intended bridges.
Then select the appropriate starter module for the crane runway and supplement it with expansion modules until you have reached your desired length.
- Each starter module consists of 2 crane runway profiles with suspensions.
- Each expansion module consists of two crane runway profiles with suspensions and butt connections.
- 2.5 metres is specified as suspension distance. Other suspension distances are to be calculated again statically based on local conditions.

Rule of thumb: Note that a crane runway of at least 2 metres should be allowed for per bridge.

Overhead conveyors and suspension cranes from the KBK modular crane kit

From individual workstations to a complex material flow solution: With the Demag KBK system, your specific requirements can be precisely implemented. Quickly and efficiently. This modular system facilitates the combination of suspension cranes, overhead conveyors, pillar and wall-mounted slewing cranes. Due to the high flexibility of the system, KBK systems can also be integrated easily into any production infrastructure and can be retrofitted at any time.

KBK-Aluline

KBK-Steel

Workshop crane, hydraulic
Portable and collapsible

Application:
For lifting heavy loads in small spaces if the crane can move below the load. Ideal for removing and installing engines and for in-house transport.

Execution:
- Collapsible
- Collapsed storage area 350 x 400 mm
- No free overhang in front of wheels
- Mobile
- Load hook guard
- Pressure relief valve
- Drain valve with dead man's switch
- 2 steering rollers, 2 runners

Advantage:
- Extremely easy to store thanks to small collapsed dimensions
- Easy to move, 360° rotating steering wheels
- Crane boom adjustable in just a few simple steps

Technical data:
- Colour: Flame red RAL 3000

Workshop crane, hydraulic

Portable and collapsible, with extra-flat running gear

Application:
For lifting heavy loads in small spaces if the crane can move below the load. Ideal for removing and installing engines and for in-house transport. Particularly suitable for Euro pallets.

Execution:
- Collapsible
- Collapsed storage area 350 x 400 mm
- No free overhang in front of wheels
- Mobile, with extra flat running gear
- Load hook guard
- Pressure relief valve
- Drain valve with dead man's switch
- 2 steering rollers, 2 runners

Advantage:
- Extremely easy to store thanks to small collapsed dimensions
- Easy to move, 360° rotating steering wheels
- Crane boom adjustable in just a few simple steps
- Versatile use thanks to flat running gear

Technical data:
- Underclearance (E): 80 mm
- Colour: Flame red RAL 3000

Yale Roller trolley

Application:
Suitable for the insertion in all manual lifting devices.

Execution:
- Calculated in line with DIN 15018
- Complies with BGV D6 cranes
- Can be adjusted for various profiles (INP, IPE, IPB and other beam ranges)
- Low design height
- Accurate positioning thanks to lug arm with counter-thread
- Central suspension, permanently lubricated runners, sealed and mounted on ball bearing
- Anti-tipping mechanism and wheel failure supports fitted as standard

Technical data:
- Max. flange width: 220 mm

Load-carrying capacity (kg)		500	1000	2000

Prod. Gr. 7EE

Yale Roller clamp

Application:
Easy-mount assembly aids for attaching and moving loads on support profiles. Ideal for assembly and repair work. Easy to fix and remove.

Execution:
- Rapid adjustment to arm width by turning the central spindle
- Secure locking thanks to counter-lever
- Spindle and attachment straps galvanised for corrosion protection

Load-carrying capacity (kg)		1000	2000	3000
Min. flange width (mm)		60	75	75

Prod. Gr. 770

Lever clamp for vertical lifting
Load capacity up to 300 kg

Application:
For the safe lifting and transporting of sheet metal, supports and profiles.

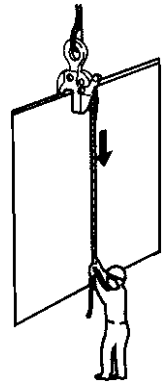
Execution:
- Safety lever which can be remotely unlocked with the supplied cable
- Corrosion-resistant
- All parts can be replaced
- High-quality materials and special steels
- Surface hardness up to a maximum of 30 HRC (300 HB)

Advantage:
- Optimum safety
- Low tare weight and high carrying capacity

Delivery:
Cable included

Notes:
Hoisting clamps with larger carrying capacities deliverable upon request.

Technical data:
- Colour: Yellow orange



Max. gripping width (mm)		19	25	30
Load-carrying capacity (kg)		1000	2000	3000
77180...	Ident. No.	310 ●	320 ○	330 ○

Prod. Gr. 770

Lever clamp for turning and vertical lifting
Load capacity up to 2000 kg

Application:
For the safe turning, lifting and transporting of sheet metal, supports and profiles, particularly suitable for use together (2 or more hoisting clamps).

Execution:
- Multi-directional suspension eyes
- Low tare weight and large gripping range
- Safety locking thanks to folding bolt mechanism with large operating ring
- Die-forged clamp body
- Toothed segment, counter-bearing and all additional functional parts made of alloyed special steel
- Surface hardness up to a maximum of 30 HRC (300 HB)

Advantage:
- Optimum safety
- Continues to function even if the clamps are not positioned in the pulling direction
- Can be used for many different purposes, user-friendly thanks to compact design
- Extremely durable

Notes:
The carrying capacity is reduced by 50% for oblique lifts of over 45°.

Technical data:
- Max. gripping width: 19 mm
- Load-carrying capacity: 1000 kg
- Colour: Yellow orange

Prod. Gr. 770

Spreader beam

Load capacity up to 5000 kg

Application:
For the safe and regulatory-compliant lifting of loads.

Execution:
- With 2 adjustable safety swivel hooks
- One-point suspension, suitable for load hooks in line with DIN 15401 etc.

Notes:
Non-adjustable; other lengths, higher carrying capacity and load turning devices for workpieces up to 10,000 kg deliverable upon request.

Technical data:
- Colour: Yellow orange

Permanent NEO lifting magnet

Threefold safety

Application:
For the secure lifting of sheet metals, profiles, panels, round- and bar-shaped parts or for loading and unloading machines.

Execution:
- With 2 longitudinal poles and vee block
- High-quality neodymium magnetic material
- Large load lug

Advantage:
- Large lifting capacity with low tare weight and small dimensions
- Robust, low-maintenance, user-friendly
- Easy to switch on and off using the hand lever, with safety lock

Delivery:
With test certificate

Technical data:
- Colour: Orange

Manual pick-up magnet

High magnetic force for unlimited period of time

Application:
For the safe manual transport of sheet metal and steel parts.

Execution:
- **Ref. no. 010** for thin sheets and small pieces.
- **Ref. no. 020** particularly for medium- and large-sized sheets (most popular model).
- **Ref. no. 030** for thick plates, heavily scaled plates, heavy workpieces.

Advantage:
- Entirely maintenance-free
- Permanently high magnetic force
- No magnetisation of workpieces

Notes:
Full adhesive force is only possible on workpieces with a smooth, flat and clean surface, easily magnetisable substances and sufficient thickness. Only around 1/3 of the adhesive force will be achieved for scaled surfaces.

Load-carrying capacity (kg)		120	170	300

Prod. Gr. 7EF

Crane pick-up magnet

High magnetic force for unlimited period of time

Application:
For the safe transport of sheet metal and steel parts by crane.

Execution:
- With a crane lug for crane operation
- For horizontal and vertical lifting
- Attached sheets of metal can be swivelled from a vertical position to a horizontal position and vice versa
- Board format 1000 x 2000 mm requires only 1 magnetic claw, board format 1500 x 3000 mm requires 2 pieces together with one spreader. When working with stacks of metal sheets, only 1 sheet may be lifted at a time.

Advantage:
- Entirely maintenance-free
- Permanently high magnetic force
- No magnetisation of workpieces

Notes:
Full adhesive force is only possible on workpieces with a smooth, flat and clean surface, easily magnetisable substances and sufficient thickness. Only around 1/3 of the adhesive force will be achieved for scaled surfaces.

Technical data:
- Suitable for min. sheet metal thickness: 4 mm
- Surface area length: 290 mm

GRABO® Nemo Grabo Plus

Cordless vacuum lifter

Application:
For holding or carrying tiles, glass panes, metal sheets, chipboard and plasterboard as well as furniture and large appliances

Execution:
- The seal is made from a special chloroprene
- The vacuum pump installed in the handle generates the required vacuum pressure to hold the workpiece
- The installed manometer is used for monitoring

Advantage:
- Seal can be replaced quickly and cost-effectively if worn
- Additionally installed plastic pads provide more retention force when handling vertically

Delivery:
Grabo Plus, 1 battery, 1 charger, 1 rubber foam seal and 1 air filter

Technical data:
- Throughput: 16
- Number of suction heads: 1 PCS
- Max. battery operating time: 1.5 h
- Mandatory testing according to DGUV (UVV): Yes

Bohle Pump vacuum lifter

www.bohle-group.com

With vacuum safety indicator

Application:
For large loads up to 120 kg. Suitable for all materials and objects with gas-tight surfaces.

Execution:
- A true design highlight – in terms of both layout and convenience
- Vacuum safety indicator is clearly visible, even from a distance
- High-quality pump mechanism for particularly fast vacuum formation
- Large valve button for faster ventilation
- Wide grip for maximum comfort

Advantage:
- High load-bearing capacity
- Ergonomic
- Optimised vacuum display
- Robust plastic
- TÜV-GS certified

Technical data:
- Load-carrying capacity: 120 kg
- Direction of force: Parallel
- Material: Plastic
- Number of suction heads: 1 PCS
- Suction head diameter: 214 mm
- Number of pieces in assortment/set: 1 PCS

Hand vacuum lifter with a single aluminium suction head

www.bohle-group.com

Load capacity 30 kg

Application:
For the safe and secure lifting, carrying and holding of lightweight discs, sheets and panels.

Execution:
- Lever-type vacuum lifter

Advantage:
- One-handed operation possible
- For rapid and efficient working procedures
- Ergonomic handle
- "red dot" design award winner

Technical data:
- Load-carrying capacity: 30 kg
- Direction of force: Perpendicular
- Material: Aluminium
- Number of suction heads: 1 PCS
- Suction head diameter: 120 mm
- Number of pieces in assortment/set: 1 PCS

Longitudinal handle, load capacity 60 kg

Application:
For the safe and secure lifting, carrying and holding of discs, sheets and panels.

Execution:
- Veribor® quality vacuum lifter with two suction heads
- 60 kg load capacity with double safety factor
- For all gas-tight surfaces
- Body made of lead-free aluminium
- PAH-free rubber disc
- Tilt lever for vacuum lifter

Advantage:
- Ergonomic handle

Technical data:
- Load-carrying capacity: 60 kg
- Direction of force: Parallel
- Material: Aluminium
- Number of suction heads: 2 PCS
- Suction head diameter: 120 mm

Manual vacuum lifter set

www.bohle-group.com

Case contains 2 manual vacuum lifters with 1 aluminium suction head

Application:
For the safe and secure lifting, carrying and holding of lightweight discs, sheets and panels. With additional sealing lip for slightly convex or textured surfaces.

Execution:
- 2 manual vacuum lifters with 1 aluminium suction head
- Lever-type vacuum lifter
- Robust case

Advantage:
- Handy for protecting and storing vacuum lifters
- Vacuum lifter with ergonomic handle design
- One-handed operation possible
- For rapid and efficient working procedures

Technical data:
- Load-carrying capacity: 30 kg
- Direction of force: Perpendicular
- Material: Aluminium
- Suction head diameter: 120 mm

Tilt lever vacuum lifter

www.bohle-group.com

1-head vacuum lifter that can be operated using one hand

Application:
Ideal solution for small areas. Suitable for all materials and objects with gas-tight surfaces.

Execution:
- Tilt lever system can be operated using one hand
- High-quality, PAH-free rubber washer
- Retains its shape, but is just flexible enough to adapt to the surface under vacuum

Advantage:
- Simple, extremely fast handling
- Robust plastic
- Made in Germany

Technical data:
- Load-carrying capacity: 25 kg
- Direction of force: Perpendicular
- Material: Plastic
- Number of suction heads: 1 PCS
- Suction head diameter: 120 mm
- Number of pieces in assortment/set: 1 PCS

VERIBOR Tilt lever vacuum lifter, for curved surfaces

With two mobile swivel heads

Application:
Ideal solution for transporting or inserting curved materials such as front or rear windows in the automotive industry.

Execution:
- Slots in the swivel heads for very curved surfaces
- Large, non-slip gripping area
- Optimum power transmission thanks to a tilt lever with a wide surface – ergonomic and user-friendly
- High-quality, PAH-free rubber washer
- Retains its shape, but is just flexible enough to adapt to the surface under vacuum

Advantage:
- For curved surfaces
- Ergonomic
- Robust plastic
- Made in Germany

Technical data:
- Load-carrying capacity: 35 kg
- Direction of force: Parallel
- Material: Plastic
- Number of suction heads: 2 PCS
- Suction head diameter: 120 mm
- Number of pieces in assortment/set: 1 PCS

Without screw locking device

Snap hook with screw locking device (DIN 5299)

Zinc-plated

Application:
For the securing of loads and fixing of materials, as an accessory for wire cables and steel chains.

Execution:
- Galvanised
- With screw locking device

Notes:
Must not be used in conjunction with slings and must not be used for lifting loads!

Technical data:
- Surface: Zinc plated

With screw locking device

Chain quick-action closures

Application:
Allows chains to be connected and extended without fuss.

Execution:
- **Ident. No. 100–180:** Galvanised
- **Ident. No. 200–280:** Stainless steel

Notes:
Not to be used in connection with slings.

CARTEC Joker safety load hook

For round slings and hoisting slings

Application:
for connecting two slings or as the end sling point hook.

Execution:
- forged steel
- with a safety catch
- colour corresponds to CEN colour coding for textile slings
- hook opening designed to fit the usual sling points

Advantage:
- simple to use thanks to design and colour
- no risk of confusion
- particularly robust
- protects fabric lifting gear

Forklift hook, double

Application:
As an add-on unit for all types of stacker.

Execution:
- The rotating and pivoting compact hooks are attached outside the dovetail opening. Thereby, the dovetail opening can be fully utilised and there is no jamming of the stacker dovetail on inclined pulling
- Effortless conversion into a safe lifting device
- Double, can be locked on both fork arms via cross arms, load can be divided into 2 fork arms

Technical data:
- Design: Double
- B: 65 mm
- D: 100 mm
- Colour: Orange

CARTEC Ring bolt

Screw-in anchor point, can be rotated 360°

Application:
For the safe attachment of loads.

Execution:
- Forged, high-strength annealed
- 100% Magnaflux crack-tested in accordance with DIN EN 1677-1
- captive hexagon socket screw,
- can be rotated 360°
- designed for up to 20,000 strokes at full load
- Powder-coated surface: salmon-coloured

Advantage:
- 4-fold safety
- Can be set in the direction of force to avoid accidental unscrewing or overscrewing
- **Ident. No. 208–248:** Tool-free assembly

Delivery:

RUD® Vario ring bolt, Starpoint type VRS-F

Screw-in anchor point, can be rotated 360°

Application:
For the safe attachment of loads.

Execution:
- Forged, high-strength annealed
- 100% electromagnetically crack-tested in accordance with DIN EN 1677-1
- Patented 100% crack-tested hexagon socket screw, non-detachable
- can be rotated 360°
- Stated carrying capacity for adverse load area F
- Powder-coated surface: pink, fluorescent

Advantage:
- 4-fold safety
- Can be set in the direction of force to avoid accidental unscrewing or overscrewing
- Tool-free assembly

Delivery:
Includes annealed star profile key for tool-free assembly. Special lengths and other threads upon request.

CARTEC Sling swivel, quality class 8

Screw-in anchor point with ball bearing

Application:
Screw-on, rotating attachment point for lifting heavy loads that need to be rotated or turned. Suitable for safe lifting in accordance with Machinery Directive 2006/42/EC.

Execution:
- quality class 8 - compact, lightweight design, with DGUV certification
- with ball bearing for easier loading, loadable in all directions
- Can be rotated by 360°, swivel range of bracket max. 180°
- Red, powder-coated surface
- permanent rotation under full load not permitted

Advantage:
- 4-way safety in every load direction
- constructed, tested and certified according to GS-OA 15-04 – EN 1677

Delivery:
Carrying capacities up to 35 t and other dimensions deliverable upon request.

Notes:
with special thread or special thread length upon request.

Technical data:
- Colour: Red

Prod. Gr. 775

CARTEC Hoist ring, quality class 10

Application:
Attachment point for lifting loads.

Execution:
- Suitable for secure raising of loads according to Machinery Directive
- 2006/42/EC
- constructed, tested and certified according to GS-OA 15-04 – EN 1677
- DGUV certification
- Magnaflux crack tested to 100%
- can be rotated 360°

Advantage:
- load direction 90°, with minimal space requirement
- Durable corrosion protection of screw
- designed for a load of 20,000 load changes

Notes:
Caution: Anchor point not suitable for rotating under load! Articles are also available with special thread and special thread length.

RUD Vario hoist ring thread, type VLBG

Screw-in anchor point with folding, rotating load ring

Application:
For the safe attachment of loads in every load direction.

Execution:
- Patented 100% crack-tested, hexagonal bolt, BG tested, non-detachable
- Load bracket collapsible, rotates in all direction
- Integrated heat indicator: during inadmissible overheating over 350 °C the colour changes from pink to jet black

Advantage:
- 4-way safety in every load direction
- Load bracket carries the full load in every installation position

Delivery:
Carrying capacities up to 20 t and screws in special lengths deliverable upon request.

Notes:
On the construction side a thread or through hole suitable for the power line is necessary. Not suitable for rotating movements under load.

Technical data:
- Colour: Pink

Prod. Gr. 781

HALDER Lifting pins, self-locking

Application:
Quick pick-up of loads for safe transport by crane

Version:
- steel, manganese phosphate-plated
- stainless steel 1.4542, precipitation-hardened

Advantage:
- no thread required on the workpiece. can be used with bore holes H11
- locking bar on shackle to prevent accidental release
- fast load changes, efficient work

Technical data:
- W.L.L.: 275 kg
- Material of shackles: Steel tempered
- Surface of the shackle: Manganese phosphated
- Material of bolt: Steel tempered
- Material of spring: Corrosion resistant steel
- Material of push knop: Aluminium
- Locating bore hole diameter: 10 mm
- Max. temperature: 250 °C
- Design: Self-locking
- Operation: By pressing the button
- With corrosion protection: Yes

Prod. Gr. 7EC

HALDER Self-locking threaded support bolt

Quick and easy-to-use anchor point

Application:
For lifting loads. The threaded support bolt is inserted into a threaded hole and secures itself. In contrast to a ring screw, this eliminates time-consuming screwing and unscrewing.

Execution:
- Stop point with self-locking thread
- Shackles made of heat-treated steel, tempered, manganese phosphate-coated
- Stainless steel 1.4542 thread element, precipitation-hardened
- Movable shackle
- Loosen the safety bar to prevent accidental release
- High-strength, precipitation-hardened bolts
- Aluminium press stud
- TÜV tested – in accordance with DIN EN 13155

Advantage:
- Time savings of up to 95% compared to conventional ring bolts

Technical data:
- Material of shackles: Steel tempered
- Surface of the shackle: Manganese phosphated
- Material of bolt: Steel tempered
- Material of spring: Corrosion resistant steel
- Material of push knop: Aluminium
- Max. temperature: 250 °C
- Design: Self-locking
- Operation: By pressing the button
- With corrosion protection: Yes

CARTEC Ring bolt, rotating and mounted on ball bearing

Application:
Suitable for continuous rotary motion under full weight in axial tensile direction.

Execution:
- Suitable for secure raising of loads according to Machinery Directive
- 2006/42/EC
- constructed, tested and certified according to GS-MO 1504 – EN 1677
- DGUV certification
- can be rotated 360°
- 4-way safety in all load directions
- Magnaflux crack tested to 100%

Advantage:
- designed for a load of 20,000 load changes
- suitable for continual rotary motion

Notes:

Chain slings quality class 8, with shortening hooks (EN standard 818-2)

2-leg

Application:
For the safe and regulatory-compliant lifting of heavy loads.

Execution:
- High-strength, hardened and tempered chain, quality class 8
- Complete with safety load hooks
- Chain strands may be shortened using the hook

Advantage:
- High strength
- low tare weight
- High wear resistance
- Large range of accessories

RUD VIP attachment chains

Application:
For the safe and regulatory-compliant lifting of heavy loads.

Design:
- CrNiMo stainless steel, special tempering, quality class 10
- Bright fluorescent pink powder coating (VIP)
- VIP identification tag with integrated chain test gauge, to check the three discard criteria for attachment chains (diameter wear, pitch elongation and overloading)
- VIP Cobra safety hook with patented wear marks showing the legal discard state without measuring, gauge marks for measuring the width of the hook opening
- Integrated heat indicator: in the event of inadmissible overheating above 400°C, the colour changes to jet back and small bubbles form

Advantage:
- Up to 30% higher load-bearing capacity compared to quality class 8 with the same nominal chain thickness
- No confusion with other quality classes
- Resistant to external mechanical wear and damage
- Longer service life

Delivery:
1-stranded or longer designs, stronger chain diameter, carrying capacities up to 56 t upon request.

Hoisting sling with reinforced loops (EN standard 1492-1)

Made of polyester fabric

Application:
For the safe and regulatory-compliant lifting of loads.

Execution:
- Additionally printed with load capacity specification
- Tear-proof, double label sewn in
- Complies with EN 1492-1
- GS-tested
- Can be used between -40°C and +100°C
- with reinforced loops
- Two-ply lifting strap (B2)

Advantage:
- Low tare weight
- Versatile
- Durable and flexible fabric construction

Delivery:
including instructions for use and declaration of conformity

Prod. Gr. 786

SpanSet® SupraPlus round sling with extremely robust hose cover (EN standard 1492-2)

Made of polyester fabric

Application:
For the safe and regulatory-compliant lifting of loads, for daily use and extreme usage conditions.

Execution:
- Textile wire-reinforced hose sleeve
- Ribbed reinforcement of hose sleeve made of high-performance polyester
- Embossed weaving in of carrying capacity

Advantage:
- Compact, long service life thanks to low wrinkle formation and small support area
- Significantly higher usage time: double the resistance to wear and multiple resistance to cuts thanks to ribbed reinforcement
- Special hose sleeve prevents almost all damage or tearing
- Increased working safety thanks to embossed weaving in of carrying capacity

Delivery:
Other lengths deliverable on request.

Notes:
Return or exchange of goods excluded for product liability reasons.

Technical data:
- Material: PES - Polyester
- Approval mark: GS certified safety

CARTEC Joker safety load hook

For round slings and hoisting slings

Application:
for connecting two slings or as the end sling point hook.

Execution:
- forged steel
- with a safety catch
- colour corresponds to CEN colour coding for textile slings
- hook opening designed to fit the usual sling points

Advantage:
- simple to use thanks to design and colour
- no risk of confusion
- particularly robust
- protects fabric lifting gear

Ratchet lashing strap with long-lever lashing ratchet, 5,000 daN in the strapping

Claw hook

Application:
For lashing down with high pre-tension force, suitable for lorry freight and transporting heavy goods.

Execution:
- Made of 100% polyester, 2 pieces
- Lever 350 mm, 20 teeth

Advantage:
- Long lever and optimum transmission
- Easy to use—high pre-tension force

- Suitable for use as a pull or push ratchet
- Can be converted in just a few simple steps

Notes:
Other designs and lengths upon request.

Technical data:
- Restraint assembly design: Two parts, with claw hook and long lever
- Width: 50 mm
- Pre-tensioning force STF: 500 daN
- Permissible LC tensile force when pulled directly: 2500 daN
- Permitted tensile force LC in the strapping: 5000 daN

Prod. Gr. 775

Lashing strap reel

For max. strap width 50 mm and max. strap length 10 m

Application:
For rapid retraction and neat stowage of lashing straps up to 10 m long.

Execution:
- Extremely simple retraction function:
- 1. Fit the base plate to the truck once
- 2. Push the reeling-in mechanism into the base plate
- 3. Reel in the belt strap
- 4. Pull off the belt strap
- 5. Store the belt strap
- 6. Remove the reeling-in mechanism and store it in the case

Advantage:
- Prevents lashing straps becoming tangled and can be neatly stowed away, saving time
- Rapid and practical solution for reeling in and storing lashing straps

Delivery:
Lashing strap retractor, base plate

77206...	Ident. No.	660 ●

Prod. Gr. 775

Non-slip mats

Made of granulate fibre

Application:
Ref. no. 703: For optimum load securing in accordance with Article 220, StVO and VDI 2700 (Sheet 14+15). For transport, storage and logistics, as well as in industry and production. Proven protection against slipping, scratches or rolling away. Also ideal as a non-slip cover and support for drawers, shelves, boxes, on sloped surfaces etc.

Version:
- Highly tear-resistant
- closed surface
- 4.5 mm thick
- Extremely strong reinforced inner fabric with durable non-slip coating
- Tested friction coefficient of μ 1.49 at 500 kg/m2 up to μ 0.94 at 10 tonnes/m2
- Tested and certified several times by FLOG and Fraunhofer IML and DEKRA

Advantage:
- No breaking or crumbling, so can be used for many years
- Can be used multiple times and easy to roll
- Easy handling thanks to low
- weight
- Exceeds all requirements of the VDI Regulations and of Article 22, StVO
- Washable at up to 60°, easy to cut to size and food safe.

Technical data:
- Material thickness: 8 mm

DICK File and rasp sets

Application:
For general and rough filing and rasping work on steel, iron and non-ferrous metals in industry, skilled trades and hobby use.

Execution:
- **Ident. No. 002:** Cut 2, shapes: flat blunt-ended, half-round, triangular, round, half-round rasp with beech handle.
- **Ident. No. 005:** Cut 2, shapes: flat blunt-ended, half-round, triangular, round, half-round rasp, with plastic handle.

Delivery:
Ident. No. 002: 1 x flat blunt-ended, half-round, triangular, round flat hand engineer's file, half-round rasp, with beech handle, in robust textile tool roll
Ident. No. 005: 1 x flat blunt-ended, half-round, triangular, round flat hand engineer's file, half-round rasp, with plastic handle, in plastic pouch

Technical data:
- File blade length: 200 mm
- File cut: 2
- Number of pieces in assortment/set: 5 PCS

DICK Flat universal file

Application:
For rough and fine manual material removal on all materials.

Execution:
- Rough face for preliminary filing, when removing particularly large amounts of metal
- Fine face for retouching work, for fine machining of surfaces

Advantage:
- Ideal for universal use due to two different flat faces
- With special cut designed for cast iron, steel (also stainless steel), non-ferrous metals and soft metals, plastics and wood

File blade length (mm)		200	250
Width (mm)		20.0	25.0
Thickness (mm)		5.0	6.3
51470...	Ident. No.	**200** ●	**250** ●

Prod. Gr. 6AD

DICK Milled flat blunt-ended file

Application:
For manual material removal on light and soft metals (aluminium, lead, tin), synthetic resin, wood, leather, marble and horn.

Execution:
- Helical toothing, uniform rough toothing on both faces
- Narrow faces uncut
- Made of chrome-alloy steel

Advantage:
- High removal performance and favourable chip removal

Technical data:
- File cut: 1
- Thickness: 6.3 mm

File blade length (mm)		250	300
Width (mm)		25.0	30.0
51520...	Ident. No.	**125** ●	**130** ●

DICK Covered files and bodywork files

Application:
Ident. No. 130–135: For manual material removal on light and soft metals (aluminium, lead, tin), synthetic resin, wood, leather, marble and horn.
Ident. No. 230–235: For manual material removal on steel with a strength of less than 800 N/mm², steel casting, chilled casting, copper, brass and bronze.

Execution:
- Made of chrome-alloy steel
- Flat blunt-ended
- **Ident. No. 130–135:** radial cut on both sides, nine teeth per inch
- **Ident. No. 230–235:** radial cut on both sides, 12 teeth per inch

Technical data:
- Thickness: 4.0 mm

Plastic, with spring-action collet chuck and clamping knob

Application:
For needle and diamond files, scrapers, reamers and countersinks.

Advantage:
- Fast, easy tool change with secure fastening

Technical data:
- Length: 95 mm
- Material: Plastic

Min./max. clamping Ø		1.1-2.1 mm	2.0-3.1 mm	3.0-4.0 mm
51409...	Ident. No.	010 ●	015 ●	020 ●

Prod. Gr. 6AE

ATORN Grinding files (honing rods) (ISO 525)
Corundum

Application:
For deburring or rounding hardened steel.
For use in mould and tool construction, mechanical and equipment engineering.

Execution:
- hard bonding
- after baking, processed on all sides

Advantage:
- more edge-resistant and wear-resistant than the SiC version due to high bonding hardness

Notes:
Use with water or thin oil

Technical data:
- Material of abrasive medium: Pink fused aluminium oxide

ATORN Bench stones (ISO 525)
White and pink corundum

Application:
For sharpening and re-machining tools for wood, metal and plastic processing, e.g. machine and plane knives, steels, scrapers, reamers and gauges as well as measuring equipment.

Execution:
- hard bonding
- after baking, processed on all sides

Notes:
Use with water or thin oil

Technical data:
- Form: Rectangular
- Number of pieces per packet: 1

ATORN Bench combination stones (ISO 525)

Corundum

Application:

Ident. No. 200–230: For sharpening and re-machining tools for metal, wood and plastic processing, e.g. machine and plane knives, steels, scrapers, reamers and gauges as well as measuring equipment.

Ident. No. 240: For sharpening and re-machining tools for metal, wood and plastic processing, e.g. machine and plane knives, steels, scrapers, reamers and gauges as well as measuring instruments.

Execution:

- **Ident. No. 200–230:**
  - with coarse and fine side
  - hard bonding
  - after baking, processed on all sides
- **Ident. No. 240:**
  - With coarse and fine side
  - Hard binding
  - After burning, processed on all sides

Advantage:

- **Ident. No. 240:** Especially suitable for knives and fine cutting

Notes:

Use with water or thin oil

Technical data:

- Form: Rectangular
- Number of pieces per packet: 1

LAPPORT SCHLEIFTECHNIK INDIGA composite bench stone (ISO 525)

One rough side and one fine side (K100/400), type 9010

Application:

For sharpening and reworking tools for wood, metal and plastic processing, e.g. scrapers, machine and plane knives, steels, reamers and gauges as well as measuring instruments.

Execution:

- Best used with thin-bodied oil, petroleum or water
- Machined and wetted on all sides after burning

Advantage:

- High endurance and grinding force

Technical data:

- Form: Rectangular
- Number of pieces per packet: 1 PCS
- Material of abrasive medium: Corundum

Ident. No. 010–020, 030–035

LAPPORT SCHLEIFTECHNIK Record block combination bench stones (ISO 525)

One rough side and one fine side (K150/K500), type 9010

Application:

Record blocks must be soaked in water or better still stored in water.

Advantage:

- The uniform, precision texturing affords the stone delicate-grinding properties

Technical data:

- Form: Rectangular
- Thickness: 20 mm
- Number of pieces per packet: 1 PCS
- Material of abrasive medium: Fused aluminium oxide

Ident. No. 050–070

ATORN Grinding files (honing rods) (ISO 525)

Silicon carbide

Application:
For sharpening and re-machining tools for metal, wood and plastic processing, e.g. machine and plane knives, steels, scrapers, reamers and gauges as well as measuring equipment. Made notably of carbide.

Execution:
- made of high-purity silicon carbide
- after baking, processed on all sides
- medium-hard bonding

Advantage:
- More abrasive bonding than corundum files
- pronounced self-sharpening effect
- also suitable for carbide
- Green silicon carbide - the hardest abrasive grain after diamond/CBN

Notes:
Use with water or thin oil

Technical data:
- Material of abrasive medium: Green silicon carbide

ATORN Shaped stones (ISO 525)

Silicon carbide

Application:
Ident. No. 050–055: For the sharpening and re-machining of curved cutting edges (different radii) and wedge-shaped cutting edges
Ident. No. 060–062: For the sharpening and re-machining of curved cutting edges (e.g. hollow gouging chisels)
Ident. No. 070–072: For the sharpening and re-machining of wedge-shaped cutting edges (e.g. wedge-shaped chisels)

Execution:
- made of high-purity silicon carbide
- after baking, processed on all sides
- **Ident. No. 050–055:** with different radii and different edge thicknesses
- **Ident. No. 060–062:** with two different radii for machining different cutting edges
- **Ident. No. 070–072:** with different edge thicknesses

Advantage:
- Green silicon carbide - the hardest abrasive grain after diamond/CBN

Notes:
Use with water or thin oil

Technical data:
- Number of pieces per packet: 1
- Material of abrasive medium: Green silicon carbide

DEGUSSIT bench stone (ISO 525)

Type 9010

Application:
For all grinding, deburring and precision grinding work, for resharpening all kinds of tools and for machining hard or abrasive materials such as quartz, glass or ceramics.

Execution:
- Mixed crystal, the main component of which is aluminium oxide, no bonding agent
- **No. 69360–69361:** Typically red colour due to chrome oxide additives
- **No. 69365:** Typical red colour due to chromium oxide additives

Advantage:
- High resistance to wear and changes in shape due to the hardness of the crystals
- Achieves excellent surface finish and accuracy of shape during precision work

Delivery:
No. 69360–69361: In case
No. 69365: Bonded into wooden box

Notes:
Wet or dry machining possible

Prod. Gr. 6HD

DEGUSSIT pencil file (ISO 525)

60° point, type 9030 B

Application:
For all grinding, deburring and precision grinding work, for resharpening all kinds of tools and for machining hard or abrasive materials such as quartz, glass or ceramics.

Execution:
- Mixed crystal, the main component of which is aluminium oxide, no bonding agent
- Typical red colour due to chromium oxide additives

Advantage:
- High resistance to wear and changes in shape due to the hardness of the crystals
- Achieves excellent surface finish and accuracy of shape during precision work

Delivery:
In case

Notes:
Wet or dry machining possible

Technical data:
- Length: 100 mm
- Diameter: 5 mm
- Number of pieces per packet: 1 PCS

Form	Pointed	
Surface structure	Fine	
	69382... Ident. No.

Prod. Gr. 6HD

DEGUSSIT mini files

Complete range

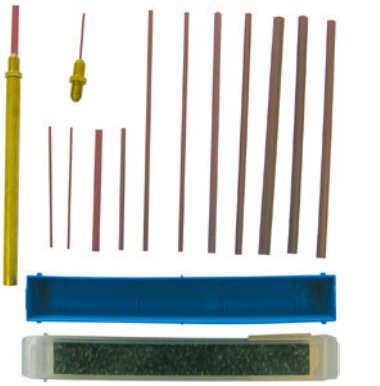
Application:
For all grinding, deburring and precision grinding work, for resharpening all kinds of tools and for machining hard or abrasive materials such as quartz, glass or ceramics.

Execution:
- consisting of: 2 x triangular (50 x 2, 100 x 3), 2 x square (50 x 1, 100 x 2), 1 x flat (50 x 3 x 0.3), 3 x round (50 x 1, 100 x 2, 100 x 3), 1 x half-round (100 x 5 x 1.5), 1 x oval (100 x 5 x 1.5), 1 (100 x 4 x 1.5)
- Mixed crystal, the main component of which is aluminium oxide, no bonding agent
- Typically red colour due to chrome oxide additives

Advantage:
- High resistance to wear and changes in shape due to the hardness of the crystals
- Achieves excellent surface finish and accuracy of shape during precision work

Delivery:
Includes 1 holder and 2 mountings as well as 11 files

Notes:
Wet or dry machining possible



69390...	Ident. No.	010 ●

Prod. Gr. 6HD

DEGUSSIT grinding file assortment

Application:
For all grinding, deburring and precision grinding work, for resharpening all kinds of tools and for machining hard or abrasive materials such as quartz, glass or ceramics.

Execution:
- Includes 1 of each grinding file: triangular 100 x 10 mm medium grain, square 100 x 10 mm medium grain, square 100 x 8 x 6 mm fine grain, half-round 100 x 10 mm rough grain, round 100 x 6 mm medium grain
- Mixed crystal, the main component of which is aluminium oxide, no bonding agent
- Typically red colour due to chrome oxide additives

Advantage:
- High resistance to wear and changes in shape due to the hardness of the crystals
- Achieves excellent surface finish and accuracy of shape during precision work

Delivery:
In cardboard box

Notes:
Wet or dry machining possible

ARKANSAS bench stones (single)

Very fine surface structure, type 9010

Application:
For fine grinding and honing of tools for optical, watchmaking, engraving and precision engineering workshops as well as of knives and surgical instruments.

Execution:
- For use with thin-bodied oil or petroleum
- **No. 69450:** Natural size fluctuations possible

Advantage:
- Finest and most even natural grain structure

Delivery:
No. 69450: In cardboard box
No. 69451: Bonded into polished wooden box

Technical data:
- Number of pieces per packet: 1 PCS

ATORN Cutting disc INOX/STEEL

with outstanding performance

Application:
For burr-free cutting of thin-walled pipes, sheet steel and profiles.

Execution:
- Ideal for power tools with high drive power.
- Stainless steel, steel

Advantage:
- Low burr formation
- High cutting speed
- Low sparking
- Ideal for power tools with high drive power.

Technical data:
- Bore diameter: 22.23 mm
- Material to be processed: Steel | Stainless steel
- Free from iron and sulphur: Yes
- Number of pieces per packet: 25 PCS
- Removal performance (points system): 4 of 4 points
- Service life (points system): 4 of 4 points

ALU cutting disc

Specially designed for use on aluminium and non-ferrous metals such as copper, brass and bronze

HIGHLIGHT

Application:
The cutting disc is especially suitable for use on aluminium and other non-ferrous metals such as copper, brass, bronze etc. as well as steel (black steel, structural steel, St37, S235JR, 1.0037 or carbon steel) and cast steel. Impressive full cuts with aggressive, easy and fast cutting. The disc is characterised by low sparking, low dust formation and outstanding smooth running.

Execution:
- Extra-thin cutting disc with a long service life and optimal cutting performance
- High cutting speed and smooth running
- Low burr formation

Advantage:
- Extra-thin cutting disc, specially designed for aluminium and non-ferrous metals
- Ideal for power tools with low drive power

Technical data:
- Tool holding device: M14
- Bore diameter: 22.23 mm
- Material to be processed: Aluminium | Non-ferrous metal | Steel | Cast steel
- Free from iron and sulphur: No
- Number of pieces per packet: 25
- Removal performance (points system): 4 of 4 points
- Service life (points system): 3 of 4 points

ALL IN ONE cutting disc

Extra-thin cutting with a single disc for almost all materials

HIGHLIGHT

Application:
The extra-thin cutting disc is ideal for precise and clean cuts in various materials, from structural steel to stainless steel, and offers a long service life. It is suitable for angle grinders of all performance classes as well as for battery-operated models, which makes it flexible and efficient when used on construction sites and in workshops. Its universal use on construction sites, for machining zinc-plated components, cable ducts, profiles and other materials makes it an indispensable tool for precise cutting!

Execution:
- Extra-thin cutting disc with a long service life and high cutting performance
- Suitable for a wide range of materials
- Aggressive cutting with low sparking and impressive smooth running

Advantage:
- Extra-thin cutting disc with a long service life for a wide range of applications
- Ideal for power tools with low drive power

Technical data:
- Tool holding device: M14
- Bore diameter: 22.23 mm
- Material to be processed: Steel | Stainless steel | Aluminium | Ceramics | Non-ferrous metal | Cast metal
- Free from iron and sulphur: Yes
- Number of pieces per packet: 25
- Removal performance (points system): 3 of 4 points
- Service life (points system): 3 of 4 points

Prod. Gr. 6CI

ATORN DUO ALL IN ONE cutting/roughing disc

Extra-thin cutting and roughing with a single disc for almost all materials

HIGHLIGHT

Application:
The DUO ALL IN ONE disc combines the properties of a cutting disc and a roughing disc, which means that it can be used for both the cutting and coarse grinding of workpieces. It is ideal for applications that require both precise cutting and the removal of excess material. By combining both functions, the combination disc saves time and increases flexibility on the construction site or in the workshop.

Execution:
- Extra-thin cutting and roughing with a single disc
- Suitable for a wide range of materials
- Safe due to three full-surface fabric layers

Advantage:
- Enables cutting/grinding work in a single operation - with a disc thickness of 1.9 mm.
- Ideal for power tools with low drive power

Technical data:
- Tool holding device: M14
- Bore diameter: 22.23 mm
- Material to be processed: Steel | Stainless steel | Aluminium | Ceramics | Non-ferrous metal | Cast metal
- Free from iron and sulphur: Yes
- Number of pieces per packet: 25
- Removal performance (points system): 3 of 4 points
- Service life (points system): 3 of 4 points

PFERD TOOLS SGP-STEELOX cutting discs for steel and stainless steel

Type - A 60 S BF

Application:
For burr-free cutting of sheet metals, steel sections and solid materials with cool cutting.

Execution:
- Very robust, high-performance Special Line SGP design with maximum cutting performance and outstanding service life

Advantage:
- Can be used universally on steel and stainless steel (INOX)
- Fast work progress owing to high cutting efficiency
- Specially optimised for use on thin sheet metal and profiles

Technical data:
- Bore diameter: 22.23 mm
- Design: Hard
- Free from iron and sulphur: Yes
- Number of pieces per packet: 25 PCS
- Removal performance (points system): 4 of 4 points

PFERD TOOLS Diamond cutting discs for CFRP/GFRP

for angle grinders or straight die grinders

Application:
For cutting and trimming fibre-reinforced plastics (CFRP/GRP) on straight grinders (with clamping mandrel)

Execution:
- Single-layer, zinc-plated diamond cutting disc with side protection segments
- Total disc width 2.0 mm, steel blade 1.0 mm
- Type 1A1

Advantage:
- Also suitable for cutting hard materials such as carbide or technical ceramics

Technical data:
- Washer thickness: 2 mm
- Design: Straight
- Number of pieces per packet: 1
- Removal performance (points system): 4 of 4 points
- Service life (points system): 4 of 4 points

Application:
For heavy grinding applications, such as chamfering/bevelling, slag/rolling skin removal, welding seam and edge machining

Execution:
- With precision-shaped ceramic abrasive grain for high grinding performance and long service life

Technical data:
- Bore diameter: 22.23 mm
- Form: Cranked
- Free from iron and sulphur: Yes
- Number of pieces per packet: 10
- Removal performance (points system): 3 of 4 points
- Service life (points system): 3 of 4 points

RHODIUS TOPLINE XTK 35 Cross cutting and grinding discs
Type A 46 U 9 BF 1432, for stainless steel

Application:
For cutting, deburring, chamfering and grinding as well as for preparatory and finishing work on weld seams.

Advantage:
- Cutting and grinding work in a single operation. Saves time and costs: no work interruptions due to conversion or machine changes

- Protection against age-related power loss thanks to HydroProtect formula

Technical data:
- Washer thickness: 1.9 mm
- Bore diameter: 22.23 mm
- Design: Hard
- Free from iron and sulphur: Yes
- Number of pieces per packet: 25 PCS
- Removal performance (points system): 3 of 4 points
- Service life (points system): 3 of 4 points

PFERD TOOLS CC-GRIND-ROBUST

SGP STEELOX special range for steel and stainless steel

Application:
Trim the CC-GRIND-ROBUST on sharp metal edges, files or with indexable inserts.

Execution:
- High performance in use provides ultimate economic efficiency
- PFERD's triangular, precision-shaped abrasive grain achieves a uniquely high grinding performance

Advantage:
- Ultimate aggressiveness for ultra-fast work progress.
- Fibreglass-reinforced plastic backing pad guarantees equally robust and safe use.
- Considerably more ergonomic than a roughing disc: Noise, vibration and dust are significantly reduced. In addition, a significantly better surface is achieved.

Technical data:
- Bore diameter: 22.23 mm
- Removal performance (points system): 4 of 4 points
- Service life (points system): 4 of 4 points

ATORN Abrasive flap disc - for extreme sanding and grinding work

with self-sharpening ceramic abrasive grain, tool carrier made of fibreglass

Application:
Universally applicable for all steel grinding tasks

Execution:
- Optimised performance ensures a long service life and optimal utilisation until the end
- Consistently high performance thanks to optimised fabric backing
- High stability thanks to fibreglass backing
- Proven safety that goes far beyond the requirements of the oSa guidelines and the EN 13743 safety standard

Technical data:
- Bore diameter: 22.23 mm
- Max. rotation speed: 13300 rpm
- Number of pieces per packet: 10 PCS
- Material to be processed: Steel | Stainless steel

Prod. Gr. 6CH

ATORN Abrasive flap disc - for universal sanding and grinding work on steel and VA steel

with high-tech zirconia fabric, tool carrier made of high-tech natural fibre

Application:
For deburring, derusting, fettling and for pre/post-machining of welding seams.

Execution:
- Carrier disc can be fully trimmed; fully usable disc

Advantage:
- Natural fibre backing disc for flexible, low-vibration work
- fibreglass- and resin-free - self-trimming
- Backing disc made from natural fibre compound protects the environment and the user (CO2 neutral)

Technical data:
- Bore diameter: 22.23 mm
- Number of pieces per packet: 10 PCS
- Material to be processed: Steel | Stainless steel

ATORN Abrasive flap disc - high-quality and suitable for universal use

with zirconia alumina, tool carrier made of fibreglass, for steel/stainless steel

Application:

Ident. No. 541, 561, 581, 641, 651, 661, 681: For deburring, derusting, fettling and for pre/post-machining of welding seams.

Ident. No. 546, 566, 586, 646, 656, 666, 686: For smoothing, derusting, grinding and similar surface applications.

Execution:

- Iron and sulphur-free

Advantage:

- high cutting performance for increased material removal
- with OSA approval - greater safety due to regular independent product tests

Technical data:

- Bore diameter: 22.23 mm
- Number of pieces per packet: 10 PCS
- Material to be processed: Stainless steel | Steel

ATORN High-performance abrasive flap disc with easy-to-trim plastic backing

with zirconia alumina, for stainless steel/steel/cast iron

Application:

The sanding disc is ideal for all sanding and deburring work, whether for intensive stock removal or for the removal of light burrs and welding seams.

The flexible, food-safe ABS plastic backing pad ensures a uniform sanding finish and precise machining.

Advantage:

- High-tech ZIRCONIUM fabric enables faster and more efficient sanding for longer
- TOPSIZE cooling agent coating for up to 50 % higher stock removal rates and longer service life
- Backing pad made of food-safe, flexible special plastic; easy to trim, flexible and vibration-damping
- Replaces both fibre discs and roughing discs in many companies
- Suitable for universal use on steel, cast iron and stainless steel. For surface and edge sanding, coarse and intermediate sanding, machining fillet welds, derusting, deburring and dressing cast parts

Technical data:

- Bore diameter: 22.23 mm
- Number of pieces per packet: 10 PCS
- Material to be processed: Stainless steel | Steel | Cast metal

ATORN Non-woven combination disc 3 in 1

A-MEDIUM/K80

Application:

For direct use on variable-speed angle and fillet weld grinders. TIG weld seam machining, surface and contour sanding, deburring work.

Execution:

- Sanding welding seams
- Matching
- Finish sanding

Advantage:

- The specialist for welding seam removal and finishing in one step:
- Enormous time savings (extreme reduction in work steps)
- Sanding welding seams and finishing in one step
- Constant, low Ra value (high surface quality)
- No change in shape during sanding, no clogging

Technical data:

- Grid size: 80
- Bore diameter: 22.23 mm
- Material of abrasive medium: Ceramic grain
- Material to be processed: Stainless steel | Steel | Aluminium | Brass | Copper | Bronze

ATORN Abrasive flap disc X-LOCK

Zirconia alumina

Application:
Universal grinding, surface grinding, abrasive grinding and edge machining. Ideal for surface grinding on steel and stainless steel.

Execution:
- X-LOCK quick-action clamping system
- Robust fibreglass backing pad for optimal contact pressure

Advantage:
- Long service life
- Fast machining
- Robust fabric backing

Notes:
X-LOCK abrasive flap discs are backwards compatible and can also be used on conventional angle grinders.

Technical data:
- Tool holding device: X-LOCK
- Bore diameter: 22.23 mm
- Max. rotation speed: 12250 rpm
- Number of pieces per packet: 10 PCS
- Material to be processed: Steel | Stainless steel
- Service life (points system): 2 of 4 points

3M Cubitron II abrasive flap disc

made of precision-formed ceramic abrasive grain, tool carrier made of fibreglass

Application:
For deburring, removing rust, fettling and for preparatory and finishing work on weld seams.

Advantage:
- Higher removal performance and aggressive grinding thanks to precision grain
- Special coating ensures cool grinding

Technical data:
- Bore diameter: 22.23 mm
- Number of pieces per packet: 10 PCS

3M Abrasive flap disc 769F

with 3M precision grain and durable polyester backing

Application:
Covers a wide range of applications from post-processing and chamfering through to surface preparation. Ideal for use on carbon steel, stainless steel and other heat-sensitive alloys.

Execution:
- With 3M precision grain and durable polyester carrier

Advantage:
- Precision-shaped ceramic abrasive grain allows for exceptional removal at a lower contact pressure
- Proven to be more powerful than conventional zirconia alumina flap wheel discs

Technical data:
- Washer diameter: 125 mm
- Bore diameter: 22.23 mm
- Max. rotation speed: 12000 rpm
- Number of pieces per packet: 10 PCS

Abrasive flap disc SLTT - extremely robust

with zirconia alumina, tool carrier made of steel, for steel/non-ferrous metals

Application:
For plastering, smoothing, deburring, derusting and processing of welding seams

Execution:
- Robust support plate made of steel
- Extremely resistant grain with high compressive strength

Advantage:
- Optimised for universal use on different steels and aluminium
- High flexibility and abrasive capacity whilst retaining uniform grinding pattern and low noise emissions
- Extremely robust thanks to steel carrier

Technical data:
- Bore diameter: 22.23 mm
- Number of pieces per packet: 10 PCS

Abrasive flap discs

made of zirconia alumina, tool carrier made of plastic, for stainless steel/steel/cast iron

Application:
For smoothing, removing rust, grinding and similar surface applications.

Execution:
- CAL zirconium: Cooling agent layer for cooler grinding

Advantage:
- Highly elastic backing adapts perfectly to the workpiece surface
- For especially smooth and flat surfaces, such as for surface grinding of large plants

Technical data:
- Bore diameter: 22.23 mm
- Number of pieces per packet: 10 PCS

RHODIUS See-through abrasive flap discs VISION

with zirconia alumina, tool carrier made of fibreglass

Application:
For direct abrasion inspection when deburring, chamfering, sanding and during preparatory and finishing work on weld seams.

Advantage:
- Clear view of the workpiece. Thanks to its three slots, the abrasive flap disc becomes transparent
- Reduces costly machining errors by controlled material removal

Technical data:
- Bore diameter: 22.23 mm
- Number of pieces per packet: 10 PCS

PFERD TOOLS Flap disc POLIFAN SG POWER STEELOX X-LOCK

with zirconia alumina, tool carrier made of fibreglass, for steel/stainless steel

Application:
For deburring, chamfering, edge finishing and welding seam machining. Also suitable for surface grinding.

Execution:
- With X-LOCK mount for convenient and fast tool change
- Maximum aggressiveness over the entire service life

Advantage:
- Fast progress and maximum efficiency through aggressive cutting performance
- Creates a consistently high surface quality over the entire service life

Notes:
X-LOCK flap wheel cutting discs are backwards compatible and can also be used on conventional angle grinders.

Technical data:
- Washer diameter: 125 mm
- Tool holding device: X-LOCK
- Bore diameter: 22.23 mm
- Max. rotation speed: 12200 rpm

ACTIROX fibre disc

Ceramic abrasive grain, full synthetic resin bonding, base material vulcanised fibre

Application:
Maximum performance in the machining of superalloys, stainless steels, carbon steels and aluminium

Execution:
- With geometrically shaped ceramic abrasive grain
- With extremely durable and shape-retaining vulcanised fibre base

Advantage:
- Faster grinding and very long service lives significantly increase productivity
- More than double the rate of material removal in comparison to conventional ceramic grain abrasives
- Maximum performance with superalloys and stainless steels, thanks to optimum grain distribution density
- Cool grinding and extended service life due to the VSM TOP SIZE active grinding extra layer

787C fibre discs - for stainless steel

Ceramic abrasive grain, full resin bond, dense grain distribution

Application:
For machining stainless steel welding seams in metalworking shops and sheet metal processing plants.

Execution:
- Backing produced from very robust, hornlike vulcanised fibre

Advantage:
- Excellent service life and erosion performance for stainless steels, particularly at low and medium pressures
- Special design ensures a low temperature development in stainless steels known to have poor thermal conductivity

Technical data:
- Bore diameter: 22.23 mm
- Number of pieces per packet: 25 PCS

Cubitron™ II fibre discs

Ceramic abrasive grain, full resin bond, half-open grain distribution - precision-formed ceramic abrasive grains for absolute sharpness

Application:

For sharp grinding, especially suitable for general metal working such as weld seam preparation, machining of cast and flame-cut parts and polishing.

Execution:

- Can be used in conjunction with a support plate no. 76206
- Backing produced from very robust, hornlike vulcanised fibre

Advantage:

- High degree of sharpness owing to precision-formed ceramic grains
- Very long service lives and fast cutting
- Pleasant work owing to low dust formation and low contact pressure

Technical data:

- Bore diameter: 22.23 mm
- Number of pieces per packet: 25 PCS

ATORN Coarse cleaning disc dia. 125 mm SiC

EXTENDED PROGRAM

Execution:

- Coarsely structured and elastic non-woven cleaning abrasive made of a special combination of synthetic fibres and evenly embedded abrasive grains (silicon carbide)
- Flexible, open non-woven structure
- Open structure effectively prevents clogging
- Continuous exposure of fresh abrasive grain
- Uniform and consistent work results
- Free of metals susceptible to corrosion

Advantage:

- Adapts perfectly to the workpiece geometry
- Uniform, reproducible sanding results
- Cooler sanding and thus reduced heat generation
- Clean and residue-free surface
- Minimised risk of damaging the workpiece surface

Technical data:

- Bore diameter: 22.23 mm

Scotch-Brite™ high-performance coarse cleaning discs - extra coarse

Non-woven fibre discs with fibre underlay, for use on angle grinders

Application:
Ideally suited for cleaning heavy surface soiling and surface coatings or for removing varnish.

Execution:
- Flexible fibre fleece with resin-bonded abrasive, for universal cleaning tasks

Advantage:
- Strengthened backing for processing surfaces without the use of a support plate
- Open structure, disc does not clog
- Free of corrosive metals
- Does not loosen individual parts

Scotch-Brite™ coarse cleaning discs - extra coarse

Application:
Ident. No. 200–203: For the rapid removal of rust, paint, scaling, coatings and adhesives from surfaces without significantly altering the base material.
Ident. No. 206–209: For removing hard coatings such as strong rust, thick coat lacquer and corrosion while facing and refining the bare metal underneath.

Execution:
- High-strength fibre, resistant to breakouts and provides optimum edge performance

Advantage:
- Resistant against loads, ensuring a uniform cutting performance
- High adaptability provides a larger contact area for faster removal rates
- **Ident. No. 200–203:** Silicon carbide cuts aggressively and leaves a clean finish
- **Ident. No. 206–209:** Aluminium oxide mineral aggressively removes the upper layer and refines the bare metal underneath

Technical data:
- Bore diameter: 22.23 mm
- Number of pieces per packet: 10

Advantages of 3M Scotch-Brite™ Bristle products

Bristle products are flexible, high-performance brushes impregnated with **ceramic Cubitron abrasive grains**. They have exceptionally long service lives. They are especially suited to cleaning, deburring and paint stripping.

Thanks to their unique **cast-in-one-piece** design, individual components cannot work loose during application as can happen when using wire brushes. This **improves occupational safety**. Furthermore, **Scotch-Brite Bristle products do not clog**, which ensures **consistent performance** throughout their service life. Thanks to their high level of flexibility, Bristle products adapt to the shapes and contours of workpieces. This enables you to produce a **uniform finish**, even on very profiled surfaces.

Scotch-Brite™ BD-ZB bristle disc for angle grinders

Specially designed for planar surfaces

Application:
For rust removal, paint removal, removing adhesive residues or other surface contaminants. Specially designed for flat surfaces. Can be used on angle grinders without accessories.

Advantage:
- Works without contact pressure with a very long service life
- Integrated M14 thread makes additional accessories unnecessary

Technical data:
- Head diameter: 115 mm
- Length of bristles: 19 mm
- Max. rotation speed: 12200 rpm
- Suitable for machine chuck: M14
- Material of abrasive medium: Ceramic grain Cubitron

Scotch-Brite™ BB-ZB radial bristle grinding brush, type C

Specially designed for highly contoured surfaces

Application:
For cleaning, removing paint, deburring and blending on virtually all materials. Specially designed for highly contoured surfaces. For use on robotic machines, sanding blocks, straight grinders or on flexible shafts.

Execution:
- 8 separable individual segments, flange with 4 reducers from 25.4 to 13 mm

Advantage:
- With curved bristles, ideal for working on profiled surfaces

Notes:
For use only with clamping mandrel no. 76098 002

Technical data:
- Head diameter: 150 mm
- Length of bristles: 38 mm
- Max. rotation speed: 6000 rpm
- Material of abrasive medium: Ceramic grain Cubitron

Specially designed for highly contoured surfaces

Application:
For cleaning, removing paint, deburring and blending on virtually all materials. Specially designed for highly contoured surfaces. For use on straight grinders or flexible shafts

Execution:
- 6 segments cast with a 6-mm shank

Advantage:
- With curved bristles, ideal for working on profiled surfaces
- Can be used immediately without any further accessories

Technical data:
- Head diameter: 75 mm
- Length of bristles: 25 mm
- Max. rotation speed: 15000 rpm
- Suitable for machine chuck: Shank 6 mm
- Material of abrasive medium: Ceramic grain Cubitron
- Number of pieces per packet: 1 PCS

LESSMANN® Narrow cylinder wire brush (pipeline brush)

for use on all commercially available angle grinders and angle polishers

Application:
Especially for processing of U- and V-welding seams; which are often chosen for pipe connections

Execution:
- Long service life
- smooth running

Advantage:
- Pipeline brush is particularly narrow and is therefore suitable for cleaning all welding seams on pipe connections

ATORN Shank-mounted cylinder wire brushes with silicon carbide sanding bristles

Shank diameter 6 mm, for use on high-speed machines and power tools

Application:
For deburring, rounding edges and surface finishing, and for machining stamped, turned, milled and drilled tool parts.

Advantage:
- optimal adaptation to irregular surfaces due to nylon fibres
- high elasticity without risk of breakage paired with a long service life

Notes:
due to the effect of heat on the plastic brushes, the speed is limited to a cutting speed of 18 m/sec.

Technical data:
- Number of braids: 0 PCS
- Max. rotation speed: 15000 rpm
- Number of pieces per packet: 5 PCS

ATORN Wire end brushes with braided wire

Shank diameter 6 mm, for use on high-speed machines and power tools

Application:
For precise machining in hard-to-reach places and on inner surfaces, also particularly suitable for cleaning the inside of cylindrical bores.

Advantage:
- variable outer diameter: due to the centrifugal force generated, the brush expands and retracts as the working speed changes
- high flexibility and high cleaning efficiency

ATORN miniature brushes round/pot/wire end brushes

Shank Ø 2.34 mm

Application:
For cleaning and polishing as well as for light deburring work in holes and cavities. Due to the low trim width, targeted processing is possible in hard-to-reach spots.

Notes:
Brushes with natural trim can be used with polishing pastes for a better result.
Brushes with flexible nylon diamond trim: Restoration and breakage resistance even under heavy load and deformation. Suitable for machining very hard parts such as ceramic parts, hardened parts, precision components etc.

Prod. Gr. 6CN

ATORN miniature brushes round/pot/wire end brushes

Shank Ø 3 mm

Application:
For cleaning and polishing as well as for light deburring work in holes and cavities. Due to the low trim width, targeted processing is possible in hard-to-reach spots.

Notes:
Brushes with natural trim can be used with polishing pastes for a better result.
Brushes with flexible nylon diamond trim: Restoration and breakage resistance even under heavy load and deformation. Suitable for machining very hard parts such as ceramic parts, hardened parts, precision components etc.

LESSMANN® Micro-abrasive pipe brushes with sanding bristles

For use on drills

Application:

Ident. No. 000–030: Particularly suitable for deburring bores, horizontal bore holes or O-ring inserts in complex workpieces, as well as for polishing and cleaning nozzles and small holes.

Ident. No. 035–055: The micro pipe brush is used for cleaning, deburring, edge rounding, polishing, grinding and structuring.

Execution:

- **Ident. No. 000–030:**
  - Internal cleaning brushes with galvanised twisted wire and a basic spiral of bristles: - Aluminium oxide (AO) sanding bristles: for finishing soft metals, for polishing and smoothing and for processing of aluminium while smoothing or polishing. - Sanding bristles made of silicon carbide (SIC): for optimum deburring results, for surface repair/processing and especially for processing aluminium and stainless steel.
  - Aluminium oxide (AO) sanding bristles are suitable for finishing soft metals, for polishing and smoothing, and for processing aluminium during smoothing or polishing.
  - Sanding bristles made of silicon carbide (SIC) are suitable for optimum deburring results, for surface repair/processing and especially for processing aluminium and stainless steel
- **Ident. No. 035–055:** The high-quality sanding bristles with silicon carbide meet these special requirements.

Advantage:

- **Ident. No. 000–030:** Can be used flexibly as a conventional internal cleaning brush due to sanding bristles

Notes:

Ident. No. 000–030: When using the brushes on a machine, always observe the specified max. rotation speed (max. RPM)

Prod. Gr. 6CL

LESSMANN® Micro abrasive tube brushes with steel wire trim

Shank diameter 3.8 mm, for manual use or use on drills

Application:
Used as thread brushes for descaling, deburring or cleaning e. g. transverse intersections, drilling overlaps, threaded drill holes or grooves. For polishing and cleaning nozzles and small holes

Execution:
- Micro pipe brushes (IBH) with steel wire are internal cleaning brushes with steel wire bristles, and are used as thread brushes for descaling, deburring or cleaning e.g. transverse intersections, drilling overlaps, threaded drill holes or grooves. The brushes can be used either manually or with a machine.

Notes:
When using the brushes on a machine, always observe the specified max. rotation speed (max. RPM)

Prod. Gr. 6CL

Flex-Hone honing brush

Grain size 180 SiC, for hydraulic cylinders and small engine cylinders, etc.

Application:
For easy and fast honing on any machine system, including hand drills.

Execution:
- Small abrasive bearings are permanently attached to strong nylon brushes
- Brush rotates during insertion and removal and thus produces accurate cross grinding
- Place your order using the actual cylinder diameter: All honing brushes have a 10-12% larger diameter than the respective specified diameter.

Advantage:
- No risk of breakage unlike standard honing stones.
- Saves time-consuming adjustments to the diameter
- Extremely flexible application, can be used on any machine system

Prod. Gr. 6IB

osborn Novoflex-B tube brushes

Application:
Honing and deburring tool in high-end quality for internal machining

Execution:
- Flexible, self-centring honing tool
- Achieves a plateau finish
- Due to cross-hatch pattern, good carrier for oil film adhesion
- Can be used both on hand-held power tools as well as on honing machines
- Can also be used in CNC and NC machines, machining centres and automated machines as well as for clamping in tool spindles

Technical data:
- Length: 200 mm
- Material of edging: Silicon carbide

Prod. Gr. 6OS

ATORN ATORN disc brushes

With dense sanding bristle trim (full trim) fully encapsulated in the plastic disc

Application:
On CNC machining centres and with the use of robots, preferably in wet sanding with cooling lubricant. Machining of flat components: precise deburring, edge rounding, fine machining after milling, surface finishing of e.g. sealing and contact surfaces.

Execution:
- with longitudinal slot for clamping on face mill arbours (DIN 6357) and combination mill arbours (DIN 6358) - no additional accessories required
- Disc brushes with dense sanding bristle trim (full trim) firmly moulded into the plastic disc
- **Ident. No. 610–695:** Ideally suited for the machining of aluminium

Advantage:
- Post-machining directly after the cutting process - without changing the geometry of the workpiece
- Continuously released abrasive grain ensures reproducible results
- Very high dimensional stability and accuracy
- Controllable wear properties to end of tool life - no bristle breakage
- 4 x higher trim density produced than in conventional process (stamped)

Notes:
Infeed with brushes of diameter 50: 0.3 mm (fine)-1.0 mm (coarse) infeed with brushes dia. 76-150: 0.8 mm (fine)-1.5 mm (coarse) Other designs available on request

Technical data:
- Filling length: 35 mm

HSS and cemented carbide milling bits
For electric and compressed air operated machines and systems with flexible shafts

Recommendations for use:

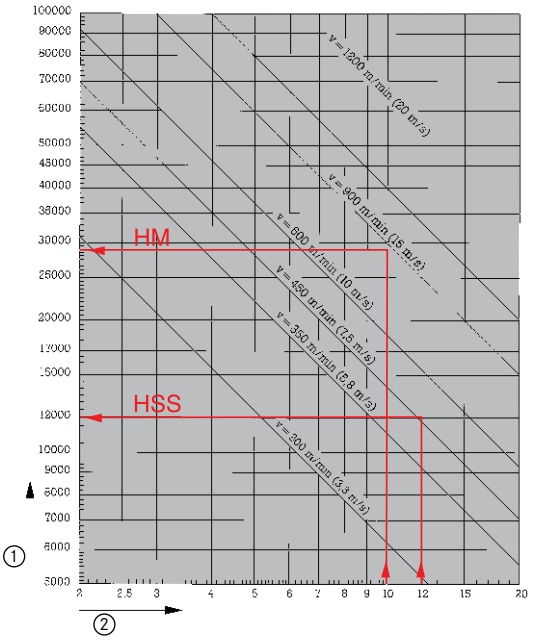
Optimal rotation speed and performance of the tool drive (compressed air, electrics, flexible shaft) are crucial for efficient use of cemented carbide milling bits.

- Use the highest possible rotation speeds within the recommended ranges of rotation speed/cutting speed.
- Pay particular attention to the rotation speed recommendations when working with materials with poor thermal conductivity, such as stainless steel, titanium alloys etc. so that you do not damage the tool. Blue colouration of the shaft and tool should be avoided.
- Only use clamping systems/drives without play; knocking and rattling of the tools results in premature wear.
- Do not choose a milling bit clamping length that is too small. Rule: Minimum clamping length 2/3 of the shaft length.

When selecting the milling bits, take into account the material to be processed and the rotation speed.

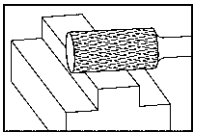
To determine the correct rotation speed range for the particular HSS or cemented carbide burr in your application, please note the following:

- Choose the toothing you want based on the material that will be processed and the resulting cutting speed.
- Find your required cutting diameter and the calculated cutting speed for the chosen toothing in the diagram on the right. The point where the lines cross gives you the required rotation speed range.

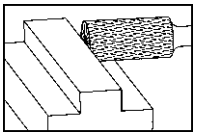


① Rotation speed (rpm), ② Cutting diameter (mm)

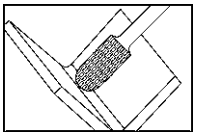
Milling bit shapes and their applications:



Shape: Cylindrical without end cut (ZYA)



Shape: Cylindrical with end cut (ZYAS)



Shape: Cylindrical with radius end (WRC)

ATORN Carbide bur set (DIN 8033 similar)

10-piece, shaft diameter 3 mm, toothing 2

Application:

For deburring and finishing work on cast parts, roughly machined workpieces or welding seams - can be used in hand-held power tools or on stationary machines.

Execution:

- For use with steel, stainless steel, cast iron
- Cutting speed: 450-900 m/min
- precise spindle bearing with high concentricity required

Technical data:

- Shank diameter: 3 mm
- Composition of set: 1x ZYA 0312/3 cut 2 bur, 1x WRC 0312/3 cut 2 bur, 1x KUD 0303/3 cut 2 bur, 1x TRE 0306/3 cut 2 bur, 1x RBF 0312/3 cut 2 bur, 1x SPG 0312/3 cut 2 bur, 1x B 0306/3 cut 2 bur, 1x KEL 0312/3 cut 2 bur, 1x SKM 0311/3 cut 2 bur, 1x WKN 0303/3 cut 2 bur
- Serration type: 2
- Number of pieces in assortment/set: 10 PCS

ATORN Carbide bur sets (DIN 8033 similar)

Shaft diameter 6 mm, teeth 6

Application:

For deburring and finishing work on cast parts, roughly machined workpieces or welding seams - can be used in hand-held power tools or on stationary machines.

Execution:

- Cutting speed: 450-900 m/min
- precise spindle bearing with high concentricity required

- **Ident. No. 920:** For use with cast iron, unhardened steel, tool steel and alloyed stainless steel
- **Ident. No. 931:** universal application for metals of all kinds (excl. aluminium)

Advantage:

- **Ident. No. 920:** with TiAlN coating for longer service life, strength and effective manufacture

Ident. No. 920

Ident. No. 931

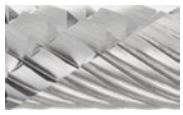
PFERD cemented carbide milling bits
Shaft diameter 3 and 6 mm, toothing 3 Plus

Application:
Deburring, processing contours, chamfering/rounding edges, milling out for preparation of deposit welds, preparation/levelling of welding seams, fettling, altering geometries.



PFERD TOOTHING 3 PLUS:
universal staggered tooth system for roughing

Cutting speed:
steels up to 1200 N/mm² (< 38 HRC); cast iron: 450–600 m/min
Hardened, tempered steels over 1200 N/mm² (> 38 HRC); stainless steel: 250-350 m/min
Nickel-based and cobalt-based alloys: 250-450 m/min

Carbide bur sets
5 carbide burs, shaft diameter 6 mm, toothing 3 PLUS

Application:
For deburring, processing contours, fettling, altering geometries.

Execution:
- Five carbide milling bits in a break-resistant plastic box. Five additional spaces are available to be equipped by the user as necessary.

Delivery:
Ident. No. 750: ZYA 0616/6 Z3 PLUS, KUD 0605/6 Z3 PLUS, WRC 0616/6 Z3 PLUS, SPG 0618/6 Z3 PLUS, RBF 0618/6 Z3 PLUS

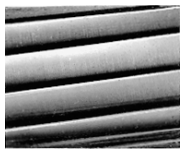
ATORN HSS milling bits
Shank diameter 6 mm

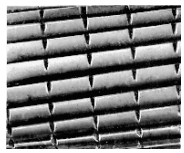
Application:
For deburring, chamfering, milling, contour milling, fettling and for welding seam machining.



TOOTHING 1:
Very rough toothing for soft materials, without chip breaker groove

Cutting speed:
200-300 m/min

Material: Aluminium (long-chipping), light metal alloys, lead, tin, plastic materials (thermoplastics and duroplastics) fibre, rubber, wood



TOOTHING 2:
Robust plain toothing, with chip breaker groove

Cutting speed:
150-300 m/min

Material: Light metal (short-chipping), brass, copper, electrolyte, red bronze, bronze, zinc, magnesium alloy

TOOTHING 3:
Medium plain toothing, with chip breaker groove

Cutting speed:
60-180 m/min

Material: steel and steel casting, alloyed and unalloyed

ATORN HSS bur

ATORN Carbide burs

With innovative coating

HM

Application:

The new innovative ATORN NG6 carbide burs are the ideal solution for accelerating production processes in industrial applications where rapid material removal is required. Combined with the unique NG6 coating technology, the removal rate is up to twice that of leading premium-quality carbide burs

Execution:

- **Significantly increased material removal**
- Up to 82 % higher performance compared to conventional **double cuts** on the market
- **Aggressive geometry/chip chamber geometry**
- The new geometry significantly improves cutting performance and finishing options and reduces process costs in the case of heavy-duty removal applications.
- **NG6 coating technology from Oerlikon Balzers**
- The NG6 coating ensures the material removal rate is up to TWICE that of other high-quality end mills on the market
- **Comfortable working**
- Enables virtually vibration-free and controlled working, even during extreme roughing work, and leaves a smooth finish
- **New innovative geometry**
- The new chip space geometry features a clearance angle that significantly increases the service life of the carbide bur

Advantage:

- New innovative geometry
- NG6 coating technology
- Significantly less vibration
- Reduced component operating time

- The new chip space geometry features a clearance angle that significantly increases the service life of the carbide bur

Advantage:
- New innovative geometry
- NG6 coating technology
- Significantly less vibration
- Reduced component operating time

Technical data:
- Shank diameter: 6 mm
- Serration type: NG6

Prod. Gr. 6CG

PFERD TOOLS Poliflex® finishing tips, PUR bond

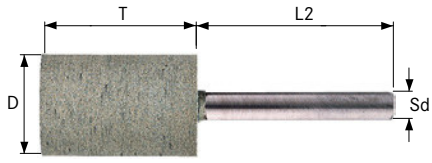
Cylindrical, silicon carbide, green

Application:
For preliminary grinding before polishing steel parts, stainless steel (INOX), titanium, light and non-ferrous metals as well as components for food and kitchen technology. For use on flexible shafts, electrical and pneumatic straight grinders. For achieving a fine, matte grinding pattern.

Advantage:
- Optimum contour following due to high flexibility
- Cool, very soft grinding thanks to open structure and elastic binding
- For achieving a fine, matt grinding finish

Notes:
Recommended cutting speed: 10–15 m/s

Technical data:
- Sd x L2: 6 x 40 mm



Cylindrical pin type

Grid size	D x T	Max. rotation speed (rpm)	Recommended rotation speed (rpm)	69200... Ident. No.

Example application

Poliflex® finishing tips, GR bond

Cylindrical, corundum, pink

Application:
For finishing of surfaces. For use on flexible shafts, electric and compressed air straight grinders.

Advantage:
- For achieving a fine, polished grinding finish
- Soft, elastic binding for soft grinding

Notes:
Recommended cutting speed: 10-12 m/s

Technical data:
- Grid size: 120

Poliflex® finishing tips, GHR bond

Cylindrical pin shape, synthetic corundum

Application:
For finishing of edges. For use on flexible shafts, electric and compressed air straight grinders.

Advantage:
- For achieving a fine, polished grinding finish
- Soft grinding with longer service life

Notes:
Recommended cutting speed: 20–25 m/s

Technical data:
- Grid size: 120

Grinding points

All PFERD sanding tips are approved for a **maximum circumferential speed of 50 m/s**. This must be observed in order to prevent the shaft from bending during use. Regardless of the length of the shaft, the clamping length of the shaft must be at least 10 mm.

Recommended rotation speed range:
Please refer to the table for the recommended rotation speed based on the diameter and the cutting speed of your tool.

Note:
The optimum rotation speeds can be found in the product tables. These have been limited to 150,000 RPM as a higher rotation speed is not possible with commercially available drives.

Example:
Mounted point dia. 20 mm
STEEL
Cutting speed: 30-50 m/s
Rotation speed: 28,600-47,700 RPM

Sanding tip ø [mm]	Cutting speeds [m/s]						
	10	15	20	25	30	40	50
	Rotation speeds [RPM]						
2	95,500	143,200	191,000	238,700	286,500	382,000	477,500
3	63,700	95,500	127,300	159,200	191,000	254,600	318,300

50	3,800	5,700	7,600	9,500	11,500	15,300	19,100

Mounted points, hardness O - for unhardened, non-tempered steels up to 1,200 N/mm² (<38 HRC)

Shaft diameter 3 mm, pink corundum abrasive, ceramic bond

Application:
Ideal for use on edges and for deburring work on steel structural and cast steel parts as well as for removing burrs and for grinding of chamfers for preparation of weld seams and sanding of contours.

Advantage:
- Long service life and large machining volume due to wear-resistant grain and hard bonding
- Thanks to its high edge stability, it can also be used economically on low-speed tool drives

Notes:
Ident. No. 005–055: STEEL EDGE grinding points achieve their best performance at a cutting speed of 25 to 40 m/s.
Ident. No. 060–070: Sanding tips STEEL EDGE achieve their best performance at a cutting speed of 25 to 40 m/s.

>Mounted points, hardness J - for hardened, tempered steels over 1,200 N/mm² (38 HRC)

Shaft diameter 3 mm, white corundum and blue ceramic sintered corundum abrasive, ceramic bond

Application:

For extensive use on titanium materials, nickel and cobalt-based alloys, for the machining of hardened steel components, application welds and for the grinding and regrinding of repair welds in tool and mould making.

Advantage:

- Cool grinding, due to good friability of the grain mixture
- Consistently high removal rate and very long service life due to the self-sharpening effect of the ceramic abrasive grain

Notes:

Sanding tips TOUGH achieve their best performance at a cutting speed of 30 to 50 m/s

Technical data:

- Shank diameter: 3 mm
- Shaft length: 30 mm
- Grid size: 80
- Number of pieces per packet: 10 PCS

PFERD TOOLS Felt mounted points

Shaft diameter 6 mm, shaft length 40 mm

Application:
For pre-polishing and gloss polishing of injection moulding tools, fittings, cemented carbide cutting knives and for gloss polishing of stainless steel components (INOX).

Advantage:
- Exact preservation of geometric shapes due to its hardness
- Freely profilable and can therefore also be used for tools with complicated geometries

Notes:
For best performance, use at a recommended cutting speed of 5–10 m/s. The polishing tool must also be changed when changing the polishing paste

Ident. No. 005–020
Type - cylinder ZYA:
Work is predominantly carried out with the tool circumference

Ident. No. 040–055
Shape - taper KEL:
Used predominantly to machine radii

Ident. No. 025–035
Shape - pointed taper SPK:
Used predominantly to machine radii and contours

Ident. No. 060–070
Type - cylindrical with radius end WRC:
Mainly used for machining small concave contours

Polishing disc

Suitable for any angle grinder/polisher

Application:
Polishing large areas in a short time to a mirror finish. Also for removing paints and coatings, cleaning components, derusting and fine deburring.

Execution:
- Extremely long service life
- Fast progress
- Quick and effortless polishing, even over large surfaces, with a controlled angle grinder

Advantage:
- Replaces cloth discs, felt discs and polishing pastes
- Works without polishing paste
- In one step: Cleaning of the workpiece and finishing of the surface

Technical data:
- Washer diameter: 125 mm
- Form: Flat
- Max. rotation speed: 4850 rpm
- Bore diameter: 22.23 mm
- Free from iron and sulphur: Yes
- Material of abrasive medium: Silicon carbide
- Material to be processed: Stainless steel | Steel | Aluminium | Cast metal | Titanium

ATORN universal hook-and-loop sanding disc

Hole pattern for all manufacturers

Application:
Universally applicable for varnish, paint, putty, wood and plastic

Execution:
- Perforated, suitable for Bosch, DeWalt, Festool and Metabo machines
- Dust-repellent stearate coating from P150 and finer

Advantage:
- Smooth latex paper backing for optimal adaptation to all grinding surfaces
- Increased service life thanks to optimised abrasive grain distribution and abrasive dust-repellent stearate coating

Technical data:
- Material of abrasive medium: Corundum
- Material to be processed: Paint | Colour | Filler | Wood | Plastic

FP 73 WK hook-and-loop sanding discs

With corundum, resin bond, semi-open grain distribution

Application:
Special product for lacquer, paint and putty work.

Execution:
- Perforated, hole pattern GLS47
- With highly tear-resistant film backing

Advantage:
- Very good grain adhesion, even on edges
- Additional coating reduces clogging of disc and increases service life

Notes:
For use with HST 555 adhesive velcro support plate.

Technical data:
- Number of pieces per packet: 100 PCS
- Material of abrasive medium: Corundum
- Material to be processed: Paint | Colour | Filler

1950 siaspeed hook-and-loop sanding discs

The complete range for every application

Application:
- Sanding coatings and impurities - Grinding out unevenness at the edge of the repair site - Flat sanding of the spatula and filler - Finishing of fillers - Grinding of old and new varnishes

Execution:
- Grain type: Mixed grain with ceramic P40–80, semi-precious corundum 100–600
- Base: Paper
- Scatter type: electrostatic P40–P180, open electrostatic P220–P600

Advantage:
- very high removal rate with a good finish
- Broad scattering in grain 220–600 for minimal clogging
- Grain mix including ceramic corundum in grain 40–180, for an enhanced performance
- Lower consumption of abrasive
- Very long service life

Technical data:
- Material to be processed: Paint | Acrylic glass | Colour | Plastic | GRP | Filler

ATORN mesh sanding disc

Corundum, special mesh

Application:
for varnish, paint, plaster, wood and plastic

Execution:
- Special mesh for optimum dust extraction regardless of the type of machine used

Advantage:
- Extremely high removal rate thanks to high-quality corundum abrasive grain
- Long service life and no clogging thanks to open-pored mesh structure for high level of dust extraction
- Minimal dust emissions and a clean workplace thanks to special mesh that promotes extraction

7500 sianet CER net-backed abrasive with ceramic grain

For maximum removal rate and service life

Application:
- Sanding coatings and impurities - Whetting primers - Finishing solid wood, veneers, mineral materials, primer film, gypsum and gypsum fibreboards - Intermediate sanding of varnishes

Execution:
- Grain type: ceramic corundum
- Base: knitted fabric

Advantage:
- Full-surface dust extraction
- Not dependent on hole system
- High removal rate without clogging
- Robust net backing for high tear strength

ATORN Abrasive fabric sheets - universal application

Sheet size 230 x 280 mm

Application:
Manual sanding of alloyed and unalloyed steels, stainless steel, chrome steel and chrome-nickel steel, brass, bronze, wood, paint and plastic

Execution:
- Excellent sanding performance with high-quality synthetic corundum (AO - resin-bonded) and dense grain distribution.
- Robust, oil/petroleum-resistant, highly flexible cotton fabric

Technical data:
- Material of abrasive medium: Aluminium oxide (normal corundum)
- Backing material: Cotton fabric
- Binding: All-synthetic resin
- Colour: Brown
- Number of pieces per packet: 50

Abrasive fabric arc KL 371 X

For metal universal, non-ferrous metal

Application:
For grinding surfaces in metalworking.

Execution:
- Light but robust X-fabric backing

Advantage:
- For universal manual and power tool sanding

Technical data:
- Type description: KL 371 X
- Area of application: Surface grinding
- Material of abrasive medium: Corundum
- Backing material: Cotton fabric
- Binding: Glue
- Colour: Blue
- Number of pieces per packet: 50 PCS

KL 385 JF abrasive fabric sheet for wood, all kinds of metal, non-ferrous metals

Sheet size 230 x 280 mm

Application:
Suitable for a wide range of uses in the metalworking industry.

Execution:
- High-quality abrasive cloth and very flexible cotton backing

Advantage:
- Can be easily torn to the desired length
- Also suitable for stainless steel.

Technical data:
- Type description: KL 385 JF
- Area of application: Surface grinding
- Material of abrasive medium: Corundum
- Backing material: Cotton fabric
- Binding: Synthetic resin
- Colour: Brown
- Number of pieces per packet: 50 PCS

PS 11 waterproof sandpaper sheets for car repair and painting jobs

Sheet size 230 x 280 mm

Application:
For machining of paint, lacquer, spreader and filler, mainly used in automotive repair and painting applications.

Advantage:
- High sanding rate and service life
- High-quality and very flexible

Technical data:
- Area of application: Wet sanding
- Material of abrasive medium: Silicon carbide
- Backing material: Latex paper
- Binding: Synthetic resin
- Colour: Black
- Number of pieces per packet: 50 PCS

ATORN Abrasive fabric economy roll

High-quality synthetic corundum, full synthetic resin bond, dense grain distribution

Application:
Manual and machine sanding (width: 115 mm) of alloyed and unalloyed steels, stainless steel, chrome and chrome-nickel steel, brass, bronze, wood, paint and plastic

Execution:
- Robust, oil/petroleum-resistant, highly flexible cotton fabric
- Excellent sanding performance with high-quality synthetic corundum (AO - resin-bonded) and dense grain distribution.

Advantage:
- Holder core for economy roll

Technical data:
- Length of roll: 50 m
- Backing material: Cotton fabric

VSM Sanding belt roll cartridge

Equipped and empty

Application:
For sorted storage and metered supply of sanding belt and abrasive cloth.

Execution:
- Robust magazine (with a hammered enamel finish)
- Complete with tear-off device and fastening material
- Empty, for 5 rolls of 25 to 50 mm width and max. 50 m length

Advantage:
- The right sanding belt or abrasive cloth always kept close to hand
- Ensures economical use
- Enables fresh supplies to be provided in good time

VSM XK850X TOP SIZE abrasive fabric belt for stationary grinding machines

For high-alloy steels, chrome steel and chrome-nickel steel, non-ferrous metals, nickel-based alloys and cast parts

Application:
Removing welding seams, deburring, sanding edges and surfaces

Execution:
- Self-sharpening ceramic abrasive grain
- Active grinding extra layer TOP SIZE
- Sanding of stainless steel, unalloyed steel, aluminium
- Cool sanding

Advantage:
- High removal rate due to self-sharpening effect
- Cool sanding and extended service life due to the active sanding extra layer VSM TOP SIZE
- Optimal value for money

Technical data:
- Material of abrasive medium: Ceramic zirconium corundum
- Scattering: Close scattering
- Number of pieces per packet: 10 PCS
- Binding: Synthetic resin

ATORN Non-woven sanding belts for tube belt sander

Application:
For mat finishing, polishing and smoothing of pipes, pipe bends and closed pipe constructions made of stainless steel, steel, brass, copper and aluminium

Advantage:
- Reduces smearing even for alloys with high nickel content (anti-smear technology)
- Extremely low belt elongation
- Faster sanding and finishing with consistent, reproducible surface finish
- Rust-free, waterproof, resistant, malleable, non-conductive, non-metallic

ATORN Non-woven abrasive hand pads and rolls

for smoothing, matting, roughing, removal of dirt, corrosion and other impurities

Application:
For smoothing, matting, roughening, degreasing and cleaning surfaces, light deburring and removing dirt and corrosion.

Execution:
- Accessories: Pad holder with integrated barbed hooks no. 69296 090

Advantage:
- smooth cutting with high flexibility
- long service life and optimal sanding results thanks to the uniform fibre structure

Technical data:
- Material to be processed: Universal use

Scotch-Brite™ non-woven abrasive pads and rolls

For application by hand or for use on hand-held sanders

Application:

Ident. No. 006–016: For cleaning, deburring, finishing and sanding surfaces. Ideally suited to complicated or detailed work

Ident. No. 205–211: Universal hand pads for most standard applications.

Execution:

- Resin-bonded fleece material

- **Ident. No. 006–016:**
  - Achieves a highly consistent and even finish
  - Does not alter the geometry of the workpiece

Advantage:

- CF-HP with aluminium oxide: Tough abrasive grain for a fine, matt finish
- CF-HP with silicon carbide: Hard, sharp abrasive grain provides a distinctive finish with a fine structure
- **Ident. No. 006–016:** CP-HP: High cutting performance and dense, even finish

Notes:

Ident. No. 205–211: Usable both wet and dry.

3M Scotch-Brite™ CF-SR non-woven abrasive roll

In handy tear-off roll

Application:
For roughening painted surfaces, deburring, finishing, matting and cleaning of various surfaces

Execution:
- Nylon fibre fleece with resin-bonded abrasive
- Pre-cut roll with 35 pads (115x150 mm)

Advantage:
- Does not alter the workpiece geometry
- Easy to detach without waste

Notes:
Usable both wet and dry.

ATORN SCD GB 610 AR non-woven discs

Application:
Particularly suitable for cleaning and finishing work

Execution:
- Very good on stainless steel
- Achieves matt and semi-gloss surfaces

Advantage:
- The discs have a punched 22 mm hole
- The 22 mm hole can optionally be pressed out of the disc
- The ZB 340 adhesive backing pad ensures concentric running

Technical data:
- Bore diameter: 22 mm
- Number of pieces per packet: 10 PCS

ORION® Miniature flap wheels

For use on flexible shafts and electrical or pneumatic straight grinders

Application:
For machining in hard-to-reach places and of very small surfaces, e.g. fittings made of light or heavy metal, in tool construction, with pressing, casting or die-cast moulds or similar.

Execution:
- Plastic-bonded abrasive cloth discs
- Cast resin core
- Adjusts to the shape of the workpiece during grinding

Technical data:
- Binding: Plastic
- Number of pieces per packet: 10 PCS

POLINOX fleece grinding points
For an exceptional silk-matt sanding finish

General usage information:

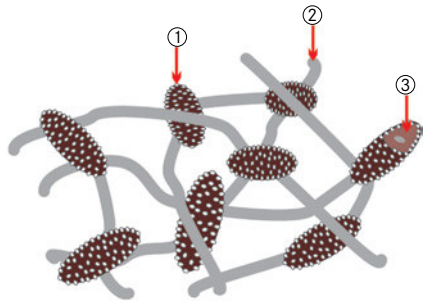
Non-woven abrasives are used when other grinding tools have reached the limit of their use or no longer achieve the required result.

Ideal for matting and satin-finishing of metals, cleaning oxidised non-ferrous base metals, uniform brush-matting of stainless steel, roughening of plastics in preparation for bonding and for levelling the surfaces of weld seams. Abrasive fleece can be used for wet or dry sanding.

Flexible shafts, electric and pneumatic straight grinders can be used as tool drives. POLINOX® fleece sanding tips perform best at a recommended cutting speed of 10-20 m/s.

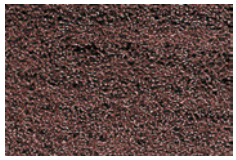
Advantages:

- Optimum contour following thanks to high flexibility
- Cool grinding and low thermal load on the workpiece
- No tool clogging thanks to the open structure and high flexibility of the fleece material



① Abrasive grain ② Synthetic fibres ③ Resin

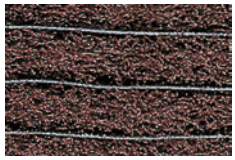
Special features and application options:



PNL model:

The abrasive fleece elements are arranged radially. Dense packing of the layers ensures a long service life.

PNL sanding tips are used chiefly for **surface conditioning** to obtain a **fine grinding finish**.



PNZ model:

The abrasive fleece elements are arranged radially with abrasive cloth interlayers.

This structure enables **improved stock removal** and produces a **coarser grinding finish**.

PNG model:

Made of multiple elements of strongly corrugated abrasive fleece strips wound around a core, arranged radially.

The wavy structure of the abrasive fleece permits **matt finishing of surfaces without visible transitions**.

POLINOX non-woven sanding tips
Shaft diameter 6 mm, shaft length 40 mm

Technical data:

- Shank diameter: 6 mm

ATORN Grinding flaps, synthetic corundum

For use on flexible shafts and electrical or pneumatic straight grinders

Application:
For machining small parts, narrow curves, pipes, moulds, models, fittings etc. Particularly suitable for levelling, deburring, surface and weld seam processing as well as for flush surface finishing.

Advantage:
- Perfect fit on the workpiece thanks to flexible abrasive flaps
- consistently high material removal over the full service life
- optimised air supply prevents discolouration from occurring

Technical data:
- Binding: Synthetic resin
- Material to be processed: Stainless steel | Metal | Wood | Plastic | Steel | Universal use
- Number of pieces per packet: 10 PCS

ATORN Non-woven abrasive matting body

Synthetic corundum

Application:
For matting and satin finishing metals, matting non-ferrous metals and cleaning oxidised non-ferrous heavy metals. Smoothing and final sanding of workpiece surfaces.

Execution:
- Made of multiple non-woven lamellas, which are positioned around the axis of the tool in a fan pattern
- Extra soft non-woven abrasive for optimum adaptation to workpiece contours
- Creates a smooth, matte finish

Advantage:
- Longer service life thanks to increased material density and precise machining

Technical data:
- Material of abrasive medium: Aluminium oxide (normal corundum)
- Shank diameter: 6 mm
- Number of pieces per packet: 10

Application:
For matting and satin finishing metals, matting non-ferrous metals and cleaning oxidised non-ferrous heavy metals. Smoothing and final sanding of workpiece surfaces.

Execution:
- made of multiple non-woven lamella which are positioned around the axis of the tool in a fan shape
- To achieve virtually shoulder-free line matting on stainless steel surfaces

Advantage:
- Significantly longer service life thanks to double impregnation and material density
- Colour-coded tools ensure the easy allocation of grit size

Technical data:
- Material of abrasive medium: Aluminium oxide (normal corundum)
- Shank diameter: 6 mm

ATORN Abrasive non-woven/cloth matting body

Synthetic corundum

Application:
For cleaning and derusting oxidised metals and non-ferrous metals, and for texturing, roughening and pre-grinding workpiece surfaces

Execution:
- Made of non-woven and cloth lamellas, which are positioned alternately around the axis of the tool in a fan pattern
- Extra soft abrasive fleece for optimum adaptation to workpiece contours
- The combination of non-woven abrasive and abrasive cloth significantly enhances the sanding effect

Advantage:
- Longer service life thanks to increased material density and precise machining
- Increased removal thanks to the combination with synthetic corundum abrasive cloth

Technical data:
- Material of abrasive medium: Aluminium oxide (normal corundum)
- Shank diameter: 6 mm

ATORN Abrasive non-woven/cloth matting body

Ceramic abrasive grain with colour coding

Application:
For metalworking and machining stainless steels in equipment, container, automotive and mould engineering and in the tool industry. Specially designed for processing stainless steel

Execution:
- Made of a combination of ceramic abrasive grain non-woven and cloth lamellas, which are positioned alternately around the axis of the tool in a fan pattern.
- To achieve virtually shoulder-free line matting on stainless steel surfaces
- Colour-coded tools ensure the easy assignment of fineness structure
- Combining non-woven abrasive with abrasive cloth made of ceramic abrasive grain considerably enhances the sanding effect and achieves a “brushed” grinding finish

Advantage:
- Long service life thanks to double impregnation
- High degree of removal and long service life thanks to the use of ceramic abrasive grain

Technical data:
- Material of abrasive medium: Ceramic grain
- Shank diameter: 6 mm

ATORN Coarse cleaning disc, silicon carbide

Application:
Optimal results when cleaning welding seams on stainless steels, but also when removing corrosion, scaling, discolouration, stubborn paints and coatings

Execution:
- The dia. 19 mm plastic hole core with 2 keyways fits all commercially available roller drives

Advantage:
- No clogging of the tool thanks to the open non-woven structure
- Uniform, reproducible sanding results

Technical data:
- Material of abrasive medium: Silicon carbide
- Colour: Black
- Max. rotation speed: 4800 rpm
- Recommended rotation speed: 2400 rpm
- Number of pieces per packet: 1

Ø x width x drill hole		100 x 100 x 19 mm

ATORN Abrasive flap disc, abrasive cloth
Synthetic corundum

Application:
Suitable for larger areas, e.g. in container and equipment engineering. For removing rust, oxide layers, minor scratches and for strong texturing (pattern finishes) and satin finishing of metals

Execution:
- Made of synthetic corundum cloth lamellas, which are positioned in a plastic core around the axis in a fan pattern
- The dia. 19 mm plastic hole core with 4 keyways fits all commercially available roller drives
- Synthetic resin-bonded abrasive flaps

Technical data:
- Material of abrasive medium: Aluminium oxide (normal corundum)
- Max. rotation speed: 5700 rpm
- Recommended rotation speed: 3800 rpm

ATORN Abrasive flap disc, non-woven abrasive
Synthetic corundum

Application:
For matting and satin finishing metals, matting non-ferrous metals and cleaning oxidised non-ferrous heavy metals. Smoothing and final sanding of workpiece surfaces.

Execution:
- made of multiple non-woven lamellas which are positioned in a plastic core around the axis in a fan shape
- The dia. 19 mm plastic hole core with four keyways fits all commercially available roller drives.
- Extra soft non-woven abrasive for optimum adaptation to the workpiece
- Creates a smooth, matte finish

Advantage:
- double impregnation has a positive effect on the service life, significantly increasing it

Technical data:
- Material of abrasive medium: Aluminium oxide (normal corundum)
- Colour: Brown
- Max. rotation speed: 4800 rpm

ATORN Abrasive flap disc, non-woven abrasive

with colour coding

Application:
For matting and satin finishing metals, matting non-ferrous metals and cleaning oxidised non-ferrous heavy metals. Smoothing and final sanding of workpiece surfaces

Execution:
- Made of multiple non-woven lamellas, which are positioned in a plastic core around the axis in a fan pattern
- The dia. 19 mm plastic hole core with 4 keyways fits all commercially available roller drives
- Creates a smooth, matte finish

Advantage:
- Colour coding prevents the tools from getting mixed up
- More trimming material compared to conventional rollers ensures a longer service life and generates less heat during machining

Technical data:
- Material of abrasive medium: Aluminium oxide (normal corundum)
- Max. rotation speed: 4800 rpm
- Recommended rotation speed: 2800 rpm
- Number of pieces per packet: 1

ATORN Abrasive non-woven/cloth flap disc

Synthetic corundum

Application:
Suitable for larger surfaces, e.g. in tank and equipment manufacturing, for removing rust, oxide layers, minor scratches and for the strong texturing (pattern finishes) and burnishing of metals.

Execution:
- Made of fleece and abrasive cloth lamella which are positioned in a plastic core around the axis in a fan shape
- The dia. 19-mm plastic hole core with 4 keyways fits all commercially available roller drives.
- The use of synthetic corundum abrasive cloths achieves a higher degree of material removal and a coarser grinding finish.

Advantage:
- Longer service life and reduced heat generation thanks to 110 mm diameter

Technical data:
- Material of abrasive medium: Aluminium oxide (normal corundum)
- Colour: Brown
- Recommended rotation speed: 2800 rpm

Ø x width x drill hole	Design	Max. rotation speed (rpm)	Number of pieces per packet	76044... Ident. No.

ATORN Abrasive non-woven/cloth flap disc
with colour coding

Application:
Suitable for larger areas, e.g. in tank and equipment manufacturing. For removing rust, oxide layers, minor scratches and for strong texturing (pattern finishes) and burnishing of metals. Specially designed for machining stainless steel

Execution:
- Made of ceramic abrasive grain non-woven and abrasive cloth lamellas, which are positioned in a plastic core around the axis in a fan pattern
- The dia. 19 mm plastic hole core with 4 keyways fits all commercially available roller drives
- Double-impregnated abrasive fleece achieves the required grinding finish with quick and shoulder-free results

Advantage:
- Colour coding prevents the tools from being confused
- More trimming material compared to conventional rollers ensures a longer service life and generates less heat during machining
- The combination with ceramic grain abrasive fleece enhances the grinding effect and provides a striking grind pattern (brushed effect)
- Extremely high stability thanks to double impregnation

Technical data:
- Material of abrasive medium: Ceramic grain
- Max. rotation speed: 4800 rpm
- Recommended rotation speed: 2400 rpm
- Number of pieces per packet: 1
- Free from iron and sulphur: Yes

ATORN Crimped flap disc, non-woven abrasive
with colour coding

Application:
For cloud-free matting, satin finishing and polishing of pre-ground sheets, cleaning of oxide layers and removal of discolouration. Smoothing and final sanding of workpiece surfaces. Suitable for malleable iron, grey cast iron, zinc injection moulding, forged steels, C-steel, deep-drawing steel, stainless steels, non-ferrous metals and wood.

Execution:
- made of multiple non-woven lamellas which are positioned in a plastic core around the axis in a fan-like, corrugated arrangement
- The dia. 19 mm plastic hole core with 2 keyways fits all commercially available roller drives.

Advantage:
- Shoulder-free line matting of large surfaces thanks to the corrugated design
- Extremely high stability thanks to double impregnation
- Colour coding prevents the tools from being mixed up.

Technical data:
- Material of abrasive medium: Aluminium oxide (normal corundum)
- Max. rotation speed: 4800 rpm
- Recommended rotation speed: 2400 rpm
- Number of pieces per packet: 1

ATORN Coarse cleaning disc

Suitable for Roloc mount

Application:
For coarse cleaning, e.g. suitable for removing paint, scale, discolouration, rust and adhesive residues

Execution:
- Coarse, non-woven cleaning abrasive, developed from a special combination of synthetic fibres and ceramic abrasive grains

Advantage:
- Optimum contour adaptation and no tool jamming thanks to a high level of flexibility and an open structure
- Highly efficient thanks to rapid tool change

Notes:
For maximum performance, use at a recommended cutting speed of 15-20 m/s. This achieves an ideal compromise between removal rate, surface quality, temperature load of the workpiece, and tool wear

Technical data:
- Number of pieces per packet: 10 PCS

PFERD TOOLS COMBIDISC sanding disc holder SBH

screw connection with internal thread

Application:

For use on straight or angle grinders and flexible shaft machines, for holding COMBIDISC grinding discs.

Execution:

- Quick-change screw connection for grinding discs with metal internal thread

Advantage:

- Simple handling with rapid grinding disc replacement
- No velcro, no slipping, no loosening of the grinding disc due to heat
- Vibration-free concentricity due to permanently centred seating of the grinding disc

Technical data:

- Design: Medium hard
- Shank diameter: 6 mm
- Shaft length: 40 mm

Combidisc system

COMBIDISC A-PLUS corundum sanding discs

For universal use on metals and other materials

Application:
For universal use from rough to fine grinding. Particularly suitable for edge grinding.

Advantage:
- Higher removal rate due to stiffer base material
- Very high tear-resistance for long service life

Technical data:
- Washer diameter: 50 mm
- Min./max. recommended rotation speed: 8000-13000 rpm
- Material of abrasive medium: Corundum
- Number of pieces per packet: 100 PCS

Prod. Gr. 6AB

COMBIDISC A-COOL corundum sanding discs

For difficult-to-machine materials such as stainless steel (INOX), soft aluminium alloys etc.

Application:
For universal coarse to fine grinding on hard-to-machine materials such as INOX or nickel-based alloys. Suitable for roughening, levelling, deburring, sharpening, staged finishing and for machining surfaces and weld seams.

Advantage:
- Active grinding additives in the coating noticeably increase the removal rate, prevent clogging and facilitate cooler grinding.

Technical data:
- Washer diameter: 50 mm
- Min./max. recommended rotation speed: 8000-13000 rpm
- Material of abrasive medium: Corundum
- Number of pieces per packet: 100 PCS

COMBIDISC non-woven discs

Hard version, corundum abrasive grain, CD system

Application:
For universal surface processing on metals, e.g. eliminating pre-finishing marks, removing oxidation and light deburring work. For achieving matt and satin surfaces.

Advantage:
- Open structure prevents clogging of the disc

Notes:
Adding oil or water when grinding results in an even finer surface finish, cooler grinding and a longer service life.

Technical data:
- Number of pieces per packet: 50 PCS

ORION® Cup grinding wheels (ISO 525)

Ceramic bond, type 6

Application:
For regrinding metal cutting tools such as drills, milling cutters etc. on tool and pattern making machines.

Execution:
- **Ident. No. 005–035:**
  - HSS and special steels = grain 60–80
  - Low-alloy steels = grain 46–60

Advantage:
- cool grinding
- long service life
- superior surface finish

Notes:
Not suitable for wet grinding.

DIAPOINT single-diamond dressing tools

For dressing ceramic sanding discs

Application:
Suitable for all machines with corresponding holder. **Chucking:** Inclination of dressing tool to sanding disc centre from 5° to 15° required. We recommend **selecting the appropriate diamond weight** for individual diamond dressing tools according to the following diagram depending on the sanding disc to be adjusted.

Execution:
- Universal, traditional dressing tool with a single diamond with protruding working tip

Notes:
When ordering single-diamond dressing tools with cylindrical shaft, please specify the **dimension and length of the shaft**. **Holder** for manual dressing of grinding wheels, see no. 61220. **If the sharpness decreases,** rotate the dressing tool by approx. 60° around its own axis. Do this in good time: the blunt surface should be no greater than approx. 0.5 mm²

Technical data:
- Min./max. side feed per revolution: 0.05-0.15 m/s
- Min./max supply per throughput: 0.01-0.03 mm
- Number of pieces per packet: 1 PCS

Multi-grain dressing tool DIAROND

For dressing straight ceramic-bonded sanding discs

Application:
Ident. No. 010: For all straight ceramic sanding discs. **Chucking:** Dressing tool is clamped vertical to the spindle axis
Ident. No. 015–025: For all straight ceramic sanding discs. **Chucking:** Dressing tool is clamped vertical to the spindle axis

Execution:
- Standard dressing tool for machines with a suitable mounting
- With cylindrical, sintered diamond insert with many working tips

Advantage:
- Maintenance-free over the entire service life
- Robust and hard-wearing where handled incorrectly
- Can be used up fully
- For use with higher dressing traverse speed than single diamonds

Notes:
Not suitable for profile sanding discs. For new use, it is recommended to perform several dressing strokes with increased infeed For **particularly aggressive hard abrasives,** a more wear-resistant dressing tool connection R is available

Technical data:
- Min./max supply per throughput: 0.01-0.03 mm
- Min./max. side feed per revolution: 0.3-0.5 m/s
- Number of pieces per packet: 1 PCS

Heat-resistant up to 70°C

Application:
For industrial applications such as marking, strengthening, repairing, sealing joints and air-conditioning ducts, bundling pipes, materials etc.

Execution:
- Close-meshed fabric adhesive tape with matt surface
- Polyethylene coating

Advantage:
- Excellent adhesive strength on a variety of surfaces
- Outstanding moisture resistance
- Adapts easily for use on uneven surfaces
- Good tear resistance and flexibility

Technical data:
- Width of tape x length of strap: 50 mm x 50 m
- Thickness: 0.26 mm
- Type of adhesive: Rubber/resin
- Adhesive tape backing material: PE-coated rayon fabric

3M Soft aluminium adhesive tapes 431

Suitable for long-term applications

Application:
For masking, sealing, heat and light reflection, covering surfaces during aluminium anodising and for use as a moisture barrier.

Execution:
- A combination of robust aluminium and durable adhesive for problem-free long-term applications
- Suitable for use as a moisture barrier

Advantage:
- Outstanding sealing properties thanks to good moisture shielding (water vapour diffusion)
- High level of resistance to ageing and weathering
- Good resistance to chemicals
- Strong heat and light reflection
- Low flammability (class L)

Technical data:
- Type description: 431
- Thickness: 0.08 mm
- Colour: Silver grey
- Type of adhesive: Acrylate
- Adhesive tape backing material: Soft aluminium
- Min./max. temperature resistance: -54 to 149 °C
- Breaking elongation: 5 %

Pica Gel signal marker
For universal use

Application:
For permanent markings on all materials, both indoors and outdoors.

Execution:
- Chloride-free; therefore ideal for marks on stainless steel
- Variable line thickness, approx. 2-8 mm
- With practical quiver protector for perfect one-handed operation

Advantage:
- Highly permanent
- Fast-drying
- Light- and weather-resistant
- Temperature-resistant up to 1000°C
- Time-saving: Considerably faster marking than with a tube marker

Notes:
Extremely cost-effective: 1 Pica Gel replaces up to four 50 ml tubes

Technical data:
- Max. temperature resistance: 1000 °C
- Material to be processed: Rubber | Ceramics | Tiling | Glass | Plastic | Wood | Steel | Stainless steel | Leather

MARKAL Quik Stik mini marker

Compact solid-colour pen

Application:
Ideally suited for line markings on smooth or rough surfaces

Execution:
- Fast-drying
- Light- and weather-resistant
- With no xylene or ethylene glycol monobutyl ether
- Heat-resistant up to 300°C

Advantage:
- Marks virtually any surface, whether it is wet, smooth, rough or hot
- Leaves strong, durable marks on almost any surface

Technical data:
- Line thickness: 6 mm
- Max. temperature resistance: 300 °C
- Material to be processed: Steel | Iron | Glass | Wood | Rubber | Ceramics | Plastic

MARKAL Dura-Ink 5 deep-hole marker

Application:
For precise markings on small surfaces.

Execution:
- With micro tip
- Smudge-proof and waterproof industrial ink for permanent marking
- Xylene-free

Advantage:
- The extended tip is ideal for marking through openings as well as in hard-to-reach areas.

Technical data:
- Line thickness: 1 mm
- Material to be processed: Metal | Plastic | Glass | Cardboard | Paper | Wood | Textiles

Ident. No. 300

Pica-Ink deep-hole marker

Very slim marker for marking hard-to-reach spots

Application:
For all dry materials

Execution:
- With self-readjusting and patented telescopic tip made of stainless steel
- Waterproof markings on almost all dry surfaces

Advantage:
- Permanent
- Can be removed using alcohol and spirit
- Can be left open for up to one day without drying out
- Patented telescopic tip: Up to 3x writing performance by using the full 7 mm of abrasive length of the fibre tip, instead of 2 mm

Technical data:
- Line thickness: 1.5 mm
- Material to be processed: Metal | Plastic | Ceramics | Tiling | Glass | Wood | Laminate

Colour		Black	Red	Blue
69794...	Ident. No.	200 ●	205 ●	210 ●

Prod. Gr. 650

Pica Dry deep-hole marker and refills

For marking and writing even on dusty, rough, oily or damp surfaces

Application:

Ident. No. 199: Ideal for fine markings on dry surfaces only.

Execution:

- **Ident. No. 100:**
  - Marker with all-purpose graphite lead, 2B
  - Shaft with roll stopper
  - "LONGLIFE CAP" with extra-strong clip and robust sharpener for long-term use
  - Effective protection from dust and moisture: Push-button as a protective cap and shaft with sealing ring
- **Ident. No. 190–197:** For almost all surfaces, whether dry or damp, smooth or rough, dusty or oily, light or dark
- **Ident. No. 199:** Graphite refill leads in special hardness H

Advantage:

- **Ident. No. 100:**
  - Automatic lead feeder integrated in the stainless steel tube
  - Can be wiped off all smooth surfaces with a cloth
  - Extremely sustainable as it can be refilled: Easy to change the refill from behind
- **Ident. No. 190:** Hardness 2B – easily removable from smooth surfaces
- **Ident. No. 199:** Hardness H for precise marking – not easily removable

Delivery:

Ident. No. 190: Set of pencil refills, consisting of 4 x graphite lead, 2 x red lead, 2 x yellow lead

Technical data:

- Line thickness: 2.8 mm

DURA-INK® permanent marker

Universal use

Application:

For permanent markings on metal, cardboard, plastic, glass, timber/sawn wood, materials and fabrics.

Advantage:

- Clip caps for easy, secure storage of markers
- Impact-resistant barrel and extra-tough tip for long-term use with no loss of precision
- With wear-resistant ink formula for long-lasting markings

Paint marker SL.100

For permanent marking on almost all surfaces

Execution:

- Sturdy, medium-sized round tip: abrasion-resistant and extremely durable

Advantage:

- Xylene-free formula minimises risk to user's health
- Fast-drying paint means work can continue with no downtime
- Bright, UV and weather-resistant paints for highly effective, long-lasting markings

Notes:

Not for use on dirty, rough or wet surfaces.

Technical data:

- Line thickness: 3 mm
- Min./max. ambient temperature: -20 to 50 °C
- Max. temperature resistance: 100 °C
- Material to be processed: Steel | Iron | Non-ferrous heavy metal | Concrete | Stone | Plastic | Glass | Rubber | Ceramics | Tiling | Textiles | Cardboard

PAINT-RITER™ WATER-BASED paint marker

Solvent-free water-based paint marker

Application:
Water-based, low-odour paint marker suitable for marking virtually all types of clean surface.

Execution:
- weather- and UV-resistant

Advantage:
- Smooth, continuous marking – valve-actuated tip only releases paint as required
- Medium bullet tip resists wear to give an extremely long service life
- Water-based paint formulation that does not contain solvents and does not release volatile organic compounds. It therefore meets the user safety and environmental protection requirements

Technical data:
- Line thickness: 3 mm
- Min./max. ambient temperature: 4 to 66 °C
- Material to be processed: Steel | Iron | Plastic | Rubber | Cardboard | Glass

SL.130 paint marker

Removable paint marker for temporary marking

Application:
Chalk-based paint marker easily wiped off any smooth, non-porous surface using water, without leaving traces or residue

Advantage:
- Ideal for temporarily visible markings
- Medium bullet tip resists wear to give an extremely long service life
- Smooth, continuous marking – valve-actuated tip only releases paint as required

Technical data:
- Line thickness: 3 mm
- Min./max. ambient temperature: 5 to 40 °C
- Max. temperature resistance: 80 °C
- Material to be processed: Steel | Iron | Rubber | Glass | Artificial stone | Non-ferrous heavy metal

Trades markers set 13 pieces

Mechanical universal marker (refillable)

Application:
Refillable markers for weather-resistant marking on all surfaces; for example smooth, rough, rusty or dirty surfaces.

Execution:
- Abrasion-resistant
- Weather- and UV-resistant

Advantage:
- TRADES-MARKER® offer the versatile marking properties of a wax pen with paper sleeve, combined with a simple push-button mechanism for saving costs and resources
- Owing to the push mechanism, easy to use with just one hand

Delivery:
1 holder, 12 refills

Technical data:
- Line thickness: 3 mm
- Material to be processed: Steel | Iron | Metal | Stone | Tiling | Ceramics | Wood | Textiles | Glass | Plastic

metabo Drills

For drilling in steel up to max. Ø 16mm

Execution:

- **Ident. No. 022:**
  - Spindle with hexagon socket for working with screwdriver bits without a drill chuck
  - With adjusting wheel for pre-selecting the rotation speed
  - With Vario (V) electronics for working with rotation speeds suitable for the material
- **Ident. No. 036:**
  - drill spindle with hexagon socket
  - variable speed
  - rotating carbon brush bridge for maximum performance
  - cable-protecting ball joint for maximum freedom of movement when working
  - safety coupling

BOSCH Drills

For drilling in steel up to max. Ø 16 mm

Application:

No. 70016 041: ideal for drilling holes in formwork

Execution:

- control electronics for precise spot drilling
- **No. 70002:** variable speed to suit the material
- **No. 70016 038:**
  - adjustment wheel for speed preselection
  - 2-speed planetary gear unit
  - Ball bearings and anti-friction bearings throughout for long service life and precise work
  - Overload coupling
- **No. 70016 041:**
  - synchronised 2-speed draw-key transmission; switchover possible during operation
  - Switch is operated and locked with one finger

Advantage:

- **No. 70016 041:** also suitable for mixing

Angle drills

For drilling in steel up to max. Ø 10mm

Application:
ideal for hard-to-reach areas

Execution:
- **Ident. No. 005:**
  - accelerator electronics and speed preselection with adjusting wheel
  - rugged bevel gear drive for long service life
  - transmission head height only 74 mm
- **Ident. No. 021:**
  - metal gear head
  - clockwise/anti-clockwise rotation and continuously variable accelerator electronics for universal use, e.g. for thread cutting up to M6.
  - conical drill shaft holder
  - transmission head height: 96 mm

Delivery:
in cardboard box

Impact drills, 1-speed and 2-speed

For drilling in masonry up to max. 24 mm

Application:
No. 70020: for drilling boreholes in particularly hard materials using mechanical impact.
No. 70021 011–70021 026, 70021 052: For drilling holes in especially sturdy materials with mechanical force
No. 70021 048: for the most demanding applications with large diameters (drilling, working with hollow drilling bits and hole saws) as well as screw-driving and mixing.

Execution:
- **No. 70020:**
  - adjustment wheel for pre-selecting the speed
  - wear-free cast aluminium gear case
  - spindle with hexagon socket
  - rotating carbon brush bridge
  - safety coupling
  - cable-protecting ball joint
- **No. 70021 011:** speed preselection with adjustment wheel for working with different materials
- **No. 70021 011, 70021 048:**
  - Wear-free metal gear case
  - Rotating carbon brushes
  - Ball joint for maximum freedom of movement and protection from cable breakage
- **No. 70021 026:** With Rotation Control Clutch - protects the user and machine from overloading or blocking
- **No. 70021 026, 70021 052:**
  - Robust metal gear housing for long service life
  - With kickback control
  - With speed pre-selection
- **No. 70021 048:**
  - Mechanical overload clutch
  - torque pre-selection for uniform driving in of screws

Advantage:
- **No. 70021 026–70021 048:** clutch claws unlock and torque is minimised to prevent the tool blocking abruptly

Delivery:
No. 70020 191–70021 011: quick-action drill chuck, extra handle, depth stop, in plastic case
No. 70021 026, 70021 052: In case

ATORN Hammer drill bit with four cutting edges

with SDS-Plus shank

HM | Z 4

Application:
Cutter with multiple cutting edges for concrete and reinforcements

Execution:
- Extremely robust with four cutting edges and two spiral flutes for a long service life
- Large drilling dust grooves and spiral
- Hammer drill bit with four cutting edges combining speed and robustness

Advantage:
- With an embedded carbide head for extreme resistance in reinforcements and powerful drilling progress
- Particularly fast drilling progress, does not get caught on reinforcements
- Optimised head and spiral design ensure highly effective drilling dust removal and minimal dust deflagration, even in deep drill holes
- Computer-generated spiral leads to very low levels of vibration and reduces the strain on the user
- Centring point ensures easy drilling

Technical data:
- Number of cutting edges: 4 PCS

Prod. Gr. 1AH

ATORN Hammerbohrer Vierschneider Satz

with SDS-Plus shank

HM | Z 4

Application:
Cutter with multiple cutting edges for concrete and reinforcements

Execution:
- Extremely robust with four cutting edges and two spiral flutes for a long service life
- Large drilling dust grooves and spiral
- Hammer drill bit with four cutting edges combining speed and robustness

Advantage:
- With an embedded carbide head for extreme resistance in reinforcements and powerful drilling progress
- Particularly fast drilling progress, does not get caught on reinforcements
- Optimised head and spiral design ensure highly effective drilling dust removal and minimal dust deflagration, even in deep drill holes
- Computer-generated spiral leads to very low levels of vibration and reduces the strain on the user
- Centring point ensures easy drilling

Technical data:
- Included in delivery: Box 5/6/8 x 50/110 and 6/8/10/12 x 100/160 mm
- Number of pieces in assortment/set: 7 PCS

Prod. Gr. 1AH

ATORN Cylindrical stone drill bit (DIN 8039)

HM | Z 2 | HA

Application:
A genuine all-rounder for true professionals: Suitable for almost all materials and available for all standard power tools. A must-have drill bit for every tradesperson.

Execution:
- Ideal for a wide range of materials used in construction
- Save time and money by using a drill bit that is compatible with a range of materials and composite materials
- Reliable universal drill bit.

Advantage:
- Enables drilling into smooth and hard surfaces thanks to the diamond-ground carbide transverse cutting edge
- Can also be used with lower impact force when drilling in masonry and stone

BOSCH Hammer drill bit SDS max-7

For use in stone, concrete and masonry

Z 2

Application:
Ideal for use at the highest drilling speeds

Execution:
- Suitable for all SDS plus hammer drills.

Advantage:
- Highest drilling speeds
- S-cutters made of carbide and inclined side cutters enable very fast drilling
- Vibration-optimised flute design provides excellent power transmission and increased speed

BOSCH Expert SDS max-8X hammer drill bit

For use in stone, concrete and masonry

Z 4

Ident. No. 200

Application:
Ideal for drilling holes in reinforced concrete, e.g. for setting chemical anchor points and/or reinforcement joints.

Execution:
- Suitable for all SDS max hammer drills.

Advantage:
- Lasts up to three times longer than a standard drill bit
- Extremely durable drill bit tip with Bosch Carbide Technology.
- The first choice for construction workers. Durable and powerful.

BOSCH Expert CYL-9 MultiConstruction drill bit

For use in stone, concrete, reinforced concrete and masonry

Application:
Ideal for drilling holes in various materials. Can be used in impact drilling for concrete and stone and rotary drilling for clay brick, tiles, panels, wood and plastic.

Advantage:
- Up to five times more precise than a standard drill bit
- Precise drilling with the patented Bosch Centering Geometry.
- The cylindrical shank is suitable for keyed drill chucks.
- The first choice for building work: maximum precision and versatile.

Bench drill stands

For hand drills and impact drills in stationary use

Application:
Ident. No. 019: Solid design for precise drilling.
Ident. No. 201: Industrial drill stand for drills up to 16 mm drilling capacity.

Execution:
- **Ident. No. 019:**
  - With integrated return spring and depth stop.
  - Use of the max. drilling depth of 65 mm is possible without repositioning.
  - Milled work surface with clamping grooves, e.g. for fixing vices.
- **Ident. No. 110:**
  - Adjustable depth stop
  - Asymmetrical arrangement of the column on the base plate allows larger workpieces to be processed
  - The structure of the feed drive mechanism enables the maximum drilling depth of 65 mm to be reached with one swivel movement
- **Ident. No. 201:**
  - Double drill motor guide for extra-large drilling tools
  - Base plate with hole pattern for Demmeler and Siegmund system 28 welding tables
  - Integrated coolant tank with flexible jointed hose
  - Manual feed wheel can be positioned on either side
  - Tool-free adjustable slide height

Advantage:
- Guarantees secure and precise work

Application:

Ident. No. 015: For use on hand-held drills and hammer drills.

Ident. No. 025: For easy screw-driving in hard-to-reach places.

Execution:

- Suitable for clockwise and anti-clockwise rotation
- **Ident. No. 015:**
  - Suitable for drills with spindle neck diameter of 43 mm
  - Spindle with hexagon socket for screwdriver bits
  - Quick-clamping coupling
- Transmission ratio 1:1
- Drill chuck connecting thread 1/2 inch - 20 UNF
- Bit clamping socket
- **Ident. No. 025:**
  - With 1/4 inch (6.35 mm) hexagonal shaft
  - Magnetic bit holder
  - Only 30 mm corner-to-corner
  - Suitable for cordless screwdrivers up to a maximum of 14 Nm and 400 rpm
  - Gear unit made of special steel
  - Angle screwdriver attachment with 105° inclination

Prod. Gr. 745

Magnetic core drills

With Weldon shank

Application:

For drilling large diameters on magnetic workpieces.

Execution:

- Large stroke, therefore suitable for use with core drill bits, twist drills and countersinks
- Magnetic base with high retention force allows working on vertical surfaces and overhead
- Integrated coolant container for easily metered internal cooling of the core drill bit
- Bright LED light
- Restarting protection
- Hard-wearing 5-meter mains cable with rubber sheath
- Lockable carriage for comfortably changing tools

Advantage:

- Chip guard installable without tools protects user from metal chips and contact with tools
- Handle for comfortable carrying and lifting
- Protection circuit starts motor only when magnet is activated

Delivery:

Ident. No. 011: Ejector pin, securing belt, hexagon socket key size 4, chip guard, in plastic case

Ident. No. 021: Industrial holder for Weldon shank 19 mm, ejector pins 75 and 100 mm, ejector drift Morse taper 2, securing belt, hexagon socket key size 5, chip guard, plastic case

Ident. No. 011

Magnetic core drills - with QuickIN holder

In universal and automatic versions

Application:

Ident. No. 011: For drilling large diameters on magnetic workpieces.

Ident. No. 028–036: For universal use, such as core, spiral, thread drilling as well as countersinking and reaming

Ident. No. 042: With extra large lifting range for all drilling operations, such as core, twist, thread drilling, countersinking and reaming

Execution:

- Clockwise/anti-clockwise rotation
- integrated coolant tank
- Manual feed wheel can be positioned on either side
- **Ident. No. 011, 036:** electronic speed adjustment
- **Ident. No. 011–036:**
  - Tilt sensor
  - Speed memory “Memory Function”
- **Ident. No. 028:** Electronic speed adjustment.
- **Ident. No. 028–036:** convenient magnetic retention force indicator
- **Ident. No. 036–042:** Torque safety clutch
- **Ident. No. 042:**
  - Mechanical 4-speed gearing
  - tilt sensor
  - Rotation speed reduction

Advantage:

- **Ident. No. 011:**
  - small, lightweight and powerful
  - easy and confusion-free operating concept
  - high magnetic retention force
- **Ident. No. 036:** digitally actuated drill feed saves times and money when drilling large volumes

Delivery:

Ident. No. 011–036: incl. coolant tank, lashing strap, swarf hook, centring pin, in plastic case

Ident. No. 042: Delivered in case with 1 coolant tank, 1 lashing strap with ratchet tool, 1 swarf hook, 2 centring pins, 1 protective cover, 1 taper drift, 1 Allen key 5 and 6 mm, 1 additional handle

BOSCH Impact wrenches and drivers

With 1/2 inch square drive/1 inch square drive

Application:
for heavy-duty screw connections on trucks, agricultural machinery, in commercial vehicle construction, in heavy industry and the petrochemical industry

Execution:
- suspension hook for attaching to a spring balancer
- torsion rods (special accessories) guarantee that the required torque is maintained
- V-slot impact mechanism with low back torque and long service life
- additional handle with support plate can be fitted in two positions for improved handling

Model		GDS 30
Manufacturer Article Number		0601435103
Power input (W)		920
Suitable for screw		M30
Max. torque for hard screwing application (Nm)		1000
Max. torque for soft screwing application (Nm)		500

BOSCH Rotary hammer drills

For drilling in concrete up to max. 45 mm

Application:

Ident. No. 076–091: For drilling and chiselling with pneumatic impact mechanism, in stone and concrete.

Ident. No. 237: for drilling and chipping in stone and concrete with pneumatic impact mechanism.

Execution:

- Vibration Control vibration damping
- **Ident. No. 076:** replacement chuck for switching rapidly between drilling with impact in concrete and drilling without impact in wood and metal
- **Ident. No. 076, 237:** continuous speed control
- **Ident. No. 076–091:** Overload coupling
- **Ident. No. 091:**
  - speed preselection
  - Turbo-Power function for extra power when chipping
  - Automatic switch lock
  - service display and standby display
- **Ident. No. 091–237:** ball joint for preventing cable breakage
- **Ident. No. 237:**
  - overload coupling
  - rotatable brush plate for equal force in clockwise and anti-clockwise rotation

Advantage:

- clutch claws unlock and torque is minimised to prevent the tool blocking abruptly

Delivery:

Ident. No. 076: Grease tube, quick-action drill chuck 13 mm, replacement SDS-plus drill chuck, additional handle, depth stop 310 mm, in tool case

Ident. No. 091: Grease tube, machine cloth, additional handle, in tool case

Angle grinder

with discs dia. 125 mm to 150 mm

Application:
Ref. no. 051-052, 055-057: For effective grinding, cutting and deburring work in harsh working environments.
Ref. no. 053-054: For effective grinding, cutting and deburring work in harsh working environments for stainless steel machining.

Version:
- Optimum cooling and temperature monitoring.
- Tool-free changing of abrasives in seconds.
- Effortless work due to slim size, compact design and low weight with good balance.
- Industrial-grade cable H07, 4 m length.

Advantage:
- FEIN PowerDrive motor with fully enclosed motor housing and separately installed motor electronics for maximum service life.
- Optimum protection of the motor against aggressive ceramic and mineral dusts.
- Extensive user protection through many electronic functions.

Technical data:
- Motor design: Brushless motor
- Power input: 1500 W
- Power output: 1050 W
- Thread dimension of spindle: M14
- With restart protection: Yes

No. 70371

No. 70373

metabo® INOX angle grinder - with disc Ø 125 mm

With adjustable speed for perfect stainless steel machining

Application:

Ident. No. 502: Ideal for stainless steel machining: robust, high-torque angle grinder with high gear reduction and reduced adjustable rotation speed for cool grinding

Ident. No. 510: Specially developed for removing weld slag, rust or paint in narrow frame constructions and for working in tight spaces

Execution:

- **Ident. No. 502:**
  - Vario Tacho Constamatic (VTC) full-wave electronics with adjusting wheel: for working with material-appropriate speeds which remain constant under load
  - Metabo M-Quick system: for faster, tool-free cutter replacement at the push of a button
  - Metabo S-automatic: mechanical safety coupling
  - With electronic overload protection, soft start and restart protection
- **Ident. No. 510:**
  - Metabo S-automatic mechanical safety clutch
  - cut-out carbon brushes for protecting the motor
  - speed adjustment for perfect machining of stainless steel

Advantage:

- **Ident. No. 502:** Gear case can be swivel-mounted in 90° increments for left-handed operation or for separation

Delivery:

Ident. No. 502: Protective hood, support flange, M-Quick clamping nut, extra handle Metabo VibraTech (MVT)

Ident. No. 510: Protective cover, support flange, M-Quick clamping nut, additional handle, lamellar grinding disc Flexiamant Super Convex (125 mm; P60)

Ident. No. 510

Ident. No. 502

Prod. Gr. 745

metabo® Straight grinder

With variable rotation speed

Application:

Ident. No. 007: High rotation speed makes it ideal for milling and grinding work.

Ident. No. 017: Long grinding spindle makes it ideal for use in hard-to-reach places.

Ident. No. 027: Ideal for grinding inner and outer surfaces in conjunction with disc sanders, thanks to extremely high torque.

Execution:

- adjustment wheel for pre-selecting the speed
- VC electronics for working at appropriate speeds for the material, speeds remain virtually constant under load
- Electronic overload protection
- Safety motor cut-off and restart protection
- Precision collet chuck for precise concentricity
- **Ident. No. 027:** Robust and smooth running planetary gearbox provides high torques

Delivery:

Ident. No. 027: Collet chuck, open-end spanner, protective cap, additional handle, in box

Prod. Gr. 745

BOSCH Straight grinder

With fixed or variable speed

Application:
For fine finishing, smoothing and deburring.

Execution:
- Kickback stop, direct cooling, cut-out carbon brushes
- **Ident. No. 020–051:** 6-level speed pre-selection for different materials

Advantage:
- **Ident. No. 010–020:** Long service life due to double-sealed ball bearings

Delivery:
Ident. No. 010–020: 2 x open-end spanners size 19, clamping unit
Ident. No. 051: Single open-ended spanners 13 mm and 19 mm, clamping unit

Prod. Gr. 731

metabo Milling and grinding motor

710 W

Application:
For driving flexible shafts. For universal use. Motor upgradeable to router with milling attachment (accessory).

Execution:
- adjustment wheel for pre-selecting the speed
- VC electronics for working at appropriate speeds for the material, speeds remain virtually constant under load
- Hardened and polished replaceable collet chuck for precise concentricity of tools
- Electronic overload protection
- Safety motor cut-off and restart protection

Delivery:
Two open-end spanners, in box

Technical data:
- Model: FME 737
- Min./max. idle speed: 13000-34000 rpm
- Power input: 710 W
- Power output: 430 W
- Spindle-neck diameter: 43 mm
- Max. clamping diameter: 8 mm
- Weight: 1.4 kg

70309...	Ident. No.	090 ○

Prod. Gr. 745

BIAX Professional Power Drive unit with flexible shaft, 20/3 G, set

710 watt, voltage 230 V

Application:
Ident. No. 012: For fine grinding, milling and polishing tasks, particularly in mould making
Ident. No. 015: Universal tool for milling, grinding, brushing or polishing

Execution:
- Overload protection of the motor thanks to automatic shutdown
- Machine can be operated when suspended or standing
- Soft start
- **Ident. No. 012:** Higher level of safety due to restart protection
- **Ident. No. 015:** Start-up current limitation prevents current peaks and protects the motor

Advantage:
- Constant speed even under loads
- Automatic cut-off when carbon brushes become worn
- **Ident. No. 015:**
  - No pulsing in low speed range
  - Fewer mechanical wear parts because there is no gear
  - Fully encapsulated sensorless electronics – no clogging with metal chips

Delivery:
Ident. No. 012: With flexible shaft DV 6, straight handpiece
Ident. No. 015: With DV 8 flexible shaft, straight handpiece

Technical data:
- IP protection class: IP 20

DREMEL® Drive unit with flexible shaft

Voltage 230 V, 50 Hz, shock-proof, noise-suppressed

Application:
For light grinding, milling or drilling tasks.

Execution:
- Quick-change system: EZ Twist
- Soft-grip handle
- Replaceable carbon brushes
- Collet chuck lock
- Integrated suspension loop

Delivery:
Dremel 3000, flexible shaft, 25 accessories including SpeedClic, carrying case.

Model		3000-1/25

Prod. Gr. 768

FLEX BSE 14-3 100 brush sanding machine set

1,400 watt, voltage 230 V

Application:
For optimal processing of various materials when satin-finishing, texturing, polishing, brushing, smoothing, removing rust, deburring steel and stainless steel surfaces

Execution:
- Microprocessor electronics: Speed pre-selection, constant speed maintenance using a tachometric generator, soft start-up, restart inhibitor after power failure, overload protection and temperature monitoring
- A unique tool attachment with quick-action coupling for tool-free changing of the system's attachments for burnishing and tube belt sanding
- Tool-free grinding tool replacement via patented quick-change system
- Adjustable protective cover: for striking tools up to dia. 125 mm
- **Ident. No. 011:** spindle lock
- **Ident. No. 012:** Spindle lock

Advantage:
- The grinding attachment for burnishing can be adjusted variably, allowing work to be carried out close to edges; also suitable for narrow rollers

Delivery:
Ident. No. 011: Grinding attachment satin-finishing BS 00, rubber air roller, air pump, abrasive fleece A 280/fine, Superfinishing sleeves S 600 and S 500, MESHFLEX A 400 sanding sleeve, 3 each of sanding sleeves: ZIRCOFLEX P 80, ZIRCOFLEX P 20, CERAFLEX K 20, CORUFLEX P 80, transport case L-BOXX® 238.

FLEX BRE 14-3 125 tube belt sander set

1,400 watt, voltage 230 V

Execution:
- Microprocessor electronics: with constant speed maintenance system by means of tachogenerator, soft start, overload protection and speed pre-selection
- Adjustable protective hood: for grinding tools up to 125 mm
- Tool-free grinding tool replacement via patented quick-change system
- spindle lock
- Single-pole switch
- High-quality, sprung sanding arm: made of light metal with two deflection rollers. For optimum wrapping of tubes up to max. 270°
- Sanding belt dimensions: 760 x 40 mm

Delivery:
Pipe band grinding attachment BR 25, Superfinishing-Band S 600 and S 500, MESHFLEX A 240 sanding belt and A 400, 5 each of sanding belts CORUFLEX in P 80, P 20, P 220, transport case L-BOXX® 238

Prod. Gr. 707

FLEX Belt filing machine TRINOFLEX FBE 8-4 140

880 watt, 230 V

Application:
For sanding and filing at inaccessible spots.

Execution:
- With rotation speed preselection, keeps constant rotation speed by means of tachometer generator, soft start, power-on inhibitor after power failure, overload protection and temperature monitoring
- Powerful motor with high efficiency for high output power
- VE electronics: for continuously variable pre-selection of belt speed
- Sanding head: pivots 140°, 9 mm or 30 mm sanding arms can be used
- Sanding arm adjustable for belt lengths 520 mm and 533 mm
- Machining length of sanding arm up to approx. 12 cm

Advantage:
- Quick belt change system: for fast, tool-free replacement
- A unique tool attachment with quick-action coupling for tool-free changing of the system's attachments for burnishing, tube belt sanding and filing

Delivery:
Band file grinding attachment BF 140, various sanding belts, in L-BOXX

Technical data:
- Model: FBE 8-4 140 Set
- Manufacturer Article Number: 453455
- Power input: 800 W
- Power output: 325 W
- Min./max. belt speed: 3-8 m/s
- Suitable for strap dimension: 533 x 4-30 mm | 533 x 4-9 mm
- Weight: 2.6 kg

metabo Orbital sanders

With a fixed and variable number of oscillations

Application:
For sanding wood, plastics, metals, stone, plaster and painted surfaces.

Execution:
- **Ident. No. 011:**
  - Bearing flange made from die-cast aluminium
  - Clamping system for sandpaper with and without velcro backing
  - Easy-to-empty textile bag for working without a vacuum cleaner
  - Connection option for attaching an all-purpose vacuum cleaner
- **Ident. No. 025:**
  - Rugged clamping system for sandpaper with and without Velcro, as well as abrasives up to 10 mm thick
  - Multi-sealed ball bearings and tear-resistant rubber sleeve
  - TurboBoost: Connection of additional power reserves for maximum removal
  - Abrasive pad with additional lateral suction channels for clean working
  - Vario (V) electronics for working with orbital rates suitable for the material
  - Dust trap cartridge with filter for working without an extractor connected
  - Extraction option by connecting an all-purpose vacuum cleaner

Advantage:
- **Ident. No. 025:**
  - Orbital system with double-row angular contact ball bearings for extremely quiet running and minimal vibration
  - Excellent sanding pattern without sanding whorls and grooves for professional surface treatment

Delivery:
Ident. No. 011: Textile dust bag, in plastic case
Ident. No. 025: Abrasive pad with Velcro adhesion, removable additional handle, dust trap cartridge, 1x folded filter, in box

BOSCH Orbital sanders

With variable number of oscillations

Application:
For sanding wood, plastics, metals, stone, plaster and painted surfaces.

Execution:
- Controllable speed for material-suitable operation
- Direct connection of vacuum cleaner or micro-filter dust box for dust-free working
- **Ident. No. 013:** Additional handle with vibration damping for comfortable gripping in any working position

Advantage:
- Ergonomically designed surfaces with Softgrip for perfect handling
- Uniform distribution of the contact pressure for high surface quality
- Lowest level of vibration in class (<2.5 m/s²) due to decoupled motor housing
- **Ident. No. 013:** Perfect sandpaper mounting, even for paper without Velcro connection, due to special paper clamping system
- **Ident. No. 023:** Innovative paper clamping system for perfectly fitting sandpaper, even for sandpaper without velcro backing

Delivery:
Micro-filter box, additional handle, in L-Boxx

metabo Random orbital sanders

2.5 mm - 5 mm orbital circle

Application:
For finishing surfaces.

Execution:
- Vario (V) electronics and wheel for adjusting the speed to different materials
- Power Control System: prevents scratches when placing the running machine onto the material
- rugged bearing housing made from wear-free die-cast aluminium
- TurboBoost function for maximum material removal
- Removable extra handle
- grinding plate with multi-hole pattern for effective extraction and longer life of abrasive
- handle area with slip-proof soft grip surface
- extraction option by connecting an all-purpose vacuum cleaner
- **Ident. No. 200:** Patented adjustable dual orbit diameter with settings for fine finishing or high material removal

Delivery:
Support plate with Velcro adhesion, hexagon key, removable additional handle, dust trap cartridge, 1x folded filter, in box

Technical data:
- Min./max. idle speed: 4200-11000 rpm

BOSCH Random orbital sanders

2.5 mm - 5 mm orbital circle

Application:
for sanding, intermediate sanding, fine sanding and removing paint. Can be used on wood, veneer, paint and filler as well as on mineral and acrylic surfaces.

Execution:
- Speed pre-selection for adjusting the speed to different materials
- Hook-and-loop closure for fast sanding disc replacement
- Aluminium bearing flange for long service life

Advantage:
- Constant speed and high removal rate for efficient results even on demanding surfaces

Delivery:
Ident. No. 023: 1 x multi-hole sanding disc C470, Best for Wood and Paint, grain 120, in box, backing pad, paper dust bag, suction adapter
Ident. No. 033: 1 x multi-hole sanding plate C470, Best for Wood + Paint K120; in box

Technical data:
- Min./max. idle speed: 4500-12000 rpm
- Power input: 340 W
- With rubber-coated handle: Yes
- With electronic feedback: Yes
- With overload protection: No
- With speed pre-selection: Yes
- With soft start: No
- With dead man function: No
- Min. idle speed: 4500 rpm
- Max. idle speed: 12000 rpm
- With restart protection: No

Prod. Gr. 731

Bench grinders
with AC or three-phase motor

Application:

Ident. No. 011: Robust and compact machine for sharpening, sanding and deburring tasks

Ident. No. 021: High-performance power tool for demanding sharpening, sanding and deburring work

Ident. No. 041: Particularly powerful power tool for heavy-duty use

Ident. No. 071: Universal combination power tool with sanding belt and sanding disc for processing wood and metal

Execution:

- **Ident. No. 011:**
  - Motor for single-phase alternating current
  - Workpiece rests adjustable without tools
  - Large spark protection screens to protect eyes
  - Vibration-damping rubber feet for secure position
- **Ident. No. 011–041:** Low-noise, low-vibration, maintenance-free induction motor
- **Ident. No. 021:**
  - Large, tilting tool support with practical V-groove for sharpening welding needles
  - Maximum work safety thanks to extra-large, sturdy eye shields
- **Ident. No. 021, 071:**
  - Suitable for the use of steel wire wheel brushes for rust removal
  - Integrated LED light for optimal illumination of the work area
  - Maximum smoothness and long disc service life thanks to high-quality mounting flanges
- **Ident. No. 021–041:** Workpiece rests are adjustable without tools
- **Ident. No. 041:**
  - Powerful three-phase motor with high torque
  - Robust die-cast aluminium protective covers
  - Protective covers with bayonet mount for quick, easy disc changes
  - Restart protection: Prevents unintentional startup after a power failure
  - Large eye shields
  - Vibration-absorbing rubber pads for stability
- **Ident. No. 071:**
  - For sanding, sharpening, deburring and derusting of steel and metals
  - Large belt sanding arm that can be continuously inclined up to 90° for two typical standard sanding belt lengths
  - Tool-free angle adjustment of the belt sanding arm
  - Flexible working on the large sanding area or alternatively on the curved section of the belt sanding arm
  - Extraction connection on the belt sanding arm, suitable for commonly used coupling bushes
  - Rubber drive wheel in the belt sanding arm with grooves for fast heat dissipation
  - Quick, tool-free sanding belt change after opening the cover

Universal endless sanding belts
For METABO belt sanding machines

Application:

For grinding and deburring metals, unalloyed and low-alloy steels, cast iron, aluminium alloys, brass, bronze, hard metallic layers, rubber, plastics etc.

Execution:

- Suitable for universal use.
- High-quality sandpaper (synthetic corundum) with dense grain distribution, high removal rate and long service life.

Notes:

Recommended peripheral speed: 25-35 m/s

Technical data:

- Width of tape x length of strap: 50 mm x 1020 mm
- Material of abrasive medium: Corundum
- Scattering: Close scattering
- Included in delivery: 3 pcs.

BOSCH Belt sander

Voltage 230 V, 50 Hz

Application:
For removing, flat-sanding, smoothing and cleaning wood, plastic and metal.

Execution:
- With speed control
- Aluminium rollers for the most demanding applications
- With robust toothed belts and metal toothed belt wheels for long tool life
- Graphite-coated abrasive pad

Advantage:
- Can be simply reversed and used as a stationary power tool

Delivery:
Fabric tape, graphite plate and dust bag; in case

Model			GBS 75 AE

BOSCH sabre saws

Stroke length 28 mm

Application:
For removing old components and for cutting pipes.

Execution:
- With constant pendulum stroke for fast sawing progress
- Anti-vibration handle and counterbalance weight
- Metal hook for suspending the device

Advantage:
- Faster tool change with one hand thanks to SDS saw blade replacement

Delivery:
Saw blade wood S 2345 X, saw blade metal S 123 XF, in plastic case

Technical data:
- Model: GSA 1300 PCE
- Manufacturer Article Number: 060164E200
- Max. cutting capacity of wood: 230 mm
- Max. cutting capacity of non-ferrous metals: 20 mm
- Min./max. idle stroke speed: 0-2900 rpm
- Power input: 1300 W
- Stroke length: 28 mm
- Weight: 4.1 kg
- With working lights: Yes

BOSCH Sabre saw blades for metal demolition work

suitable for sabre saws with 0.5-inch universal shank systems

Application:
Suitable for cutting high-strength steel and the toughest materials.

Execution:
- Carbide technology, even tooth spacing
- Teeth welded to highly elastic steel body using hard metal technology
- Wide body (25 mm) and high blade thickness (1.25 mm) allow precise cutting
- Specially designed for maximum durability with high-strength steels

Advantage:
- For effortless cutting and an ultimate blade service life

Notes:

ZIMMER MASCHINEN Band saws

Voltage 230 V, 50 Hz, shock-proof, noise-suppressed

Application:
Small bandsaw for professional use

Execution:
- Single-phase 1800 watt motor
- Safety switch
- Toothed gearing with long-life lubricants
- Electronic speed controller with torque control
- Automatic band tensioning

Delivery:
1x compatible saw blade

Hot air blowers

Application:
For removing paint, shaping, shrink-fitting and welding.

Execution:
- **No. 71172 012:** With two temperature settings
- **No. 71172 014:** With three air flow settings
- **No. 71172 014–71172 016:** With adjusting wheel for continuous temperature adjustment
- **No. 71172 014–71172 018:** Hith high-quality ceramic heating
- **No. 71172 016:** With two air flow settings
- **No. 71172 018:** With LCD display to enable precise adjustment of the temperature and air flow to suit different materials and applications
- **No. 71180:**
  - Powerful 2300-W motor quickly achieves a temperature of 650°C
  - With thermal protection: Heating element switches off automatically in the event of motor overheating
  - With 10 airflow speeds, digitally controlled temperature settings and 4 adjustable programmes for comprehensive tool control

Advantage:
- **No. 71172 012–71172 014, 71172 018:** Safe stationary working thanks to large non-slip base
- **No. 71172 016:** Practical rod shape for a comfortable working position, e.g. when working on the floor
- **No. 71172 018:** Programmable settings for recalling frequently recurring tasks

Delivery:
No. 71172 012: Wide-jet nozzle (50 mm) and reflector nozzle; in metaBOX
No. 71172 014, 71172 018: Wide-jet nozzle (50 mm), reducing nozzle (9 mm) and reflector nozzle; in metaBOX
No. 71172 016: Slotted nozzle, welding nozzle and reducing nozzle (9 mm); in metaBOX
No. 71180: Glass protection nozzle (75 mm), area nozzle (50 mm), reducing nozzle (9 mm), welding shoe (10 mm) and reflector nozzle; in case

metabo KE 3000 glue gun

Voltage 230 V, 50 Hz, shock-proof, noise-suppressed

Application:
Suitable for hot-melt gluing of wood, plastic, cardboard, glass, ceramics, stone, textiles, cork, leather and metal, and for sealing, caulking as well as for repairs with hot melt glue.

Execution:
- Wire bracket and support surface on the housing

Advantage:
- Exact metering due to mechanical adhesive feeding
- Optimum application of the glue due to PTC heating element for constant temperature
- Clean working, without dripping thanks to nozzle with ball seal

Delivery:
Hot melt glue stick (200 mm long, transparent)

Model		KE 3000

PACKOUT case

With drawers

Execution:
- Access your tools easily, even if the case is near the bottom of the PACKOUT™ tower. Ball-bearing slides with a load capacity of up to 11 kg. The safety struts prevent you from accidentally opening a case during transport and can be locked with a padlock. Supplied with adjustable dividers for maximum customisation and enhanced organisation. Metal struts reinforce the case corners.

Construction made of impact-resistant polymers - ideal for use on construction sites.

Technical data:
- Width x height x depth: 560 x 360 x 410 mm
- Compartment type, boxes: Adjustable
- With handle: Yes

Compressed air tools

Oil mist should be continuously added to the compressed air flowing through all pneumatic tools which are not explicitly labelled as suitable for oil-free operation. We therefore recommend using the corresponding conditioning unit, consisting of a filter pressure regulator and mist lubricator.

metabo BASIC mobile workshop compressors

IP 54 degree of protection, for simple commercial applications

Application:
Ident. No. 206: Handy 6-L compressor, ideal for stapling, nailing, tyre inflation and for working with cartridge guns, grease guns and riveters.

Execution:
- **Ident. No. 206:**
  - Oil-free piston compressor: easy to transport and reduced service costs
  - Instrument panel with easily legible manometers for tank and operating pressure
  - Adjustable working pressure suitable for the application due to pressure reducer and manometer
  - With overload protection
- **Ident. No. 214:**
  - For single-phase alternating current
  - Oil-lubricated piston compressor
  - Pressure reducer with manometer for controllable working pressure
  - Additional manometer for displaying tank pressure
  - Rubberised, robust wheels and handle for mobile applications
- **Ident. No. 312:** oil-lubricated piston compressor
- **Ident. No. 312–380:**
  - for single-phase alternating current
  - pressure reducer with manometer for controllable working pressure
  - additional manometer for displaying tank pressure
  - rubberised, robust wheels and handle for mobile applications
- **Ident. No. 380:** oil-free piston compressor

Advantage:
- **Ident. No. 206:**
  - Easy to carry and space-saving storage thanks to the folding handle and small dimensions
  - Simple condensate outlet via ball valve with butterfly handle
- **Ident. No. 206, 312–380:** 10-year boiler warranty against rust penetration
- **Ident. No. 214:**
  - Push button with starter valve for reliable cold start
  - 10-year tank warranty against rust penetration
  - No testing necessary before commissioning
- **Ident. No. 312–380:**
  - pressure switch with starter valve for reliable cold start
  - no testing necessary before commissioning
- **Ident. No. 380:** easier transport and reduced service costs thanks to oil-free piston compressor

Delivery:
Ident. No. 206, 312: universal quick-release coupling
Ident. No. 214: Universal quick-release coupling
Ident. No. 380: universal quick-release coupling, pull handle with rubber coating

Technical data:
- Operating pressure: 8 bar
- With overload protection: Yes

  - With lever start function
  - With pistol grip
  - Exhaust air: front
  - Frequency 110 Hz
  - Vibration level ≤ 5 m/s²
- **No. 75066:** Ergonomic shape
- **No. 75066 115:** Vibration and thermally insulated handle

Advantage:
- **No. 75066:**
  - Very high impact frequency
  - For left- and right-handed use

Delivery:
No. 75061: Needle set (kit contents:19 needles Ø3.2 mm x 140 mm)

Prod. Gr. 7AA

Pneumatic straight grinder

With turning valve

Application:

Ident. No. 015, 035: For fine grinding, milling and engraving work.

Ident. No. 032: For spotting and reworking of moulds and tools.

Ident. No. 045: Universally applicable for fine and coarse work with milling bits of head diameter 3–8 mm.

Ident. No. 065: For coarser applications with milling bits of 6–10 mm head diameter.

Execution:

- **Ident. No. 015, 035–045:** Air discharge to the rear
- **Ident. No. 015, 035–065:** Environmentally friendly owing to central air discharge
- **Ident. No. 032, 065:**
  - with a long, thin tool spindle to enable work even in hard-to-access spaces
  - Rear air exhaust

Advantage:

- **Ident. No. 015, 035:** Very light and handy - extremely slim design.
- **Ident. No. 032:** The long, thin tool spindle allows the tool to be placed flat
- **Ident. No. 032–035:** Handy ergonomics for effortless grinding
- **Ident. No. 065:** Increased wear resistance

Delivery:

Ident. No. 015, 035: Includes Collet chuck ZG 5/3 mm, collet chuck spanner 6 + 8 and hose unit; in box

Ident. No. 032: Includes collet chuck ZG 5/3 mm and collet chuck key size 6 + 10; in box

Ident. No. 045: Includes collet chuck ZG 4/6 mm and collet chuck key size 9 + 11; in box

Ident. No. 065: Includes collet chuck ZG 7/6 mm and collet chuck key size 11 + 14; in box

Notes:

Please operate with oil. We recommend using a maintenance unit.

Pneumatic straight grinder

With lever valve

Application:

No. 75036 025: For fine grinding, milling and engraving work.

No. 75036 055: For fine finishing, smoothing and deburring, for powerful working.

No. 75036 095: For coarse work with milling pins of head diameter up to 12 mm.

No. 75061 070: For light and heavy deburring work

No. 75061 075, 75061 090: For light deburring work

No. 75061 080: For heavy deburring work as well as high-precision milling, grinding and roughing

No. 75061 085: For heavy deburring work. Ideal for brushing.

Execution:

- **No. 75036:** Rear air exhaust
- **No. 75061 070:**
  - Rear exhaust via hose unit with integrated silencer
  - Safety lever valve conforms to EN 792
  - Vane motor with powerful throughput
- **No. 75061 075, 75061 090:**
  - Ergonomic design
  - With a high-torque vane motor
- **No. 75061 075–75061 090:** Exhaust air: rear (via hose unit with integrated silencer)
- **No. 75061 090:** With floating bearing

Advantage:

- **No. 75036 025:** Very light and handy - extremely slim design.
- **No. 75036 095:** Increased wear resistance.
- **No. 75061 090:**
  - Floating bearing ensures scratch-free workpiece processing
  - Reduced cutter wear and tool life extension - tooth breakage is avoided

Delivery:

No. 75036 025: incl. collet chuck ZG 5/3 mm, collet chuck key size 6 + 8 and hose unit; in box

No. 75036 055: Includes collet chuck ZG 4/6 mm and collet chuck key size 9 + 11; in box

Pneumatic straight grinder

Application:

No. 75039: For grinding and deburring, particularly in metal work, toolmaking, form construction and bodywork construction.

No. 75066: for deburring, finishing welding and cast seams as well as other light grinding work

Execution:

- **No. 75066:** Exhaust air: rear
- **No. 75066 050:** Motor housing made of composite ensures insulation of the machine at hand
- **No. 75066 054:** rubberised handle ensures good insulation between hand and power tool

Advantage:

- **No. 75039:** Single-handed operation
- **No. 75066:** Movable air connection guarantees easy mobility of the grinder
- **No. 75066 054:** The tool performance can be adjusted via the adjustment wheel if desired by the
- operator

Pneumatic turbine grinder - oil-free operation

80 W

Application:

No. 75036 005: For the finest deburring work.

No. 75036 405: For working with milling pins of head diameter of up to 6 mm.

Execution:

- **No. 75036:** With elastic bearing
- **No. 75036 005:** Exhaust air discharge to the front
- **No. 75036 405:**
  - Air discharge to the rear
  - Controlled rotational speed for constant speeds
  - Run-out brake for increased safety
- **No. 75061:**
  - Exhaust air: rear
  - Elastic bearings significantly reduce the wear on the cutter
- High speed for excellent machining quality
- Oil-free operation

Advantage:

- **No. 75036:** Turbine motor - oil-free operation
- **No. 75036 005:** Optimum surface quality thanks to high speed and elastic bearing
- **No. 75036 405:** Constant speed at different loads thanks to centrifugal governor.
- **No. 75061:** High degree of concentricity for long run-times

Delivery:

No. 75036: Includes collet chuck ZG 5/3 mm, collet chuck key size 6 + 8 and hose unit; in box

Sanding belt 10 x 330 mm

Application:

No. 75066: For surface grinding in metal and wood processing as well as for deburring in hard-to-reach areas.

No. 75070: For working on narrow surfaces. For sanding belts 10 x 330 mm

Execution:

- **No. 75066:**
  - With safety trigger
  - With sound-proofed air outlet
  - With adjustable sound insulation
- **No. 75070:**
  - Head can be adjusted through 360°
- With continuously variable speed regulation
- With automatic belt adjustment
- With practical locking for fast sanding belt replacement

Delivery:

No. 75066: With sanding arm 6x330mm and 10x330mm

Technical data:

- Valve design: Lever valve
- Inner hose diameter: 10 mm
- Max. sanding belt width: 10 mm
- Grinding belt length: 330 mm

Pneumatic sheet metal shears 9036N-5

Application:
Ideal for cuts with small radii (min. 4.5 mm). Also suitable for cutting plastic.

Execution:
- Continuous speed control via a rotary knob on the handle back
- Cold-insulating handle

Delivery:
Includes coupling connector nominal width 7.2

Technical data:
- Model: 9036N-5
- Air consumption: 104 l/min
- Operating pressure: 6.3 bar
- Inner hose diameter: 10 mm
- Max. cutting capacity of steel: 1.2 mm
- Max. cutting capacity in aluminium: 1.6 mm
- Cutting width: 4.5 mm
- Length: 185 mm
- Weight: 1 kg
- Max. sound-pressure-level: 80 dB

75033...	Ident. No.	200 ●

Prod. Gr. 738

Pneumatic sheet metal nibbler 9036N-1

Application:
for high-precision cutting of all aluminium and steel sheets. ideal for straight cuts, also suitable for contour cutting.

Execution:
- continuous speed control via a rotary knob on the handle back
- with high-performance blade for maximum cutting performance
- cold-insulating handle and cold-insulated housing
- vibration-dampened through double-bearing spindle

Delivery:
incl. coupling connector nominal width 7.2

Technical data:
- Model: 9036N-1
- Air consumption: 104 l/min
- Operating pressure: 6.3 bar
- Inner hose diameter: 10 mm
- Max. cutting capacity of steel: 1.2 mm
- Max. cutting capacity in aluminium: 1.6 mm
- Cutting width: 4.5 mm
- Length: 255 mm
- Weight: 1 kg
- Max. sound-pressure-level: 80 dB

Pneumatic blow-out guns

Forged aluminium, silver anodised

Application:
For blowing out and cleaning machines, workpieces, bore holes, hollow parts etc.

Execution:
- **Ident. No. 013:** Connection nipple for couplings with nominal width 7.2-7.8

Technical data:
- Max. operating pressure: 10 bar
- Connection thread: M12 x 1.25
- Min./max. working pressure: 2-6 bar
- Min./max. working temperature: -10 to 50 °C
- Surface: Nickel plated

RIEGLER Low-noise energy-saving nozzle

For blow-out guns

Application:
For controlling the flow of air and reducing pressure.

Execution:

- aluminium basic body, other parts POM
- Volume flow: 10 to 95 l/min at 6 bar
- Controlled by turning the operating sleeve to one of 7 notches marked +/-, total 125°

Advantage:

- Regulating the flow downwards prevents sharp and pointed chips or harmful fluids flying around uncontrollably, for safe working.
- Saving energy and costs
- Additional effect is noise reduction

Pneumatic and liquid blow guns, series 208

for cleaning with compressed air or non-explosive water-based liquids

Application:
For cleaning work using compressed air, coolant or non-explosive water-based liquids.

Execution:
- **Ident. No. 003–006:**
  - Nozzle made of brass
  - With infinite flow control
- **Ident. No. 105:** Consisting of blow gun, silencer, rubber nozzle (diameter 14 mm), protective shield

Advantage:
- Ergonomic handle piece for working comfortably
- High blowing force
- Infinitely adjustable air flow
- **Ident. No. 005–006:** Satisfies OSHA and ArbStättV (German workplaces ordinance) requirements

Delivery:
Ident. No. 105: In cardboard box

Technical data:
- Max. operating pressure: 16 bar
- Burst pressure: 64 bar
- Connection thread: R 1/4 inch
- Min./max. temperature conditions: -20 to +60 °C

Pneumatic and liquid blow guns MultiFLOW

for cleaning jobs using water, coolant or compressed air

Application:
For cleaning work using compressed air, coolant or non-explosive water-based liquids.

Execution:
- Precisely adjustable flow rate regulation
- Satisfies OSHA requirements
- **Ident. No. 010:**
  - Zinc-plated hardened steel nipple (Ø 7.6 mm)
  - Compatible with all standard pneumatic systems
  - Planar or pointed jet with adjustable jet nozzle
- **Ident. No. 020:** Brass nipple (Gardena nipple: particularly suitable for liquids)
- **Ident. No. 020–030:** Flat or concentrated jet with adjustable jet nozzle
- **Ident. No. 030:** Zinc-plated steel adapter, 1/4" female thread

Notes:
Ident. No. 010: Compatible coupling, e.g. no. 75135 010-113

Technical data:
- Min./max. flow capacity: 5-25 l/min
- Min. air consumption: 200 l/min
- Max. air consumption: 1200 l/min
- Max. operating pressure: 16 bar
- Burst pressure: 64 bar
- Connection thread: R 1/4 inch
- Min./max. sound-pressure-level: 79-101 dB
- Min./max. temperature conditions: -20 to +60 °C

RIEGLER Pneumatic spray gun
With swivelling nozzle

Application:
For spraying low-viscosity media such as oils.

Execution:
- Matt translucent plastic cup (container volume approx. 0.7 l)
- Jet adjustable with nozzle

Technical data:
- Type: SPR1L
- Max. operating pressure: 12 bar
- Nozzle size: 4.5 mm

75101...	Ident. No.	910 ●

Prod. Gr. 7AD

HAZET Suction and blow gun
Reversible

Application:
For suctioning dirt into dust bag and for blowing out surfaces

Execution:
- Metal housing
- With single hand switch
- Vacuum level: 7.5 mmHg

Advantage:
- Special deflector insert protects bag against damage, e.g. from metal chips

Technical data:
- Connection thread: IT 1/4 inch
- Sound-pressure level: 92 dB

75033...	Ident. No.	050 ●

Prod. Gr. 738

RIEGLER Pneumatic tyre inflation gauge
0-12 bar, can be calibrated; EU type approval

Application:
For filling, bleeding and testing tyre pressure in workshops and filling stations.

Execution:
- Manometer with plastic protective cap for protection against shock and impacts
- Manometer diameter: 80 mm
- Can be loaded up to final display value
- Scale interval in bar and psi

Delivery:
Includes Plug-in nipple

Technical data:
- Type: 37.013.2
- Min./max. pressure measuring range: 0-12 bar

75101...	Ident. No.	701 ●

Prod. Gr. 7AD

HAZET Pneumatic tyre inflation gauge
Calibrated and uncalibrated

Application:
Ident. No. 060: For filling, bleeding and checking tyre pressure
Ident. No. 064: Precise tyre inflation and testing of the air pressure

Execution:
- Rubber sheath protects the manometer against light impact
- Hose with integrated torque plug-in nipple
- **Ident. No. 060:**
  - Manometer diameter: 63 mm
  - Scale interval in bar and psi
  - Handle with actuating lever and drain button (for one-handed operation)
  - Flexible hose: Length: 400 mm
- **Ident. No. 064:**
  - Manometer diameter: 80 mm
  - Scale graduation in bar
  - Handle with actuating lever for filling and bleeding (one-handed operation)
  - Flexible hose: Length: 1000 mm

Advantage:
- **Ident. No. 064:** Calibrated device

Delivery:

EJN Pneumatic spiral hose eSafe

Series 320

Application:
for connection to compressed-air tools and compressed-air machines.

Execution:
- With eSafe safety coupling and nipple
- ends and rotary joint axially offset on both sides
- max. pressure: 10 bar

Advantage:
- Coupling and nipple (DN 7.6) pre-installed for immediate use
- Lightweight and flexible
- Long life with excellent ageing properties
- The ventilation function of the eSafe safety coupling reduces the noise level and prevents accidents caused by the whiplash effect

Champion solid plastic cable reel

Application:
Can be permanently used outdoors

Execution:
- Solid plastic version
- AC power version

Advantage:
- Ergonomic soft-touch carry handle
- Folding twist grip
- Rotation stop switch
- Cable guide
- DiagS diagnostics system

Technical data:
- Cable length: 40 m
- Number of sockets (Safety plug): 4 PCS
- Material of drum body: Plastic
- Diameter: 290 mm
- Width x height x depth: 305 x 415 x 240 mm
- IP protection class: IP 54

Full plastic cable drum
for continuous use outdoors

Execution:
- Fully plastic
- 4-way grounding contact sockets
- Neoprene-rubber cable H07RN-F
- Ergonomic handle with 2-component soft touch
- With HEDI DiagS diagnostics system
- With rotation stop switch

Advantage:
- Incline of drum body of approx. 7° degrees
- Optimum stability
- Improved visibility of the socket insert
- Safety in wet conditions: Drainage due to incline and drainage grooves; even when lying down
- Convenient wall mounting of cable drum through rear boreholes

Notes:
Complies with the provisions of DGUV-I 203-005, K2 and DGUV-I 203-006

Technical data:
- Cable length: 40
- Number of sockets (Safety plug): 4 PCS
- Material of drum body: Plastic
- Diameter: 290
- Colour of cable: Black
- IP protection class: IP 54

Spring loaded reels

Electric version for use in dusty and dirt-prone environments

Application:

Ident. No. 110–115: Cable drum for all operations in which carrying the drum is a hindrance.

Ident. No. 120: spring-operated automatic cable winding

Execution:

- **Ident. No. 110–115:**
  - Maximum power with cable wound: 800 W
  - Maximum power with cable unwound: 2000 W
  - 1.5 metre connecting cable
  - Robust, closed housing
  - Thermal circuit breaker
  - Swivelling wall or ceiling bracket with 150° rotation
  - Rotation-stop system: Cable can be snapped in lace
- **Ident. No. 120:**
  - cable lock, easy to switch off and control
  - impact-resistant plastic frame
  - painted steel swivel-mounted wall bracket

Technical data:

- Cable material: Neoprene-rubber
- Material of drum body: Plastic
- Colour of cable: Black
- IP protection class: IP 24

Nilfisk Sweeping machines

For interior and exterior cleaning

Application:

Ideal choice for cleaning small production facilities, car parks, shopping centres, schools, workshops, bus and railway stations as well as in outdoor areas of office buildings.

Execution:

- with 2 side brooms
- main sweeping roller is equipped with a two-sided gear drive and the side brush is driven via a belt
- with adjustable handle with soft mould
- with dust filter for a clean exhaust air while sweeping
- working width 480 mm, not including side brooms

Advantage:

- cleaning is up to 6 times faster than when using a normal broom.
- virtually maintenance-free: a simple mechanical construction. no motor and no battery.
- easy to control thanks to large wheels

Delivery:

main sweeping roller, 2 side brooms, folding handle

Model			SW 250 920
Bin capacity (l)			38
Max. surface coverage per hour			1840

Nilfisk Wet/dry vacuum cleaners

For use in workshops and industry

Application:

No. 75520: Handy and robust vacuum cleaner – ideal for small cleaning tasks in workshops

No. 75521 042: Multi-purpose vacuum cleaner for industry and skilled trades.

Execution:

- **No. 75520:** Blow-out function
- **No. 75521 042:** with cable and accessory holder
- **No. 75521 060:**
  - Anti-static design
  - Certified according to dust class M (extended warning levels according to BG Bau specifications)
  - 42l dirt container and robust chassis with steel castors
  - With InfiniClean™ - fully automatic filter cleaning system for highest cleaning requirements and high filter efficiency
  - With appliance socket including automatic switch-on for the use of power tools

Advantage:

- **No. 75520 012–75521 042:** washable PET filter element
- **No. 75521 042:** suction regulation on hand-held tube
- **No. 75521 060:**
  - PTFE flat pleated filter (M-Class) with a separation efficiency of at least 99.9%
  - Use the same maintenance-free filter for wet and dry cleaning to reduce maintenance requirements, costs and downtime.

Delivery:

No. 75520: With 1.8 m suction hose (dia. 32 mm), hand-held tube with suction regulation, extension tube, joint and floor nozzle, universal nozzle, filter element and fleece filter bag

No. 75521 042: suction hose D32 x 3.5 m, aluminium extension pipes D36 2 x 500 mm, floor nozzle, joint nozzle, PET filter element Ø 185 x 140 mm, filter bag

No. 75521 060: PTFE flat filter, suction hose antistatic red/black D32-4m, extension tubes stainless steel D36 2x505mm, hand tube, tool adapter, crevice nozzle and floor nozzle

Notes:

No. 75520: Not suitable for oil and coolants

Nilfisk Wet/dry vacuum cleaners

For professional applications

Application:

No. 75522: for professional use in wet and dry applications

No. 75524 020: flexible high-performance vacuum cleaner with two-motor drive (2x 1500 W) for demanding cleaning tasks.

No. 75524 030: For working in environments with explosive dust in accordance with ATEX Zone 22.

Execution:

- **No. 75524 020:** Tilting and removable container
- **No. 75524 030:**
  - Anti-static design
  - Approved for environments with explosive dust in accordance with ATEX Zone 22
  - Approved for working with class M hazardous dust
  - With automatic switch-on for power tools

Advantage:

- **No. 75522:** high vacuum performance with low noise levels
- **No. 75522 036–75524 020:** washable PET fleece filter element
- **No. 75524 030:**
  - Brushless long life motors (single phase) for maximum performance and durability.
  - PET filter element allows moist dirt to be sucked up without the use of the wet filter (separation efficiency of at least 99.9%)

Delivery:

No. 75522: 4-m suction hose (diameter 36 mm), rubber diagonal tube nozzle, curved hand-held tube, filter element and fleece filter bag

No. 75524 020: 4-m suction hose (38 mm), 2 x 0.5-m stainless steel extension tube, bent hand pipe, fleece filter bag and PET nano fibre filter element, 400-mm floor nozzle, 300-mm plastic joint nozzle

KÄRCHER Wet/dry vacuum cleaners

For professional applications

Application:

No. 75523: for removing large quantities of fine dust, but also for coarse dirt and water. Ideal for use in construction, the food sector, the automotive branch and in industry in general.

No. 75526: for universal commercial use.

Execution:

- Maintenance-free suction turbines
- **No. 75523:**
  - Discharge hose (oil resistant)
  - tilting frame
  - stop castor
- **No. 75526:** mechanical float cut-off

Advantage:

- **No. 75523:**
  - two motors for consistently high suction power
  - filter cleans itself with targeted, powerful blasts of air. The process is triggered automatically and the suction power remains consistently high. Further advantages: low maintenance costs, long filter service life.
  - adjustable push handle and large wheels ensure easy transport to the site, even on uneven surfaces.

Delivery:

No. 75523: 4.0-m suction hose, C 40 with elbow, electrostatically earthed, 2 x 0.5-m metal suction tubes, wet/dry suction nozzle (360 mm), joint nozzle, flat folding filter

No. 75526: With 2.5-m suction hose with elbow, cartridge filter, metal suction hose 2 x 0.5 m, wet and dry floor nozzle, joint nozzle, paper filter bag (double layered, BIA C)

KÄRCHER Industrial vacuum cleaner

Application:

Ident. No. 210–220: For the toughest industrial applications. For collecting large quantities of liquid and/or solids such as cooling lubricants, water or metal chips (as dust-free as possible).

Ident. No. 225: For vacuuming medium quantities of oil, cooling emulsions and fine, light metal chips ■For medium quantities of coarse and abrasive chips

Execution:

- With tilt chassis
- With visual level indicator on the unloading hose
- **Ident. No. 210–220:**
  - With integrated cover of the exhaust air to prevent contamination in the motor area.
  - Drain via either the unloading hose or the tilt frame
  - Can be picked up by forklift
- **Ident. No. 225:**
  - With continuously adjustable drum pump (up to a height difference of 6 m)
  - With washable and durable pocket filter
  - With two-turbine solution

Advantage:

- **Ident. No. 210:** The optional chip basket allows the solids to be easily separated from the liquid
- **Ident. No. 210–220:**
  - 360° rotating hose connection on the suction head enables comfortable suction in all directions without the need to knot the suction hose
  - Increased safety during transport by attaching the cable to the head of the device.
- **Ident. No. 220–225:** With the optional chip basket, solids can be cleanly separated from absorbed liquid.
- **Ident. No. 225:** It is also possible to use a forklift or crane for emptying

Delivery:

Ident. No. 210–220: includes connecting bend

Ident. No. 225: Includes Connecting bend

Technical data:

- Power input: 2400 W
- Max. air delivery volume: 148 l/s
- Cable length: 10 m

Prod. Gr. 7NK

Nilfisk Industrial vacuum cleaner

Swarf and liquid vacuum cleaner

Application:
For demanding cleaning tasks in the metal industry; especially for picking up chips and liquid media.

Execution:
- **Ident. No. 110:**
  - With two bypass motors for demanding cleaning tasks
  - With integrated chip screen and drain valve
  - Manual filter shaker for a consistently high performance
  - Removable 37l container for a large holding capacity
  - Filter class L
- **Ident. No. 120:**
  - Powerful 2.4 kW 230V turbine
  - Robust industrial construction with manoeuvrable chassis
  - With air reversing valve for reliable and easy emptying of the dirt container.
  - With integrated chip basket

Advantage:
- **Ident. No. 110:**
  - The cyclone used ensures optimal filtration and protects the star filter from abrasive substances
  - Thanks to the vacuum display on the motor head, the operating behaviour can be easily monitored
  - Chips can be drawn directly from the processing machine, while the cyclone chip screen and drain valve ensure that the fluid can be easily separated from the chips.
- **Ident. No. 120:**
  - Separation of solids and liquids during the suction process
  - By switching the air reversing valve, the liquid can be pushed to the outside via the drain valve with the aid of the overpressure
  - If the amount of fluid to be removed outweighs the amount of solids, this machine is the first choice for safely recycling lubricants and oils.

Delivery:
Ident. No. 110: Includes machine cleaning kit (galvanized hose connection, polyurethane hose 5m with sleeves, galvanised curved fitting, antistatic hand and rubber nozzle)
Ident. No. 120: Includes oil protection kit (galvanised hose connection, antistatic and oil-resistant rubber hose 5m, galvanised curved fitting, galvanized flat nozzle and anti-static angled nozzle)

Technical data:
- Hose length: 5 m
- Inner hose diameter: 50 mm

Rotoscriber labeller

Transformer-operated

Application:
For varied labelling tasks, such as labelling metal, plastic, glass, object carriers and much more.

Execution:
- Automatic adjustment as soon as it is brought into the writing position
- Shuts down when released from hand
- No tools necessary to replace the rotating writing tips
- To change tools, the worn-out tip is pulled out and the new one is attached with slight pressure

Delivery:
With transformer and writing tip for metal

Technical data:
- Operating voltage: 12 V/AC
- Current consumption: 400 mA
- Max. idle speed: 20000 rpm
- Material of housing: Aluminium
- Surface: Anodised
- Length: 150 mm
- Diameter of housing: 20 mm
- Weight: 0.07 kg

TB 10 Plus/TB 10 eco Plus bench drills

230 V power supply

Application:

Ident. No. 010: Sensitive precision drill in alternating current version with electronically, infinitely variable controlled motor speeds, with quiet operation and excellent user comfort.

Ident. No. 020: The TB 10 Plus generation of table drills – innovative design combined with impressive technical features. Touchscreen display, ergonomically adapted drilling lever, ideal lighting and fewer operating controls for simplified use.

Execution:

- quickly adjustable drill depth stop
- emergency stop palm button
- infinitely variable speed control
- **TB 10 Plus** – digital display of rotation speed and drilling depth
- **TB 10 Eco Plus** – digital display of rotation speed
- LED lighting
- Electrical drill guard
- Thread cutting device (TB 10 Plus only)
- Spindle stop (TB 10 Plus only)

Technical data:

- Max. drill diameter in steel E335/St 60 (continuous mode): 10 mm
- Max. drill diameter in steel E335/St 60 (normal mode): 12 mm
- Drill chuck holder: B 16

ZIMMER MASCHINEN Panther belt sanding machine

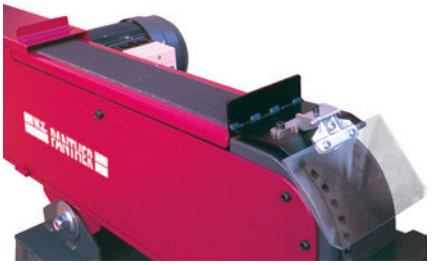
S1 three phase motor 400 V, 50 Hz

Application:
The belt sanding machines are suitable for the toughest applications in trade and industry. Equipped with S1 motors for 100% switch-on time. The capacity of S1 motors is 40% higher compared to S6 motors.

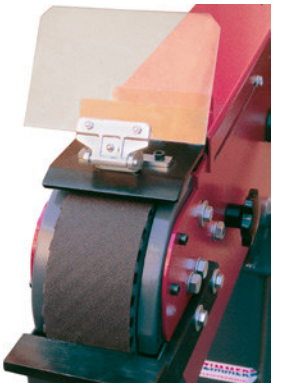
Execution:
- adjustable working height
- S1 three-phase motor 400 V, 50 Hz
- for surface and contact grinding
- low-vibration
- removable protective cover for surface grinding
- connection for double suction system
- with emergency stop switch

Delivery:
with underframe, sanding belt, spark protection and connection cable for optional fixed connection or CEE plug.

Technical data:
- Grinding belt length: 2000 mm
- Max. belt speed: 33 m/s
- Motor speed: 2800 rpm
- Motor output: 3 kW



Continuous surface grinding for processing longer workpieces.



Complete cover, no risk of injury.

Arbour presses

with underframe (optional)

Application:
Ident. No. 710–750: Arbour presses are invaluable for driving in and driving out arbours, spindles, pins etc. They are also essential in the CIM age for mechanical workshops and repair shops. The arbour presses are designed to be mounted on a workbench. Sizes 2, 3 A and 3 B are available with an underframe, which allows vibration-proof work processes.

Execution:
- **Ident. No. 710–750:** for mounting on a workbench
- **Ident. No. 730–750:** with underframe (optional)

Manual knuckle joint presses
with round ram

Application:
Knuckle joint presses do not generate their force until the end of the lift action and are ideal for assembly, punching, riveting, embossing etc. L models have an extra-large working height.

Execution:
- ergonomic ease of use
- laterally angled lever
- quick and easy to convert for left-handers
- available extras:
- pressure point precision setting
- stroke safety device – ensuring that the working stroke is always carried out in full
- counter
- Precision table bore 12H7

Deburring tool ... 165–166, 384, 406–408, 1634–1638
Deburring tools, solid carbide ... 384, 406
Deburring tools ... 142–166, 1635
Deburring wheel for bench grinders ... 2247
Deburring wheel, for bench grinder ... 2247
Deep clamping jaws ... 974
Deep hole marker ... 2259–2261
Deep twist drills ... 64, 91
DEGUSSIT honing stones ... 2180–2182
DEGUSSIT range of grinding files ... 2183
Demagnetising equipment ... 964–965, 1495
Demolition hammers, drilling and ... 2278
Demolition hammers ... 2278
Depth callipers ... 1082–1084
Depth measurement bridges ... 1172
Depth measurement devices ... 1172
Depth micrometers ... 1098
Dial gauge magnetic holders ... 1187
Dial gauges, electronic ... 1160–1163
Dial gauges, small ... 1156
Dial gauges .. 1153–1155, 1157–1161, 1166–1168, 1183–1186, 1188–1190
Diamond cutting discs ... 2189–2190
Diamond dressing tools ... 2249–2250
Diamond file handles ... 2174
Diamond files ... 2172–2173
Diamond hand lapping tools ... 2251
Diamond multi-grain hand dressing tools ... 2251
Diamond needle files ... 2172–2173
Diamond wheel dressers ... 2249–2251
Digital current clamp multimeters ... 1360
Digital multimeter ... 1355
DIN thread slide ... 1144
DIN tolerance slides ... 1144
Dirt trapping mat ... 1932, 1981–1983
Dispatch ... 1949–1950, 1956–1959, 2049, 2052–2058
Display panel ... 1951
Display units for ISO tolerances ... 1144
Disposal logistics ... 1961, 1967
Disposal ... 1961, 1967
Dividing caulkers ... 1616
Dividing heads ... 993
Document bags ... 1947, 1949, 2052
Document wallet ... 1948
Double open-end wrench sets ... 1412–1414
Double open-end wrench ... 1411
Double open-end wrenches in inches ... 1413
Double ring wrench sets ... 1424
Double scissor-type lifting table carriages . 2102
Double Vee blocks ... 1192
Double-sided adhesive tape ... 2051
Drawbar stackers, electric ... 2103–2104
Drawer cabinet ... 1764–1770, 1772–1773, 1781–1790, 1797–1807, 1809–1810, 1815, 1821, 1853–1854, 2008–2010
Drawer insert assortment ... 1788
Drawer insert material ... 1774, 1791, 1811, 1880–1881
Drawer magazines ... 1888, 1938
Drawer tower ... 1937
Drawer workbenches ... 1836–1840, 1844–1845, 1847
Drawers, tool ... 1773, 1853
Dressing tools, diamond ... 2249–2251
Dressing tools, grinding wheels ... 2249–2250
Drift punches ... 1617
Drill accessories ... 2273
Drill chucks ... 857, 869, 904–910
Drill holders ... 937
Drill hole and comparison measuring devices ... 1180–1181
Drill hole plug gauge ... 1147
Drill stands ... 2273
Drill vices ... 997–999
Drilling clamping device ... 903–910
Drilling jaws ... 953
Drilling stands, bench ... 2273
Drilling units, core ... 2274–2275
Drills with indexable inserts ... 126, 128–132
Drills, angle ... 2266
Drills, carbide .. 14–15, 17–18, 20, 28–38, 46–51, 54, 57–59, 66–67, 106–107, 112
Drills, electric ... 2265–2267, 2278
Drills 13–122, 126–138, 142–171, 546, 556–560, 581, 2267–2272
Drive motors, flexible shafts ... 2283–2284
Driving discs ... 952
Driving tools, sockets and ... 1425, 1427–1469
Drum cover mats ... 1983
Drum handling devices ... 2140
Drum pumps ... 1660–1662
Drum roller ... 2094
Drum tongs, transport ... 2139–2140
Drum truck ... 2095
Dry vacuum cleaners ... 2323–2325
Dumpcart ... 1960–1968
Dumper bodies ... 1960–1968
Dumpers ... 1960–1961, 1964–1965
Dynamometer, cylindrical ... 1302

Light metal folding rules 1233–1234
Light metal scales 1235
Light metal spirit levels 1248
Limit flat gauges 1132
Limit plug gauges 1131–1132, 1135–1140
Limit ring gauges 1139
Limited shaft slot gauges 1132
Line testers 1353
Live lathe centres 947–950
Live self-centring taper 950–951
Load frames 2153
Load hoists, magnetic, BUX 2141
Load securing devices 2157–2158, 2160–2161
Lock, combination 1766, 1772, 1788–1789, 1809–1810, 1853–1854
Locking pliers 1564–1565
Long-handled pincers 1576
Lubricant container 1657
Lubricating brush 1657
Luxmeter 1335

M

Machine accessories 952–957
Machine hand brushes 1667
Machine lamps 1674, 1680
Machine reamers, solid carbide 177, 185–187
Machine reamers 177–180, 185–204
Machine stretch film 1959
Machine tap sets 314–318
Machine tap 216, 220–228, 233–235, 238–250, 253–258, 261, 264–269, 271–272, 274–276, 320–321
Machine thread mould 288–289, 293–295, 313
Machine vices 998–1003, 1006–1007, 1012, 1016–1018, 1021, 1023, 1026–1027, 1031, 1035–1036, 1055
Machinery brushes 2202–2207
machinists' hammers 1607–1608
Magazine bit holder 1527
Magnet drilling units 2274
Magnetic angle setting devices 1648
Magnetic bands 1652
Magnetic bar grips 1651–1652
Magnetic bar grips 1651–1652
Magnetic bowls 1649
Magnetic clamping plate accessories 964–965
Magnetic clamping plates 961–962
Magnetic clamping technology 961–965
Magnetic claws 2141–2142
Magnetic core drill 2274
Magnetic core drilling units 2275
Magnetic core drills 2275
Magnetic grips 1652
Magnetic measuring and clamping Vee blocks 1193
Magnetic measuring stands 1186–1189
Magnetic parallel rests 1055
Magnetic round chucks 962–963
Magnetic Vee block joint 1650
Magnetic Vee blocks 1193, 1648
Magnetic vice jaws 1389
Magnets, decorative 1652
Magnets, organisation 1650, 1953
Magnets 1651–1652, 1953
Magnifiers with handles 1269
Magnifiers 1269, 1271–1274
Magnifying glasses 1268–1269, 1271–1272, 1274
Magnifying lamps 1269–1270, 1274
Manual dressing tool 2250
Manual speedometers 1347–1348
Marker, deep hole 2260–2261
Markers 2258–2262
Marking devices 1109–1111, 1217
Marking equipment 1955, 2045–2047, 2052, 2256
Marking gauges 1110

Marking tape 1955, 2047, 2052, 2256
Marking-off Vernier callipers 1109
Mason's chisels 1616
Material carts 2091
Material stands 2090, 2093
Measured data transfer equipment ... 1265–1266
Measuring aids 1192–1193, 1202–1203, 1230, 1233–1236, 1241–1244, 1246–1248, 1252
Measuring and control plates 1202–1204
Measuring cups 1656
Measuring data transmission, devices for .. 1261
Measuring devices for the angle of rotation 1544
Measuring devices, angle of rotation 1544
Measuring devices, comparative 1108
Measuring devices, flow 1335
Measuring devices, humidity .. 1328–1329, 1334
Measuring devices, lever 1168–1169
Measuring devices, luminous intensity 1335
Measuring devices, multi-purpose 1362
Measuring devices, sound level 1336
Measuring devices, SUBITO 1180–1182
Measuring devices, temperature 1325–1329, 1334
Measuring devices, TESATRONIC 1255
Measuring devices, UNIMASTER 1109
Measuring instruments . 1293–1295, 1300–1301
Measuring machine probe inserts 1219–1220
Measuring magnifying glasses 1272–1273
Measuring plate 1202–1203
Measuring probes, electronic . 1208, 1258–1260
Measuring probes 1295
Measuring rod 1379
Measuring stands, magnetic 1186
Measuring stands 1183–1184, 1187–1189
Measuring tables 1189–1191
Measuring tool sets 1084–1086
Mechanic's pliers 1563
Metal detector 1367
Metal saw frame 1622
Metal-cutting band saw blades 380
Microdrill 65, 99
Micrometer sets 1086–1087
Micrometer 1086–1090, 1092–1094, 1097–1098
Micrometers, depth 1098
Micrometers, dial gauge 1097
Micrometers, external 1093
Micrometers, internal, IMICRO 1101
Micrometers, internal 1098–1101
Micrometers, thread, external 1092
Micrometers, thread 1092
Micrometers 1086–1091, 1093–1094, 1096
Microscopes, stereo 1281–1283
Microscopes 1282
Mill arbour rings 876
Milling bits 2212–2215, 2217–2218
Milling chucks 843, 859, 871, 874
Milling cutters with hole 519–520, 525–526
Milling cutters, carbide 167–169, 384–398, 410–419, 425, 434–443, 451, 468, 477–482, 490, 502–506, 543, 550–567, 574–581
Milling cutters, quarter circle, solid carbide 384, 396–397
Milling cutters, rotary 2212–2215, 2217–2218
Milling cutters, single-angle 519
Milling cutters 167–169, 384–538, 541–582
Milling heads, carbide ... 167, 548, 568, 577, 581
Milling heads, facing, carbide 169, 546, 576, 581
Mini boring tools 726–729
Mini-roller stretch set 1958, 2057
Mirror 2047–2048
Mitre clamps 1396
Mitre snips 1585
Mitre square 1244
Mobile step stool 1936–1937
Mobile work bench 1843–1847, 1879–1881
Modular face drivers 951–952
Monocoque tool cases 1692
Morse taper arbours 910
Morse taper gauges 1134
Multi twist drills 66, 100–101
MultiCom connection cables 1261
Multi-Cutter 2285
MULTIFIX tool change holders 928–931
Multi-function device 2285
Multi-function tool 62, 73
Multi-grain dressing tools 2249–2250
Multimeter 1360, 1362
Multiple clamping vices 1046
Multiple socket outlets 2318
multi-purpose device 2133–2135
Multipurpose measuring devices 1359–1360, 1362, 1366
Multi-purpose vacuum cleaners 2323
Multi-tooth mills, carbide 391–392, 485–486, 495–496

N

NC spotting drill 13, 20–21, 62, 72–73
Needle files 2168–2170
Nitrate test rods 1379
Non-cutting thread formers . 288–289, 291–295, 313
Non-slip mats 1922–1923
Nozzle gauges 1147
Number and letter punch sets 1682–1683
Number punches 1682–1683
Nut taps 222
Nuts for T slots 980–981
Nuts 980–981

O

Oil absorbent mats 1978–1982
Oil canisters 2000
Oil dispensers 1653–1654
Oil spray cans 1653
One-handed clamps 1393, 1395
Open-end box wrench sets 1416–1418
Open-end box wrench 1414–1415, 1417
Open-end spanner sets, ring 1416–1418
Open-end spanners, ratchet-ring 1419–1421
Open-end wrench sets 1412–1414
Open-end wrench 1410–1411
Orbital sanders, electric 2288
Oscillating jigsaws, electric 2294
Oscillating jigsaws 2294
Oscillators 2285
Oversize screw taps 222–223

P

Packaging material 2053–2054
Packaging tape 1954, 2050, 2256
Packaging 1949–1950, 1956–1959, 2049, 2052–2058
Padlocks 1946–1947, 2035
Paint marker 2260–2261
Pallet cover sheets made of LDPE film 2056
Pallet shelves 2036
Pallet truck 2098–2101, 2103
Panel cleaner 1953
Paper scissors 1632
Parallel clamps 1393, 1395
Parallel screw clamps 1390
Parallel support pairs 1055, 1057, 1059, 1193
Parallel support sets 1057
Parallel underlays 1055–1059
Parallel vices 1384–1387, 1879
Parcel trolley 2083–2086
Part cleaners 1986–1988
Part cleaning cabinet 1989
Part cleaning devices 1986–1987, 1989
PE air bubble film 1957–1958, 2056–2057
PE film bags 1956, 2055
PE foam film 1956, 2056
Peg boards 1943–1944
Perching stools 1914–1915
Perforated metal plate walls 2011
Perforated metal plate 1850
Perforated panels 1941, 1943–1944
Permanent magnetic aids 1648, 1650
Permanent magnetic clamping blocks 964
Permanent magnetic clamping plates ... 961–962
Permanent magnetic round chucks 962–963
Permanent marker 2260, 2262
Phase sequence indicator 1354
Phillips screwdrivers 1498, 1503, 1505–1507, 1509, 1512, 1516
Phillips torque screwdrivers 1535
Pick-up magnets 1647–1649, 2141

Pictogram sticker set 1972–1975
Pin extractors 1402
Pin punches 1617–1618, 1620
Pincers 1575
Pipe cutters 1405–1406, 1408
Pipe deburrers 1408
Pipe gripping pliers 1566–1567
Pipe tongs 1569–1570
Pipe vices 1389
Plain jaws 954
Plastic bottles 1658
Plastic boxes 1903, 1905, 1938–1939
Plastic corner element 1904
Plastic cover for support rail 1904
Plastic hammers 1615
Plastic panel cart 2066
Plastic shears 1407
Platform scales 1318–1319
Platform stairs, fixed 1936
Platform trolley 2066–2072, 2090, 2092
Plier wrenches 1563–1564
Pliers set 1554, 1572
Pliers 1554–1564, 1566–1570, 1575–1579, 1585–1586, 1588–1589, 1595, 1599, 1601–1602, 1605–1607, 1641
Plug gauges, SUBITO 1182
Plug-in rack 2017–2028
Plug-in tools and driving tools 1428–1469
Plug-in tools for torque screwdrivers 1549–1552
Plug-on ratchet 1464
Plunge inserts 757–758, 801–802
Pneumatic impact screwdriver 2307
Pneumatic straight grinders 2308–2309
Pneumatic tools .. 2302–2303, 2305–2309, 2311, 2313–2314, 2316–2318
Pocket lamps 1677–1679
Pocket scales 1317
Pocket tape measures 1229–1231
Pocket vernier callipers .. 1071–1077, 1081, 1265
Pole terminal pullers 1396, 1399
Poliflex sanding tips 2219–2220
Polishing tools 2223
Position finder 1367
Positioning elements 1055–1059
Post protector 2036
Pot magnets 1652–1653
Power tools for electric and compressed air screwdrivers 1523–1525, 1631
Power tools 1529
Pre-adjustment devices 921, 1839
Precision adjustment device 921
Precision collet chuck 845
Precision collet chucks 887–888
Precision electronic pliers 1589–1590
Precision grinding tools, DEGUSSIT .. 2180–2183
Precision measuring instruments, internal, SUBITO 1182
Precision pointer gap gauges 1095–1097
Precision pointer micrometers 1097
Precision pointer 1166–1167
Precision scales 1251–1252, 1318
Precision vices 995–997
Pressure measuring devices, tyres 2315
Pressurised spray bottle 1655
Probe inserts 1219–1220
Professional vacuum cleaners 2323–2324
Protective film dispenser 2049
Protective helmets, welder 1750–1751
Protective jaws for vices 1389
Protective masks 1725–1728
Protective packaging in dispenser box 1957, 2056
Protective plugs 938
Protective shields, swarf 1752
Protective welding screens 1752
Protractors 1246
Pull clamps 990–992
Pull jacks 2133
Pull stud 880
Pullers, two-arm 1398
Pullers 1396–1399, 1402
Pull-out for hanging folders 2010
Pumps, drum and container 1662
Pumps 1660, 1662
Push handle trolley 2066–2068
Push rod clamp 988–989
PVC pads 1925

Q

Quality assurance systems, computer-aided 1265–1266
Quantity counters 1239
Quick callipers, KROEPLIN 1176–1179
Quick callipers 1177
Quick-action clamping system 2244–2246
Quick-action clamps 984–992
Quick-action collet chucks 1395
Quick-action screw clamps 1390
Quick-adjustment reamers 181, 206
Quick-change chucks, for tapping 849, 865, 872–873, 901–902
Quick-change inserts 901
Quick-change tapping chucks 873, 901, 938

R

Rack step ladders 2013
Radial tool holders 933–935
Radio pliers 1560
Radius cutters, carbide 389, 391–392, 469–471, 491–493, 506–508
Radius gauges 1144–1146
Radius milling cutters 519
Radius milling cutters 519
Random orbital sanders, electric 2289
Rasps 2166
RasterPlan support elements .. 1908, 1944–1945
Ratchet hoists 2133
Ratchets, taps 1384
Ratchets ... 1435–1437, 1444–1445, 1455–1456, 1465, 1468
Reading glasses 1269
Reamers, carbide ... 177–178, 185–187, 189–193
Reamers 176–207
Recessing system cutting inserts 797–800
Recessing system holders 796–797
Rechargeable batteries 1682
rechargeable battery 1642
Recoil hoses, compressed air 2316–2318
RECORD ARKANSAS oil stones 2178–2179
Recyclable materials collectors 1972
Recycling 1961, 1967
Reducing pieces 1440–1441, 1448, 1462, 1467–1468
Reducing sleeves 903, 937–938
Refitting screwdrivers 1526
refuse bags 1971–1975
Removal boxes 2053
Resistance meters 1353
Retaining ring plier set 1572
Retaining ring pliers 1570–1575
Riffing files 2172
Ring gauges, thread 1139
Ring gauges 1134
Ring ratchet spanners 1419, 1422
Rings for mill arbours 877
Riveting tongs 1641
Rolled rules 1229
Roller container 1878–1879
Roller desk 2080–2081
Roller shutter cabinet housings 2008–2009
Roller shutter, front-mounted 2012
Roller trestles 2093
Roller-shutter top-mounted cabinets 1818
Rolling drawer containers 1878–1879
Rolling tool case 1692
Roofer's hammer 1609
Rotary brushes, wire 2205–2206
Rotary tower for small parts 1937
Rotating transport trolleys 2108
Rotoscribers 2327
Rough grinding discs 2191
Roughing cutters, carbide ... 387, 389, 433–434, 468
Roughing cutters, solid carbide 387, 389, 433–435, 440–441, 468
Roughing cutters 521, 532–537
Roughing-finishing cutters, solid carbide 387
Roughness measuring devices, contour and 1300–1301

Round chucks, magnetic 962–963
Round files 2165, 2179, 2184
Round slings 2159
Round-nose pliers 1559, 1562, 2140
RS232 connection cables 1262–1263
Rubber composite mallets 1610
Rubber grinding discs 2224–2225
Rubber mats 1923
Rulers 1234–1236
Rules 1234–1236

S

Sabre saw blades 2291–2293
Sack trucks 2096–2097
Safety cabinet 2003
Safety cages 2104
Safety dial gauges 1155, 1158
Safety glasses 1703–1704, 1706–1709, 1711–1712
Safety knife 1626–1627
Safety ladders 1933
Safety lamps 1679
safety mirror 2047–2048
Safety systems, computer-aided quality 1265–1266
Safety washing guns 2314
Safety wrench 955–956
Sanding belt roll magazine 2230
Sanding belts, woven 2231
Sanding belts 2285, 2290
Sanding disc dressing tool 2250–2251
Sanding disc, flap 2245
Sanding discs for surface grinding machines 2248
Sanding discs, adhesive 2224–2225
Sanding discs, corundum 2246–2248
Sanding discs, cup 2248
Sanding discs, silicon carbide 2246–2247
Sanding discs, synthetic corundum 2246–2247
Sanding discs, Velcro 2226
Sanding discs 2185–2202, 2224–2228, 2247, 2287
Sandpaper, waterproof 2229
Sandpaper 2228–2230
Saw blades, band 380
Saw blades, circular 348–355
Saw blades, jigsaw 2291–2296
Saw blades, machine 346–382
Saw blades, metal 1621
Saw bow 1621–1624
Sawing machines, belt 2297
Saws, electric 2297
Saws, hand 1623–1624
Saws, jigsaw 2294
Scalpels 1627–1628
Schweißen 1645, 2094
Scissor-type lifting carriage 2102
Scissor-type lifting table carriages 2102
Scrapers, glass 1628
Scrapers 1629–1630
Screw clamps 1390–1395
Screw extractor sets 1405
Screw extractors 1403–1405
Screw jacks 973
Screw pitch gauges 1145
Screw sets, clamping 977
Screwdriver bits 1439–1440, 1447, 1458–1462, 1467, 1469
Screwdriver blades 1534–1535, 1539, 1542
Screwdriver sets 1507
Screwdrivers, Allen key 1480, 1482–1483, 1486–1487
Screwdrivers, angled 1487–1489
Screwdrivers, electric 2277
Screwdrivers, hexagon socket 1476–1478, 1480–1486, 1494
Screwdrivers, hexagon 1476–1478, 1480–1486, 1494, 1496
Screwdrivers, pneumatic 2305–2307
Screwdrivers, refitting 1526
Screwdrivers, torque 1534–1535, 1537–1542
Screwdrivers, TORX 1490–1494
Screwdrivers, universal 1446
Screwdrivers 875, 1410–1552
Screws 1476–1477
Scriber 1110–1111, 1217
Scribers 1620–1621
Scribing dividers 1109
Scroll chucks 955
Seal scraper 1630
Sealing tape 1955, 2051, 2254
Seat upholstery for chairs 1921
Self-adhesive pockets 1949, 2052
Separators 1401
Serving trolley 2086–2087
Set of hand reamers 205
Shackles 2147–2148
Shaft testing instruments 1217
Shafts, flexible 2283–2284
Shank face milling tools, carbide 169, 546, 581
Shank milling cutters 297–299, 301–303
Shears, cable 1582
Shears, wire cable 1584
Shears 1628–1629, 1632–1633
Sheet metal shears 1628–1629
Shelf boxes 1938
Shelf ladders 2013
Shelf trolley 2083–2087
Shelf troughs 1995
Shelf 2016
Shell end mills 519–520, 525–526
Shelves 2007
Shelves 2008
Shelves 2012
Shelving cabinets, easy-view storage bins 1942–1943
Shelving systems 2016, 2026
Shelving systems 2016
Shelving units, basic 2007
SHORE hardness testers 1285–1286
Short drill chuck 842, 857–858, 869, 936
Short drill chucks for NC lathes 936
Short stepped drill bit 60
Short-length chucks 871–872
Shrink-fit chucks 846–848, 862–864
Shrinking devices, induction 911–915
Shrinking devices 912, 914–915
Side cutters for electronics 1589
Side cutters 1577–1579, 1586, 1589–1591
Side lathe tools 804
Sine bars 962
Single open-end wrenches 1410
Single-angle cutters, carbide 384, 396
Single-angle cutters 519
Single-speed hand drills 2265, 2267
Siphon pliers 1566–1567
Skimmer 1984–1985
Sledge hammers 1609
Sledgehammers 1609, 1618
Slide hammer sets 1401
Sliding blocks 981, 1055
Sliding doors, front-mounted 2012
Sliding handle trolley 2067–2068
Sling swivel 2152
Slings 2157–2158
Slip joint pliers 1568
Slot cutters, boring, solid carbide 385, 416, 419
Slot cutters, slotting, boring, solid carbide 385
Slot-in shelving systems 2026
Slotted bits 1631
Slotted panels 1941, 1944
Slotted screwdrivers 1495, 1498, 1500, 1502, 1504–1508, 1511–1516
Slotted torque screwdrivers 1534
Slotted vacuum chuck sets 967
Small cask racks 2000–2001
Small nylon hammers 1613
Smoke extraction equipment 1990
Snap gauges, precision pointer 1096–1097
Snap gauges 1133
Snap hooks 2148
Snipe nose pliers 1559–1562
Socket spanner inserts, impact 1469–1474, 1529
Socket spanner inserts 1425, 1427–1436, 1438–1443, 1446–1448, 1450–1454, 1457–1458, 1461–1462, 1464–1469
Socket spanner sets, impact 1471

Socket spanner sets ... 1425, 1427–1436, 1441–1443, 1447, 1450–1455, 1458–1461, 1464–1465
Socket spanners for screw taps ... 902
Socket spanners, hexagonal ... 1530–1531
Socket spanners, tubular ... 1530
SOFT-CLOSE-AUTOMATIC ... 1773, 1853
Soft-face hammers ... 1611–1614
Soldering equipment ... 1645
Soldering fluid brush ... 1657
Soldering ... 1645, 2094
Solid carbide deburring tools ... 398–399, 401
Solid carbide end mills ... 384–398, 410–427, 434–443, 448–463, 484–495, 502–506
Solid carbide forward and backward deburrers ... 384, 406
Solid carbide heavy-duty drills ... 14–15, 17–18, 28–38, 46–49, 54
Solid carbide high-speed special milling cutters 388, 409–410, 447–448
Solid carbide machine reamers ... 177, 185–187, 191
Solid carbide multi-tooth mills ... 391–392, 485–486, 495–496
Solid carbide radius cutters . 387, 389, 391–392, 442, 469–471, 491–493, 506–508
Solid carbide roughing cutters ... 387, 389, 433–434, 468
Solid carbide slotting cutters ... 384, 410
Solid carbide square end mills ... 385, 414, 417–418
Solid carbide thread milling cutters ... 297–299, 301–303
Solid carbide torus milling cutters ... 387, 389–392, 439–440, 463–467, 477–482, 487–490, 498–503
Solid carbide twist drills ... 18, 20, 50–51, 57–59
Sound level measuring instrument ... 1336
Spanner ... 874–875
Spanners, torque ... 1542–1552
Spanners, universal ... 1532
Spare jaw ... 908
Spark plug brushes ... 1666
Spark-plug connector pliers ... 1562
Spatulas ... 1662
Special absorbent mats ... 1979–1980
Special cleaner ... 1986–1988
Special cleaning discs ... 2202
Special milling cutters, high speed, carbide 388, 409–410, 447–448
Speedometer ... 1346–1348
Speedometers ... 1346
Spherical washers ... 979
Spirit levels ... 1248–1252
Spotting drills, NC ... 62, 72
Spray canister, compressed air ... 1655
Sprayers, initial pressure ... 1655
Sprayers ... 1655
Spreaders ... 2140
Spring balances, AUTOSTAT ... 2119–2131
Spring balances ... 1302, 2116
Spring dividers ... 1109
Spring-loaded cable reel ... 2322
Square end mills, slotting, solid carbide 384, 412
Square files ... 2165, 2178, 2183–2184
Square socket wrenches for taps ... 902
Stack tippers ... 1965
Stacker bars ... 2150
Stacking chairs ... 1917
Stacking containers ... 1938–1939
Stacking stools ... 1911–1914
Stamps ... 1682–1683
Staplers ... 1665
Stationary hardness test ... 1287–1288
Steel boxes ... 1940
Steel cabinets ... 1818–1821
Steel cylinder carriages ... 2094
Steel cylinder trolleys ... 2094
Steel rollers ... 1958, 2057
Steel rules ... 1236–1237
Steel scales ... 1234–1236
Steel squares ... 1241–1245
Steel tool holders, MULTIFIX ... 928–931
Steel winches ... 2106–2107
Steel wire brushes ... 1666
Steel-tube trolleys ... 2096
Step drills, stub length ... 60
Step drills ... 118–121
Step ladders ... 1934–1935
Stepped drill bits ... 60, 113–117
Stepped frames ... 975
Stereo microscopes ... 1281
Stone drills, carbide ... 2267–2272
Stools ... 1911
Stools ... 1911–1922, 1951
Stop watches ... 1345
Storage and provision racks for tool carriers ... 1822
Storage bins, clear-view ... 1903, 1905
Storage boxes ... 1903, 1905
Straight edges ... 1085–1086, 1236
Straight grinders, compressed-air ... 2309
Straight grinders, electric ... 2282–2283
Straightening wedges ... 978
Strap wrench ... 1404
Stretch film savings offers ... 2058
Stripping tool ... 1598
Stripping tool ... 1598
Stroboscope ... 1346–1347
Stroke counter ... 1238–1239
Structural steel bar clamps ... 1393
Stud extractors ... 1402
Subland drills ... 115–117
Support clips ... 2138
Support plates ... 2200
Support rails ... 1903–1904
Support sheets ... 1150–1152
Surface chuck ... 839, 854
Surface protection systems ... 1992–1993, 1996
Surface reference samples ... 1298
Suspended scales, digital ... 1317
Suspension files ... 1949
Swarf hooks ... 1670
Swarf shields ... 1752
Sweeping machine ... 2322
Swirl ... 2148
Switch cabinet key ... 1533
Swivel work chairs ... 1915, 1917–1922
Synchronous machine thread formers ... 292
System trolleys ... 1907–1909, 1977

T

Table trolley with steel plate trays ... 2078
Table trolley ... 1939, 2065, 2072–2079, 2088–2089
Tabletop scales ... 1318
Tachometers ... 1347–1348
Tap bit sets ... 318–319
Tap extensions ... 331
Tap sets ... 311–312
Tap wrenches ... 332–333, 338
Tape measures ... 1229–1233
Tape rules ... 1229–1235
Taper bridge reamers ... 180, 203
Taper pin drills ... 107
Tapered plug gauges ... 1134–1135
Tapered stones ... 2184
Tapping chuck ... 849–850, 865–866, 872–873, 901–902
Taps ... 216, 220–227, 233–235, 239, 241, 243, 257, 259, 261, 264–269, 271, 274–284, 288–289, 291–295, 313–320
Telescopic spectacles ... 1271
Temperature measuring devices ... 1325–1327, 1330–1334, 1336
Temperature sensor ... 1325, 1332–1334
Temperature-humidity measuring device ... 1328–1329, 1334
Tensile and compressive force measuring units . 1304–1306, 1312
Tensile force measuring units ... 1302–1304
TESA my-HITE length measuring probes ... 1208
TESATAST lever gauge probes ... 1169–1170
Test glass sets, plane-parallel ... 1129
Test pin holder ... 1119
Test pins ... 1119–1128
Test rods ... 1379
Test tapers ... 1129
Testers for torque screwdrivers ... 1552
Testers, crank shaft ... 1175

Testers, electrical 1351, 1353–1355, 1362, 1366–1367
T-handle wrenches 1476–1477
T-handles 1446, 1457
Thickness measuring devices 1173–1174
Thread brushes 1667
Thread cutting sets 313
Thread cutting tools 216–284, 288–338, 749–750, 754, 757–758
Thread flank gauge slides 1092
Thread gauges 1135–1140
Thread lathe tool gauges 1146
Thread limit plug gauges 1135–1141
Thread limit ring gauges 1139
Thread milling cutters 296–311
Thread milling plates, holders 304–305
Thread moulds, non-cutting . 288–289, 291–295, 313
Thread repair tools 335–337
Thread restorers 2172
Thread value display units 1144
Thread-cutting dies 323, 325–326
Thread-cutting holders 750, 754
Threading die holders 333–334, 338
Threading dies 322–330
Thread-turning 750, 754
Three-jaw clamping chucks 955
Three-jaw drill chuck 904–909
Three-jaw lathe chuck 952–955
Tilting container 1960–1968
Tin snips 1633
Tipper 1960–1968
Tolerance or thread value display devices .. 1144
Tolerance slides, DIN 1144
Tool assortments 1085, 1694–1697, 1775–1776, 1792–1793, 1868–1869, 1871–1874, 1876–1877
Tool bags 1686–1689, 1693–1694
Tool boxes 1685
Tool cabinet insert sets 1774, 1791, 1811, 1880–1881
Tool cabinets with vertical extension 1824–1825
Tool cabinets 1764–1770, 1773, 1781–1787, 1790, 1797–1808, 1815, 2008–2010
Tool carrier system 1822–1823
Tool cases, mobile 1690–1691
Tool cases, roller 1692
Tool cases 1692–1693, 1888
Tool chuck 836–848, 850–864, 866–872, 874–883, 885–900, 926–927
Tool chucks 839, 854
Tool clamp 1945
Tool extensions 331, 871–872
Tool handles 2168
Tool holders for NC machines 874–875, 936, 938–939
Tool holders .. 928–931, 1384, 1908, 1944–1945, 2246
Tool inserts 1771, 1775–1776, 1787–1788, 1792–1793, 1808–1809, 1868–1869, 1871–1874
Tool magazines, small parts 1937
Tool pre-adjustment equipment 915–922, 926
Tool rack systems 2012
Tool racks 2007–2008, 2010–2013
Tool sets, VDE 1693–1694
Tool sets 1694–1695, 1877
Tool storage 1858–1867, 1870, 1875, 1878–1879, 1881–1884
Tool trolleys, easy-view storage bins 1942
Tool trolleys 1775–1776, 1792–1793, 1858–1875, 1878–1879, 1881–1884, 2319
Tooling tweezers 1595
Toothed ring drill chucks 904–906
Torque screwdrivers, hexagon socket 1539, 1542
Torque screwdrivers, Phillips 1535
Torque screwdrivers, slotted 1534
Torque screwdrivers, TORX 1535, 1539, 1542
Torque screwdrivers 1534–1535, 1537–1542
Torque wrenches, electronic 1548
Torque wrenches 1542–1552
Torus milling cutters, carbide 389–392, 463–467, 477–482, 487–490, 498–501
Torus milling cutters, solid carbide 387, 391–392, 439–440, 490, 502–503
TORX screwdrivers 1478, 1487–1491, 1493–1494
TORX torque screwdrivers 1535, 1539, 1542
Towels 1979
Transport cases 1889–1890
Transport protection 2055
Transport roller 1939, 2062–2065, 2094
Transport trolleys 1939, 1960–1961, 1964–1965, 2060–2079, 2082–2092, 2094, 2096, 2107–2109
Trapezoidal stepped screw taps 222
Travel counter 1238–1239
Travelling trolleys 2138
Trays 1902
Triangular files 2178, 2180–2184
Triangular hollow-ground scrapers 1630
Triangular sanders, electric 2286–2287
Triangular sanders 2285
Triangular scrapers 1629
Triangular solid scrapers 1630
Trolley clamps 2139
Trough, multi-purpose 1657
Try square 1241–1243
T-slot milling cutters 167, 169, 519, 523, 546, 556–560, 577, 581
T-slot nuts 980
T-slot screws 981–982
Tube and core drills 108, 122
Tube drills 122
Tubular socket wrenches, hexagonal 1530–1531
Tubular socket wrenches 1531
Turning jaws 952
Turning tools, HSSE 803–807
Tweezers 1595
Twist drill grinding gauges 1144
Twist drill sets 81–82, 85, 89, 105
Twist drills with Morse taper 63–64, 108–112
Twist drills, carbide . 16, 40–41, 66–67, 106–107, 112
Twist drills, extra long 63–64, 84–85, 91, 111–112
Twist drills, for electronic drills 66, 100–101
Twist drills, long 63–64, 83–84, 89–91, 95
Twist drills, micro 18, 50–51
Twist drills, multi 66, 100–101
Twist drills, solid carbide 16, 18, 20, 40–41, 50–51, 57–59
Twist drills 14–59, 62–67, 73–112
Twist drills 66, 100–101
Two-speed drills and hammer drills 2267
Two-speed hand drills 2265
Type embossing devices, DYMO 1683–1684
Tyre pressure measuring devices, manual .. 2315
Tyre pressure measuring devices, suitable for calibration 2315

U

Ultrasonic cleaning devices 1372–1373, 1376
Ultrasonic cleaning 1372–1373, 1376
Ultrasonic measuring devices 1297
Ultrasonic wall thickness measuring devices 1296–1297
Undercarriages 1939, 2060–2061, 2065, 2088
Underfloor scales 1318
UNICHECK comparison measuring instrument ... 1108
UNIMASTER measuring instrument 1109
UNIMASTER universal measuring instrument 1109
Universal absorbent mats 1978–1980
Universal absorbers 1984
Universal drills 15, 34–35
Universal files 2167
Universal keys 1532–1533
Upholstery for chairs 1921
USB connection cables 1262

V

Vacuum clamping system 965–968
Vacuum cleaners 2323–2325
Vacuum lifters 2143–2145
V-belt compressors 2303

Vee blocks 1191–1193
Velcro abrasive discs 2226
Velcro-fastening discs..... 2224–2226
Vernier callipers with dial..... 1072
Vernier callipers, depth 1082–1084
Vernier callipers, groove 1080
Vernier callipers, light metal 1079–1080
Vernier callipers, pocket 1073–1077, 1081, 1265
Vernier callipers .. 1071, 1073–1074, 1078–1084
Vertical length measuring units, TESA MICRO-HITE..... 1212–1215
Vertical pull-out cabinets..... 1824–1825
Vertical pull-outs..... 2011
Vertical quick-action clamp..... 984–985
V-heads 1147
Vice base plate..... 1388
Vice jaws 1389
Vice jaws 1389
Vice lifts 1385
Vice..... 995–1003, 1008, 1012, 1021, 1023, 1026–1027, 1035–1040, 1042
Vices, automation 1036–1040, 1042
Vices, engineering..... 1388
Vices, machine 997–1003, 1006–1007, 1012, 1016–1018, 1022–1023, 1035–1036, 1046, 1055
Vices, pipe..... 1389
Vices..... 1384–1387, 1879
Visual abrasive flap discs..... 2196
Voltage detector, metal and 1367
Voltage tester screwdriver 1509
Voltage testers 1351, 1359–1360, 1362
Voltmeters..... 1351, 1359–1360, 1362

W

Wall rails..... 1943–1944
Wall thickness measuring devices, ultrasonic 1296–1297
Wall thickness measuring devices 1296–1297
Wall view panel system 1948, 1951
Wall-mounted shelves, easy-view storage bins .. 1942
Warehouse technology..... 1886–1890, 1903, 1905, 1937–1941, 1947–1950, 1956–1959, 2007–2028, 2046–2058
Washers..... 978
Washers..... 978
Waste containers..... 1971–1975
Watches, stop..... 1345
Watchmaker's magnifying glasses 1233, 1272
Watchmaker's screwdrivers 1516
Water hardness test rods 1379
Water pump pliers 1563–1564, 1566–1569
Welder's hammer 1645
Welding and cutting torches 1645
Welding and holding magnets 1650
Welding cabins 1751
Welding kits, oxyacetylene..... 1645
Welding seam gauges..... 1145–1146
Wet vacuum cleaners 2323
Wet/dry vacuum cleaners..... 2323–2325
Wheeled workbenches .. 1843, 1870, 1881–1882
Whetstone for diamond and boron nitride sanding discs..... 2251
Whiteboard accessories..... 1953
Whiteboard..... 1952–1953
Winwrap stretch film sets 1958, 2057
Winwrap stretch films 1958–1959, 2058
Wire brushes 2204–2207
Wire cable and cable cutters..... 1585
Wire cable cutters 1584
Wire cage trolleys..... 2087
Wire crimpers 1605–1607
Wire cup brushes..... 2204
Wire end brushes 2206–2207
Wire end ferrule assortment 1601
Wire hand brushes 1666
Wire strippers..... 1598–1600
Wire-stripping pliers..... 1595–1596, 1599–1600
Wire-stripping tools..... 1598–1599
Wire-twisting pliers 1566
Wood rasps..... 2167
Wooden chairs..... 1917
Wooden folding rules..... 1233–1234
Work chair upholstery 1921
Work chairs 1917
Work knives 1596, 1631
work platform..... 2105
Work stool 1911–1914
Workbench construction..... 1850–1853
Workbench supports..... 1925
Workbench trolleys 1843
Workbenches, boxes 1837–1838, 1840
Workbenches, height-adjustable..... 1832
Workbenches, wheeled 1846, 1881–1884
Workbenches..... 1826–1828, 1832–1834, 1849–1850, 1852
Workbenches..... 1826–1834, 1836–1847, 1849–1853, 1879–1882, 1894–1905, 1925
Working islands 1907–1909, 1977
Workpiece clamping..... 995–1055, 1062–1065
Workpiece stop 956–957, 1053–1055
Workpiece trolleys..... 2091
Workplace organisation. 1947–1949, 1951–1953, 2052
Workshop brooms 1671
Workshop cranes..... 2136–2138
Workshop files..... 2165
Workshop stools..... 1911–1914
Workshop trolleys..... 1775–1776, 1792–1793, 1858–1875, 1881–1884, 2079
Workshop vernier callipers..... 1078–1081, 1083
Workstation lamps, halogen..... 1675
Workstation lamps 1680
Workstation mats..... 1922–1929, 1931–1932, 2044
Woven sanding belts 2231
Wrenches, adjustable..... 1425
Writing desk top 1819
Writing pad 1947

Z

Zero adjustment device..... 922

PICTOGRAMS FOR MACHINING TOOLS

CUTTING MATERIALS AND COATINGS

HSS — High-performance high-speed steel

HSSE — High-performance high-speed steel with cobalt

HSSE-PM — Powder metallurgical HSSE steel

HSSE Co 8 — High-performance high-speed steel with 8% Co

HM — Cemented carbide

VHM — Solid carbide

VHM-TiAlN — Solid carbide with titanium aluminium nitride coating

Diamond-coated

TYPE, PROFILES, FORMS

Typ N — Normal teeth

Typ H — For hard materials

Typ W — For soft materials

Typ NR — Roughing teeth

Typ NF — Roughing/ finishing teeth

Typ HR — Fine cord teeth

Typ HF — Roughing/finishing teeth for hard materials

Typ WF — Roughing/finishing teeth for soft materials

Typ U4 — Twist drill for universal use

Typ NV — Standard drill with reinforced core

Typ VA — Twist drill for VA machining

Typ TLP — Twist drill with deep-hole profile

Concave

Convex

B — Tooth form B

45° — Edge protection chamfer

SEET 12T3 — Indexable insert type, shape and size

A (6-8) — Chamfer form and length

MILLING APPLICATIONS

Slot drills

Peripheral milling

Radius cutter (outside)

T-slot milling

Slot milling

Angular cutters

Copy milling

Torus milling

Circular milling

90° — 90° corner milling

45° — 45° surface milling

60° — 60° chamfer milling

SHANK TYPE

HA — HA straight shank

HB — HB straight shank

MK — Morse taper straight shank

Clarkson shank

APPLICATION HINTS

Using cutting direction

HPC >>ap>Vc — **High-Performance Cutting** Cutting with high delivery and high feed

HSC <ap>>Vc — **High-Speed Cutting** Cutting with minimal delivery and very high feed

TOLERANCES

H7 — Tolerance field

ISO 2 — Screw taps tolerance field

DIN 13 6g — Dies tolerance class

ANGLE ON TOOL

44°/45°/46° — Twist angle

135° — Angle of the tip

90° — Countersink angle

0° — Reamer angle of twist

THREAD TYPES

M — ISO metric screw thread

MF — Metric ISO fine thread

BSW — British Standard Whitworth thread

G — Pipe thread

Pg — Armoured conduit thread

Tr — Trapezoidal thread

NPT — National Pipe Taper thread

UNF — Unified National Fine thread

THREAD APPLICATIONS

Screw taps for blind hole

Screw taps for through hole

≤3xd — Screw taps for through hole and blind hole with max. thread depth <3xØ

OTHER INFORMATION

Z 4 — Number of teeth cut

IK — Internal cooling

3xD — Bore depth in relation to nominal diameter

MATERIALS

Material group P Steel materials

Material group P/H High-strength steels

Material group M Stainless steel

Material group N NF metals

Material group K Cast materials

Material group S Materials that are difficult to machine

Material group H Hard materials

APPLICATION TABLE

Application	Steel (N/mm²)			Stainless steel		Aluminium		Brass		Bronze		Plastics	Graphite/	GG(G)	Titanium	Nickel	Super	</=

● Main application ○ Secondary application

VERNIER CALLIPERS AND MICROMETERS

PICTOGRAMS FOR USE

For measurements on the outside of round and rectangular parts

For measurements on the inside of round and rectangular parts

For depth measurements

For measuring the depth in narrow recesses

For measurements in T-slots

For measurements of through holes

For measurements of blind holes

For measurements of unequally divided tools

For measurements of internal recessing

For measurements of tooth width

For measurements of the parallelism

Sliding measuring bridge

Measurements of concave/convex profiles

Measurements of concave/concave profiles

For measurements of outside threads

Possibility of establishing any out-of-roundness

PICTOGRAMS FOR THE CHARACTERISTICS

Vernier calliper with Vernier scale

Vernier callipers with round scale

Scale reading 0.01 mm

Scale reading 0.001 mm

Electronic display with numerical step value of 0.01 mm

Electronic display with numerical step value 0.001 mm

Round scale 0.001 mm

Data output RS 232 optocoupled

Data output multiCOM: RS 232, USB or Digimatic

Protection class IP 40

Protection class IP 54

Protection class IP 65

Protection class IP 66

Protection class IP 67

Measuring surfaces Ø 8 mm

Measuring surfaces Ø 6.5 mm

Measuring surfaces Ø 2 mm

Replaceable anvil

Ratchet coupling

Advanced friction coupling

Spindle pitch 0.5 mm

Spindle pitch 1.0 mm

Stainless steel

COMPARISON MEASURING INSTRUMENTS

For measurements of through holes

For measuring the diameter of the core for inside threads

For measurements of blind holes

For measuring the track diameter for internal round threads

For measurements of short break-outs

For measurements of inner splines

For checking the cylindricity

For measurements of internal teeth

For checking the roundness

For measurements of recesses and pedestal bearings

For measuring spherical holes

For measurements of undercuts

SCALES

PICTOGRAMS FOR FUNCTION AND CHARACTERISTICS

Taring Empty container on the weighing plate, press the TARE key, display skips to zero. Can be repeated. Add-on weighing.

Quantities Reference quantities can be selected. Toggles display between unit and weight.

Formulation Separate memory for the weight of the container and the formulation ingredients (net total).

Percentage determination Display of deviation from reference weight (100%) as a percentage instead of in grammes.

DKD Certificate possible

Internal adjustment (CAL) Adjusting the accuracy with internal, motorised adjustment weight.

Adjustment program (CAL) For setting accuracy. External adjustment weight required.

Eligible for EU calibration, class 2 Calibration is required in all business transactions and applies in all EU states.

Eligible for EU calibration, class 3 Calibration is required in all business transactions and applies in all EU states.

Data interface RS 232 C, for connecting to printer or PC.

Battery operation Rechargeable set

Battery operation

Mains adapter 230V switch

PRICES

This catalogue does not include any prices.
For prices, please visit our online shop or contact your local Sales Organisation.

STOCK AVAILABILITY

● = IN STOCK AT HEADQUARTERS

Articles marked with ● are **stock items**, which are always on stock at our headquarters in Germany.
For country-specific delivery times please contact your local Sales Organisation.

○ = NOT IN STOCK ITEM

Articles marked with ○ are **non-stock items**. Delivery times on request.
Please ask your local Sales Organisation.

RANGE OF PRODUCTS

This catalogue only represents a selection of our complete range of products. More products or product variants can be found in our online shop. In addition, individual solutions are available on request.

VISIT OUR ONLINE SHOP

WWW.HAHN-KOLB.COM

MORE THAN 200,000 ARTICLES ONLINE AVAILABLE

The HAHN+KOLB Online Shop: Easily accessible at any time.

You will find even more products in our online shop. More than 200,000 products await you. Use the various filter options to find the products you want quickly and easily at any time. Our home-page provides information on our regularly changing special offers as well as events and new products in our range.

To make your shopping experience even better, our online shop features highlights that you will love:

- Individual prices and company conditions
- Display your own material numbers
- Intelligent user management system including budget management, approval workflows, etc.
- Order overview
- Additional information such as CAD and cutting data
- Availability display, delivery tracking and the option to request a delivery date
- Dispatch of in stock items within 12 hours
- Paperless ordering

LET'S WORK TOGETHER.
